

My sons and I are often apart these days, but together we are taking on global warming.

Film star David Strathairn with sons Tay and Ebbe

Scientists say that we can curb the most dangerous effects of global warming if we cut our carbon emissions by 80% by the year 2050. That's an achievable 2% reduction a year — the 2% Solution!

Relying on solar energy can lighten our carbon footprint. Placing solar panels on your roof will cut your energy costs and help protect the planet. It's the least one generation can do for the next.
