

[Help build momentum for a just and equitable transition to 100% clean energy here in Grand Rapids.](#)

Take Action!

Dear Friend,

Grand Rapids can be a leader for 100% clean energy -- but not without your support!

[Sign the petition to let Mayor Bliss and local leaders know that you support a community-wide goal of 100% clean energy in Grand Rapids by 2030!](#)

Grand Rapids has already committed to powering municipally-owned buildings with clean energy by 2025. However, this goal leaves our businesses and residential homes behind. If the city wants to be a leader on environmental issues, all of our residents and businesses need to be fully powered by clean energy too!

[Show your support for 100% clean energy for our entire community here in Grand Rapids, now!](#)

By signing this petition, you are showing Mayor Bliss and local leaders that the time to act on climate change is now! The more supporters we have signing this petition, the more likely we can make this community-wide clean energy goal a reality in our city.

We know this goal is realistic -- already, 125 cities and towns¹ across the country have made similar commitments to 100% clean energy. After Traverse City, Grand Rapids would be the second city in Michigan to make a community-wide commitment to 100% clean energy.

[Take action now -- sign the petition for a just and equitable transition to 100% clean energy for all in Grand Rapids.](#)

It's time for Grand Rapids to be a clean energy leader! Our petition will ensure Mayor Bliss knows that Grand Rapidians like you are ready to support a just and equitable transition to 100% clean energy, clean air, good jobs, and affordable energy for all!

Sincerely,
Jordan Chrispell
West Michigan Clean Energy Organizer for Beyond Coal and Ready for 100 Campaigns

P.S. Can you share this action with at least five friends, family members, or people in Grand Rapids now?
