**Support for accessible public transportation**

As a resident of Santa Clara without a car, originally from Los Angeles, I feel that safe and convenient public transportation should be available for everyone. As Santa Clara County grows, it's important to make it safe and convenient for residents to use alternative modes of transportation to reduce emissions and improve quality of life. Bus Rapid Transit along El Camino in Santa Clara County makes this possible by creating transportation by improving the experience for those traveling north to south from San Jose to Palo Alto. I fully support creating a designated lane for Bus Rapid Transit and improving bicycle and pedestrian infrastructure, making public transportation more accessible, faster, and better used. I support BRT for Santa Clara County!

Vanessa Quevedo
