*Via U.S. Mail and Email*

President Marybel Batjer  
Commissioner Liane Randolph  
Commissioner Martha Guzman Aceves  
Commissioner Clifford Rechtschaffen  
Commissioner Genevieve Shiroma  
California Public Utilities Commission  
505 Van Ness Avenue  
San Francisco, CA 94102

**RE: Utilities must invest in clean, renewable energy now and stop clinging to ancient or new gas plants (R.16-02-007)**

Dear President Batjer and Commissioners:

In the Integrated Resources Planning decision before the Commission, California faces a crossroads: cling to the past, or move into the clean energy future. There is only one answer: move forward with new, clean energy.

Extending the retirement dates for aging, once-through-cooling (OTC) gas plants is the wrong approach and would set nearby communities back decades. As the retirement dates approach, communities have been making and implementing plans to move forward with a future without these gas plants in their backyard. These communities have worked too hard and too long to tolerate the idea that the retirement dates for these plants could be extended. New gas plants are similarly unacceptable and run contrary to SB 100 and the state's greenhouse gas goals. We need to phase out fossil fuels—not increase our reliance on them. There are clearly better alternatives.

The better, necessary choice to match this opportunity is to invest in new, clean resources like renewables, storage, and demand response. California's utilities, community choice aggregators (CCAs), and direct access providers have been planning to deploy these clean resources, but the need has simply arrived sooner than expected.

We urge the Commission to direct the necessary procurement in preferred resources, and we urge utilities, CCAs, and direct access providers to meet that challenge bravely. Issue a directive to them that the time has come to implement their plans to invest in clean energy. The climate and our communities cannot wait.

Respectfully,

The undersigned members of the Sierra Club and the  
California Environmental Justice Alliance

Cc (via electronic mail): All Parties to R.16-02-007

Buellton, CA

*I'll leave the wonky stuff to others.*

*Consumption of time is inexorable and according to the vast majority of scientists, not paid by partisans, the earth's life support systems are on borrowed time now.*

*Any non renewable energy system just increases the debt. We don't have the luxury of a gradual, comfortable, transition to clean, renewable sources. We are down to the hours before we slip into positive feedback loops of climate destruction from which reversal is nye impossible. Will you tell your kids and grand-kids that waiting was the prudent thing to do? If we afford the conversion to renewables and we're wrong about fossil fuels, then we will have wasted some money. And we can go back to coal fired plants. However, if the scientists are right, we will have made the smartest investment ever and avoided the earth's apocalypse. Gee, I think I'll bet on the scientists.*

*Oil and gas industries are ruining the health  
of our citizens. Just today, there was an  
accident at the NuStar refinery in Crockett in  
the Bay area. The TV emergency message*

*said to stay inside, even close your fireplace vents! Refineries are ruining the health of our citizens. Less wealthy individuals are the ones who live near refineries, so there is also the social justice issue. We need to aggressively close gas and oil and focus our energy and money in clean energy. Let's not be scared to be bold and follow the path of clean energy. Clean energy will provide many new jobs. I can hardly wait until there are buildings that are built for clean energy, but also build using materials made in a clean energy way. Please lead the way! The four California gas plants are already scheduled for closure. This is a crucial decision. Be bold. Help us promote healthy environments. Our citizens deserve that.*

Davis, CA  
*As someone who has read a lot of the climate change research, and as an ecologist, I know how critical the switch to clean energy is. We must stop the increase in CO2 to reduce climatic changes as much*

*as possible. Increases in ocean temperature have mediated the increases in atmospheric temperature, but we are seeing the increasing effects of all rising temperatures. All species have finite climatic niches in which they will thrive. We are already seeing the results of exceeding some of these niches in agriculture. We also see the initial effects of increasing atmospheric temperatures on weather patterns and wildfire dynamics. We must invest in clean energy and all other measures possible to limit these climatic changes.*

Huntington Beach, CA

**1509. Hildy Meyers**

Huntington Beach, CA

*Climate change is a crisis that is threatening all of us. We must do everything possible to*

*stop using fossil fuels. I live near the California coast and fear sea level rise, among other things. It is imperative that we invest in clean energy now!*

**1510. Stephanie Zuniga**

Huntington Park, CA

**1511. Richard Klein**

Hyampom, CA

*People do not understand the dynamics of exponential change. NOTHING is more important to the future habitability of this planet than eliminating COMPLETELY all fossil fuel use ASAP. The technology is here now. It only needs the wisdom of leadership to tighten the belt so that there are still any pants in just 20-40 years. I have personally had to watch this bullshit go on for over 40 years and IT HAS TO STOP! SHUT THEM DOWN! Convert all power generation to hydro, wind, solar, wave and whatever else science can*

*come up with that does not increase CO2 in the atmosphere or oceans. It is entirely possible to do this but it will take a massive transformation which simply must begin immediately to avoid unimaginable catastrophe in mere decades now. This should have been obvious by 1970 but politics and human nature being what they are, too much time has been wasted for a gradual transition, now it must be profound, drastic and sudden.*

**DO IT NOW! SWITCH TO RENEWABLE ENERGY OR PERISH!**

**1512. Richard Cardella**

Hydesville, CA

**1513. Sylvia Cardella**

Hydesville, CA

**1514. Arthur Connor**

Idyllwild, CA

**1515. Marcia Krull**

under attack. It means more CO2 and less  
O2 for the earth. Looking at our ocean and  
our coastal redwood forest dying, I do not  
think we have that much time left. If CA  
does not lead who else will? It is time to  
move renewable energy and put resources  
into energy storage.*

**1782. Cherie Patenaude**  
Livermore, CA  
*We need clean air.*

**1783. Debora Sayre**  
Livermore, CA  
*It is healthier for the earth, water and  
humans to move off fossil fuels and natural  
gas.*

**1784. Carl Sorem**  
Livermore, CA

**1785. Phyllis Lager**  
Livermore, CA

**1786. Dennis Mulligan**  
Livermore, CA  
*We need to spend our money on renewables  
and get away from fossil fuels. I remember  
the air in the Bay Area when I was growing  
up and it wasn't good. 60's and 70's. There  
is no more to say!*

**1787. Kaitara Cullum**  
Livermore, CA  
*We only have one planet, and it doesn't  
need us the way we need it. If we continue  
to mess where we sleep, we will render it  
uninhabitable for ourselves.*

**1788. Judith Turner**  
loa angeles, CA

**1789. Paula Getzelman**  
Lockwood, CA

**1790. Patricia Maddock**

Lodi, CA

**1791. Jill Martin**

Lodi, CA

*We need to be leaders by investing in clean ,  
renewable energy sources.*

**1792. Delores Johnson**

Lodi, CA

Lompoc, CA

**1800. Mal Gaff**

Lompoc, CA

**1801. E Brooks**

Lompoc, CA

*It is one thing to think that polluting the  
water and air now is no big deal. If you  
continue to pollute as you have been, in 75  
years time your great-great or great-great-  
great grand children may not appreciate  
what you did to destroy their chances for  
happiness just so you could make a few  
more millions/billions of dollars which was  
meant to ensure their happiness. It's too  
bad that you will not be alive to witness the  
devastation you and your ilk have visited  
upon the planet and your decedents.*

**1802. Tom Gerald**

Lompoc, CA

*Time for petroleum-based energy to go!  
This is the only way our planet and it?s  
beings have any hope of a future.  
Thank you!*

**1803. Malcolm Gaffney**

Lompoc, CA

**1804. Vince Nicastro**

Lone Pine, CA

*Let?s move ahead with renewables, the  
fossil fuels are killing everything. Let?s be  
the change we need for survival!*

**1805. Bob Drury**

Long Beach, CA

**1806. Sidney Winston**

Long Beach, CA

*Let's show the world that California is dedicated to a renewable energy future. Let's be leaders.*

**1807. Susan Morales**

Long Beach, CA

**1813. Winsor Crosby**

Long Beach, CA

*Renewables are the future. If you are stuck in the past we all go down.*

**1808. Pamela Larue**

Long Beach, CA

**1809. Melinda & Jeff Cotton & Miller**

Long Beach, CA

*Please urge and empower residents and developers to install solar panels on the roofs of all new construction IMMEDIATELY and encourage homeowners to do the same. We installed solar panels on the roof of our home three years ago and it covers near our entire home heating and cooling and electric power use, and have even received checks back from Edison for the power we send back to them.*

**1814. Ed Zwieback**

Long Beach, CA

**1815. Susan Stoveken**

Long Beach, CA

**1816. Jeanne Davenport**

Long Beach, CA

**1817. Judith S Anderson**

Long Beach, CA

*Studies have shown California needs NO NEW Gas plants -- unnecessary new ones are already under construction in Long Beach and elsewhere. We have ENOUGH.*

**1818. Brenda Haig**

Long Beach, CA

*Thank you!!!*

**1819. Mark Chenevey**

Long Beach, CA

**1810. Alan Gonzalez**

Long Beach, CA

**1820. Kirk Nason**

Long Beach, CA

*I demand that CA Utilities move to renewables and get rid of Nat Gas and other polluting power plants NOW!*

**1811. Lindsey Kocinski**

Long Beach, CA

**1832. Liz Gonzalez**

Long Beach, CA

**1833. Jacob Dickinson**

Long Beach, CA

*Is it possible to make a clean break for it?*

*Let's set an example!*

*Also, selfishly...the best way I know of to  
cook is over gas! If anyone is using it for  
anything, I hope I can still get it for my  
stove. (I mean, if I live that long! But I'm  
speaking for posterity, and I hope the world  
will still have room for good cooks, as long  
as it has room for humans!) It may be silly,  
but it's sad to see us redoubling our  
consumption of the stuff for bulk energy  
production.*

**1834. Richard Watson**

Long Beach, CA

*Several times a week, throughout the summer, I would look at the weather on my smartphone and I'd see a warning that the air quality is bad. It is unacceptable to keep burning dirty fuel that pollutes the air around Los Angeles. Close these gas plants. Find a clean fuel source like Wind or Solar -- or even Nuclear (using Thorium or some lower-risk fuel). PLEASE stop using dirty fossil fuels.*

**2091. Sharon Emanuelli**

Los Angeles, CA

**2092. Barbara Mauz**

*Our natural environment has always been the least priority in the progress towards urbanization. This has caused it to become, in our current time, a critical priority that needs to be cared for. There's a battle of resources amongst power hungry nations, including our own, that has costed lives - at a global scale. It is reprehensible and it must be stopped, and the only way to do so is to initiate directive measures in transforming how our cities are run; and the first step to doing so is in analyzing what and how we consume energy, along with the long term side effects it has caused to our planet, and what we can do about it. The time to act is now, because clinging to the notion of 'sustainability' is a fool's errand. It's funny, you know, cuz people back in ancient times were more progressive when it came to living in balance with their natural environment. It's sad that we, as a humanity, have digressed so far to the point where our natural environment may cease to exist----*

*The short-term climate impacts of leaked methane (natural gas) is about 100 times that of carbon dioxide. Recent studies have shown that natural gas leakage both during production and distribution is many times higher than industry has claimed. This fact, combined with the Trump administrations move to rescind regulations to reduce this leakage, means strong action needs to be taken to reduce natural gas use. No new gas electric plants should be constructed. Renewable electricity with storage is affordable and becoming cheaper every day.*

*We know that Californians want a clean energy future. In 2010, the California State*

*Water Resources Control Board adopted a policy to phase out many seaside gas plants by Dec. 31, 2020 -- but the commissioners are still looking to hold onto them- which would further undermine the state's climate policy.*

*There is a far better alternative: direct our energy providers to invest in new, clean energy resources!*

*These four gas plants are some of the most polluting to our oceans and air. They use outdated technology and also pull hundreds of millions of gallons of water from the ocean and spew it back out -- wreaking havoc on local marine ecosystems, killing wildlife,*

*In this critical moment in history, we demand that state regulators not keep us anchored to the past and instead exhibit the leadership we need to chart the path to a clean energy future for California.*

*Thank you,  
Nancy Hotaling*

San Diego, CA

*As there is an expected rise in sea level, due to melting of ice, all coastal plants must definitely be not just shut down, but dismantled in order to avoid all sorts of risk and pollution. They will not be useful and they will pose a risk, because they were constructed too close to sea level. Their sites should be cleared off and left clean, so when the area goes underwater, no environmental disasters occur. I hope the utilities have planned well, to create DURABLE renewable energy power much higher up (over the 200 ft over sea level mark). Moving towards that renewable energy goal is paramount!*

San Leandro, CA

**4223. Kay L.**

San Leandro, CA

*I don't understand why you wouldn't do this. If California is a tourist destination, it's because of our clean air and water. It's counterintuitive to allow our offshore waters to be polluted. And it's corrupt to allow it so that fossil fuel corporations can make huge profits at the cost of our environment.*

**4229. Gretchen Sauer**

San Leandro, CA

**4230. Mary Pritchett**

San Leandro, CA

*Keep the promise and close them down. Our planet is burning...*

**4224. Renee Harper**

San Leandro, CA

*It's past time to transition to cleaner energy sources. What happens in Alamos, Huntington Beach, Redondo Beach and Ormond Beach affects all of us - pollution and CO2 don't recognize city, state or country borders. No new gas plants should be built and you need to stick to the original retirement dates for these plants. Our world*

**4231. Dennis Cecil**

San Leandro, CA

*It's got to be obvious-The planet is SICK. NEEDS some relief OK? WHY NOT err to the side of CAUTION for a change? There's only so much room on all the rockets to MARS. Same with the Luxury Bunkers a half mile under Nebraska. You won't be in either one no more than the rest of us. Change IS coming. Get on the Green Train. So your Grandkids Won't Curse you as much.*

**4232. Ann Graves**

San Leandro, CA

*in the movement to a healthier, cleaner  
environment.  
thank you!*

**4233. Sheri White**

San Leandro, CA

**4234. Susan Terry**

San Leandro, CA

**4240. Susan Youngdale**

San Luis Obispo, CA

*The planet has already warmed up too  
much. We need to move to clean  
renewable energy use Now!!!*

**4235. Mary J Wood**

San Luis Obispo, CA

*We don't have much time left.*

**4241. Deepali Panjabi**

San Luis Obispo, CA

**4236. Patricia Golden**

San Luis Obispo, CA

*It behooves the members of the CPUC to  
invest in clean energy, not only on behalf of  
the constituents that you serve. Think of  
your own families. You and they need a  
healthy planet as much as we do. No  
amount of profit or co-option can change  
that fact.*

Santa Clara, CA

*The sooner we stop depending on CO2 producing fossil fuels the better. It is all ready too late to stop climate change but we can slow the warming trend and protect the earth.*

**4467. Denis Crockett**

Santa Clara, CA

**4468. Leslie Marlowe**

Santa Clara, CA

*Yes, California, one step forward; not two steps back. To lead the way in clean energy with any integrity at all---we must actively embrace clean energy and renounce all attachments to gas plants!*

**4469. Lila Sude**

Santa Clarita, CA

**4470. Bella Silverstein**

Santa Clarita, CA

*Please retire these four plants! We don't have time to waste on fossil fuels ? and yes, gas IS a fossil fuel. If these four plants are not out of commission by 2020 as planned, it will be a HUGE setback for our planet, our lives, and our children's lives. Stop using gas! Switch to TOTALLY CLEAN energy! It's doable ? all the technology is here now. Don't make a short-sighted decision based on the pocketbooks of energy corporations. Please think only of our air, our water and your own grandchildren. Shut those gas plants down.*

**4471. Micaela Lee**

Santa Clarita, CA

**4472. Carol Lewis**

Santa Clarita, CA

**4473. Suzan Newman**

Santa Clarita, CA

*The climate crises is now. Take action for green energy.*

**4474. Karen Ramboldt**

Santa Cruz, CA  
*Please do not consider allowing energy providers to invest in new gas plants, which would further undermine the state's climate policy. There is a far better alternative: direct our energy providers to invest in new, clean energy resources!*

*These four gas plants are some of the most damaging to our ocean, air quality, and energy affordability. They not only pollute our air with outdated technology, but also pull hundreds of millions of gallons of water from the ocean and spew it back out -- wreaking havoc on local marine ecosystems, killing wildlife, and raising water temperatures. CPUC commissioners need to vote to invest in clean energy and vote NO on the lifeline to dirty gas plants.*

*The future belongs to all of us. It not just monied interests!!!*

**4554. Jessica Guild**  
Santa Cruz, CA  
*Fossil Fuels are of the past. We must put all efforts into converting our energy infrastructure to 100% renewable energy asap. Thank you for your time and consideration of my comment.*

Santa Maria, CA

*Please, there is no greater threat to the entirety of humanity than climate change and it is imperative that our infrastructure, culture, and lifestyles keep up with the science. Fossil fuels served their purpose to initially advance civilization; however, they were never a sustainable resource in the first place and now that climate change is already upon us, it is time to continue to advance civilization by moving to clean energy sources that aren't going to devastate our future. All of the science and solutions already exist; now we just have to continue to implement them and lead the world in the right direction. Large companies like ExxonMobil do not like the clean direction that the world is now heading in, but ultimately it benefits them too since continuing to rely on their harmful product will only lead to total ruin. Thus, please, fight for what is just and help make the world a better and safer place to live.*

West Hills, CA

**5373. Warren Bromund**

West Hills, CA

*The recent increase in the number of smoggy days in the Los Angeles basin after a period of noticeable reduction makes me realize that we must do all we can to reduce co2 in the atmosphere. Closing gas-fired electric plants is an important part of the job. Do not continue to use costal plants that damage the ocean as well as the air. Also - urge Los Angeles DWP to stop the practice of discarding credit for unused solar electric credits after three years. Promote generating solar power on our local sunny roofs instead of in distant delicate desert locations.*

**5374. Rebecca Clark**

West Hills, CA

**5375. Susanne Hefez**

West Hills, CA

**5376. Pular Zorrilla**

West Hills, CA

**5377. Phil Oberman**

West Hills, CA

**5378. Lila Aurich**

West Hills, CA

*I worry about the world my two great grandchildren will inherit. We must take action at once. It will cost more to repair the ravages that to begin the difficult changes we face.*

**5379. Mike Jones**

West Hills, CA

Whittier, CA  
*Its time to accelerate our actions toward clean energy for the sake of future generations.*

**5408. Jaclyn Cobbs**  
Willits, CA  
*Please don't let these energy plants continue to waste tax dollars on ruining the future of our planet. This issue is very important to me as a mother of 2 young children. The air quality is already so horrible due to California's forest fires. We need to take action to offset all of the carbon emissions that our state is putting into the atmosphere every year due to these fires. Discontinuing use of these outdated factories and instead investing in solar wind or other clean energy sources would be a step in the right direction.*

**5409. Lenore Flanders**

Willits, CA

**5410. Joe Madden**  
Willits, CA
