3. Select or add the point of contact for your GSP area or Plan Manager if identified.

Not Yet Determined

4. Please provide general information about the Agency's process for developing the GSP, including the manner in which interested parties may contact the Agency and participate in the development and implementation of the GSP as required by Water Codes [§10723.4](#) and [§10727.8](#). (Fill in the text box AND/OR attach a file).

The Eastern San Joaquin Groundwater Authority (GWA) was established with a Joint Exercise of Powers Agreement on 4/11/2017 with members consisting of the 17 GSAs in the subbasin. The agreement specifies that the 17 GSAs will coordinate via the GWA to develop and implement a GSP. The GWA has not formally identified a Plan Member to represent the GSAs as a single point of contact for the subbasin. Each GSA has one board member at the board's regular meeting on the second Wednesday of each month. Board meetings are open to all interested parties and generally are held at 9:30 a.m. at the Robert J. Cabral Agricultural Center Assembly Room#1 (2101 E. Earhart Avenue, Stockton). In addition to board meetings, more public outreach efforts are planned during the GSP development process. The GWA established a website (<http://www.esjgroundwater.org/>) where announcements and board meeting agendas are posted. GWA contact information is also posted for further questions on public participation and involvement. The GWA is committed to developing its GSP in an open and transparent process that relies upon stakeholder engagement and participation to ensure a widely accepted groundwater management plan to achieve sustainability in the subbasin.
