

Clean Transportation for All team: Be a part of a team of community members working to move New York State toward clean transportation!

Transportation issues are big in the Lower Hudson Group, encompassing Rockland, Putnam and Westchester Counties. As one of the most densely populated areas in the nation, we desperately need clean transportation alternatives.

As a team member, you will:

- Support the Group's efforts and activism on a clean transportation future, in coordination with the state Chapter and national initiatives
- Participate in team projects & actions & share out opportunities within your networks
- Work collectively to advance team goals of moving our state toward equitable and clean transportation.

This is a great opportunity for individuals interested in the following: Urban planning and development; equity, justice and inclusion, regional public transportation; biking, scooting and walking; highway and street development, specific projects like EV chargers, municipal fleets, electric school buses. Time: 5-10 hours/month. Interested? Contact Jessica Enzmann, Organizer with Sierra Club's Clean Transportation for All campaign, at jessica.enzmann@sierraclub.org .
