

Coal is one of the most dangerous and dirty energy sources today, not just because it pollutes people's communities or because it is the leading contributor to global warming, but because coal is holding us back from bringing about a clean, secure energy future.

Our university needs to take the lead and act now to move beyond coal to 100%clean energy solutions.

I want our school to be a leader and move beyond coal now!

Name: _____

Phone: _____

E-mail: _____

Major: _____ Grad Year: _____

Dorm/Address: _____

____ I want to volunteer!

I'm interested in:

____ Media

____ Outreach

____ Talking to my professors

____ Planning Events

____ Other? _____
