

No Legislative Update, but Please Act on Climate and Energy

# **CUT CLIMATE POLLUTION FROM DIRTY POWER PLANTS**

**For our health, our communities  
and our planet!**

## **SIGN THE PETITION!**

June 30, 2023

Hi all!

I hope this last day in June finds you well. There is really nothing new on the Arizona Legislature. The Senate decided not to move any more executive nominations and we still expect legislators back at the end of July.

If you have not done so already, please take action on the power plant rule to reduce carbon emissions. The Environmental Protection Agency has proposed a carbon rule for coal and gas power plants that provides an important opportunity to move us closer to our carbon emissions reduction goals to help stabilize the climate. **Use the button below to take action on the carbon rule today. Tell EPA to adopt the strongest possible rule.**

---

Act On Climate!

---

See below for information on how to act on the APS rate case.

**For more information, reach out to Sandy Bahr at [sandy.bahr@sierraclub.org](mailto:sandy.bahr@sierraclub.org).**

Thank you for all of your support!

All the best,

Sandy Bahr

**Tell The ACC No Rate Increase for Dirty Coal and Gas!**

**ARIZONA PUBLIC SERVICE WANTS TO RAISE  
THE COST OF YOUR UTILITY BILL**

**TELL THE ACC NO RATE INCREASE  
FOR DIRTY COAL AND GAS!**

**SIGN THE PETITION TODAY**

**[bit.ly/RateCaseAPS](https://bit.ly/RateCaseAPS)**

Arizona Public Service (APS) filed for a 13.6% rate increase to help pay for old coal and new gas plants -- far too much fossil fuels. To get a rate increase, the utility must get approval from the Arizona Corporation Commission (ACC), which is Arizona's public utilities commission. Tell the ACC that ratepayers should not have to pay for APS's irresponsible, unjustified spending to keep the costly, dirty Four Corners Power Plant running until 2031. It's time to replace it with lower-cost renewable energy, which would save ratepayers money and reduce pollution.

One thing that APS is proposing is worth supporting, however. The ACC should approve funding for Coal Community Transition (CCT) for communities impacted by coal plant retirements. APS's \$106.5 million CCT funding proposal is an important first step and should be approved by the Commission.

Interested in commenting at one of the upcoming public comment sessions? Sign up for our public comment training on July 11th. We are seeking to get a good turnout for the August 10th public comment session, but there are several others. You can find details and sign up for the public comment training [here](#).

We're also trying to get at least 500 written comments submitted. To help with that, [please sign our petition](#).

Thank you!
