Co-Curricular Education

This subcategory seeks to recognize institutions that provide their students with sustainability learning experiences outside the formal curriculum. Engaging in sustainability issues through co-curricular activities allows students to deepen and apply their understandings of sustainability principles. Institution-sponsored co-curricular sustainability offerings, often coordinated by student affairs offices, help integrate sustainability into the campus culture and set a positive tone for the institution.

Student Sustainability Educators Program

Responsible Party

Heather Black  
Director of Student Activities  
Student Affairs Department

Criteria

Institution coordinates an ongoing peer-to-peer sustainability outreach and education program for degree-seeking students. The institution:

- Selects or appoints students to serve as educators and formally designates the students as educators,
- Provides formal training to the educators in how to conduct outreach, and
- Offers faculty or staff and/or financial support to the program.

This credit focuses on programs for degree-seeking students enrolled in a for-credit program. Continuing education and/or non-credit students are excluded from this credit.

Student clubs or groups, which are covered by Co-Curricular Education Tier Two Credit 1, are not eligible for this credit unless the group meets the criteria outlined above.

"---” indicates that no data was submitted for this field

Total number of degree-seeking students enrolled at the institution:
2,691

Program name (1st program):
Eco-reps program

Number of students served by the program to whom peer-to-peer sustainability outreach and education is offered (1st program):
2,691

A brief description of the program, including examples of peer-to-peer outreach activities (1st program):

An important aspect of being an Eco-rep is participating in the annual energy competition. The Eco-reps answer any questions on how to reduce energy consumption as well as guide activities throughout the six-week long competition. The Eco-reps are responsible for bulletin boards in the residence halls and post information for various sustainability-related/focused events throughout the year. The Eco-reps are also responsible for making sure students living in residence halls participate and are knowledgeable on Chatham’s annual recycling competition, RecycleMania. In general, the Eco-reps are there to answer any general sustainability questions that students may have.
A brief description of how the student educators are selected (1st program):

They are elected by the student body.

A brief description of the formal training that the student educators receive (1st program):

They receive ongoing workshops and trainings through the Office of Sustainability and Student Affairs.

A brief description of the staff and/or other financial support the institution provides to the program (1st program):

The sustainability office provides training, support and materials for the Eco-reps in order for them to lead the sustainability events and activities.

---
Student Sustainability Outreach Campaign

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

Criteria

Institution holds at least one sustainability-related outreach campaign directed at students. The campaign yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

To measure if the campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign.

The campaign could take the form of a competition (such as a residence hall conservation competition), or a collective challenge (such as a campus-wide drive to achieve a specific sustainability target).

The campaign may focus on one or more sustainability issues, but educating students is a primary feature of the campaign.

The campaign may reach additional campus members (faculty, staff, visitors, etc.) as long as students are one of the audiences of the campaigns.

The following impacts are not sufficient for this credit:

- Increased awareness
- Additional members of a mailing list or group

"---" indicates that no data was submitted for this field

Does the institution hold a campaign that meets the criteria for this credit?:

Yes

The name of the campaign(s):

RecycleMania, Energy Competition, and Pathways to Sustainable Careers

A brief description of the campaign(s):

RecycleMania:
RecycleMania is a friendly competition and benchmarking tool for college and university recycling programs to promote waste reduction activities to their campus communities. Over an 8-week period each spring, colleges across the United States and Canada report the amount of recycling and trash collected each week and are in turn ranked in various categories based on who recycles the most on a per capita basis, as well as which schools have the best recycling rate as a percentage of total waste and which schools generate the least
amount of combined trash and recycling. With each week’s updated ranking, participating schools follow their performance against other colleges and use the results to rally their campus to reduce and recycle more.
Chatham University has been participating in this competition since 2007.

Energy Competition:
This year was a pilot competition designed to measure Chatham University’s energy consumption and help to reduce it in the six weeks of the competition. We plan to do this every year.
-A brief description of the measured positive impact(s) of the campaign(s)
We were able to see how much energy was consumed in each of the halls that were a part of the competition and use this to further reduce our energy consumption. We also had weekly challenges for the students to reduce their energy consumption such as changing their incandescent light bulb for a compact fluorescent light bulb.

Pathways to Sustainable Careers:
This campaign invites members from the community that are part of sustainable careers to speak to the students at Chatham University.

A brief description of the measured positive impact(s) of the campaign(s):

RecycleMania:
1. Motivate students and staff to increase recycling efforts and reduce waste generation.
2. Generate attention and support for campus recycling programs.
3. Encourage colleges to measure and benchmark recycling activity in their effort to improve their programs over time.

Energy Competition:
-We saw a 20% decrease in energy over the competition this Spring and plan to do another competition in the Fall.
-Educated students on their own personal energy consumption.

Pathways to Sustainable Careers:
To show the growing field of sustainable careers and encourage students to go into the field.

The website URL where information about the sustainability outreach campaign(s) is available:
http://recyclemaniacs.org/about/
Sustainability in New Student Orientation

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

Criteria

Institution includes sustainability prominently in its new student orientation activities and programming. Sustainability activities and programming are made available to all new students and are intended to educate about the principles and practices of sustainability.

Because orientation activities vary from one institution to another, prominent inclusion of sustainability may not take the same form on each campus. When reporting for this credit, each institution will determine what prominent inclusion of sustainability means given its particular context.

As this credit is intended to measure sustainability being infused throughout the institution, program or discipline-level orientations are not included in this credit.

"---" indicates that no data was submitted for this field

Does the institution include sustainability prominently in new student orientation?:
Yes

A brief description of how sustainability is included prominently in new student orientation:

Each year at the new student orientation, the Admissions Office and Student Affairs incorporate sustainability into the programming. Each new student receives a reusable water bottle that can be filled at any of the water fill stations placed around campus, and a sustainable laundry bag. The orientation program also has a sustainable living activity that is lead and organized by our Sustainability Coordinator to teach the new students about sustainability, sustainable living and sustainable practices here at Chatham University.

The website URL where information about sustainability in new student orientation is available:
---
Sustainability Outreach and Publications

Responsible Party

Mary Whitney  
University Sustainability Coordinator  
Office of Sustainability

Criteria

Institution produces outreach materials and/or publications that foster sustainability learning and knowledge. The publications and outreach materials may include the following:

- A central sustainability website that consolidates information about the institution’s sustainability efforts
- A sustainability newsletter
- A vehicle to publish and disseminate student research on sustainability
- Building signage that highlights green building features
- Food service area signage and/or brochures that include information about sustainable food systems
- Signage on the grounds about sustainable groundskeeping strategies employed
- A sustainability walking map or tour
- A guide for commuters about how to use alternative methods of transportation
- A guide for green living and incorporating sustainability into the residential experience
- Regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat
- Other

Submission Note:

A copy of our rain water harvesting map, arboretum walking map, a Rachel Carson’s life tour map, an historical restorations tour map and a green features tour map are available on Chatham University's intranet website which is available to any student, faculty or staff member.

"---" indicates that no data was submitted for this field

Does the institution have a central sustainability website that consolidates information about the institution's sustainability efforts?:

Yes

A brief description of the central sustainability website that consolidates information about the institution's sustainability efforts:

Chatham University's Office of Sustainability is the administrative home of all campus sustainability projects. The office works to initiate change on campus with the hope of moving Chatham to carbon neutrality. We coordinate with University departments, faculty, and
student groups to take steps to a more sustainable living, learning, and working environment for the campus community.

The website URL for the central sustainability website that consolidates information about the institution's sustainability efforts:
http://www.chatham.edu/outreach/sustainability/

Does the institution have a sustainability newsletter?:
Yes

A brief description of the sustainability newsletter:
Our sustainability newsletter is called Small Change and has been sent out into the community once a week since 2007. Small Change highlights current and future ways to get involved in the sustainable movement and what locals can do to help make positive small changes in the environment.

The website URL for the sustainability newsletter:
---

Does the institution have a vehicle to publish and disseminate student research on sustainability?:
No

A brief description of the vehicle to publish and disseminate student research on sustainability:
---

The website URL for the vehicle to publish and disseminate student research on sustainability:
---

Does the institution have building signage that highlights green building features?:
Yes

A brief description of building signage that highlights green building features:
Chatham University posts various signs around campus that highlight green building features. Some describe how our solar water system works next to the residence halls that use the water. Signs outside of Rea House explain the environmental features of the building, including energy and water saving. Other signs across campus highlight our campus-wide ban on the sale of bottled water.

The website URL for building signage that highlights green building features:
---

Does the institution have food service area signage and/or brochures that include information about sustainable food systems?:

Yes

A brief description of food service area signage and/or brochures that include information about sustainable food systems:

In our dining hall and in our Weathervane snack bar we have several signs posted that highlight local food, non-GMO milk and how to compost.

The website URL for food service area signage and/or brochures that include information about sustainable food systems:
---

Does the institution have signage on the grounds about sustainable grounds-keeping strategies employed?:
Yes

A brief description of signage on the grounds about sustainable grounds-keeping strategies employed:

At Chatham University we have a sign posted next to our rain garden that highlights our non-potable water usage and storm water management.

The website URL for signage on the grounds about sustainable grounds-keeping strategies employed:
---

Does the institution have a sustainability walking map or tour?:
Yes

A brief description of the sustainability walking map or tour:

Chatham University has several different walking maps and tour maps. We have an arboretum walking map, a Rachel Carson’s life tour map, an historical restorations tour map and a green features tour map.

The website URL of the sustainability walking map or tour:
---

Does the institution have a guide for commuters about how to use alternative methods of transportation?:
Yes

A brief description of the guide for commuters about how to use alternative methods of transportation:

Chatham University has a guide to car transportation through Commute Info on the university website. We also have a guide to bike commuting that details how to safely bike in Pittsburgh. This guide is located conveniently for the students in the bike shop. Bike routes are also marked on the campus maps.
The website URL for the guide for commuters about how to use alternative methods of transportation:
---

Does the institution have a guide for green living and incorporating sustainability into the residential experience?:
No

A brief description of the guide for green living and incorporating sustainability into the residential experience:
---

The website URL for the guide for green living and incorporating sustainability into the residential experience:
---

Does the institution have regular coverage of sustainability in the main student newspaper (either through a regular column or a reporter assigned to the sustainability beat)?:
Yes

A brief description of regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat:
The sustainability department has a regular column in the student newspaper called Small Changes that is written by students detailing sustainability events and news.

The website URL for regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat:
---

A brief description of this material:

The website URL for this material:
Does the institution have an active student group focused on sustainability?:
Yes

The name and a brief description of each student group:

Green Horizons

Green Horizons is Chatham University’s environmental collective, promoting sustainable living and awareness. Past activities include recycled plastic bag “slip and slide” night, a bike-in movie, and the annual “Green Week,” which involves the “veg pledge,” environmentally-themed teach-ins, etc.

List up to 4 notable recent activities or accomplishments of student group(s):

1. Fracking Awareness Art Campaign
2. Trial markers for Eden Hall
3. Mountain top removal protest
4. Attended power shift conference in Washington D.C.

List other student groups that address sustainability:

Naturality & Bike Collective

The website URL where information about student group(s) is available:
http://www.chatham.edu/outreach/sustainability/culture.cfm
Organic Garden

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution have an on-campus garden where students are able to gain organic farming and/or gardening experience?:
Yes

A brief description of the garden:
The garden at our Eden Hall campus is an organic student-run teaching garden. We also compost, and practice permaculture and vermiculture at our Eden Hall campus. In addition we have bee hives that act as the primary pollinators of our organic garden and for our small heritage fruit tree orchard.

The website URL where information about the garden is available:
---
Model Room in a Residence Hall

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Themed Housing

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

"---” indicates that no data was submitted for this field

Does the institution have sustainability-themed housing (residential floor or hall, or theme house) where residents learn about sustainability together and to which residents must apply?:

Yes

A brief description of the themed housing, including name(s) and descriptions of theme(s):

Rea House: Sustainability-themed house

Rea House is Chatham’s environmentally-themed student dorm, housing 28 students. Residents of Rea House must submit an application and participate in events that display a commitment to the environment and sustainability.

The website URL where information about the themed housing is available:

http://www.chatham.edu/campuslife/resident/residenthalls.cfm

The total number of residents in themed housing: 

28
Does the institution have a student-run enterprise, such as a cafe, through which students gain sustainable business skills?:
Yes

A brief description of the enterprise:
This Fair Trade, certified organic blend coffee was created for us in partnership with local coffee roasters, La Prima Espresso. This is a student-run enterprise, and all of the proceeds from our coffee sales go to the Food Studies Scholarship Fund.

The website URL where information about the sustainable enterprise is available:
https://www.chatham.edu/academics/colleges/sse/edencoffee/
Sustainability Events

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

"---" indicates that no data was submitted for this field

Does the institution hold major events related to sustainability, such as conferences, speaker series, or symposia, that have students as the intended audience?:

Yes

A brief description of the event(s):

Sustainable Careers Lecture Series:
Each month, a guest lecturer is invited to speak on their journey that led to a career in the sustainability field. The speaker provides inspiration and insight to students to encourage them in considering careers in sustainability. Even if a student is not in an environmental/sustainability program, this lecture can still show how skills from their specific program can be applicable in the sustainability field.

http://www.chatham.edu/newsevents/events/details.cfm?eventID=7221

Rachel Carson Legacy Conference:
We offer empowerment and leadership for women in the synthesis of science and writing as career opportunities following in Rachel Carson's footsteps. We will sustain Rachel Carson's legacy through our actions illustrating her principles as an institution and as individuals. Every year we host the Rachel Carson Legacy Conference in which we highlight one of her many accomplishments for the world and sustainability.

Outdoors Program

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Submission Note:

See page 8 of the activities calendar website.

"---" indicates that no data was submitted for this field

Does the institution have a wilderness or outdoors program that organizes hiking, backpacking, kayaking, or other outings for students and follows Leave No Trace principles?:
Yes

A brief description of the program:

Chatham University partners with Venture Outdoors, a non-profit organization that is dedicated to outdoor activities. Through this program students participate in various outdoor activities such as biking, hiking and skiing.

The website URL where information about the program is available:
http://www.chatham.edu/campuslife/activities/docs/2012SpringCalendar.pdf
Has the institution chosen a sustainability-related theme for its themed semester, year, or first-year experience during the past three years?:

Yes

A brief description of the themed semester, year, or first-year experience:

The Global Focus program at Chatham University engages our students in the purposeful study of peoples and civilizations. Our community of scholars promotes the acquisition of sustainable global competencies through the critical and holistic exploration of one specific country or region of the globe every year. The program concurrently reinforces cross-cultural ties and internationalization initiatives in the greater Pittsburgh area and beyond. This year we are focusing on Scandinavia, including renewable energy and sustainability issues.

The sustainability-related book that was chosen, if applicable:

---

The website URL where information about the theme is available:

http://www.chatham.edu/globalfocus/
This subcategory seeks to recognize institutions that have formal education programs and courses that address sustainability. One of the primary functions of colleges and universities is to educate students. By training and educating future leaders, scholars, workers, and professionals, higher education institutions are uniquely positioned to prepare students to understand and address sustainability challenges. Institutions that offer courses covering sustainability issues help equip their students to lead society to a sustainable future.

Sustainability Course Identification

Responsible Party

Wenying Xu
Vice President for Academic Affairs
Academic Affairs Department

Criteria

Part 1

Institution has developed a definition of sustainability in the curriculum. The definition was developed by a committee comprised of at least three faculty members who teach courses in different departments. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

In order to report on other STARS Curriculum credits, the definition of sustainability in the curriculum should distinguish between courses that focus or concentrate on the concept of sustainability throughout the course and courses that relate to an aspect of sustainability or include sustainability as part of the course.

- **Sustainability-focused courses** concentrate on the concept of sustainability, including its social, economic, and environmental dimensions, or examine an issue or topic using sustainability as a lens.
- **Sustainability-related courses** incorporate sustainability as a distinct course component or module or concentrate on a single sustainability principle or issue.

Part 2

Institution has identified its sustainability-focused and sustainability-related course offerings. A course is either sustainability-focused or sustainability-related; no course should be identified as both sustainability-focused and sustainability-related. Each institution is free to choose a methodology to identify sustainability courses that is most appropriate given its unique circumstances. Asking faculty or departments to self-identify sustainability courses using the definition in Part 1 or looking at the stated learning outcomes and course objectives associated with each course may provide a richer view of sustainability course offerings than simply reviewing course descriptions, but it is not required.

Part 3

Institution makes its sustainability course inventory publicly available online. The identification can be incorporated into the course catalog or posted as a stand-alone document.

"---" indicates that no data was submitted for this field

**Has the institution developed a definition of sustainability in the curriculum?:**

Yes

**A copy of the institution's definition of sustainability in the curriculum?:**
With Chatham's historic liberal arts focus and the requirements of our mission initiatives of sustainability, women's issues, and global affairs, much of our research is by necessity interdisciplinary in nature. The different disciplines recognized as relating to sustainability include:

- Political ecology, economic geography, critical theory, sustainability, energy, environmental governance, and spatial analysis.
- Sustainability science, global water resources, community ecology, and women’s and children’s environmental health.
- Protected areas, social and economic justice, and the intersection of race and class with conservation and environmentalism
- Sustainability and risk analysis, climate change, energy, toxic chemicals, and public health.

**Has the institution identified its sustainability-focused and sustainability-related course offerings?:**
Yes

**A brief description of the methodology the institution followed to complete the inventory:**

Each discipline compiled a list of their sustainability research activities and initiatives, then complied them into one sustainability research activities and initiatives inventory.

**Does the institution make its sustainability course inventory publicly available online?:**
Yes

**The website URL where the sustainability course inventory is posted:**

http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=19&DisplayName=University%20Sustainability
Sustainability-Focused Courses

Responsible Party

David Hassenzahl
Dean, School of Sustainability and the Environment
Academic Affairs Department

Criteria

Institution offers sustainability-focused academic courses.

This credit does not include continuing education and extension courses, which are covered by PAE Credit 21: Sustainability in Continuing Education.

"---" indicates that no data was submitted for this field

The number of sustainability-focused courses offered:
105

The total number of courses offered:
2,965

Number of years covered by the data:
Two

A list of sustainability-focused courses offered:

Sustainability Focused courses

1. FST 514 - Fair Trade (3)
Exploring the role of global trade agreements, government policies, international labor standards, and social movements in determining global food production and distribution. Examines historical food exchanges, debates over genetic modification, and strategies of multinational corporations, environmental concerns, and development scenarios. Case studies include coffee, chocolate, green beans, and aquaculture.

2. FST 517 - Sustainable Systems (3)
Students work collectively to collaborate with one client on a real world problem to provide an analysis of a complex food-related public policy issue. Projects include business plan for food-based social enterprise; production/distribution models for urban farm operations; researching solutions for bringing fresh food into low-income, historically disadvantaged communities.

3. FST 520 - Growing Sustainably (3)
Using Chatham’s Eden Hall Campus gardens as well as neighboring farms as a case study, students will integrate best practices for sustainable agriculture with theory and research analysis in the classroom. Topics will include basic principles of soil fertility,
biodiversity, agriculture history, effects of both conventional and organic agriculture, and the politics surrounding the issues.

4. FST 520L - Growing Sustainably Lab (1)
Through working on Chatham’s Eden Hall Farm as well as neighboring farms, students will integrate best practices for sustainable agriculture in ongoing projects. Lab component will include work with the western regional office of Pennsylvania Association for Sustainable Agriculture, farm-to-table initiatives, ongoing regional vermiculture and composting, and garden market development and maintenance for a variety of community partners.

5. FST 530 - Sustainable Culinary Basics (3)
Covers the fundamental concepts and skills of classical cookery focusing on local and sustainable practices. Topics include sourcing local ingredients, flavor profiles, cooking theories. Includes basics and terminology in stocks, soups, sauces, vegetables, starches, meat, and poultry from Eden Hall and field trips to local farms. Techniques include sautéing, roasting, poaching, braising and frying. Class runs 7 weeks and is offered twice.

6. FST 532 - Sustainable Meat Production (3)
As part of sustainable agriculture and culinary knowledge, understanding meat production outside the conventional large scale processing facilities is a critical skill for students who will work with restaurants, farm markets, and other distribution venues. Students will learn butchering, packaging, and cooking techniques at a grass-fed livestock farm and production facility.

7. FST 605 - Food and Climate Change (3)
This course covers the basics of the relationship between climate change and food systems. Using case studies and research projects coursework covers a comprehensive understanding of agriculture, food production and consumption in relation to environmental change, with close attention to the different ways that communities experience such change.

8. SUS 502 Sustainability and Systems (3 cr)
Students develop skills necessary to understand, describe, and communicate complex systems. Working from examples and cases, students will learn how to identify key system drivers and communicate findings to diverse audiences. In the process, students will learn to solicit useful information and model systems using formal and informal methods.

9. SUS 503 Understanding Knowledge Across Disciplines (3 cr)
Students explore how individuals and disciplines approach knowledge and how different types and sources of knowledge can help inform sustainability. They examine different assumptions about the individual as a decision maker, including the perspectives of traditional economics, behavioral economics, and anthropology. They explore the differences and similarities among different academic disciplines including law, physics, literature, philosophy, and religion. Finally, they explore the role of experts and expertise in planning and managing sustainability.

The total number of courses offered:

2,965

Number of years covered by the data:

Two

A list of sustainability-related courses offered:

Sustainability Related Courses

1. FST 505 - Food and Representations (3)
Focus on representations of food and eating in public contexts, from literature to policy, popular culture, marketing, and political rhetoric, but also including scientific, agricultural, and culinary discourses. Texts include advertising, research reports. This class examines the varying meanings assigned to agriculture, food, and eating.

2. FST 508 - Food Systems (3)
Examines philosophical, sociological, economic, and cultural issues related to the production and consumption of food. From Agrarianism to the Green Revolution, explores the transformations of industrialization, technology, and migration. Provides a foundation in food systems and commodity chains as concepts and methodological tools for uncovering the relationship between communities, agriculture, markets, and consumers.

3. FST 509 - Food Access (3)
If food is a basic human right, how do societies create universal access to food? In this course, we explore the moral and ethical basis for making citizens food secure despite global inequality. Major topics include the relationship between food access, culturally
appropriateness, nutrition, sustainability, and justice.

4. FST 510 - Food, Culture and History (3)
Provides an overview of food and diet in transnational history emphasizing cultural impact of modernity on food gathering, farming, plant biology, the body and consumption, health, taste, and cuisine. Topics include the development of agriculture, the causes of famine, the disruptions of colonialism, global exchange, industrialization, migration, and commercial economic dominance of the food system.

5. FST 511 - Research Methods: Food (3)
Introduction to social science research methods applicable to the study of food and culture. Practicum includes ethnography, interviews, focus groups, survey research, oral history, textual analysis, cultural mapping, and visual methods. Applied approach to research: students will produce data for practical use in existing community projects or thesis preparation.

6. FST 512 - Practical Nutrition (3)
Course provides an overview of nutrition as an evidence-based research field, focusing on groups and communities where research is conducted and then applied. Topics include science and politics of food categories; supplements and functional foods; weight and disordered eating, commercial, local, organic, and conventional foods; cuisine, culture, and diet.

7. FST 513 - Food, Labor, and Inequality (3)
Course examines how food labors shape historical, political, and social contexts. From nomadic egalitarianism, agrarian politics, industrial stratification to global technological disparities, we explore the uneven compensation and status created in domestic settings, restaurants, factories, and farms. Research on contemporary food labor practices and relevant policies is emphasized.

8. FST 515 - Writing about Food (3)
Students will develop techniques and skills for writing about food and culture by studying ethics; journalism, advertising, multimodal and new technology venues; recipe writing; food criticism; writing about food in a variety of genres from history to fiction, magazines and websites. Course emphasizes both print and online media. Cross-listed with ENG 513.

9. FST 516 - Comparative Cuisines (3)
This course focuses on cuisine as a conceptual tool for understanding culture, geography, and environment. Explorations include: the development of cuisine, the relationship between nation-building and culinary doctrine, literacy and cultural preservation, colonialism, empire, and appropriation. Narratives explore migration, ethnic and racial identity, gender and traditionalism, peasant and elite foodways.

10. FST 518 - Business of Food and Agriculture (3)
Course covers both history and current practices related to food and agriculture as economic enterprises in the United States and the world. Skills include ability to understand strategic management principles including identifying target markets, niche marketing. Students will be able to develop an agricultural project or food business plan including understanding barriers of entry, compiling demographic data, developing feasibility studies, long and short term business goals, define and calculate a breakeven point, and budget formulation.

11. FST 522 - GIS: Food and Agriculture (3)
This course will provide students with a solid foundation of the principles and applications of GIS, an introduction to the desktop software ArcGIS, and will demonstrate its use in the public sectors. Skills learned in other courses can be brought to this course and built upon. Students will focus on their particular interests and projects.

12. FST 531 - Fermentation (3)
Through hands on production, tastings and lectures this course is designed to provide students with an understanding of winemaking principles and practices including a history of viticulture, wine production regions, wine types/styles, methods of winemaking, basics of fermentation, wine chemistry and winery operations. Active experience in the principles of sensory evaluation will be gained through weekly tastings. Students will produce root beer, beer, sake, local mead and vinegar to gain an understanding of various fermentation methods. An emphasis will be placed on sustainable viniculture practices and the globalization of wines.
13. FST 602 - Global Agriculture (2)
Examines how contemporary agricultural era is characterized by the simultaneous existence of radically different farming systems within the same region. Course explores prior examples historically and regionally. Focus is then on what makes the contemporary agricultural age different, including respect for ‘traditional’ approaches as viable ‘alternatives’; social and scientific research supporting alternatives; farmers/practitioner awareness of options; and consumer-citizens driven awareness and advocacy.

14. FST 603 - Food Journeys (3)
From the Columbian Exchange to Eco-tourism, food travels the world and the traveler journeys through food. This course examines historical and contemporary writing on food and geographic movement. Topics include culinary adventuring, anti-colonialist eating, and the migrant food voice. Analysis of memoirs, cookbooks, and travelogues culminates in publishable food journeys.

15. FST 604 - Food, Social Change and Health (3)
Food and health are inextricably intertwined in modern cultures. Course explores the historical relationship between physical well-being and consumption, from body weight to food fads. The course examines the history of food-related social movements, policy mandates and collective action. Global environmental concerns, gender politics and public health policies are key topics.

16. FST 610 - Culture and Politics of Meat (3)
Meat is one of the most prized and problematic aspects of our food system. It is one of the key issues in environmental degradation through agriculture, but it is also the most celebrated component of new sustainable food initiatives. Large scale meat consumption can signal either a rise or decline in overall global health. This course will examine the culture, politics, history, and contemporary debates about the production and consumption of animals by humans.

17. FST 683 - Special Topics: Pittsburgh Food Landscape (3)
Using theories of collective memory, methods of culinary and oral history, and techniques from cultural geography, this course examines components of the food universe of Allegheny County and Pittsburgh, focusing on the way its distinctive ethnic and class history resulting in specific traditions, culinary creations, and entrepreneurial endeavors related to selling and consuming food.

18. FST 691, 692 - Internship (1) (2)
Internship placement will focus on local nonprofits, advocacy groups, community projects, food companies, farms, co-ops, food producers, and policy agencies. Directed experience can include developing products, community knowledge, food system data, or promotional materials (course requires instructor signature).

19. FST 693 - Field Work Practicum (3)
Students in 3 credit internships will have regular meetings as a group and individually with the supervising academic professor in order to address ethical, logistical, and intellectual issues related to community-based work in Food Studies (course requires instructor signature).

20. FST 698 - Thesis/Project (1)
Course provides supervision and research guidance for Master’s thesis or projects in Food Studies. Students will have instruction in data analysis, writing for public presentation and publication, professional development workshops, and community development issues.

21. FST 699 - Pro-Seminar (3)
Professional development seminar including workshops on negotiation, networking, public presentation, publication, and communication. Includes guest speakers and event management opportunities.

Sustainability Learning Outcomes

Responsible Party

Wenying Xu
Vice President for Academic Affairs
Academic Affairs Department

Criteria

Institution’s students graduate from programs that include sustainability as a required learning outcome or include multiple sustainability learning outcomes.

For this credit, learning outcomes at the course level count if the course is required to earn the degree. This credit includes graduate as well as undergraduate programs. For this credit, "programs" include majors, minors, concentrations, certificates, and other academic designations. Programs that include co-curricular aspects may count as long as there is an academic component of the program.

"---" indicates that no data was submitted for this field

The number of graduates covered by the sustainability learning outcomes:

241

Total number of graduates:

754

A list of degree programs that have sustainability learning outcomes:

All undergraduate students have a sustainability learning outcome in the degree programs.
All graduates from Chatham College for Women
All graduates from the School of Sustainability and Environment
All graduates in Master of Interior Architecture and Master of Science in Interior Architecture
All graduates of Master of Landscape Architecture and Landscape Development
All graduates of Master of Business and Entrepreneurship

Undergraduate Program in Sustainability

Responsible Party

Wenying Xu
Vice President for Academic Affairs
Academic Affairs Department

Criteria

Institution offers at least one sustainability-focused undergraduate major, degree program, or equivalent.

The degree program does not have to include sustainability in its name to count for this credit. Environmental Studies programs, for example, count as long as the program covers the social, economic, and environmental dimensions of sustainability. A program that focuses exclusively on environmental or social issues, however, would not be sufficient to earn this credit.

Concentrations within a major (e.g. a concentration on sustainable business within the business major) do not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution offer an undergraduate degree program that meets the criteria for this credit?:
Yes

The name of the sustainability-focused, undergraduate degree program (1st program):
Environmental Studies

The website URL for the program (1st program):

Certificate in Sustainable Management

Sustainability Immersive Experience

Responsible Party

Karin Chipman
Study Abroad Coordinator
International Programs Department

Criteria

Institution offers at least one immersive, sustainability-focused educational study program. The program(s) may take place off-campus, overseas, or on-campus.

For this credit, the program meets one or both of the following criteria:

- it concentrates on sustainability, including its social, economic, and environmental dimensions or
- it examines an issue or topic using sustainability as a lens.

Immersive programs offered in partnership with outside entities may count for this credit. Programs offered exclusively by outside entities do not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution offer a program that meets the criteria for this credit?:

Yes

A brief description of the sustainability-focused immersive experience(s) offered by the institution:

In the sense that sustainability is one of the three mission initiatives of the university, and as such is a constant conversation and more and more a part of daily life. There is no formal program in the sense of an isolated "experience." Being at Chatham University itself is a sustainable experience because sustainability is infused into every part of the institution.

Our general education program has study abroad programs in Costa Rica, Belize and New Zealand.

Below are some course descriptions.

Costa Rica: Sustainable Costa Rica, 2011
Duration: May 2 – 10, 2011 (Required classes at Chatham Eastside April 28, May 16 and 17)
The Course: Sustainable Costa Rica offers real world exposure to one of the last remaining pristine eco-systems on earth. Students will tour sustainably built and/or LEED rated residential and commercial structures. Additionally, the group shall see buildings and interiors built in the Costa Rican vernacular style. Readings, lectures, and activities will advance the understanding of how the built and natural environment can co-exist so that neither is compromised. A deeper understanding of how this relationship works shall be done by studying biomimicry, which is the science of how nature would solve a problem. By visiting wildlife reserves, biological reserves, volcanoes, sustainable plantations, and rainforests, students shall experience natural systems, thus affording models that could provide solutions for human needs. A camera and/or video camera will be required for this course.
Belize A Voyage of Discovery thru Service, 2011
Students will travel to San Ignacio, Belize, for a three-part program—volunteer activities, cultural interactions and the study of sustainable development in situ. Students will learn about the local sustainable development issues at several villages with distinctly different ethnic compositions (Mennonites, Hispanics, Maya and Garifuna). The students will do preliminary site visits upon arrival followed by case studies of ongoing sustainability projects in which the students will analyze, offer recommendations, and help with local projects. The program will also include cultural activities and events. Free time/weekend activities may include trips to the open-air market, the local pyramids and a visit to the Mayan ruins.

Guatemala/Belize 2010, 2009 and several years prior…

-Belize and Guatemala offer unique opportunities to study the partnerships between environmentally conscious humans and a wide variety of natural and cultural environments. Students will study the rain forest, mountain, and marine habitats of howler monkeys, jaguars, and reef fish, learning firsthand about grassroots environmental organization, and participate in an on-site service-learning project (e.g., at the Belize Botanical Garden). In addition, they will deepen their understanding of Mayan culture and history by first studying and then visiting classic Mayan archeological sites such as Xunantunich, Cahal Pech, and Tikal, and by visiting contemporary Mayan communities. This course will focus on rainforest and reef ecology, Mayan history and culture, and cultural diversity. Finally, students will apply their new knowledge by sharing their insights through follow-up presentations at Chatham upon their return to develop leadership and demonstrate global citizenship.

The Course: Participants in this program will spend their first week on Santa Cruz Island doing conservation work and visiting local attractions. During their second week, participants will be on San Cristobal Island volunteering on key community, conservation and social projects. You will end your program with a fascinating and relaxing week at Isabella Island where you can relax and visit the Giant Tortoise Breeding Center as well as Las Tintorera Islet to see white tip sharks, and more. Keep in mind that due to a combination of the rigorous nature of the conservation work and the intense tropical climate, this is a very physically demanding experience.

New Zealand

http://www.ecoquest.unh.edu/summer

Weeks, 3 Islands, 8 Credits: an unforgettable Summer Program in Aotearoa New Zealand
Our five-week summer program provides an unequalled opportunity to gain academic credits while working toward sustainable solutions for the management of natural resources. All learning opportunities offered by EcoQuest are packaged into a curriculum framework which addresses ecology and environmental policy pertaining to the real-life case studies which span the full spectrum of restoration opportunities on offshore islands in the Hauraki Gulf, New Zealand's largest marine embayment. Since 1999, Tiritiri Matangi Island and Ponui Island have been core destinations for the Summer Program. Motuihe and Motutapu islands are relatively recent additions to ecological restoration of offshore islands in New Zealand, and their potential conservation value is extremely high. In 2006 EcoQuest was invited to contribute to ecological restoration efforts on Motuihe, and since 2010 we have extended out efforts to include Motutapu.

The website URL where information about the immersive experience is available:

---
Sustainability Literacy Assessment

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Part 1
Institution conducts an assessment of the sustainability literacy of its students. The sustainability literacy assessment focuses on knowledge of sustainability topics, not values or beliefs.

Part 2
Institution conducts a follow-up assessment of the same cohort group using the same instrument.

Has the institution conducted a sustainability literacy assessment?:
Yes

Did the assessment include a baseline evaluation of students and then a follow-up evaluation of the same cohort?:
Yes

A copy of the questions included in the sustainability literacy assessment:
---

A brief description of how the assessment was developed:
The assessment was compiled by the sustainability department from a series of campus-wide conversations about what it means to be sustainable.
A brief description of how the assessment was administered:

The assessment was administered in the form of discussion sessions and surveys to students, faculty and staff at Chatham University.

A brief summary of results from the assessment:

The questions were not designed to find out what facts people know, but what they think about sustainability in their lives as part of Chatham's community. Student responses were reflective of a range of understandings, and generally seemed to have a good grasp of the basics, as far as the ecological aspects are considered. There is still much attention paid to recycling as the signature indicator of what being sustainable means, but students responded with an awareness of energy impacts, and one even noted that “Sustainability isn't just about being green. Focusing on equity, community service, and the environment is better than just recycling.”

The website URL where information about the literacy assessment is available:

---
Incentives for Developing Sustainability Courses

Responsible Party

Jessica Mooney
Assistant to the Dean, SSE
Academic Affairs Department

Criteria

Institution has an ongoing program or programs that offer incentives for faculty in multiple disciplines or departments to develop new sustainability courses and/or incorporate sustainability into existing courses or departments. The program aims to increase student learning of sustainability.

Incentives may include release time, funding for professional development, and trainings offered by the institution.

Incentives for expanding sustainability offerings in academic, non-credit, and/or continuing education courses count for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a program that meets the criteria outlined above?:

Yes

A brief description of the program(s):

USDA-NNF Program:

Food and Agricultural Sciences National Needs Graduate and Postgraduate Fellowship (NNF) Grants Program
This grant program supports: (1) training students for Master's and doctoral degrees in food, agricultural and natural resource sciences, and; (2) Special International Study or Thesis/Dissertation Research Travel Allowances (IRTA) for eligible USDA NNF beneficiaries. Awards are specifically intended to support traineeship programs that engage outstanding students to pursue and complete their degrees in USDA mission areas. Applicants provide clarity about the philosophy of their graduate training, and relevance to USDA mission sciences, NIFA priorities and national science education policies and statistics. Applications are being solicited from institutions that confer a graduate degree in at least one of the following Targeted Expertise Shortage Areas: 1) animal and plant production; 2) forest resources; 3) agricultural educators and communicators; 4) agricultural management and economics; 5) food science and human nutrition; 6) sciences for agricultural biosecurity; and 7) training in integrative biosciences for sustainable food and agricultural systems.

Dominion Higher Education Partnership:

Educating our citizens and meeting the varied work force needs of business and industry are challenges that require diverse solutions. Grants from the Dominion Higher Educational Partnership program better align Dominion's work force needs with the company's support of higher education.
In the area of post-secondary education, Dominion accepts grant applications, up to $50,000, to encourage the development of programs for post-secondary students, aimed at developing a skilled work force in areas critical to Dominion (see award categories for more details).

**USDA-SARE:**
Every day, farmers and ranchers around the world develop new, innovative strategies to produce and distribute food, fuel and fiber sustainably. While these strategies vary greatly they all embrace three broad goals, or what SARE calls the 3 Pillars of Sustainability:

- Profit over the long term
- Stewardship of our nation's land, air and water
- Quality of life for farmers, ranchers and their communities

There are almost as many ways to reach these goals as there are farms and ranches in America. This program works on research that leads to sustainable agriculture.

**A brief description of the incentives that faculty members who participate in the program(s) receive:**

School of Sustainability faculty receives startup funds to development their research agenda. In the last year we received over $40,000 from three different foundations to support for sustainability courses and faculty research. The faculty receive funding to help develop sustainable courses.

**The website URL where information about the program is available:**

---
This subcategory seeks to recognize institutions that are conducting research related to or focused on sustainability. Conducting research is a major function of many colleges and universities. By researching sustainability issues and refining theories and concepts, higher education institutions can continue to help the world understand sustainability challenges and develop new technologies, strategies, and approaches to address those challenges.

Sustainability Research Identification

Responsible Party

David Hassenzahl
Dean, School of Sustainability and the Environment
Academic Affairs Department

Criteria

Part 1
Institution has developed a definition of sustainability research. The definition was developed by a committee comprised of at least three faculty members from different departments who conduct research. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

Part 2
Institution has identified its sustainability research activities and initiatives. This research inventory should include all research centers, laboratories, departments, and faculty members whose research focuses on or is related to sustainability.

Part 3
Institution makes its sustainability research inventory publicly available online.

"---" indicates that no data was submitted for this field

Has the institution developed a definition of sustainability research?:
Yes

A copy of the institution's definition of sustainability research:

With Chatham's historic liberal arts focus and the requirements of our mission initiatives of sustainability, women's issues, and global affairs, much of our research is by necessity interdisciplinary in nature. The Academic Affairs Office considers these different disciplines to be applicable to interdisciplinary sustainability research:

• Political ecology, economic geography, critical theory, sustainability, energy, environmental governance, and spatial analysis.
• Sustainability science, global water resources, community ecology, and women’s and children’s environmental health.
• Protected areas, social and economic justice, and the intersection of race and class with conservation and environmentalism
• Sustainability and risk analysis, climate change, energy, toxic chemicals, and public health.

Has the institution identified its sustainability research activities and initiatives?:
Yes

A brief description of the methodology the institution followed to complete the inventory:
Each discipline compiled a list of their sustainability research activities and initiatives and compiled them into one sustainability research activities and initiatives inventory, with input from the Vice President of Academic Affairs.

Does the institution make its sustainability research inventory publicly available online?:
Yes

The website URL where the sustainability research inventory is posted (required if claiming Part 3 of the credit):
http://rs.acupcc.org/ip/187/

Sustainability Research Incentives

Responsible Party

David Hassenzahl
Dean, School of Sustainability and the Environment
Academic Affairs Department

Criteria

Part 1
Institution has an ongoing program to encourage students in multiple disciplines or academic programs to conduct research in sustainability. The program provides students with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and mentorships.

Part 2
Institution has an ongoing program to encourage faculty from multiple disciplines or academic programs to conduct research in sustainability topics. The program provides faculty with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and faculty development workshops.

Submission Note:

Examples of student sustainability research include:
starting a seed library in Pittsburgh, a study of Consumer perceptions of ecolabels and eco labeling terms, develop an online, open source map resource of the local food system infrastructure in southwestern PA and the surrounding region, and more.

"---" indicates that no data was submitted for this field

Does the institution have a program to encourage student sustainability research that meets the criteria for this credit?:
Yes

A brief description of the institution’s program(s) to encourage student research in sustainability:

Students can participate in sustainable research as part of an independent study which counts as college credits and allows the student to work with the faculty and the research project. Graduate students are encouraged to do an independent study with the sustainability office and undergraduate students are encouraged to do their senior independent research project called tutorial on sustainability. The sustainability office actively seeks students to do their tutorial projects on sustainability and the Sustainability Coordinator sits on undergraduate and graduate thesis boards. The students receive college credit for their projects. We also have internships and assistantships in both the undergraduate and graduate programs for the sustainability office and the sustainability and environment program. These are paid internships and assistantships.

The website URL where information about the student research program is available:
Does the institution have a program to encourage faculty sustainability research that meets the criteria for this credit?:
Yes

A brief description of the institution’s program(s) to encourage faculty research in sustainability:

The School of Sustainability faculty receive startup funds for developing their research agendas. In the last year they received over $40,000 from 3 different foundations to support sustainability courses and faculty research. Faculty receive money to help develop sustainable courses.

Operations

Buildings

This subcategory seeks to recognize institutions that are taking steps to improve the sustainability performance of their buildings. Buildings are generally the largest user of energy and the largest source of greenhouse gas emissions on campuses. Buildings also use significant amounts of potable water. Institutions can design, build, and maintain buildings in ways that provide a safe and healthy indoor environment for inhabitants while simultaneously mitigating the building’s impact on the outdoor environment.

Building Operations and Maintenance

Criteria

Institution owns and operates buildings that are:

1) Certified under the LEED® for Existing Buildings: Operations & Maintenance (O&M) Green Building Rating System,

and/or

2) Operated and maintained in accordance with sustainable operations and maintenance guidelines and policies that cover the following:

- Impacts on the surrounding site
- Energy consumption
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Building Design and Construction

Responsible Party
Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution-owned buildings that were constructed or underwent major renovations in the past three years are:

1) Certified under the LEED® for New Construction and Major Renovations, LEED for Commercial Interiors, and/or LEED for Core and Shell Green Building Rating Systems,

and/or

2) Designed and built in accordance with green building guidelines and policies that cover the following topics:

- Impacts on the surrounding site
- Energy consumption
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption

"---" indicates that no data was submitted for this field

New building space that meets "Eligible Buildings Criteria":
250,000 Square Feet

New building space that was designed and constructed in accordance with green building policies or guidelines but not LEED certified:
0 Square Feet

New building space that is LEED Certified:
0 Square Feet

New building space that is LEED Silver certified:
43,000 Square Feet

New building space that is LEED Gold certified:
0 Square Feet
New building space that is LEED Platinum certified:

Indoor Air Quality

Responsible Party

Dawn Roerink
Manager of Housekeeping
Facilities Management

Criteria

Institution has adopted an indoor air quality management policy, plan, and/or practices that include regular auditing or monitoring and a mechanism for occupants to register complaints. Policies and plans adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

Occupied building space covered by an indoor air quality plan, policy, and/or practices that include regular auditing or monitoring and a mechanism for occupants to register complaints:

1,050,000 Square Feet

Total occupied building space:

1,050,000 Square Feet

A brief description of the institution's indoor air quality plan, policy, and/or practices:

Chatham University has had a ban on VOC paints and finishes since 2000. Requests for remediation or complaints can be directed to facilities using an online work order system, usable by anyone with a Chatham email address.

The website URL where information about the institution's indoor air quality initiatives is available:

http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=29&DisplayName=Facilities%20Management
Climate

This subcategory seeks to recognize institutions that are measuring and reducing their greenhouse gas emissions. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries.

Greenhouse Gas Emissions Inventory

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Part 1

Institution has conducted a GHG emissions inventory covering its Scope 1 and Scope 2 emissions. The GHG emissions inventory is publicly available, either through the American College & University Presidents’ Climate Commitment reporting site, the institution’s website, or another public website.

Part 2

Institution has conducted a GHG emissions inventory covering Scope 3 emissions. The GHG emissions inventory is publicly available, either through the American College & University Presidents’ Climate Commitment reporting site, the institution’s website, or another public website.

--- indicates that no data was submitted for this field

The website URL where the GHG emissions inventory is posted:
http://rs.acupcc.org/ghg/2058/

Does the inventory include all Scope 1 and 2 emissions?:
Yes

Does the inventory include emissions from air travel?:
Yes

Does the inventory include emissions from commuting?:
Yes

Does the inventory include embodied emissions from food purchases?:
No

Does the inventory include embodied emissions from other purchased products?:
Yes
Does the inventory include emissions from solid waste disposal?:
Yes

Does the inventory include another Scope 3 emissions source not covered above?:
No

If yes, please specify:
---

Does the inventory include a second Scope 3 emissions source not covered above?:
No

If yes, please specify:
---

Does the inventory include a third Scope 3 emissions source not covered above?:
No

If yes, please specify:
---

Does the inventory include a fourth Scope 3 emissions source not covered above?:
---

If yes, please specify:
---
Greenhouse Gas Emissions Reduction

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution reduced its net Scope 1 and Scope 2 GHG emissions per weighted campus user compared to a 2005 baseline.

For this credit, off-site, institution-catalyzed carbon offsets (i.e. those popularly known as “local offsets”) count in full. Purchased carbon offsets that have been verified by a third party may count towards a portion of the reduction. Purchased offsets that have not been third-party verified do not count.

To conduct a GHG emissions inventory, campuses may use any methodology and/or calculator that is consistent with the Greenhouse Gas Protocol’s Corporate Accounting and Reporting Standards.

The baseline GHG emissions inventory should include the same emissions sources as the performance year emissions inventory.

Submission Note:

We count the employees of our Eastside tenant companies in our weighted campus user calculations. Though they are not a part of Chatham University staff or faculty and therefore do not appear in our IPEDS data, they are significant users of our electricity for their data center.

"---" indicates that no data was submitted for this field

Scope 1 and 2 gross GHG emissions, 2005:
6,460 Metric Tons of CO2 Equivalent

Off-site, institution-catalyzed carbon offsets generated, 2005:
0 Metric Tons of CO2 Equivalent

Third-party verified carbon offsets purchased, 2005:
0 Metric Tons of CO2 Equivalent

On-campus residents, 2005:
400

Non-residential/commuter full-time students, faculty, and staff members, 2005:
689
Non-residential/commuter part-time students, faculty, and staff members, 2005:
608

Scope 1 and 2 gross GHG emissions, performance year:
9,141.50 Metric Tons of CO2 Equivalent

Off-site, institution-catalyzed offsets generated, performance year:
0 Metric Tons of CO2 Equivalent

Carbon offsets purchased, performance year:
0 Metric Tons of CO2 Equivalent

List the start and end dates of the GHG emissions performance year:

Air Travel Emissions

Responsible Party

Jennifer Lundy
Assistant Vice President of Finance and Administration
Finance and Administration

"---" indicates that no data was submitted for this field

Does the institution have policies and/or programs in place to reduce emissions from air travel?:
Yes

A brief description of the policies and/or programs:

Chatham University, upon signing the American College and University President’s Climate Committee in 2007, adopted a policy that all unnecessary airfare should be eliminated. This is enforced through both the Academic Affairs Office and the Business Office. Employees must prove that the travel is necessary, and all air travel must be arranged through the university travel agent. The agency selects for the lowest emission flight and reports on flight emissions to the Sustainability Office annually.

The website URL where information about the policies and/or programs is available:
http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=2&DisplayName=Business%20Office
Local Offsets Program

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Dining Services

This subcategory seeks to recognize institutions that are supporting a sustainable food system. Modern industrial food production often has deleterious environmental impacts. Pesticides and fertilizers used in agriculture can contaminate ground and surface water, which has potentially dangerous impacts on wildlife and human health. Furthermore, the often long-distance transportation of food to institutions produces greenhouse gas emissions and other pollution. Additionally, farm workers are often paid substandard wages, subjected to harsh working conditions, and exposed to dangerous pesticides. Institutions can use their food purchases to support their local economies; encourage safe, environmentally-friendly farming methods; and help alleviate poverty for farmers.

Please note that while dining services can also play an important role in conserving energy and water, reducing waste, and purchasing environmentally preferable materials other than food, STARS measures these impacts across the institution instead of by department; therefore, the benefits of these actions are captured in the Energy, Water, Waste, and Purchasing subcategories, respectively.

Food and Beverage Purchasing

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

This credit includes food and beverage purchases for on-campus dining services operated by the institution or the institution’s primary on-site contractor. Institution purchases food and beverages that meet at least one of the following criteria:

- Grown and processed within 250 miles of the institution
- Third-party certified (USDA Certified Organic, Marine Stewardship Council Blue Ecolabel, Food Alliance, Fair Trade, Certified Humane Raised and Handled)

Food and beverage purchases that meet multiple criteria listed above should not be double-counted.

This credit includes food and beverage purchases for on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor (e.g. Aramark, Bon Appétit Management Company, Chartwells, Sodexo). On-site franchises, convenience stores, vending machines, or concessions are excluded from this credit unless they are operated by the institution or the institution’s primary on-site contractor.

"---" indicates that no data was submitted for this field

Percentage of food expenditures that meet one or more of the criteria for this credit (0 - 100):

50

A brief description of the sustainable food and beverage purchasing program:

Chatham University’s food is provided by Parkhurst, a member of the Eat N’ Park Hospitality Group. Working with Parkhurst is a good fit for Chatham because both have similar missions pertaining to locally sourced food. In 2002 Parkhurst launched FarmSource as a part of their Ecosteps program.

The aim of the FarmSource program is to source more than 20% of all food locally. Parkhurst defines locally in the following ways:

- Produce sourced 125 miles from the point of distribution
- Dairy sourced within 150 miles and produced by independent farmers that do not use recombinant bovine somatotropin hormone (rBST)
- Eggs that are cage free, from Ohio (over 150 miles away)
- Meat and Poultry that is regionally sourced through companies like Hatfield. Artisanal products such as fresh baked bread and homemade sausages are purchased from small local businesses

The Website URL where information about the institution's sustainable food and beverage purchasing efforts is
Trayless Dining

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

--- indicates that no data was submitted for this field

Does the institution have a trayless dining program in which trays are removed from or not available in dining halls?:
Yes

A brief description of the trayless dining program:

Chatham ran a pilot program called “Trayless Tuesdays” in 2008 and it was so successful that they fully implemented a completely trayless system in 2009. Currently 99% of all meals served on campus are trayless. This includes meal plan meals, retail facility meals, and conference meals. The new system appears to have no disadvantages. In addition to using less water, soap, and labor to clean the trays Chatham has seen enormous reductions in post-consumer food waste. Before the trayless system was used, dining hall patrons filled four to five 55-gallon containers with food waste per meal period. After going trayless only half of one 55-gallon container is filled per meal.

List the year the program was started:
Sept. 4, 2009

The overall percentage of meals served on campus that are trayless:
99

The percentage of meal plan meals served on campus that are trayless:
100

The percentage of retail facility meals served on campus that are trayless:
99

The percentage of conference meals served on campus that are trayless:
100

Vegan Dining

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution offer diverse, complete-protein vegan dining options during every meal?:
Yes

A brief description of the vegan dining program:

Chatham has a large vegetarian population, with about 20% of the students being vegetarian or vegan and upwards of 50% identify as flexetarian. Chatham University offers complete-protein vegan dining options at every meal. The main dining hall has a large salad bar as well as hot vegan food during each meal period. There is always a vegetarian soup (not necessarily vegan) everyday.

We also have a vegan/vegetarian focus group that meets with Dining Services to provide feedback for the selections.

The website URL where information about the program, policy, or practice is available:
http://my.chatham.edu/departments/getpage.cfm?PageID=209&DeptID=69
Trans-Fats

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution use frying oil that does not include trans-fats and seek to avoid foods that include trans-fats in its dining operations?:

Yes

A brief description of the trans-fats avoidance program, policy, or practice:

Most of the food served is from recipes developed by the chefs from scratch. Chatham only uses non-trans-fat butter and other fats in these recipes.

Chatham University has no specific process in place to communicate trans-fats amounts in the various foods available, but information is available to students upon request.

The website URL where information about the program, policy, or practice is available:

---
Guidelines for Franchisees

This credit was marked as **Not Applicable** for the following reason:

*Institution does not have food service franchisees operating on campus.*
Pre-Consumer Food Waste Composting

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution have a pre-consumer food waste composting program?:
Yes

A brief description of the pre-consumer food waste composting program:
Chatham composites all animal, vegetable, and cardboard waste from Anderson and the Weathervane but not at the Eastside campus. (The Eastside campus does not compost pre or post consumer waste at this time because there is no space at that facility.)

The overall percentage of meals for which pre-consumer scraps are composted:
80

The percentage of meal plan meals for which pre-consumer scraps are composted:
100

The percentage of retail facility meals for which pre-consumer scraps are composted:
50

The percentage of conference meals for which pre-consumer scraps are composted:
100

The website URL where information about the composting program is available:
---
PostConsumer Food Waste Composting

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution have a postconsumer food waste composting program?:
Yes

A brief description of the postconsumer food waste composting program:

In order to compost post-consumer food waste, students must separate food trash and compostable items, recyclable items, and those that must go to the landfill. Waste receptacles at Anderson Dining Hall and at the Weathervane Snack Bar are clearly marked, with pictures and directions explaining how to separate. (There are no receptacles for sorting waste at the Eastside Campus due to space and access limitations.)

The percentage of overall meals for which postconsumer composting is available:
75

The percentage of meal plan meals for which postconsumer composting is available:
100

The percentage of retail facilities for which postconsumer composting is available:
50

The percentage of conference meals for which postconsumer composting is available:
0

Food Donation

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---” indicates that no data was submitted for this field

Does the institution donate leftover or surplus food?:
Yes

A brief description of the food donation program:

Leslie Ekstrand (General Manager of Dining Services at Chatham University) said, “We try not to have left over food ever…It’s a goal.”

Chatham’s Dining Services does have a relationship with the regional Food Bank and donates to them after large dinners, (such as Thanksgiving or other large events), when there is an atypical amount of leftovers. We do not, however, send food to the Food Bank every day because the quantity of food left over is too small.

The website URL where information about the food donation program is available:
---
Recycled Content Napkins

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution use recycled content napkins in its dining service operations?:
Yes

A brief description of the purchasing behavior:

Chatham purchases recycled content napkins from a local paper goods distributor. All of the napkins are made from 100% recycled content. Chatham also purchases coffee cups and coffee sleeves made from recycled materials.

The website URL where information about the purchasing is available:
---
Reusable Container Discounts

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does campus dining operations offer discounts to customers who use reusable mugs instead of disposable cups in to-go food service operations?:

Yes

A brief description of the reusable mug program:

Cafe Rachel sells reusable beverage containers. If you buy their mug or bring your own from home you are only charged for a small tea or coffee, even if your travel mug is a large size.

Amount of the discount offered for using reusable mugs:

0.25

Description of other reusable food- or beverage-related programs (e.g. incentives for use of reusable bags, dishware, to-go containers):

---

Reusable To-Go Containers

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does campus dining operations provide reusable containers for to-go food that are returned for cleaning and reuse?:
Yes

A brief description of the reusable to-go container program:

Chatham gives all students who purchase a meal plan, faculty and staff green plastic reusable to-go containers free of charge at the beginning of each school year. Students without meal plans may buy these containers for $5. The sustainability office underwrites the program for faculty and staff who do not have meal plans.

The website URL where information about the reusable to-go container program is available:
---
Energy

This subcategory seeks to recognize institutions that are reducing their energy consumption through conservation and efficiency, and switching to cleaner and renewable sources of energy such as solar, wind, geothermal, and low-impact hydropower. For most institutions, energy consumption is the largest source of greenhouse gas emissions, which cause global warming. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries. In addition to causing global warming, energy generation from fossil fuels, especially coal, produces air pollutants such as sulfur dioxide, nitrogen oxides, mercury, dioxins, arsenic, cadmium and lead. These pollutants contribute to acid rain as well as health problems such as heart and respiratory diseases and cancer. Coal mining and oil and gas drilling can also damage environmentally and/or culturally significant ecosystems. Nuclear power creates highly toxic and long-lasting radioactive waste. Large-scale hydropower floods habitat and disrupts fish migration.

Implementing conservation measures and switching to renewable sources of energy can help institutions save money and protect them from utility rate volatility. Renewable energy may be generated locally and allow campuses to support local economic development. Furthermore, institutions can help shape markets by creating demand for cleaner, renewable sources of energy.

Building Energy Consumption

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution has reduced its total building energy consumption per gross square foot of building space compared to a 2005 baseline.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

1 kWh = 0.003412 MMBtu

1 MWh = 3.412 MMBtu

1 therm = 0.1 MMBtu

1 kBtu = 0.001 MMBtu

1 ton-hour = 0.012 MMBtu

1 MJ = 0.000948 MMBtu

"---" indicates that no data was submitted for this field

Total building energy consumption, 2005:
2,653,808.29 MMBtu

Building space, 2005 :
723,000 Gross Square Feet

Total building energy consumption, performance year:
106,686.92 MMBtu

Building space, performance year:
1,050,000 Gross Square Feet

List the start and end dates of the energy consumption performance year:
1-1-2010- 12-31-2010
Clean and Renewable Energy

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution supports the development and use of clean and renewable energy sources using any one or combination of the following options.

Option 1: Generating electricity from clean and renewable energy sources on campus and retaining or retiring the rights to the environmental attributes of such electricity. (In other words, if the institution has sold Renewable Energy Credits for the clean and renewable energy it generated, it may not claim such energy here). The on-site renewable energy generating devices may be owned and/or maintained by another party as long as the institution has contractual rights to the associated environmental attributes.

Option 2: Using renewable sources for non-electric, on-site energy generation, such as biomass for heating.

Option 3: Catalyzing the development of off-site clean and renewable energy sources (e.g. an off-campus wind farm that was designed and built to supply electricity to the institution) and retaining the environmental attributes of that energy.

Option 4: Purchasing the environmental attributes of electricity in the form of Renewable Energy Certificates (RECs) or other similar renewable energy products that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party, or purchasing renewable electricity through the institution’s electric utility through a certified green power purchasing option.

Option 5: Using cogeneration technologies to generate electricity more efficiently. Note: generating electricity using cogeneration technology and a renewable fuel, such as biomass, is considered Option 1 and should not be counted twice.

Since this credit is intended to recognize institutions that are generating new sources of clean and renewable energy, neither the electric grid mix for the region in which the institution is located nor the grid mix reported by the electric utility that serves the institution count for this credit.

Technologies that reduce the amount of energy used but do not generate renewable energy do not count for this credit. For example, daylighting, passive solar design, and ground-source heat pumps are not counted in this credit. The benefits of such strategies are captured by OP Credit 5: Greenhouse Gas Emissions Reductions and OP Credit 7: Building Energy Consumption.

Transportation fuels, which are covered by OP Credit 14: Campus Fleet, are not included in this credit.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

\[1 \text{ kWh} = 0.003412 \text{ MMBtu}\]

\[1 \text{ MWh} = 3.412 \text{ MMBtu}\]

\[1 \text{ therm} = 0.1 \text{ MMBtu}\]
Option 1: Total clean and renewable electricity generated on site during the performance year and for which the institution retains or has retired the associated environmental attributes:
0 MMBtu

Option 2: Non-electric renewable energy generated:
128.23 MMBtu

Option 3: Total clean and renewable electricity generated by off-site projects that the institution catalyzed and for which the institution retains or has retired the associated environmental attributes:
0 MMBtu

Option 4: Total RECs and other similar renewable energy products that the institution purchased during the performance year that are Green-e certified or meet the Green-e standard's technical requirements and are third party verified:
11,532.56 MMBtu

Option 5: Total electricity generated with cogeneration technology using non-renewable fuel sources:
0 MMBtu

Total energy consumed during the performance year:
106,686.92 MMBtu

A brief description of on-site renewable electricity generating devices:
---

A brief description of on-site renewable non-electric energy devices:
Micro-channel solar thermal hot water systems on 2 largest residence halls. Sixty-four collectors, covering 1270 square feet, producing 90kw at peak power. Total thermal storage of 2260 gallons.

Purchasing

This subcategory seeks to recognize institutions that are using their purchasing power to help build a sustainable economy. Collectively, colleges and universities spend many billions of dollars on goods and services annually. Each purchasing decision represents an opportunity for institutions to choose environmentally and socially preferable products and services and support companies with strong commitments to sustainability.

Computer Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase Electronic Product Environmental Assessment Tool (EPEAT) Silver or higher products. This can take the form of purchasing policies, guidelines, or directives. This credit does not include specialized computers for which no EPEAT certified products are available. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases Electronic Product Environmental Assessment Tool (EPEAT) Silver and/or Gold registered products for standard desktop and notebook/laptop computers and monitors. This credit does not include specialized computers for which no EPEAT certified products are available.

Submission Note:

Chatham provides Apple computers, and Apple has withdrawn from EPEAT.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Cleaning Products Purchasing

Responsible Party

Dawn Roerink
Manager of Housekeeping
Facilities Management

Criteria

Part 1

Institution has an institution-wide stated preference to purchase Green Seal™ or EcoLogo™ certified cleaning products. The stated preference can take the form of purchasing policies, guidelines, or directives to purchase green cleaning products. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution’s main cleaning or housekeeping department(s) and/or contractor(s) purchase Green Seal or EcoLogo certified cleaning products. This credit does not include cleaning products for which no Green Seal or EcoLogo certified products are available.

Does the institution have an institution-wide stated preference to purchase Green Seal (tm) or EcoLogo (tm) certified cleaning products?:

Yes

The website URL where the green cleaning product purchasing policy, directive, or guidelines are posted:

http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=29&DisplayName=Facilities%20Management

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

Chatham preferences Green Seal and Eco Logo products when available. Supplies are purchased by the Housekeeping Manager only.

Does the institution wish to pursue points for Part 2 of this credit (expenditures on cleaning products)?:

Yes

Expenditures on Green Seal and/or EcoLogo certified cleaning products:

5,106.13 US/Canadian $
Total expenditures on cleaning products:
14,441 US/Canadian $

A copy of the sections of the cleaning contract(s) that reference certified green products:
FACILITIES CLEANING PRODUCTS POLICY 9-2012.docx
Office Paper Purchasing

Responsible Party
Jennifer Lundy
Assistant Vice President of Finance and Administration
Finance and Administration

Criteria

Part 1

Institution has an institution-wide stated preference to purchase recycled content office paper. This can take the form of purchasing policies, guidelines, or directives to purchase recycled content office paper. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases recycled content office paper.

Submission Note:

$7,816 or 38% of our paper purchases are not recycled content, but are sustainably sourced and either FSC or RFA approved. "---" indicates that no data was submitted for this field.

Does the institution have an institution-wide stated preference to purchase recycled content office paper?:
Yes

The URL where the recycled paper policy, directive, or guidelines are posted:
http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=2&DisplayName=Business%20Office

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

Paper:
On the Shadyside and Eden Hall campuses, paper may be purchased directly from Office Depot online, where the University has negotiated a preferred price on 30 percent recycled paper. Paper purchases should be charged to each department’s paper budget line (7120). The Copy Center can also assist in ordering paper, particularly cardstock and colored paper as they have negotiated rates and identified the best vendors for these commodities.

For printing at the Eastside campus, paper is purchased and stocked by Ikon and passed on to departments in the per print copier charges, and also provides 30 percent recycled paper.
Does the institution wish to pursue points for Part 2 of this credit (expenditures on recycled paper)?: Yes

Expenditures on 10-29 percent recycled-content office paper :
0 US/Canadian $

Expenditures on 30-49 percent recycled-content office paper :
10,516 US/Canadian $

Expenditures on 50-69 percent recycled-content office paper :
0 US/Canadian $

Expenditures on 70-89 percent recycled-content office paper (required if claiming points for Part 2):
0 US/Canadian $

Expenditures on 90-100 percent recycled-content office paper :
0 US/Canadian $

Total expenditures on office paper :
20,849 US/Canadian $
Vendor Code of Conduct

Criteria

Institution has and acts on a vendor code of conduct or equivalent policy that sets expectations about the social and environmental responsibility of vendors with whom the institution does business. Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.

Transportation

This subcategory seeks to recognize institutions that are moving toward sustainable transportation systems. Transportation is a major source of greenhouse gas emissions and other pollutants that contribute to health problems such as heart and respiratory diseases and cancer. Due to disproportionate exposure, these health impacts are frequently more pronounced in low-income communities next to major transportation corridors. In addition, the extraction, production, and global distribution of fuels for transportation can damage environmentally and/or culturally significant ecosystems and may financially benefit hostile and/or oppressive governments.

At the same time, campuses can reap benefits from modeling sustainable transportation systems. Bicycling and walking provide human health benefits and mitigate the need for large areas of paved surface, which can help campuses to better manage storm water. Institutions may realize cost savings and help support local economies by reducing their dependency on petroleum-based fuels for transportation.

Campus Fleet

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution supports alternative fuel and power technology by including in its motorized vehicle fleet (cars, trucks, tractors, buses) vehicles that are:

1. Gasoline-electric hybrid
2. Diesel-electric hybrid
3. Plug-in hybrid
4. 100 percent electric
5. Fueled with Compressed Natural Gas (CNG)
6. Hydrogen fueled
7. Fueled with B20 or higher biofuel for more than 6 months of the year; and/or
8. Fueled with E85 or higher ethanol for more than 6 months of the year.

For this credit, the institution’s motorized fleet includes all institution-owned and operated vehicles that are used for transporting people and/or goods. Heavy construction equipment (e.g. excavators and pavers) and maintenance equipment (e.g. lawn-mowers and leaf blowers) are not included in this credit.

"---" indicates that no data was submitted for this field

"---" indicates that no data was submitted for this field

Has the institution developed a bicycle plan?:
Yes

A brief description of the plan:

Chatham University was recognized by the League of American Bicyclists as a Bike Friendly University (BFU). Bicycle commuting is a significant part of the University’s sustainability and employee wellness initiatives, and the adoption of the Bicycle Commuting Tax Credit for employees and the Chatham Bike Works educational bike shop were established to support these efforts.

Chatham’s bicycle plan includes several initiatives aimed at making biking a safe and convenient option for students and faculty. The University is currently working to increase bike parking availability as well as increasing indoor bike parking and storage.

The website URL where information about the plan is available:

http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=19&DisplayName=University%20Sustainability
Mass Transit Programs

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution offer free or reduced price transit passes and/or operate a free campus shuttle?:
Yes

A brief description of the program(s), including availability, participation levels, and specifics about discounts or subsidies offered (including pre-tax options):

Chatham University offers a free campus shuttle for students, faculty and staff. Three shuttles operate daily. Chatham Eastside Shuttle loops every 20 minutes between 7am to 11pm, Monday-Friday. Oakland Shuttle loops every 30 minutes Mondays-Thursdays between 7 a.m. to 11 p.m., Fridays between 7am to 3:30 a.m., Saturdays between 9 a.m. to 3:30 p.m. and Sundays between 10 a.m. to 6 p.m. Approximately 1,000 riders per week participate in the Chatham Shuttle program while classes are in session. These “Green Machines” run on a 5 percent biodiesel blended fuel.

Additionally, students, staff and faculty are eligible to ride the University of Pittsburgh shuttles at no cost throughout the SouthSide and Oakland and University of Pittsburgh students are eligible to ride our shuttles at no cost as well. Riders must present their valid Chatham Photo ID. There are nine Pitt Shuttles which operate under regular schedules, seven days per week, throughout the year.

Free Public Transportation

Pittsburgh Port Authority Transit (PAT) offers free transportation for students, staff and faculty aboard its buses, Monongahela Incline and light rail system within any PAT zone via its Port Authority U-Pass program. Riders must present a valid, unexpired Chatham University photo ID and are free to ride at any time on any day.

Free Safe Rider Van:

Chatham participates in the University of Pittsburgh's Safe Rider Van Service which provides free evening and early morning transportation to students, faculty and staff where and when buses and shuttles are not available. Transportation service is limited to two categories: intercampus, between local residences and campus buildings. Riders are limited to 20 trips per semester. Trips are scheduled with a dispatcher during evening and early morning hours.

Condensed Work Week

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Telecommuting

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Carpool/Vanpool Matching

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution participate in a carpool/vanpool matching program?:
Yes

A brief description of the program:

Chatham participates in the Southwest PA Commission CommuteInfo program, which coordinates vanpool, carpool and now bikepool riders.

The website URL where information about the program is available:
http://www.commuteinfo.org/
Cash-out of Parking

Submission Note:

There are many free mass transportation alternatives to driving personal cars to campus: students, faculty and staff can use their Chatham photo IDs to ride PAT transit, the incline and Chatham and Pitt shuttles for free. This incentive promotes environmentally-friendly behavior; cash-out of parking is not applicable.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Carpool Discount

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution offer reduced parking fees for car and van poolers?:
Yes

A brief description of the program:
Carpoolers pay only one parking fee, split amongst themselves.
We also offer free vans for students who carpool to events, with pre-registration.

The website URL where information about the program is available:
---
Local Housing

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Does the institution have incentives or programs to encourage employees to live close to campus?:
Yes

A brief description of the incentives or programs:
Chatham owns and rents at reasonable rates many houses and apartments on and near campus, with preference given to faculty and staff. The university provides housing for many Student Affairs staff, as well as Academic Affairs staff, whose jobs require them to be on campus throughout the day and evening.

The website URL where information about the incentives or programs is available:
---
Has the institution adopted a policy prohibiting idling?:
Yes

A brief description of the policy:
In accordance with county regulations, Chatham University prohibits idling at loading docks and other boarding locations. There are signs posted that note this regulation. Furthermore, Chatham University shuttle buses and other newer vehicles on campus automatically shut down after they have been idling for a set amount of time (when in park with the emergency brake on).

The website URL where information about the policy is available:
---
Does the institution participate in a car sharing program, such as ZipCar or HourCar?:
Yes

A brief description of the program:
Chatham has hosted Zipcar since 2009. Two cars, including a Honda Insight hybrid, are located on campus. The cars are available for any Chatham community member 18 or older with a drivers license. Chatham ZipCar members may also use other university ZipCars in the city, including those at Carnegie Mellon, University of Pittsburgh, and Duquesne University.
We also have a fleet of minivans that are reservable by students for activities. (21 and over)

The website URL where information about the program, policy, or practice is available:
http://www.chatham.edu/outreach/sustainability/
Waste

This subcategory seeks to recognize institutions that are moving toward zero waste by reducing, reusing, recycling, and composting. These actions mitigate the need to extract virgin materials, such as trees and metals. It generally takes less energy and water to make a product with recycled material than with virgin resources. Reducing waste generation also reduces the flow of waste to incinerators and landfills which produce greenhouse gas emissions, can contaminate air and groundwater supplies, and tend to have disproportionate negative impacts on low-income communities. Waste reduction and diversion also save institutions costly landfill and hauling service fees. In addition, waste reduction campaigns can engage the entire campus community in contributing to a tangible sustainability goal.

Waste Reduction

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution has implemented source reduction strategies to reduce total waste generation (garbage, recycling, and compost) per weighted campus user compared to a 2005 baseline.

Total waste generation includes all materials recycled, composted, and disposed of as trash except construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP Credit 19: Construction and Demolition Waste Diversion, OP Credit 20: Electronic Waste Recycling Program, and OP Credit 21: Hazardous Materials Management.

"---" indicates that no data was submitted for this field

Weight of materials recycled, 2005 baseline year :
10.94 Tons

Weight of materials composted, 2005 baseline year :
23.06 Tons

Weight of materials disposed as garbage, 2005 baseline year :
244.57 Tons

Weight of materials recycled, performance year :
17.52 Tons

Weight of materials composted, performance year :
44.47 Tons

Weight of materials disposed as garbage, performance year :
298.09 Tons

List the start and end dates of the waste reduction performance year:
1-1-2010, 12-31-2010

On-campus residents, 2005:

Non-residential/commuter full-time students, faculty, and staff members, 2005:
689

Non-residential/commuter part-time students, faculty, and staff members, 2005:
608

On-campus residents, performance year:
471

Non-residential/commuter full-time students, faculty, and staff members, performance year:
2,881

Non-residential/commuter part-time students, faculty, and staff members, performance year:
975

Time period for weighted campus user (list the consecutive 12 month period that most closely overlaps with waste reduction performance year):
1-1-2010 - 12-31-2010

Indication of whether institution has a stated commitment to waste-reduction goals, such as zero waste:
Yes

A brief description of the plan of action to achieve waste reduction goals:

Chatham works to reduce waste primarily through reduction at the source, including packaging reduction choices for products, returnable food containers, reusable bags, the elimination of bottled water, and more.

We also work to see improved recycling annually, and increased composting opportunities.

The website URL where information about the institution’s waste reduction initiatives is available:
http://www.chatham.edu/outreach/sustainability/environment.cfm
Waste Diversion

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution diverts materials from the landfill or incinerator by recycling, composting, reusing, donating, or re-selling.

This credit does not include construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP Credit 19: Construction and Demolition Waste Diversion, OP Credit 20: Electronic Waste Recycling Program, and OP Credit 21: Hazardous Materials Management.

"---" indicates that no data was submitted for this field

Materials recycled, composted, reused, donated, re-sold, or otherwise diverted:
116.03 Tons

Materials disposed in a solid waste landfill or incinerator:
199.50 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate:

Chatham boasts a composting program in its dining facilities that gathers pre-and post-consumer materials, including takeout containers. Waste fat is sent to a regional biodiesel plant. The school–wide single–stream recycling program is successful and includes students and administration. The Waste Working Group of Chatham's Climate Committee promotes and advertises the reduction efforts at Chatham.
Construction and Demolition Waste Diversion

Responsible Party

Mary Whitney  
University Sustainability Coordinator  
Office of Sustainability

Criteria

Institution diverts non-hazardous construction and demolition waste from the landfill and/or incinerator.

Soil and organic debris from excavating or clearing the site do not count for this credit.

"---" indicates that no data was submitted for this field

Amount of construction and demolition materials recycled, donated, or otherwise recovered:

109.86 Tons

Amount of construction and demolition materials landfilled or incinerated:

0.07 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contribute to the diversion rate for construction and demolition waste:

This project was completed as a LEED Silver for commercial interiors.
Electronic Waste Recycling Program

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Part 1

Institution has a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution. Institution takes measures to ensure that the electronic waste is recycled responsibly.

Part 2

Institution has a program in place to recycle, reuse, and/or refurbish electronic waste generated by students. Institution takes measures to ensure that the electronic waste is recycled responsibly.

"---" indicates that no data was submitted for this field

Does the institution have a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution and take measures to ensure that the electronic waste is recycled responsibly?:
Yes

Does the institution have a program in place to recycle, reuse, and/or refurbish electronic waste generated by students and take measures to ensure that the electronic waste is recycled responsibly?:
Yes

A brief description of steps taken to ensure that e-waste is recycled responsibly, workers’ basic safety is protected, and environmental standards are met:

Chatham requires the e-waste be handled by a vendor that can provide proof that they are a Basel Action Network signatory, and are permitted & bonded through the PADEP permit 081 for electronic de-manufacturing.

A brief description of the electronic waste recycling program for institution-generated materials:

Chatham University recycles all institution-generated materials with two different organizations that refurbish the electronic materials and donate them to schools and other non-profit organizations.

Any non-reusable materials go to an electronics recycler that is a signatory of the Basel Action Network protocol, and is permitted & bonded through the PADEP permit 081 for electronic de-manufacturing. In addition, our vendor, ECS&R, is Pennsylvania’s 1st U.S. Environmental Protection Agency R2 Certified company for electronics recycling.
A brief description of the electronic waste recycling program for student-generated materials:

The program is the same for students, but we request that cellphones be donated to the Hope Line program that refurbishes the phones for a women’s shelter.

The website URL where information about the e-waste recycling program is available:

http://www.ecsr.net/ei-recycling.php
Hazardous Waste Management

Responsible Party
Wendy Hallows
Safety Manager
Natural and Physical Sciences

Criteria

Institution has strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seeks to minimize the presence of these materials on campus.

"---" indicates that no data was submitted for this field

Does the institution have strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seek to minimize the presence of these materials on campus?:
Yes

A brief description of steps taken to reduce hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste:

Chatham University has recently chosen to run laboratory instruction on the micro-scale to aid in reducing chemical waste. The university has invested in smaller glassware and more appropriate tools for chemistry classes in order to help reduce the amount of chemicals being wasted. We have an online purchasing database that is used to eliminate duplications of orders.

A brief description of how the institution safely disposes of hazardous, universal, and non-regulated chemical waste:

Chatham University designates that hazardous chemicals be picked up once a semester by a certified company. The university follows OSHA’s regulations and guidelines of how to properly dispose of hazardous, universal and non-regulated chemical waste. One member of the science department sits on a university wide safety committee to ensure that Chatham University is handling the hazardous materials as safely as possible.

The website URL where information about hazardous materials management is available:
---
Does the institution have a surplus department or formal office supplies exchange program that facilitates reuse of materials?:
Yes

A brief description of the program:
The Paper Exchange is a joint project of the Ikon Copy Center and the Office of Sustainability. A supplies cupboard is located in an alcove next to the Copy Center, and stocked with surplus paper, labels, folders etc. Materials are free to all.

The website URL where information about the program is available:
---
Limiting Printing

Responsible Party

Jennifer Lundy
Assistant Vice President of Finance and Administration
Finance and Administration

"---" indicates that no data was submitted for this field

Does the institution limit free printing for students in all computer labs and libraries?:
Yes

A brief description of how printing is limited:
Each student is able to print 2,000 pages a year. The number of pages a student has printed is tracked through their student username when they log onto the network. Any additional pages that a student needs may be printed for a small fee per page.

The website URL where information about the program, policy, or practice is available:
http://my.chatham.edu/documents/getdeptdocs.cfm?DeptID=2&DisplayName=Business%20Office
Is the institution's default not to print course catalogs, course schedules, and directories, but instead make these materials available online?:

Yes

A brief description of the practice:

Chatham University uses a web-based Learning Management System (Moodle). Professors upload materials for their courses on Moodle for students to view, download, submit, or discuss information. Professors are to use Moodle for all papers distributed to the students including syllabi.

Chatham University posts all documents and forms online on the intranet for the various departments on campus including the business office, registrar, and academic affairs. If a student needs a form they can fill it out on the computer and send it via email to the necessary department without any paper being used. All documents and forms are for Chatham University student, faculty and staff can be found on the myChatham network.

The website URL where information about the practice is available:

---
Has the institution implemented a campus-wide inventory system to facilitate the reuse of laboratory chemicals?:
Yes

A brief description of the program:
Chatham University has a chemical inventory system that does not allow anyone to reorder chemicals until all the chemicals are used on campus. Once they are used up then we can order in a new supply. The purpose of this is to not order more chemicals when there are already chemicals on campus.

The website URL where information about the practice is available:

Move-In Waste Reduction

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

"---" indicates that no data was submitted for this field

Does the institution have a program to reduce residence hall move-in waste?:
Yes

A brief description of the program:

Recycling opportunities are available for students in areas with designated bins for food, clothing and school supplies. The housekeeping department makes special pick-ups of cardboard for recycling at this time.

The website URL where information about the program is available:
---
Move-Out Waste Reduction

Responsible Party
Heather Black
Director of Student Activities
Student Affairs Department

"---" indicates that no data was submitted for this field

Does the institution have a program to reduce residence hall move-out waste?:
Yes

A brief description of the program:

Recycling opportunities are available for students in areas with designated bins for food, clothing and school supplies. The housekeeping department makes special pick-ups of cardboard recycling during this time.

Through the Office of Residence Life (ORL), the university encourages a socially responsible clean up during move-out. E-mailed newsletters and announcements at residence hall meetings are utilized to educate the student population about the donation bins provided for food, clothing and school supplies. The ORL staff reviews the contents of the bins as well as any items left behind in the rooms. Move-out in 2011 generated 4 medium boxes of food donations for the food bank, 78 bags of clothing for Goodwill, and one box of school supplies for the Salvation Army. Furniture is an additional category that the ORL plans to offer next year. Any abandoned items that are not re-usable are thrown away.

The website URL where information about the program is available:

This subcategory seeks to recognize institutions that are conserving water and making efforts to protect water quality. Pumping, delivering, and treating water is a major energy user, so institutions can help reduce energy consumption and the greenhouse gas emissions associated with energy generation by conserving water. Likewise, conservation and effective stormwater management are important in maintaining and protecting finite groundwater supplies. Water conservation and effective stormwater management also reduce the need for effluent discharge into local surface water supplies, which helps improve the health of local water ecosystems.

Water Consumption

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution has reduced its total water consumption per weighted campus user compared to a 2005 baseline.

Total water consumption includes both potable and non-potable water.

"---" indicates that no data was submitted for this field

Water consumption, 2005 baseline year:
29,364,000 Gallons

Water consumption, performance year:
2,574,000 Gallons

List the start and end dates of the water consumption performance year:
1-1-2010, 12-31-2010

On-campus residents, 2005:
400

Non-residential/commuter full-time students, faculty, and staff members, 2005:
689

Non-residential/commuter part-time students, faculty, and staff members, 2005:
508

On-campus residents, performance year:
471

Non-residential/commuter full-time students, faculty, and staff members, performance year:
2,881

Non-residential/commuter part-time students, faculty, and staff members, performance year:
Time period for weighted campus user (list the consecutive 12 month period that most closely overlaps with water consumption performance year):
1-1-2010, 12-31-2010

Indication of whether institution has a stated commitment to water use reduction goals:
Yes

A brief description of the plan of action to achieve water use reduction goals:
Chatham works to reduce water consumption and wastewater throughout our campuses, in recognition of the importance of our region's stormwater problems.

We practice water conservation in as many places as possible, from our trayless dining initiatives, no lawn irrigation policy (except for new grass seeding), new construction policies and retrofit programs in residence halls.

The website URL where information about the institution’s water conservation initiatives is available:
http://www.chatham.edu/outreach/sustainability/environment.cfm
Stormwater Management

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Part 1

Institution has adopted a stormwater management policy, plan, and/or strategies that mitigate the stormwater runoff impacts of new construction, major renovation, and other projects that increase paved surface area on campus or otherwise significantly change the campus grounds.

The policy, plan, and/or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

The policy, plan, and/or strategies cover the entire campus. While the specific strategies or practices adopted may vary depending on project type and location, this credit is reserved for institutions that mitigate stormwater runoff impacts consistently during new construction. Implementing a strategy or strategies for only one new development project is not sufficient for this credit.

Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution has adopted a stormwater management policy, plan, or strategies that mitigate the stormwater runoff impacts of ongoing campus operations.

The policy, plan, or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

Though specific practices adopted may vary across the campus, the policy, plan, and/or strategies cover the entire institution. Implementing strategies for only one building or area of campus is not sufficient for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a policy, plan, and/or strategies to reduce stormwater runoff from new development projects? :
Yes

Does the institution have a policy, plan, and/or strategies to reduce stormwater runoff from ongoing campus operations? :
Yes
A brief description of the institution's stormwater management initiatives:

One major environmental concern in Pittsburgh is the management of stormwater. With an antiquated storm system, large rain events have a harmful effect on its waterways. Chatham has implemented a number of techniques to reduce the effects of stormwater. A historical pond has been restored to capture rainwater from the Mellon Green. The new athletic field allows water to infiltrate and slowly releases it into the sewer system, after the main push of the rain event. In 2010, a rain barrel was installed outside of the Rea house to capture rooftop run off and for watering the surrounding garden and in summer of 2011, a rain garden was installed behind Dilworth that contains certain species of plants capable of withstanding more saturation from water runoff.

All new buildings will be planned to have a rain garden, and all existing buildings where a rain garden is possible are having them installed over a 10-year period.

The website URL where information about the institution's stormwater management initiatives, plan or policy is available:
http://www.chatham.edu/outreach/sustainability/environment.cfm

Does the institution have a living or vegetated roof?:

Yes

A brief description of the institution's living or vegetated roof:

In addition to what may be the oldest green roof in America, above our Mellon Board Room (installed in early 1900s with two mature honey locusts as features of the plantings), we have a smaller green roof on the new addition to Mellon. More green roofs are planned, including one on the Eddy Theater to support beehives.

Does the institution have porous paving?:

Yes

A brief description of the institution's porous paving:

Porous paving is laid behind Rea, Laughlin and Beatty Halls. We also use brick laid on sand, wood chips on sand, and gravel for pathways.

Does the institution have retention ponds?:

Yes

A brief description of the institution's retention ponds:

Mellon Pond has been redesigned to manage runoff from Mellon and the surrounding hillside.

Does the institution have stone swales?:

No

A brief description of the institution's stone swales:

---

Does the institution have vegetated swales?:
Yes

A brief description of the institution's vegetated swales:

A rain garden and vegetated swale are located behind Dilworth Hall.

Does the institution employ any other technologies or strategies for stormwater management?:
Yes

A brief description of other technologies or strategies for stormwater management employed:

We have a complicated and extensive system of piping, sand beds and baffles beneath an artificial turf playing field designed to slow the water down in heavy rain events and allow reabsorption before reaching the public sewer system in lighter events.
Waterless Urinals

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Submission Note:

Due to concerns about struvite and other mineral accumulation in pipes, we have chosen not to install waterless urinals.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Building Water Metering

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Non-Potable Water Usage

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution use non-potable water (e.g., harvested rainwater or graywater) for irrigation and/or other applications?:
Yes

A brief description of the source of non-potable water and how it is used:
Rainwater is collected in a large rain barrel at Beatty and used for watering hall’s surrounding shrub border.

The percentage of irrigation water usage from recovered, reclaimed or untreated sources:
---

The percentage of building space using water from recovered, reclaimed or untreated sources:
---

The percentage of water used in utility plants from recovered, reclaimed or untreated sources:
---

The website URL where information about the program, policy, or practice is available:
---
Xeriscaping

Responsible Party

Steven Horhut
Master Gardener and Arborist
Facilities Management

"---" indicates that no data was submitted for this field

Does the institution use xeriscape landscaping techniques, including the selection of drought tolerant plants?:
Yes

A brief description of the program or practice:

Chatham University is in a high rainfall area therefore, our xeriscaping is limited. We do preference native plants adapted to the region in our plantings. The native plants are able to survive the area’s wet, high humidity and cold/thaw cycle without supplemental watering.

The website URL where information about the program or practice is available:
---
Weather-Informed Irrigation

Responsible Party

Steven Horhut
Master Gardener and Arborist
Facilities Management

"---" indicates that no data was submitted for this field

Does the institution use weather data or weather sensors to automatically adjust irrigation practices?:
Yes

A brief description of how weather data or sensors are used:

We do not water grass regularly and we do not have a built-in irrigation system. In rare times of extreme heat we may water newly-established trees or borders, but this is done on a high-stress basis only. In the fall we re-seed the upper campus quad, due to summer camp damage, and this requires irrigation. This is only done during this re-seeding process, and not at any other time of the year.

The website URL where information about the practice is available:
---
Coordination and Planning

This subcategory seeks to recognize colleges and universities that are institutionalizing sustainability by dedicating resources to sustainability coordination, incorporating sustainability into their primary campus plans, and developing plans to move towards sustainability. Staff and other resources help an institution organize, implement, and publicize sustainability initiatives. These resources provide the infrastructure that fosters sustainability within an institution. Strategic and physical campus plans guide an institution and its physical development. These important documents establish an institution’s priorities and influence budgeting and decision making. Incorporating sustainability into these plans is an important step in making sustainability a campus priority and may help advocates implement sustainable changes. Sustainability plans and climate plans provide a road map for how to achieve sustainability goals.

Sustainability Coordination

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution has a sustainability committee, office, and/or coordinator that are tasked by the administration or board of trustees to advise on and implement policies and programs related to sustainability on campus.

The committee, office, and/or coordinator focus on sustainability broadly (i.e. not just one sustainability issue, such as climate change) and cover the entire institution. A committee, office, or coordinator that focuses on just one department or school within the institution does not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a sustainability committee?:
Yes

The charter or mission statement of the committee or a brief description of the committee's purview and activities:

The mission of the Chatham University Campus Climate Commitment Committee is to reduce the university's carbon footprint and achieve sustainability in energy use as described in the Presidents' Climate Commitment with communication and involvement of the entire Chatham community.

The Climate Committee membership includes faculty, staff, and students of Chatham University who come together biweekly to discuss and plan initiatives to push Chatham towards becoming a carbon neutral campus. The committee includes four subcommittees that work on specialized programming for campus. These committees are as follows: Alternative Transportation, Waste Reduction, Energy, and Outreach.

Members of the committee, including affiliations:

- Walter Fowler-Vice-President of Finance and Administration
- Mary Whitney, Sustainability Coordinator
- Steven Karas, Assistant Professor of Health Sciences
- Deborah DeLong, Assistant Professor of Marketing
- Joellen Popma, Assistant Professor of Counseling Psychology
- Tracy Bartel, Assistant Professor of Human Development
- Cynthia Magistro, Professor of Counseling Psychology
- Jeri Hale, Secretary to the Assistant Dean, College Graduate Studies, College of Continuing and Professional Studies.
- Patricia DeMarco, Director of the Rachel Carson Institute
The website URL where information about the sustainability committee is available:
http://www.chatham.edu/outreach/sustainability/involved.cfm

Does the institution have a sustainability office?:
Yes

A brief description of the sustainability office:
Chatham University's Office of Sustainability is the administrative home of all campus sustainability projects. The office works to initiate sustainable change on campus. One of the larger projects Chatham is working on is moving the university towards carbon neutrality. We coordinate with University departments, faculty, and student groups to take steps to a more sustainable living, learning, and working environment for the campus community.

The number of people employed in the sustainability office:
2

The website URL where information about the sustainability office is available:
http://www.chatham.edu/outreach/sustainability/

Does the institution have a sustainability coordinator?:
Yes

Sustainability coordinator's name:
Mary Whitney

Sustainability coordinator's position title:
University Sustainability Coordinator
A brief description of the sustainability coordinator’s position:

The Coordinator will be responsible for the following:

- Analyze current sustainability practices at the university, including recycling, transportation, energy use, land use, and other areas of sustainability against current research and trends worldwide, propose policies and new practices based on that analysis, and work with administration, facilities, faculty, staff, students and outside contractors to implement them at all campuses.

- Co-chair the President’s Climate Commitment Committee. Work with administration, facilities and institutional advancement to meet carbon neutrality goals for all campuses.

- Lead collaboration and communication on sustainability practices at the university and beyond, coordinating the efforts of members of the Chatham community and community partners.

- Develop and implement formal and informal educational initiatives, via formal courses and informal workshops on environmental studies, environmental citizenship and sustainability. Lead informal environmental education professional development programs. Develop outreach activities to complement academic programs.

- Represent and share Chatham’s sustainability efforts to a larger community via conference presentations, serving on committees and boards of local, regional and national organizations, publications, events, etc.

- Advise Chatham students in the area of environmental issues and sustainability practices, including serving as the advisor to Green Horizons student group, academic advising, and serving as a member of tutorial boards as appropriate.

- Administer sustainability program budget. Work with Institutional Advancement to seek funding for sustainability initiatives.

- Manage student employees, research assistants and interns.

The website URL where information about the sustainability coordinator is available:

http://www.chatham.edu/academics/programs/undergraduate/environmental/faculty_get.cfm?FacultyID=55
Strategic Plan

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution’s current, formally adopted strategic plan or equivalent guiding document includes sustainability at a high level. The plan covers the entire institution.

An amendment to the strategic plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a physical campus plan (which is covered in PAE Credit 3: Physical Campus Plan) nor an independent sustainability plan (which is covered in PAE Credit 5: Sustainability Plan) counts for this credit.

Submission Note:

http://www.presidentsclimatecommitment.org/

"---“ indicates that no data was submitted for this field

Year the strategic plan or equivalent was completed or adopted:

2,010

Does the institution's strategic plan or equivalent guiding document include the environmental dimensions of sustainability at a high level?:

Yes

A brief description of how the strategic plan or amendment addresses the environmental dimensions of sustainability:

Chatham’s 20/20 Vision Plan states how important the environmental dimensions of sustainability are. The 20/20 Vision Plan states that among the many legacies of Rachel Carson is her alma mater’s longstanding commitment to environmental education, research and advocacy. The establishment of the Rachel Carson Institute, the designation of the campus as an arboretum, the hiring of some excellent new faculty, the formation of a student environmental club and living/learning hall, and the development of a very effective focus on writing about place in the MFA program are but a few examples of Chatham’s ongoing commitment to the environment. More recently, Chatham became a Charter Signatory to the American College and University Presidents Climate Commitment, whose members have pledged to reduce and hopefully eliminate their campus greenhouse gas emissions.

The President’s Climate Commitment also details different dimensions of sustainability throughout Chatham University’s campus. The aspects the document outlines are landscape, energy production and transfer, building systems and building energy use and efficiency.
Does the institution's strategic plan or equivalent guiding document include the social dimensions of sustainability at a high level?:
Yes

A brief description of how the strategic plan or amendment addresses the social dimensions of sustainability:

According to the 20/20 Vision Plan, the definition of sustainability that Chatham’s Board of Trustees adopted makes the relationship between sustainability and the environment clear:

Chatham University defines sustainability as the capacity of society to meet its current needs without compromising the ecological, social and economic systems on which society will rely for meeting future needs.

Integrating sustainability into the fabric of the university will require a coordinated and sustained university-wide effort of a kind rarely seen before. Coordination and collaboration across all aspects of the university will be required because sustainability – more than any of the other Mission Initiatives -- touches upon nearly every area of the university: operations, curriculum, student life, research, and the university’s interaction with everyone from community members to policy makers.

The President’s Climate Commitment also details different dimensions of sustainability throughout Chatham University’s campus. The aspects the document outlines are landscape, vehicles and education.

Does the institution's strategic plan or equivalent guiding document include the economic dimensions of sustainability at a high level?:
Yes

A brief description of how the strategic plan or amendment addresses the economic dimensions of sustainability:

The definition of sustainability that Chatham’s Board of Trustees adopted makes the relationship between sustainability and the environment clear:

Chatham University defines sustainability as the capacity of society to meet its current needs without compromising the ecological, social and economic systems on which society will rely for meeting future needs.

The President’s Climate Commitment also details different dimensions of sustainability throughout Chatham University’s campus. The aspects the document outlines are energy production and transfer, building systems and building energy use and efficiency.

The website URL where information about the strategic plan is available:
http://www.chatham.edu/about/pdf/vision_2020.pdf
Physical Campus Plan

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution’s current plan for its physical campus (commonly referred to as the campus master plan) includes sustainability at a high level.

An amendment to the plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a strategic plan (which is covered in PAE Credit 2: Strategic Plan) nor an independent sustainability plan (which is covered in PAE Credit 4: Sustainability Plan) counts for this credit.

Plans developed at the system level are eligible for this credit. Likewise, multiple plans which together cover the institution’s entire physical campus are eligible for this credit.

"---" indicates that no data was submitted for this field

Does the institution's physical campus plan include sustainability at a high level?:

Yes

A brief description of how the physical campus plan or amendment includes sustainability:

We have demonstrated our commitment to sustainability by creating a new School of Sustainability and the Environment, that the Board approved in February 2009. The primary goal of the School will be to provide innovative, interdisciplinary education and research opportunities for undergraduate, graduate and professional students to better prepare them to identify and solve challenges related to sustainability and the environment. The School will be located at Eden Hall Farm campus, although its programs and activities will take place on all of the university’s campuses. The responsibility of the School’s dean will be to provide leadership of the School. Similarly, the Eden Hall Farm Campus that Chatham acquired in May 2008 will be dedicated primarily, but not exclusively, to teaching, research and demonstration projects related to sustainability and the environment.

The year the physical campus plan was developed or adopted:

2,010

The website URL where the physical campus plan is available:

http://www.chatham.edu/about/pdf/vision_2020.pdf
Sustainability Plan

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution has a sustainability plan that was developed with input from faculty, staff, and students. The plan includes measurable goals with corresponding strategies and timeframes to achieve the goals. The plan need not be formally adopted.

The plan covers multiple sustainability topics and issues. Plans focused exclusively on climate change, which are covered by PAE Credit 5: Climate Plan, are not eligible for this credit.

Strategic or master plans that cover sustainability may count for this credit if they meet the other criteria outlined above.

"---" indicates that no data was submitted for this field

Does the institution have a sustainability plan that meets the criteria for this credit?:
Yes

A brief description of how multiple stakeholder groups were involved in developing the plan:

When the newly constituted Strategic Plan Coordinating Committee (chaired by Diane Holder) met for the first time in February of 2009, the members of the Committee suggested that Vision 20/20 be “refreshed” in light of recent developments such as the economic recession.

A brief description of the plan’s measurable goals:

When the newly constituted Strategic Plan Coordinating Committee (chaired by Diane Holder) met for the first time in February of 2009, the members of the Committee suggested that Vision 20/20 be “refreshed” in light of these developments. The inclusion of these new developments, although relatively few in number, had a wide-ranging impact on Vision 20/20 because each impacted more than one section of the plan. What follows is a “refreshed” version of Vision 20/20, not a reinvention. The major difference between the original and “refreshed” versions is the inclusion of the new developments in the latter. References to objectives or goals that have already been accomplished (such as the creation of area studies certificates) or to enrollment figures that existed at the time the original was written (and upon which assumptions were made that have proved to be correct) have been left as they were. References to actions that have been impacted by the inclusion of the new developments have been modified accordingly. In all other material respects, the “refreshed” version stays true to the vision found in the original Vision 20/20.

A brief description of how progress in meeting the plan’s goals is measured:
We measure our progress based on our green house gas emissions, waste and water audits, sustainability survey, and STARS.

The website URL where more information about the sustainability plan is available:
http://www.chatham.edu/about/pdf/vision_2020.pdf

The year the plan was developed or last updated:
2010
Climate Action Plan

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution has a formal plan to mitigate its greenhouse gas emissions. The plan includes a measurable, numerical goal or goals and a corresponding date or dates by which the institution aims to achieve its goal(s). The plan has been adopted by the institution’s administration.

A formal sustainability plan (i.e. a plan that has been adopted by the administration) counts for this credit if it includes climate change goals, strategies, and corresponding timeframes. Such a plan may also count toward PAE Credit 4: Sustainability Plan.

"---" indicates that no data was submitted for this field

Does the institution have a plan to mitigate its greenhouse gas emissions that meets the criteria for this credit?:

Yes

A brief summary of the climate plan’s long-term goals:

Climate neutrality by 2025

A brief summary of the climate plan’s short-term goals:

Chatham has identified high-priority projects to show an actual reduction in our carbon footprint. They have been assigned a priority, based on costs, ROI and carbon reduction.

#1. Enhanced Metering and Power Quality: Completed energy audit of the main campus and Eastside suggests energy management systems units could be installed in each building at a cost of $55,295 with an energy savings of 387,650 kWh and a cost savings of approximately $48,486 including demand savings.

#2. Lighting Efficiency Upgrade
The lighting fixtures in many campus buildings can be upgraded to T8 ballasts. Replacement high efficiency electronic ballast will cost approximately $96,800.00, with an anticipated energy savings of 616,711 kWh and a cost savings of approximately $60,999.00. This project estimate includes both demand savings and occupancy sensors.
The motor controls and lighting upgrades projects would, when fully implemented, show an estimated 10% annual real reduction in emissions, within a maximum 4-year ROI time frame.

#3. Photovoltaic Power - 50 kW Array on the Eastside Building
The array would consist of high efficiency PV panels with array combiners, a DC/AC inverter; disconnect switches and an isolation
transformer. Cost estimates: around $408,000.00 to install, yield 85,600 kWh annually at a savings of $11,124.00 per year.

#4. Centralized Geothermal Co-generation

On the Shadyside campus, we plan to consolidate all heating and cooling into one centralized natural-gas fired co-generation plant. The plant’s three megawatt co-generation plant would be located in the center of the quad below grade. Co-generation units would provide electricity to upper campus grid via new connections. We are also planning for a natural gas cogeneration / geothermal system to be located under the parking lot at Eastside. Preliminary numbers show an estimated cost of $3-5 million dollars, with estimated reduction of 15,000,000 kWh, about $1 million saved annually.

**Year the climate plan was formally adopted or approved:**

2009

**An indication of whether institution has made a commitment to reduce GHG emissions a specific amount by a target year:**

Yes

**List which emissions (scope 1, 2, and/or 3) are included in its GHG emissions commitment:**

Scope 1, 2 & 3

**The reduction level (percentage) institution has committed to:**

100%

**The baseline year the institution used in its GHG emissions commitment:**

Jan. 1, 2007

**The baseline emissions level institution used in its GHG emissions commitment:**

15391

**The target year the institution specified in its GHG emissions commitment:**

Jan. 1, 2025

**The website URL where information about the climate plan is available:**

Diversity and Affordability

This subcategory seeks to recognize institutions that are working to advance diversity and affordability on campus. In order to build a sustainable society, diverse groups will need to be able to come together and work collaboratively to address sustainability challenges. People of color and low-income communities tend to suffer disproportionate exposure to environmental problems. This environmental injustice happens as a result of unequal and segregated communities. To achieve environmental and social justice, society must work to address discrimination and promote equality. The historical legacy and persistence of discrimination based on racial, gender, religious, and other differences makes a proactive approach to promoting a culture of inclusiveness an important component of creating an equitable society. Higher education opens doors to opportunities that can help create a more equitable world, and those doors must be open through affordable programs accessible to all regardless of race, gender, religion, socio-economic status and other differences. In addition, a diverse student body, faculty, and staff provide rich resources for learning and collaboration.

Does the institution have a diversity and equity coordinator?:

Yes

Diversity coordinator’s name:

Sean McGreevey, Ph.D.

Diversity coordinator's position title:

Assistant Dean of Students

A brief description of the diversity coordinator's position:

Dr. Sean McGreevey serves as Assistant Dean of Students and coordinates a variety of activities to support multicultural initiatives at Chatham University.

The website URL where information about the diversity and equity coordinator is available:

---
Measuring Campus Diversity Culture

Responsible Party

Sean McGreevey
Assistant Dean of Students
Academic Affairs Department

Criteria

Institution assesses attitudes about diversity and equity on campus and uses the results to guide policy, programs, and initiatives.

Institution may measure its culture of diversity and equity using one assessment for the entire institution or using separate assessments that taken together cover the entire institution.

Assessments conducted during the previous five years are eligible for this credit.

Has the institution assessed attitudes about diversity and equity on campus in a way that meets the criteria for this credit?:

Yes

A brief description of the assessment(s):

When students are applying to the university we ask them to provide us with cultural information. We document students’ race, state or country of residence and gender (for graduate students).

We also conducted the ACUHO-I Survey recently and are planning on using the data to improve programs and initiatives here at Chatham University. The ACUHO-I Survey was conducted by Educational Benchmarking Incorporated and sponsored by the Association of College and University Housing Officers – International. The survey was conducted in the Spring 2012 semester and was delivered electronically to all undergraduate residential students with a 75.9% response rate.

Year the assessment was last administered:

2,011

A brief description of how the results of the assessment(s) are used in shaping policy, programs, and initiatives:

Since Chatham University has a percentage of students who are international, it recognizes that there are many different faiths at the university. Recently Chatham University has developed an “All Faith Worship Service” where students of all faiths can come together and worship. Chatham University was awarded the NACA Outstanding Diversity Achievement Campus Program Award for the “All Faith Worship Service.” We also use our assessments for information in what we should put into our curriculum. Chatham University makes sure diversity is a part of every program.

Support Programs for Underrepresented Groups

Responsible Party
Frank Greco
Director of Human Resources
Human Resources Department

Criteria

Institution has mentoring, counseling, peer support, affinity groups, academic support programs, or other programs in place to support underrepresented groups on campus.

"---" indicates that no data was submitted for this field

Does the institution have mentoring, counseling, peer support, affinity groups, academic support programs, or other programs in place to support underrepresented groups on campus?:
Yes

A brief description of the programs sponsored by the institution to support underrepresented groups within the student body:

At Chatham University, the PACE center offers academic support programs, career development, and a learning center. We also the Gateway adult student program, for non traditional age students. There is counseling, mentoring and the opportunity to gain academic credit for knowledge gained through employment, job training, volunteer and civic activities, military service and travel. Each group of students who identify as an at-risk or protected group have a liaison in the office of student affairs (Minority Students, Commuter Students, Veteran Students, Transfer Students, Gateway Adult Students, Student Athletes, Resident Students, Graduate Students, International Students and Out of State Students).

Each month, events are held on campus to celebrate diversity including Hispanic Heritage Month, LGTB History Month, Native American Indian Heritage Month, Black History Month, Women of Color HerStory Month, Women’s History Month, Asian-Pacific Islander Month and Jewish Heritage Month.

Additionally, several student organizations are sponsored by the Chatham Student Government and support and promote multicultural initiatives including:
Students Against Sexual Oppression
Black Student Union
Amnesty International
Feminist Activists Creating Equality
Muslim Student Association
All Faith Gathering
A brief description of the programs sponsored by the institution to support underrepresented groups within the faculty:

Chatham University has participated in the Scholar Rescue Fund for the past four years. The program allows Chatham University to sponsor a faculty member from an underrepresented country to teach at Chatham University. Our first rescue scholar now has a full assistantship in a doctoral program at another university.

A brief description of the programs sponsored by the institution to support underrepresented groups within the staff:

We have several programs that provide opportunities for masters-level women, generally underrepresented in academia, to get teaching experience and credit needed for advancement. The MFA Creative Writing program and the MAP to PsyD participate in this program. Since 1999, we have had an EO and Affirmative Action Policy which we review in all new employee orientation sessions and supervisor training on the Employee Manual. As part of the policy, we make good faith efforts in supporting diversity initiatives. Below are some highlights and accomplishments from our policy:

• Our executive team has 66% women and 33% minority representation.
• Our management team has 66% women and 13.8% minority representation.
• We hired a minority female as Assistant VP of Admission.
• We hired a minority female as Residence Life Coordinator.
• We promoted a minority male with the understanding that he completes trade school training as a locksmith. This was the first minority hired into the skilled trade job classification.
• We hired a female as Assistant Head Gardener. This was the first female in the grounds classification.
• Our security has 22% women and 11% minority representation. Police and security are traditionally dominated by male representation.

Support Programs for Future Faculty

Responsible Party

Wenying Xu
Vice President for Academic Affairs
Academic Affairs Department

Criteria

Institution administers and/or participates in a program or programs to help build a diverse faculty throughout higher education.

Such programs could take any of the following forms:

- Teaching fellowships or other programs to support terminal degree students from underrepresented groups in gaining teaching experience. (The terminal degree students may be enrolled at another institution).
- Mentoring, financial, and/or other support programs to prepare and encourage undergraduate or other non-terminal degree students to pursue further education and careers as faculty members.
- Mentoring, financial, and/or other support programs for doctoral and post-doctoral students from underrepresented groups.

"---" indicates that no data was submitted for this field

Does the institution administer and/or participate in programs that meet the criteria for this credit?:

Yes

A brief description of the institution’s programs that help increase the diversity of higher education faculty:

For the past four years Chatham University has participated in the Rescue Scholars Program. Chatham University commits to the salary for one of the scholars who is an at-risk faculty or future faculty in another country. We support their visa, etc. Our first-ever Rescue Scholar now has a full doctoral assistantship at George Mason University.

Chatham University also has a Master of Fine Arts Creative Writing terminal degree. We have a program that allows students in the program to acquire teaching experience, and offer mentorships and internships for the students.

Chatham University also has a Master of Arts in Psychology transition to the Doctoral program that allows students, especially women, to move from a master’s degree to a PhD program. This program allows them to teach with a Master’s degree.

Chatham University also has a nursing program that is a transition to a doctor of nursing program with similar features.

Affordability and Access Programs

Responsible Party
Sean McGreevey
Assistant Dean of Students
Academic Affairs Department

Criteria

Institution has policies and programs in place to make it accessible and affordable to low-income students. Such policies and programs may include, but are not limited to, the following:

- Policies and programs to minimize the cost of attendance for low-income students
- Programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds
- Programs to prepare students from low-income backgrounds for higher education such as the federal TRIO programs
- Scholarships for low-income students
- Programs to guide parents of low-income students through the higher education experience
- Targeted outreach to recruit students from low-income backgrounds
- Other admissions policies or programs
- Other financial aid policies or programs

Institutions are not required to have programs or policies in each of the above areas in order to earn this credit. They may pursue the policies and programs that are appropriate for their context.

"---" indicates that no data was submitted for this field

Does the institution have policies and programs in place to make it accessible and affordable to low-income students?:
Yes

A brief description of the institution’s participation in federal TRIO programs:
---

A brief description of the institution’s policies and programs to minimize the cost of attendance for low-income students:

To minimize the cost of attendance for low-income students, Chatham offers need-based grants that are awarded to students based on financial need and academic strength. Academic strength is determined based on GPA, SAT/ACT results and test-optional scores. Students with high financial need and high GPA and SAT/ACT scores will receive the highest grant awards from institutional funds. As a result, we are using need as a factor to determine if students can be awarded additional financial aid from Chatham, which does not have to be repaid. We are, therefore, lowering their costs that they may have to otherwise borrow in student loan funds.
A brief description of the institution’s programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds:

Chatham University is also awarded Supplemental Educational Opportunity (SEOG) funds on an annual basis from the federal government. Through the availability of these funds we are identifying the neediest students in our student body, and awarding them based on the date in which their FAFSA was received and their EFC. SEOG funds are allocated to low-income students, on a first-come, first-served basis. Receipt of the FAFSA and the Expected Family Contribution (EFC) are used to determine which students are awarded this particular grant. These funds may only be awarded to students who are Pell eligible. Information on the SEOG and Chatham Grant are available at:

http://www.chatham.edu/admissions/aid/undergraduate/types.cfm

A brief description of the institution’s programs to prepare students from low-income backgrounds for higher education:

As part of its on-going effort to recruit students from a wide variety of socio-economic backgrounds, the Office of Admission routinely visits high schools in Allegheny County to meet with high school students to discuss college entrance requirements; some of the schools have student populations where over 50% participate in free or reduced-lunch programs. The Office of Admission has designated counselors who are assigned to working with military students and Pittsburgh Promise students, some of whom are low-income, to help guide them through the application process.

A brief description of the institution’s scholarships for low-income students:

Students with high financial need and high GPA and SAT/ACT scores will receive the highest grant awards from institutional funds. As a result, we are using need as a factor to determine if students can be awarded additional financial aid from Chatham, which does not have to be repaid. We are, therefore, lowering their costs that they may have to otherwise borrow in student loan funds. Chatham University is also awarded Supplemental Educational Opportunity (SEOG) funds on an annual basis from the federal government. Through the availability of these funds we are identifying the neediest students in our student body, and awarding them based on the date in which their FAFSA was received and their EFC.

A brief description of the institution’s programs to guide parents of low-income students through the higher education experience:

Chatham University offers a Financial Aid 101 information session for students and parents. We also have an information session during the new student orientation.

http://www.chatham.edu/admissions/aid/undergraduate/types.cfm
A brief description of the institution’s targeted outreach to recruit students from low-income backgrounds:

Some specific initiatives that demonstrate Chatham’s dedication to providing access for low-income students are highlighted below. For five years, an admission counselor has been on the planning committee of a Pittsburgh-colleges initiative, College Success 101, which annually provides public school students in the region with information about financial aid and scholarships and other aspects of college life. Additionally, Chatham works with alumnae involved with two community based organizations (YWCA and SHINE) that serve young women in low-income areas of Pittsburgh by providing them with information about higher education opportunities. Chatham has established a partnership with the Youth and Arts sector of Manchester Craftsmen’s Guild, a local organization that serves students in the Pittsburgh public school region, many of whom are low-income students; Chatham provides an art scholarship and information about the college search process. Additionally, Chatham has established a partnership with a local Girl Scout troop that targets girls living in specific low-income housing projects in Western PA; faculty, staff and students are engaged with the troop to bring a host of services to the girls in that particular troop. Each year, the Office of Admission charters a bus to bring low-income high school students from New York City, Philadelphia and Harrisburg to participate in our annual scholarship event. Without transportation to campus, overnight housing and food, many of these young women would not be able to visit our campus to engage with professors and experience campus life prior to making their college selection.

A brief description of the institution’s other admissions policies and programs:

First-year student admission is for applicants entering directly from high school, without enrolling in prior post-secondary course work (other than courses completed while attending high school).

Admission to Chatham University is determined by the candidate’s academic record, her promise as a student at Chatham, and commitment to continued personal growth. Chatham gives preference to students that come from a strong college preparatory background. Chatham encourages a minimum of four years of English, three years of mathematics, three years of science, and three years of social science. The meeting of minimum requirements itself does not ensure admission to Chatham. Acceptance is contingent upon a candidate’s completion of secondary school requirements and is based on careful review of all credentials presented by the candidate.

First-year student applicants must submit the following:

- Completed application for admission
- Official high school transcripts
- SAT (Chatham code: 2081) or ACT (Chatham Code: 3538) scores
- Essay or writing sample
- One or more letters of recommendation from guidance counselor or teachers.

Students may apply using our SAT optional policy and choose not to submit their SAT scores at the time of application. If not submitting their scores, in addition to the required application materials, applicants must submit the following:

- Résumé
- Graded academic writing sample
- Complete an on campus interview (highly recommended)
- Portfolio (optional)

If an applicant feels that these materials do not adequately represent her academic abilities or explain her academic history, she is encouraged to submit additional explanatory materials to strengthen her application.

Further, prospective students are strongly encouraged to arrange for a personal tour of campus and meet with an Admission Counselor. The Office of Admission is open Monday through Friday from 9 a.m. to 5 p.m., and on selected Saturdays (prospective students should
call ahead for the availability of Saturday visits). If it is not possible to schedule a campus visit, prospective students should contact the Office of Admission to schedule an interview with an alumnae representative in their area.

A brief description of the institution’s other financial aid polices or programs:

Chatham University is proud to offer both need-based financial aid and merit-based scholarships to incoming undergraduate students. Our Financial Aid website is designed to assist students with the financial aid process. We provide information on the financial aid application process, scholarships, loans, plus many other topics.

A brief description of the institution’s other policies and programs not covered above:

Human Resources

This subcategory seeks to recognize institutions that have incorporated sustainability into their human resources programs and policies. This includes recognition for treating and remunerating their workers responsibly and fairly. An institution’s people define its character and capacity to perform; and so, an institution’s achievements can only be as strong as its community. An institution can bolster the strength of its community by making fair and responsible investments in its human capital. Such investments include offering benefits, wages, and other assistance that serve to respectfully and ethically compensate workers. Investment in human resources is integral to the achievement of a healthy and sustainable balance between human capital, natural capital, and financial capital.

In addition, this subcategory recognizes faculty and staff training and development programs in sustainability. Faculty and staff members’ daily decisions impact an institution’s sustainability performance. Equipping faculty and staff with the tools, knowledge, and motivation to adopt behavior changes that promote sustainability is an essential activity of a sustainable campus.

Sustainable Compensation

Responsible Party

Frank Greco
Director of Human Resources
Human Resources Department

Criteria

Institution evaluates, and updates as appropriate, its wages and benefits policies and its guidelines for contractors operating on campus to ensure that total compensation (wages plus benefits) for all on-campus workers is sufficient to enable these employees to meet their basic needs, as defined by the institution. This evaluation is completed at least once every three years.

Student workers are not covered by this credit.

While wages and total compensation set in the following ways may constitute sustainable compensation, institutions should conduct a basic needs assessment to ensure that the total compensation is adequate before claiming points for this credit:

- Paying prevailing wages for job type or classification
- Paying average or above average wages for the region or city where the institution is located
- Paying minimum wages or a set amount above the minimum wage

Policies and practices adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

Total number of employees working on campus (including contractors):
499

Number of employees (including contractors) that the institution ensures earn sustainable compensation:
499

A brief description of how the institution ensures that its lowest-paid workers (including contractors, if applicable) receive sustainable compensation:

Chatham University offers all of its employees a living wage therefore all employees are ensured to receive sustainable compensation, including contractors, copy center, dining service, bookstore, security and parking employees. Compensation levels were compared to living wage calculations for Pittsburgh using data from MIT's living wage calculator.

The most recent year total compensation for the institution’s lowest-paid workers (including contractors, if applicable) was evaluated to ensure that it was sustainable:
The website URL where information about the institution’s compensation policies and practices is available:
---
Employee Satisfaction Evaluation

Criteria

Institution conducts a survey or other evaluation that allows for anonymous feedback at least once every five years to measure employee satisfaction. The survey or equivalent may be conducted institution-wide or may be done by individual departments as long as all departments are covered by a survey. The institution has a mechanism in place to address issues raised by the evaluation.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Staff Professional Development in Sustainability

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution makes available training and/or other professional development opportunities in sustainability to all staff at least once per year.

Separate training opportunities for each department would count for this credit, as long as each staff member has an opportunity to learn about sustainability at least once per year.

It is not necessary that each staff member attend such trainings; the credit is based on making training available to all staff.

This credit applies to staff members only; it does not include faculty members.

The following training opportunities are not sufficient for this credit:

• Specialized training for a small group of staff
• The opportunity to participate in an institutional sustainability committee or group

"---" indicates that no data was submitted for this field

Does the institution make training and professional development opportunities in sustainability available to all staff?:
Yes

A brief description of the sustainability trainings and professional development opportunities available to staff:

At Chatham University we train our student affairs employees in sustainability and green practices. The School of Sustainability and Environment and the Sustainability Office have a sustainability speakers program and we have sustainability ambassadors from the university's admissions office. We also train our facilities employees on green facilities operations (as part of our membership in AICUP) and have several green cleaning seminars for all housekeeping employees at Chatham University.

The Rachel Carson Institute also provides speakers, lectures, presentations that are all free to employees, students and community members on various aspects of sustainability.

The website URL where information about staff training opportunities in sustainability are available:
---
Sustainability in New Employee Orientation

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution covers sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff.

"---" indicates that no data was submitted for this field

Does the institution cover sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff?:

Yes

A brief description of how sustainability is included in new employee orientation:

As part of every new employee orientation the Sustainability Coordinator speaks about Chatham’s sustainability initiatives in order to familiarize the new employees about sustainable practices and the expectations for employees. The following is a list of the new employee orientations from the last two years:

April 1, 2010
October 28, 2010
March 3, 2011
July 13, 2011
September 27, 2011
March 22, 2012
July 12, 2012

Socially Responsible Retirement Plan

Responsible Party

Frank Greco
Director of Human Resources
Human Resources Department

"---" indicates that no data was submitted for this field

Does the institution offer a socially responsible investment option for retirement plans?:
Yes

A brief description of the socially responsible investment option for retirement plans:

Chatham University offers a generous retirement plan that employees are eligible to sign up for after one year of employment, however, employees are eligible immediately if they already have a retirement plan with one of the two companies the university uses. The university will match employee contributions generously with our retirement plan. The University gives the option of using two different companies to allow you the opportunity to choose the plan that is right for you. Employees are able to choose from Fidelity Investments or TIAA-CREF.

Matching contributions:
Employee Contribution: Employer Contribution:
2% 5%
3% 8%
4% 9%
5% 10%

Fidelity Investments
With Fidelity Investments there is the convenience of deducting your contributions automatically pretax. Meaning that you may lower the amount of income taxes withheld each period. You will pay no taxes until you withdraw them from your account. Fidelity gives you the flexibility to choose investment options that range from more conservative to more aggressive so that you may have a well-diversified investment portfolio and you will feel comfortable with the plan you have chosen.

www.fidelity.com
800-544-4774

TIAA-CREF
TIAA-CREF gives you two options with their company.
Option A: The simplified one-decision strategy you have the comfort of knowing that professional managers are automatically adjusting your portfolio to keep it on track with your retirement time horizon. It allows for simple and easy investing. With this option funds are...
available for target retirement years in five-year increments. Investments are automatically adjusted from a more aggressive to a more conservative allocation as the target retirement date approaches.

Option B: Build your own portfolio strategy is great for employees who prefer to choose among investments in different asset classes and develop your own portfolio to match your time horizon and tolerance for assuming risk. With this option you can also get objective retirement planning advice, including fund-specific portfolio recommendations, through an independent service.

---
**Investment**

This subcategory seeks to recognize institutions that make investment decisions that promote sustainability. Most institutions invest some of their assets in order to generate income. Together, colleges and universities invest hundreds of billions of dollars. Schools with transparent and democratic investment processes promote accountability and engagement by the campus and community. Furthermore, institutions can support sustainability by investing in companies and funds that, in addition to providing a strong rate of return, are committed to social and environmental responsibility. Investing in these industries also supports the development of sustainable products and services. Finally, campuses can engage with the businesses in which they are invested in order to promote sustainable practices.

Throughout this subcategory, the term “sustainable investment” is inclusive of socially responsible, environmentally responsible, ethical, impact, and mission-related investment.

Committee on Investor Responsibility

Criteria

Institution has a formally established and active CIR or similar body that makes recommendations to the Board of Trustees on socially and environmentally responsible investment opportunities across asset classes, including proxy voting. The body has multi-stakeholder representation, which means its membership includes faculty, staff, and students and may include alumni, trustees, and/or other parties.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

A general committee that oversees the institution's investments does not count for this credit unless social and environmental responsibility is an explicit part of its mission and/or agenda.

This credit applies to institutions with endowments of US $1 million or larger. Institutions with endowments totaling less than US $1 million may choose to omit this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Shareholder Advocacy

Criteria

There are two possible approaches to earning this credit.

1) Institution filed or co-filed one or more shareholder resolutions that address sustainability or submitted one or more letters about social or environmental responsibility to a company in which it holds investments, during the previous three years.

and/or

2) Institution has conducted a negative screening of its entire investment pool within the last three years. This could take the form of prohibiting investment in an industry (e.g. tobacco or weapons manufacturing) or participating in a divestment effort (e.g. companies operating in South Africa during apartheid). The negative screen includes selling all but $2,000 or less of the affected direct holdings and writing a letter to all fund managers encouraging them to remove affected holdings as well.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the shareholder advocacy activities of those entities.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Positive Sustainability Investments

Responsible Party

Jennifer Lundy
Assistant Vice President of Finance and Administration
Finance and Administration

Criteria

Institution invests in any of the following:

- Sustainable industries, such as renewable energy or sustainable forestry
- Businesses selected for exemplary sustainability performances
- Sustainability investment funds, such as a renewable energy investment fund
- Community development financial institutions (CDFI)
- Socially responsible mutual funds with positive screens.

Investment in a socially responsible mutual fund with only negative screens (i.e. one that excludes egregious offenders or certain industries, such as tobacco or weapons manufacturing) does not count for this credit.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

"---" indicates that no data was submitted for this field

Total value of the investment pool:
61,000,000 US/Canadian $

Value of holdings in sustainable industries, such as renewable energy or sustainable forestry:

Does the institution have a student-managed sustainable investment fund through which students are able to develop socially and/or environmentally responsible investment skills and experience with governance?:

Yes

A brief description of the student-managed sustainable investment fund:

Chatham University has a sustainable investment fund that is managed by students who are a part of the Climate Committee. The students can decide based on their knowledge they gained as members of the Climate Committee, which socially and/or environmentally responsible investments Chatham University should make. Originally proposed to Climate Committee in 2011, the fund has been approved and will be accepting proposals for 2013.

The website URL where information about the fund is available:

---
Does the institution have a policy, practice or directive to consider the social and/or environmental impacts of investment decisions, in addition to financial considerations?:

Yes

A brief description of the sustainable investment policy:

At the March board of trustees meeting the following was approved: While the primary responsibility of the Investment Committee is to oversee the management of the University’s endowment to generate real asset growth for the long-term, the University is also concerned with demonstrating its commitment to sustainability within its investment portfolio. As such, the Investment Committee will evaluate sustainable fund options where appropriate within the asset allocation policy at least annually. US Equity allocation will include 5% to a sustainable investment fund.

The website URL where information about the policy is available:

Investment Disclosure

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Public Engagement

This subcategory seeks to recognize institutions that give back to their communities through community service, engagement, and partnerships. Volunteerism and the sense of compassion that community service helps develop are fundamental to achieving sustainability. From tutoring children to removing invasive species to volunteering at a food bank, students, faculty, and staff can make tangible contributions that address sustainability challenges through community service. Community engagement can help students develop leadership skills while deepening their understandings of practical, real-world problems. Institutions can contribute to their communities by harnessing their financial and academic resources to address community needs. For example, faculty research and courses can focus on how to address community problems. In addition, colleges and universities can offer incentives for their graduates to pursue careers that fill community needs, and schools can use their prominence to advocate for sustainability outside of their institutions.

Community Sustainability Partnerships

Responsible Party

David Hassenzahl
Dean, School of Sustainability and the Environment
Academic Affairs Department

Criteria

Institution has formal partnership(s) with the local community, including school districts, government agencies, non-profit organizations, or other entities, to work together to advance sustainability within the community.

"---" indicates that no data was submitted for this field

Does the institution participate in community sustainability partnerships that meet the criteria for this credit?:

Yes

A brief description of the institution’s sustainability partnerships with the local community:

Chatham University strongly believes in community partnership. Chatham University outreach centers, institutes, and programs make significant contributions in the areas of environmental science and sustainability, women's leadership, and global understanding. Our formal partnerships include higher energy climate consortium, urban ecology collaborative, American Association of University Women, Association of Women's Business Centers (AWBC) among others.

http://www.chatham.edu/cwe/resources/index.cfm

http://pittsburghclimate.org/whatCanWeDo/higherEducation.htm

The website URL where information about sustainability partnerships is available:

---
Inter-Campus Collaboration on Sustainability

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution collaborates with other colleges and universities to support and help build the campus sustainability community.

"---" indicates that no data was submitted for this field

Does the institution collaborate with other colleges and universities to support and help build the campus sustainability community?:

Yes

A brief summary of papers, guides, presentations, and other resources the institution has developed to share their sustainability experience with other institutions:

All of our sustainable publications, newsletter and guides are made available for anyone to see on our website.

The names of local, state, regional, national, and other campus sustainability organizations or consortia in which the institution participates and/or is a member:

The Higher Education Climate Consortium (HECC)
ASSHE
American College & University Presidents Climate Commitment

A brief summary of additional ways the institution collaborates with other campuses to advance sustainability:

We are a part of an organization called The Pittsburgh Higher Education Climate Consortium (HECC) that works on sustainable issues in Pittsburgh, PA. Pittsburgh’s institutions of higher education have accepted responsibility for leading the way in reducing greenhouse gas emissions and have collaborated to form The Higher Education Climate Consortium (HECC) to cooperatively implement recommendations. HECC meets quarterly in an effort to address the short-term (within 2 years), medium-term (within 5 years) and long-term (beyond 5 years) recommendations on how colleges, universities and their 70,000 students can reduce their greenhouse gas emissions. For the Pittsburgh Climate Action Plan, Version 2.0, HECC developed a series of recommendations addressing energy use, transportation, recycling & waste management, and general sustainability. Our sustainability coordinator, Mary Whitney, is the 2012 HECC Co-chair.
The website URL where information about cross-campus collaboration is available:

http://pittsburghclimate.org/higher-education/
Sustainability in Continuing Education

Criteria

Part 1

Institution offers continuing education courses that are focused on or related to sustainability.

Courses that can be taken for academic credit are not included in this credit. They are covered by the *Curriculum* subcategory.

Part 2

Institution has a sustainability-related certificate program through its continuing education or extension department.

**Submission Note:**

Chatham does not offer not-for-credit continuing education programs.

This credit was marked as **Not Applicable** for the following reason:

*Institution does not offer continuing education or community education programs.*
Community Service Participation

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

Criteria

Institution engages its student body in community service, as measured by the percentage of students who participate in community service.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

"---“ indicates that no data was submitted for this field

The number of students engaged in community service:
950

Total number of students, which may exclude part-time, continuing education and/or non-credit students:
2,270

The website URL where information about the institution’s community service initiatives is available:
---
Community Service Hours

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

Criteria

Institution engages students in community service, as measured by average hours contributed per full-time student per year.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

"---" indicates that no data was submitted for this field

The number of student community service hours contributed during a one-year period:
1,150

Total number of students, which may exclude part-time, continuing education and/or non-credit students:
2,270

The website URL where information about the institution’s community service initiatives is available:
---
Sustainability Policy Advocacy

Responsible Party
Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution advocates for federal, state, or local public policies that support campus sustainability or that otherwise advance sustainability.

The policy advocacy must be done by the institution, not by students or a student group.

"---" indicates that no data was submitted for this field

Has the institution advocated for federal, state, and/or local public policies that support campus sustainability or that otherwise advance sustainability?:
Yes

A brief description of how the institution engages in public policy advocacy for sustainability, including the issues, bills, and ordinances for or against which the institution has advocated:

Chatham University is in the process of working with Richland Township, PA and the PA Department of Environmental Protection to revise building code to allow green on-lot sanitation such as living machines and constructive wetland water treatment. Chatham University hopes to be model green sanitation so others will follow.

Chatham University also is working with a collation in city of Pittsburgh, PA to support ALCOSAN’s implementation of the EPA’s stormwater policy. Chatham University and other members of Coalition Action, United Clean, Water Action, and the City of Pittsburgh among others are working to allow green stormwater infrastructure to be included in legislation.

The website URL where information about the institution’s advocacy efforts are available:
---
Trademark Licensing

Criteria

Part 1

Institution is a member of the Fair Labor Association or Worker Rights Consortium.

Part 2

Institution has signed on to participate in the Designated Suppliers Program.

Submission Note:

Although Chatham University is not a member at this time, Chatham's bookstore, follettbooks.com, is a Fair Labor Association member.

http://www.fairlabor.org/affiliate/follett-higher-education-group

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Graduation Pledge

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

"---" indicates that no data was submitted for this field

Does the institution administer a graduation pledge through which students pledge to consider social and environmental responsibility in future job and other decisions?:

Yes

A brief description of the graduation pledge program:

The graduation pledge on sustainability is voluntary for all students. The students will be able to wear an identifying ribbon to signify that they have made the graduation pledge. The graduation pledge is through Graduation Pledge Alliance.

The website URL where information about the graduation pledge program is available:

---
Community Service on Transcripts

Responsible Party
Heather Black
Director of Student Activities
Student Affairs Department

"---" indicates that no data was submitted for this field

Does the institution include community service achievements on student transcripts?:
Yes

A brief description of the practice:

Chatham University offers a co-curricular transcript. The Co-Curricular Transcript is an official document of Chatham University just like an Academic Transcript, but designed to recognize and validate student certifications, honors, awards, leadership positions, and other campus and community involvement. Chatham University is proud of the community service that the students, faculty and staff have been involved in. Chatham University has been admitted to the 2012 President’s Higher Education Community Service Honor Roll for engaging its students, faculty, and staff in meaningful service that achieves measurable results in the community. This is Chatham University’s second consecutive year being named this honor.

The website URL where information about the practice is available:
---
Farmers' Market

Responsible Party

David Hassenzahl
Dean, School of Sustainability and the Environment
Academic Affairs Department

"---" indicates that no data was submitted for this field

Does the institution host a farmers' market for the community?:
Yes

A brief description of the farmers’ market:

Chatham University has a farm campus in the rural Pine Richland area that is called our Eden Hall campus. The vegetables that are grown there are sold in a farmers' market at the main campus outside our café.

The website URL where information about the market is available:

Innovation

These credits recognize institutions that are seeking innovative solutions to sustainability challenges and demonstrating sustainability leadership in ways that are not otherwise captured by STARS.

Innovation 1

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

1) Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.

3) The innovative practice, policy, program, or outcome should have occurred within the past three years.

4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.

5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.

6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

7) Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

8) While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit.

9) Outcomes, policies, and practices that are innovative for the institution’s region or school type are eligible for innovation credits.

10) When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

"---" indicates that no data was submitted for this field

A brief description of the innovative policy, practice, program, or outcome:

As of the fall semester of 2011, Chatham University has eliminated all sales of bottled water on campus. Instead the university encourages students to carry reusable water bottles and has installed water coolers around campus and in every major building where student can fill up their bottles with high quality filtered water. Each student who is enrolled at Chatham University receives a free refillable stainless steel water bottle. Additional Chatham reusable water bottles can be purchased at a subsidized price of two dollars for all Chatham University students, faculty, staff, and visitors.

Chatham University is the first university in Pittsburgh, Pa to implement a campus wide bottle ban initiative and was recently featured in...
both Food Service Director magazine and the CBS Pittsburgh news for this campaign to reduce waste. Chatham University believes this to be an innovative policy because it's ban includes all sales of bottled water: in vending machines, at athletic events, in all dining services locations, and for all catered events.

10) When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

"---" indicates that no data was submitted for this field

A brief description of the innovative policy, practice, program, or outcome:

Eden Hall Campus is the first academic institution designed from the beginning to integrate sustainable development, learning, and living. Housing the new School of Sustainability and the Environment and a re-envisioned Rachel Carson Institute, the campus weaves together broad issues of sustainability to inform decision-making and the marketplace. Over time, it will evolve into a comprehensive campus that, linked with Chatham’s Shadyside Campus, connects physically and virtually to students, faculty, professionals, and leaders around the world. Members of Eden Hall Campus engage in immersive learning, rooted in the place but looking out to the world. Eden Hall Campus serves as a living laboratory where students and faculty analyze, reflect, create and live sustainably, inspired by each other and their
There are four main principles informing the development of the Eden Hall Campus: academic excellence, community building, robust natural environment, and high performance built environment. For academic excellence, Eden Hall Campus offers a model curriculum, focusing on systems thinking, interdisciplinary research, sustainability, and hands-on learning. For community building, strong relationships that develop across the campus and through global outreach via a “virtual campus” will enhance lifelong collaboration, leadership, and activism. For a robust natural environment, Eden Hall will restore natural systems, healthy streams and forests, and a focus on the “genius of the land” is designed to inspire and nurture a regenerative relationship with nature and its bounty. For the high performance built environment, demonstrating the principles of high performance design, Eden Hall Campus’ elegant and efficient buildings will provide a laboratory for testing best practices.

The new campus is proposed to generate all energy on site and treat all wastewater on site. The goal for on-site carbon emissions will be net-zero. Structures on campus will be designed as living buildings, generating all of their own energy with renewable resources, capturing and treating all of their water on site, and using resources efficiently and for maximum beauty. The design of each building, site and the campus overall will focus on transportation, views, materials, water systems, and energy systems to elevate the campus to the highest levels of sustainable performance.

The development plan will maintain appropriate stream buffers to protect water resources. The campus will protect and restore nearly 200 acres of the forest for teaching, research and demonstration, and will protect arable land, preserving productive landscapes and scenic views.

Chatham University believes this to be an innovative program because we are one of the first universities to design a campus from the ground up to be an embodiment of sustainable principles - integrated sustainable development, learning and living for the future.

---*

A brief description of the innovative policy, practice, program, or outcome:

Chatham Bike Works opened in April 2010. It is the result of a collaboration between the Bike Support Working Group of Chatham Climate Committee, the Office of Sustainability, and the student-run Bike Collective. It is a free work and indoor bike-parking space available at no cost to all Chatham biking community members. Chatham Bike Works offers shop hours and monthly “hands on” workshops. Bike Works offers a workshop every month, focusing on some aspects of bicycling: basic maintenance skills, on-the-road repairs and how to ride safely. Chatham University also offers the Bicycle Commuter Act tax credit of twenty dollars a month to registered bicycle commuters. Chatham was one of the first, if not the first, employer in the United States to offer this credit to
employees. We have provided assistance to over 30 universities in the last two years to help them set up their own program. Chatham University has made the news several times for this innovative project (see website links below).

---

"---" indicates that no data was submitted for this field

A brief description of the innovative policy, practice, program, or outcome:

Chatham University installed building-integrated micro-channel solar thermal collectors on its research greenhouse and roof-mounted installations on the two highest-occupancy residence halls on the Shadyside Campus. It is one of the largest solar thermal hot water installations in Pennsylvania. The project incorporates advanced micro-channel technology from Solar Tomorrow, Inc. to provide student residents with solar-heated hot water. This project is just one example of Chatham’s commitment to reducing its global warming pollution and reaching carbon neutrality by 2025.
Some project details:
Number of collectors: 64
- Peak power: 90 kW [307,000 BTU/hr]
- Total area of collectors: 1,270 sq ft
- Total thermal storage of 2,260 gallons
- Collector made of 100% aluminum alloy containing 70% recycled content
- Collectors fully recyclable after 20-25 year lifespan
- 1,160,000 BTU of solar energy stored in tanks on an average sunny day
- 15 to 20 tons of CO2 prevented from entering the atmosphere per year.

The installation on the greenhouse is designed as a teaching system and as a research project. There are two different types of collectors installed on the greenhouse: glazed collectors and unglazed collectors with a stone composite surface. The collectors are installed at the ground level to showcase the installation and system elements to students and visitors. Signage describe the basics of the technology and provide information about the project, and a computer display next to the collectors shows live system data. The system is designed to be controllable by learners, so that the installation can be used in class.

Chatham University received the “Green Power: Make It…” award from Citizens for Pennsylvania’s Future (PennFuture) for this innovative project.

New Student Orientation

Responsible Party

Heather Black
Director of Student Activities
Student Affairs Department

Criteria

Institution provides details about how it incorporates sustainability into new student orientation.

"---” indicates that no data was submitted for this field

Does new student orientation include presentations, speakers, or skits that address sustainability and take place in large venues that most or all first-year students attend?:

Yes

Provide a brief description of the presentations, speakers or skits:

At orientation we offer a session that focuses on educating students on sustainability and Chatham’s commitment. Session is usually 30-45 minutes.

Does new student orientation incorporate sustainability information into presentations (e.g., made by Residential Advisors to individual dorm floors)?:

Yes

Provide a brief description of the presentations:

These are usually scheduled by RAs and Eco-reps for the first hall meeting, timing over the semester varies.

Does new student orientation actively engage students in activities that raise awareness about sustainability, highlight how sustainability plays out on campus, or allows students to take part in a productive green activity?:

Yes

Provide a brief description of the activities:

We offer a community service project where we focus on promoting the Eden Hall campus. The School of Sustainability gives an introduction, shares about the initiatives at the farm, and students have the opportunity to volunteer with faculty.
Does the institution make new student orientation more sustainable via efforts such as a zero-waste meal or carbon offsets?:
Yes

Provide a brief description of the efforts:

All our meals are trayless, we compost, etc (see Dining Credits for more details.) for Orientation, we have volunteers guiding new students on proper compost techniques.

Does the institution incorporate sustainability into new student orientation in other ways?:
Yes

Provide a brief description:

All students are encouraged to think about sustainable items they can bring with them. Below is the list we send them…

Environmentally Sustainable School Supplies
What to bring:
1. Cloth bags to tote your purchases from area shops and grocery stores.
2. A bicycle. Chatham is a bike-friendly campus, and bikes are a convenient mode of transportation.
3. Use reusable mugs. You can purchase a Café Rachel mug and then you receive a discount on coffee when using it.
4. Stereos, televisions, printers, computers, lamps and other appliances are all available in Energy Star models, which reduce energy use significantly as compared to other models.
5. Power Strips. Power strips cut down on vampire loads – the power drain that occurs when an electronic device is turned “off” but still plugged into the electrical socket. Plugging such electronic equipment as cell phone chargers, stereos and computers into a power strip that can be shut off at night or when you are in class, saves energy.
6. Compact fluorescent bulbs, an energy-saving alternative to incandescent bulbs.
What not to bring:
1. A computer printer. Utilize on-campus printing sources.
2. Incandescent bulbs. They use three times the power of compact fluorescent bulbs.
Food Education

Criteria

Institution provides education about eco-positive food and gardening techniques.

Submission Note:

Chatham has a complete Food Studies program. For complete details, please see http://www.chatham.edu/academics/programs/graduate/mafs/

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Food and Beverage Purchases

Criteria

Institution provides details of its food and beverage purchases.

Submission Note:

See OP Credit 6

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Confinement-Free Food Purchases

Criteria

Institution provides details of its confinement-free animal product purchases.

Submission Note:

See OP Credit 6

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Vegetarian-Fed Food Purchases

Criteria

Institution provides details of its vegetarian-fed animal product purchases.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Hormone-Free Food Purchases

Criteria

Institution provides details of its hormone-free animal product purchases.

Submission Note:

See OP Credit 6

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Seafood Purchases

Criteria

Institution provides details of seafood products purchased that meet Marine Stewardship Council Blue Ecolabel standards and/or Monterey Bay Aquarium Seafood Watch guidelines.

Submission Note:

See OP Credit 6

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Dishware

Responsible Party

Mary Whitney
University Sustainability Coordinator
Office of Sustainability

Criteria

Institution provides details of the dishware its provides at its dining services locations.

"---" indicates that no data was submitted for this field

Does the institution offer reusable dishware at its dining services locations?:
Yes

Does the institution offer plastic dishware at its dining services locations?:
No

Does the institution offer polystyrene (Styrofoam) dishware at its dining services locations?:
No

Does the institution offer post-consumer recycled content dishware at its dining services locations?:
Yes

Does the institution offer biodegradable / compostable dishware at its dining services locations?:
Yes

Does the institution offer other types of dishware at its dining services locations?:
Yes

Provide a brief description.: returnable take-out containers
Energy Initiatives

Criteria

Institution provides details about its energy initiatives.

Submission Note:

See OP Credit 7

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Energy Use by Type
