1. Do you think that, going forward, electricity in Maryland should be generated...?

<table>
<thead>
<tr>
<th>Source of Electricity</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>More from renewable energy sources, such as wind and solar</td>
<td>70</td>
</tr>
<tr>
<td>More from fossil fuel energy sources, such as coal and natural gas</td>
<td>16</td>
</tr>
</tbody>
</table>

2. I am going to read you a proposal related to energy and electricity here in Maryland.

Maryland must, by law, work to reduce pollution that causes climate change. To help meet that law, Maryland power plants pay a fee based on the amount of pollution they create. There is a proposal to use a portion of the money collected from the pollution fee to help move, or transition, the state off its six remaining coal power plants. Estimates range from forty to eighty million dollars to be used for three primary purposes: to increase energy from wind and solar, to provide job retraining and financial support for laid-off workers from closed coal power plants, and to provide economic support to communities where coal plants close.

Do you favor or oppose this proposal? (IF RESPONDENT SAYS "FAVOR" OR "OPPOSE," ASK:) And would you strongly (favor/oppose) this or somewhat (favor/oppose) it?

<table>
<thead>
<tr>
<th>Position</th>
<th>Count</th>

+ Asked of one-third the respondents (FORMS A/D),
++ Asked of one-third the respondents (FORMS B/E),
+++ Asked of one-third the respondents (FORMS C/F).

8. As you may know, there is a process for drilling for natural gas that is called fracking. Fracking is not allowed in Maryland, but Maryland could purchase fracked gas from other states as we move off of coal for electricity. Would you prefer that Maryland use only renewable energy sources to replace coal or that Maryland use renewable energy sources AND fracked gas bought from other states to replace coal?

(IF RESPONDENT SAYS "NOT SURE," ASK:) Well, if you had to choose, which way do you lean?

<table>
<thead>
<tr>
