Property taxes on the pipeline								
Property taxes on the pipeline will be assessed by October 31, 2018. The apportionment by county will be determined at that time.								
Assessment is performed by a state assessor, employed by Iowa Department of Revenue.								
The counties will collect their portion of the property taxes on the pipeline, just like they do for houses, businesses, farmland.								
The counties will also send out notices to Dakota Access of the property taxes owed, just like they do for other properties.								
The fact that there is a pipeline on the property that is being assessed for property taxes does not change the assessment on the farmland above the pipeline, nor the tax rates that are applied on the farmland.
