## DECLARATION OF DR. DOLORES LEONARD

I, Dolores Leonard, hereby declare as follows:

1. I am over 18 years of age, of sound mind, and otherwise competent to make this Declaration. The statements below are based on my personal knowledge.
2. I am a member of Sierra Club and have been a member since 2005.
3. After joining Sierra Club, I volunteered for the Detroit office's Committee on Environmental Justice, where I conducted research, edited a quarterly newsletter, and helped review permits and draft comments, among other things. As a result of this and other work, I am familiar with health, environmental, and equity issues in Detroit and the nation.
4. I live in Detroit in zip code 48217 in Wayne County, Michigan. I have lived at my current residence since 1957.
5. My house is surrounded by industrial facilities that emit high amounts of pollution. Wayne County is home to oil refineries, steel mills, and other industrial facilities. I live one mile from the Marathon Detroit oil refinery.
6. I closely follow air pollution permits in my area, as well as air pollution monitoring issues, so I am aware that many of the facilities in or near my neighborhood emit nitrogen oxide (NO<sub>x</sub>) and volatile organic compounds

(VOCs), both of which contribute to ozone pollution. I am also aware that cars and trucks contribute to ozone pollution.

7. Some of the facilities near my home that have permits allowing them to emit more than 100 tons of NO<sub>x</sub> and/or more than 100 tons VOCs per year include the AK Steel (now Cleveland Cliffs Steel) mill, Ford Motor Company's Rouge auto-manufacturing complex, the Marathon Petroleum refinery, and Dearborn Industrial Generation, a gas-fired power plant.

8. Many of the industrial facilities in my neighborhood are located across the street from people's homes and are also close to public schools.

9. There are other industrial sources of VOCs in my zipcode, like oil and gas storage and loading facilities, asphalt mixing plants, and auto coating shops. The attached excerpt from the Michigan Department of Environment, Great Lakes, and Energy (EGLE)'s lists dozens of pollution sources with active air permits in my zipcode and neighboring areas like 48120, 48209, and 48218.

10. I also live close to major highways, including about a half-mile from the I-75, a major north-to-south interstate highway.

11. I understand that high ozone levels can make breathing more difficult and cause asthma and other respiratory issues, as well as contributing to what is

commonly known as smog. As a senior citizen, I am particularly vulnerable to air pollution.

12. I have asthma, for which I regularly use an inhaler and take medication when my symptoms worsen.

13. I regularly check the news for ozone levels, and refrain from spending time outdoors when air quality is bad because I know that ozone pollution can worsen my respiratory problems and cause other harm to my health. When the air quality is poor, I rarely open the windows of my house. I have to use a central air system, which I do not like, to help with air circulation and to manage my respiratory problems.

14. I have flower and vegetable gardens, but because of my concerns about the impact of air pollution on my health, I do not tend to them as much as I would like. When the air quality is poor, I am also less likely to spend time at outdoor events I might enjoy with my friends and family.

15. I support Sierra Club's lawsuit to require EPA to take all legally required steps to ensure that ozone pollution does not exceed federal air quality standards in my area. I understand that success in this lawsuit would trigger additional requirements for state regulators to consider pollution reductions from Wayne

County and surrounding counties. I would support this because such reductions would result in cleaner, healthier, and clearer air for myself and my community.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on this 27 day of December, 2023.

  
DOLORES LEONARD

## DECLARATION OF ROBERT SHOBE

I, Robert Shobe, hereby declare as follows:

1. I am over 18 years of age, of sound mind, and otherwise competent to make this Declaration. The statements below are based on my personal knowledge.
2. I am a member of the Sierra Club.
3. I live in Detroit on Beniteau Street in zip code 48214 in Wayne County, Michigan. I have lived in this home since 1998.
4. My home is approximately 3.5 miles from the East 7 Mile air monitor located at 11600 East Seven Mile Road in Detroit, Michigan.
5. As a child, I grew up in the same neighborhood where I currently reside. I lived with my mother in a house at 3881 Gladwin Avenue from age one to sixteen. I attended Mack Primary School, St. Clair Annex, Region 7 Middle School, and Denby High School as a child. I often played baseball and basketball at the Brewer Recreation Center. Gladwin Avenue and the homes on it, including my childhood home, no longer exist after being incorporated into what is now a parking lot for Chrysler Corporation, which has since become Stellantis.
6. My current home is adjacent to two large automotive assembly plants owned and operated by Stellantis: the Mack Avenue Assembly Plant and the Jefferson North Assembly Plant (collectively, "Plants").

7. I have been diagnosed with chronic obstructive pulmonary disease, for which I am prescribed an albuterol inhaler to help manage the condition. I was diagnosed with leukemia in December of 2015.

8. I am aware that the automotive painting operations are a leading source of volatile organic compound (VOC) emissions at automotive manufacturing facilities and that these facilities are some of the largest sources of VOC pollution in Michigan, which contributes to ozone pollution. I am also aware that cars and trucks contribute to ozone pollution.

9. Before the construction and operation of the Mack Avenue Assembly Plant, my property was roughly 1,000 feet from an automotive stamping plant, which emitted minimal amounts of VOCs. My home was separated from the stamping plant by a large earthen berm with trees and St. Jean Street.

10. Today, my property is about 300 feet from the automotive paint operation that is a part of the Mack Avenue Assembly Plant and which is the main source of VOC emissions at the plant. The earthen berm, trees, and St. Jean Street were removed and turned into a parking lot for the Mack Avenue Assembly Plant.

11. While I had air quality concerns before the plant was expanded, when the Mack Avenue Assembly Plant went into operation I became significantly more aware and concerned about how air quality affects my health. Since the Mack Avenue Assembly Plant began operation, I frequently notice the smell of paint from my home, like it was freshly sprayed from an aerosol can. It is often particularly strong early in the morning.

12. Since the Mack Avenue Assembly Plant began operations, while at or near my home I often cough and develop increased tightness in my chest. I get frequent headaches and my

eyes often begin to burn. I am more easily fatigued and have developed frequent bouts of nausea. My symptoms often clear up within an hour of leaving my neighborhood.

13. While emissions from the Plants are the most noticeable to me and impact my daily life, I understand that other facilities in Wayne county and across the Southeast Michigan region as well as mobile sources of pollution, such as cars and trucks, also impact the overall level of ozone pollution in and around my community and impact my health and well-being.

14. I closely follow air quality in my community, and am more likely to stay indoors when there is an ozone action day out of concern for my health.

15. Bad air quality in my area severely impacts my day-to-day life. I refrain from laying in my hammock and tending to my lawn, out of concern for air pollution's impact on my health. I also walk and jog less than I would if the air quality were better. I have stopped inviting people to my house because I do not feel comfortable asking them to come to a place with poor air quality. I almost never open the windows to my home, despite having no air conditioning. I rely on an air purifier to help clean the air in my house.

16. I am aware that high levels of ozone can cause and exacerbate numerous respiratory conditions, including asthma, and can make breathing more difficult. My respiratory illness makes me especially vulnerable to high levels of ozone.

17. I support Sierra Club's lawsuit to require EPA to take all legally required steps to ensure ozone pollution does not exceed safe levels in my area. I understand that success in this lawsuit would trigger additional requirements for state regulators to lower ozone pollution in my area. I would support this because such reductions would result in cleaner and healthier air for myself and my community.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on this 5 day of January, 2024.

A handwritten signature in cursive script, appearing to read "Robert Shobe", is written over a horizontal line.

ROBERT SHOBE

## DECLARATION OF MARTIN HABALEWSKY

I, Martin Habalewsky, hereby declare as follows:

1. I am over 18 years of age, of sound mind, and otherwise competent to make this Declaration. The statements below are based on my personal knowledge.
2. I am a member of Sierra Club and have been a member since 2003. I am a member because I enjoy the outings Sierra Club organizes and because Sierra Club works to protect things I care about, like clean air and water and a healthy environment.
3. I am 70 years old and retired.
4. My wife and I live in Port Huron in St. Clair County. I have lived in Port Huron for 12 years. Before that, I lived in or very near Detroit proper, where I grew up.
5. I live about 8 miles from the air monitoring station in Port Huron, located at 2625 Dove Road.
6. I enjoy spending time outdoors in my community and in, and around, Detroit, too. It's my way of keeping fit. I walk, bike, golf, and hike often, mostly in the community near my home, but also throughout the broader Detroit metropolitan area. For example, as part of participating in a weekly summer and fall fitness program called Walk Michigan, I walk every Tuesday during the program dates at various locations, like the St. Clair Riverfront in Port Huron. I ride my bike near my home, and sometimes also to the south, in Macomb County. I golf regularly, about twice a week, except in winter, including at the Rackham Golf Course, near Detroit.
7. I very much enjoy hiking. I live about 3/4 of a mile from a large, forested City of Port Huron park with trails. It is my ideal place to hike. I also hike in county parks in the area. I enjoy looking at the trees and the scenery. I like to explore nature. My wife is a master

gardener and knows the plants and trees, and I like learning about them from her. Being in nature makes me feel at peace—it's a mystical kind of thing. The serenity of nature makes me relaxed.

8. Because of my involvement with Sierra Club, I am aware of the harmful effects of ozone air pollution. I am aware that the United States Environmental Protection Agency (EPA) had designated all of St. Clair County, as well as Wayne County, which includes Detroit, Macomb County, and several other nearby counties, as failing to meet federal health standards for ozone, and that EPA has now removed that designation.

9. There are a number of industrial sources of air pollution in St. Clair County, including coal- and gas-fired power plants, and several large industrial companies, such as Mueller Brass Company and ALD Thermal Treating Inc., both in Port Huron. In addition, electricity is generated from methane gas at the St. Clair County Landfill in nearby Kimball Township. This work is done by Blue Water Renewables, a division of DTE Energy, a major electric and gas utility.

10. I am aware that both volatile organic compounds (“VOCs”) and nitrogen oxides (“NOx”) contribute to ozone. I understand that the Michigan Department of Environment, Great Lakes, and Energy (“EGLE”) issued new rules to limit VOCs from certain existing sources of that pollution in Michigan’s ozone nonattainment areas, but that since EPA removed the nonattainment designation from the Southeast Michigan area, EGLE has suspended its enforcement of those rules in my county and the other counties that had made up the nonattainment area. (See Exhibit 1.) My understanding is that this means that sources of VOC pollution in these counties that otherwise would have had to comply with those rules and limit their emissions will no longer have to do that.

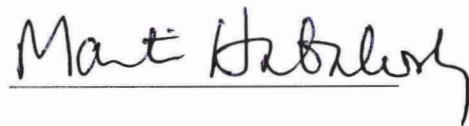

11. I am concerned about air quality in the Detroit area, including St. Clair County, because I spend a significant amount of time outdoors there. As a senior citizen, I am particularly vulnerable to air pollution. When the air quality is poor, I become concerned about the impacts it may have on my health during my outdoor activities. When I know it is a high-ozone day, that discourages me from exercising and otherwise enjoying the outdoors.

12. I am also concerned about the effects of air pollution on the natural world that I enjoy. I have seen many trees in my neighborhood have to come down and I am concerned that air pollution contributes to their harm.

13. I support Sierra Club's efforts to compel the EPA to take action that would help address the ozone air pollution problems in my community. I want to breathe as little pollution as possible. I believe that stronger action on ozone pollution would help lessen harms to my health when I recreate outdoors, and harms to the forests and natural world that is so important to me.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on this 4th day of January, 2024.

MARTIN HABALEWSKY

GRETCHEN WHITMER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF  
ENVIRONMENT, GREAT LAKES, AND ENERGY  
LANSING

Exhibit 1

AARON B. KEATLEY  
ACTING DIRECTOR

**Variance**  
**Suspension of Enforcement of Part 6 Reasonably Available Control Technology Rules**  
**For**  
**the Southeast Michigan 2015 Ozone Maintenance Area**

**1. Variance Statement**

In accordance with the provisions of Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA), a variance is granted suspending specific requirements of various Part 6 rules only as described in subparagraphs I. and II. below. This variance is granted for a period of one year from the effective date of this document.

- I. For only Michigan Air Pollution Control Rules (MAPCR) R 336.1602(4); R 336.1606 – R 336.1608; R 336.1610a; R 336.1620a; R 336.1621a; R 336.1624a; and R 336.1633 – R 336.1644 the term “2015 ozone nonattainment area” as referenced in the rules and defined in R 336.1601(a), shall not include the following counties: Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw, and Wayne.
- II. For MAPCR R 336.1632 the exception within Rule 632(9)(a) does not apply to the following counties: Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw, and Wayne Counties; instead, the exception in Rule 632(9)(b) and 632(9)(j) applies to those counties.

The purpose of this variance is to suspend the Reasonably Available Control Technology (RACT) requirements of the newly promulgated MAPCR Part 6 rules for the counties in the southeast Michigan 2015 ozone maintenance area (SEMI NAA), also known as the Detroit maintenance area. On May 19, 2023, the United States Environmental Protection Agency (USEPA) redesignated the seven-county southeast Michigan area from nonattainment to attainment / maintenance based on Michigan’s January 3, 2022, redesignation request, effectively nullifying the requirement for the RACT rules for the area. Enforcing these RACT rules in an area that had attained the ozone National Ambient Air Quality Standard in a timely fashion would be an unreasonable hardship upon the impacted persons.

**2. Regulatory Background**

Part 55 of the NREPA, along with rules promulgated pursuant to the NREPA, regulates emissions of air pollutants to the ambient air.

Section 5535 (MCL 324.5535 *Suspension of enforcement; reasons; variance*) of the NREPA allows the department to suspend enforcement of the whole or part of any rule that would be an unreasonable hardship upon the person, provided it is granted by variance, and it does not violate the federal Clean Air Act (CAA).

Section 5536 (MCL 324.5536 *Variance; considerations effecting*) specifies considerations the department shall give due recognition to in granting any variance, and conditions and

requirements that shall apply. It also specifies when variances may *not* be granted, and those circumstances do not apply here.

Section 5538 (MCL 324.5538 *Variance; period granted; report; conditions*) specifies that any variance granted pursuant to Section 5535 shall be for a period of time specified by the department at the time of granting but not to exceed one year. However, any variance may be continued from year to year.

### 3. Justification for the Department's Position

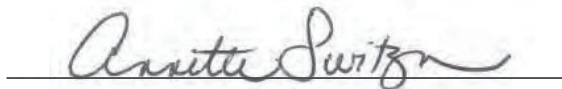

The department submitted the redesignation request for the seven-county SEMI NAA on January 3, 2022. The USEPA redesignated the area to attainment with a maintenance classification on May 19, 2023, based on the submitted redesignation request. The department is suspending the requirements of the newly revised RACT requirements of the MAPCR Part 6 rules for the seven counties in southeast Michigan because the area has been redesignated such that the implementation of the RACT rules for the area are not required at this time. Requiring existing sources in an attainment area to comply with these more stringent requirements would create an unreasonable hardship.

This variance will not cause violations of the CAA. While all of the sources that qualify for this variance are also regulated under the CAA, this variance does not exempt these sources from complying with all other aspects of the NREPA, the CAA, and those rules promulgated thereunder.

### Final Approval

The Director of the Air Quality Division, having had opportunity to review the variance and having been delegated authority to grant variances by the Director of the Michigan Department of Environment, Great Lakes, and Energy pursuant to the provisions of Part 55 of the NREPA and otherwise being fully advised on the premises,

Hereby grants the variance, which shall be entered in the record of the department.

Annette Switzer, Director  
Air Quality Division  
Michigan Department of Environment, Great Lakes, and Energy

Effective Date: May 19, 2023

## DECLARATION OF ANDREW SARPOLIS

I, Andrew Sarpolis, hereby declare and state as follows:

1. I am the Field Manager for Sierra Club's activities in Michigan. Sierra Club is a non-profit organization under the laws of the State of California. I am responsible for overseeing Sierra Club's on-the-ground efforts to meet objectives defined by its national campaigns and state Chapter. I live in Royal Oak, Michigan. The following information is within my personal knowledge.

2. The Sierra Club's purposes are to explore, enjoy, and protect the wild places of the Earth; to practice and promote the responsible use of the Earth's ecosystems and resources; to educate and enlist humanity in the protection and restoration of the quality of the natural and human environment; and to use all lawful means to carry out these objectives. Sierra Club members are greatly concerned about air quality, and the Club has a long history of involvement in air quality-related advocacy on both the local and national levels.

3. I began working at the Sierra Club on September 30, 2013, and have worked continuously at Sierra Club since July 21, 2014. In my current capacity, I am responsible for coordinating activities to advance Sierra Club objectives including managing field activities in Michigan to conduct community outreach, public education, and supporting litigation. In order to perform the responsibilities of these roles, I have interacted on a daily basis with the Sierra Club's members in Michigan, as well as other state and national staff. Because of my position and responsibilities, and through my regular interaction with members, I am familiar with the Sierra Club's purpose, organization, and activities, and with the environmental interests and concerns of Sierra Club members. Both the Chapter and national campaigns I am involved in, including the Beyond Coal campaign, work to protect and improve air quality.

4. Prior to my role as Field Manager, I was a Senior Organizing Representative for the Club's Beyond Coal Campaign. This often involved educating Sierra Club members as to air quality issues and providing opportunities for them to advocate for regulations that would result in cleaner air.

5. Sierra Club has expended its resources addressing air pollution issues, including issues relating to ozone and the enforcement of the 2015 ozone National Ambient Air Quality Standard. For example, Sierra Club has sought to inform the public about the health impacts of ozone pollution. We regularly advocate for strong implementation of the National Ambient Air Quality Standards. We also use information that is produced through monitoring and reporting of air pollution to inform ourselves and our members about pollution.

6. I am familiar with the nature and scope of Sierra Club's membership programs, its membership records, and the manner in which information on members can be retrieved. Sierra Club regularly maintains membership records that include the address of each member. These records are regularly updated to add new members, reflect address changes, and remove the names of persons who are no longer members. .

7. Based on membership records as of October 2023, Sierra Club has nearly 700,000 members nationwide. Members reside in each of the 50 states of the United States, as well as the District of Columbia and Puerto Rico, and several U.S. territories. Nearly 20,000 Sierra Club members reside in Michigan. The following number of Sierra Club members reside in the following Michigan counties: Wayne (1,652); Washtenaw (1,693); St. Clair (191); Oakland (2,405), Monroe (169); Macomb (777), Livingston (431). The total number of members living in these seven counties is 7,308.

I declare, pursuant to 28 U.S.C. § 1746, under penalty of perjury that the foregoing is true and correct.

Executed on December 07, 2023.

A handwritten signature in cursive script that reads "Andrew M. Sarpolis". The signature is written in black ink and is positioned above a horizontal line.
