A Springtime Epiphany: The Biodiverse Glories of Southwestern Australia

Wednesday, August 18 at 7 p.m. on ZOOM

Join Alex Mintzer (Prof. Emeritus of Biology, Cypress College) for a tour of southwestern Australia that highlights landscapes, wildlife, wildflowers, and particularly the diversity of wild orchids that he and Carole saw over a few amazing days in September 2019! Dr. Mintzer will incorporate major concepts from evolutionary biology and ecology in his presentation.

This talk is highly recommended for naturalists, biodiversity mavens, wildflower enthusiasts, students of evolution, and orchid lovers.... Best of all, there will be no quiz after the show!
