

SPS Peak Climbs

A 10-Year History of Scheduled SPS trips from 1996 - 2006

The following tabulation was compiled by Reiner Stenzel, Outings Chair, in March 2006. The data was extracted from the SPS Echo and Sierr Club Schedule. this material is provided as general information for trip planning and a history base for SPS List additions and deletions. The peaks listed include those from the SPS List and other Sierra Peaks. The number in parenthesis is the number of times a peak has been scheduled for a climb. This does not imply that the peak was actually summited. Not all trips went forward, and a few trips may have happened which were not listed in the standard publications. The list does not include the many peaks which SPS members climbed privately or with other groups. Nevertheless, it gives a reasonable overview of the SPS climbing activities. The dates of the trips and leaders are available from the Outings Chair in Excel file format.
