## A GSA Eligibility Determination

1. Provide a description of your local agency's water supply, water management, or land use responsibilities within the groundwater basin / basins intend to manage.

The City of Stockton's water utility provides drinking water service to more than 55% of the Stockton Metropolitan area. The state of the art De Water Supply Treatment Plant began operation in May 2012, providing up to 30 million gallons per day of treated surface water from the Sacramento/San Joaquin Delta and Mokelumne Rivers. The water utility maintains a water transmission and distribution system, which include 7 reservoirs, 590 miles of pipeline, 48,000 meters and 7,000 fire hydrants. A recently completed Proposition 218 study, completed in June 201 established water rates that well-position the utility for the next five years.

2. Are you an "exclusive local agency" listed in Water Code §10723(c)?

No
