

Political Action team: 2022 will be a busy year, with races for governor and NYS legislators, so get involved to help us elect leaders who will address climate change, safeguard water resources, and protect the wild space that make New York such a special place to live. Every election is important! People like you are the heart of our political program and it's going to take all of us to protect our environment from those who would destroy it for their own gain. Will you commit to joining our Political Action team in 2022?

The Political Action team evaluates candidates for office, helping decide who should be endorsed by the Sierra Club based on their record and interview evaluations. We recommend candidates for political office in Westchester, Putnam and Rockland Counties. Learn where our elected officials and candidates for office stand on environmental issues by examining their voting records and interviewing them. Your help gives us the ability to endorse more candidates. Time: 5-10 hours/month in season and as needed. Contact Ed Berry at berryed3@gmail.com.
