Daly City, CA 94015

RE: Proposed Sites for RHNA Requirements

Dear members of the City Council,

We send a sincere thank you to staff for providing the proposed sites to meet the 2023 – 2030 RHNA requirements for Daly City as required for the Housing Element at the City Council meeting on Feb 14, 2022.

The Draft Site List (attached) included in Michael Van Lonkhuysen’s presentation provides the unit potential and density per acre for each of the identified site addresses. Serramonte del Rey at 64 units per acre is far below the median, at 195 units per acre, and the high at 477 at units per acre. If the density at Serramonte Del Rey was doubled then the footprint would be reduced by half and the project would still achieve the same unit potential. This would allow for nine acres of green space. The garden and trees could be preserved as a county park for Daly City. The park could be co-managed by the Association of Ramaytush Ohlone as recommended by the California Natural Resources Agency.

We urge the City to use its authority over public health, safety and welfare to fill essential needs in Daly City for more public park lands. This can be realized by requiring the doubling of density at the current unit potential. This minor change to the Serramonte Del Rey plan will mitigate air quality, traffic, and decreased open space problems that will result from current design.

Serramonte Del Rey is a 90% market rate housing project. Please include at least 59% affordable housing including very low-income and low-income and moderate housing as allocated by RHNA (see attachment). For a nearby example, the Balboa Reservoir project by City College in San Francisco is a similarly scaled development (17 acres) with 1100 units that includes 50% affordable housing with 25% green space, a community garden and multiple parks including a 2-acre central park. 100 units will be for teachers. Of the 450 permanently affordable housing at least 18 percent of the affordable housing on site will be for low-income individuals who earn up to 55 percent of the Area Median Income, according to the RFQ. Another 15 percent of the units are for moderate-income individuals who earn up to 120 percent of AMI, and only the last 17 percent for “middle” income households that earn up to 150 percent of AMI. In addition, the

Balboa site will provide care for 100 children on site, 50% of whom will be from affordable units.

Thank you for increasing density as part of your effort to meet your RHNA allocation thereby reducing the footprint and for considering additional affordable housing.

Sincerely,

A handwritten signature in black ink, appearing to read "Gladwyn d'Souza". The signature is fluid and cursive, with a large initial 'G'.
