Our Imperative: Vote for the Environment

by Richard Morley Baron,
Chapter Political Committee Chair

Michigan and our nation face unprecedented threats to our air and water quality. Global warming imminently threatens our entire biosphere. Whether it is Asian Carp, large-scale water withdrawals, petroleum pollution, CAFO waste, or emissions from coal-fired power plants (see pages 8-11), our Legislature and our Congress need informed leaders to take sensible but aggressive action to protect our environment. Candidates who do not support environmental protection, or who resist any regulation of pollution in the name of a free market economy, clearly endanger the health and welfare of our planet and our children’s future.

Ideally, every voter would take the time to research and interview each candidate on their ballot. But the Sierra Club has done this time consuming work so you can quickly determine those candidates who are committed to the preservation of our irreplaceable natural resources.

I hope that every Sierra Club member believes that they have a duty to actively support and vote for candidates that the Club has determined to be environmentally responsible. Our failure to be actively involved in our electoral process is a tacit authorization to allow the spoiling of the natural resources in this state.

So please, make use of this electoral edition of The Mackinac. Make note of the endorsed candidates in your district (see pages 6-7), and VOTE on Nov. 2.

As the famous Chinese proverb says, “It is better to light one candle than to curse the darkness.”

Support your Michigan Chapter Sierra Club

Getting information into your hands as a Sierra Club member is a top priority of the Michigan Chapter. That’s because you are the most powerful force for protecting our air, water, land and communities. Information about the best environmental candidates and how we can create a cleaner, brighter future for our state are the fuel that makes this organization run. That’s why we bring you *The Mackinac* two times a year, and the on-line *Michigan Chapter Update* twice a month.

Support the environmental organization that believes in you! Find out more on pages 20-21, or go online at www.michigan.sierraclub.org.

Voting for Michigan’s Future

by Jean Gramlich, Chapter Chair

Michigan stands at an important point in our political history. Next year, based upon the results of the 2010 Census, the newly elected legislature, governor and courts will re-district the state, re-drawing the lines that define our electoral districts.

Because Michigan has been losing population, we will most likely lose at least one seat in Congress, reducing our state’s influence at the federal level. After the last census, one of our environmental champions, Congressman David Bonior, lost his seat through redistricting. At the state level, redistricting will likely result in significant changes to Michigan’s political landscape.

Those who win this election will control re-districting—and where they draw the lines will have significant influence over election outcomes for the next ten years. Never doubt that the corporate polluters, dirty energy producers, water hogs and others will come out in force to elect people who will vote their way in both the legislative arena and in re-districting. We can’t afford to sit on our hands—a lot is at stake.

Our group and chapter Political Committees have worked hard to vet candidates on all levels—national, state and local—who will vote for the environment and re-district Michigan in a fair and balanced way. This issue of *The Mackinac* lists all of our endorsed candidates. They all need our help. Please consider getting involved in a campaign by making phone calls, walking a neighborhood or contributing money to a candidate of your choice. Your involvement can make a difference!
Do One Thing!

by Mitch Mitchell, Southeast Michigan Political Committee Chair

These are tough economic times. Families and are hurting, and so are organizations that depend upon “disposable income” for donations and membership. The Sierra Club, including our Chapter’s political program, is not immune to those factors.

The economy is affecting everything, including the outcome of the November election. But who we elect will determine how well our legislature will safeguard the health and beauty of the Great State of Michigan. They will guide our use of energy, water and alternative fuels, and hopefully make sure that unscrupulous corporations do not slowly poison our children.

There are some who are cynical about the prospects for progressive candidates whom the Sierra Club supports. I am not one of those people. I believe that there is an opportunity here that we cannot afford to miss. I believe our Sierra Club members can make a difference. We have strength in our membership, a grass roots power that comes from having truth on our side and the love of nature in our hearts.

I’m challenging every member who reads this article to do at least ONE thing to help a Sierra Club endorsed candidate win their election. Offer to make phone calls for ONE night. Volunteer to walk door-to-door in a district that is not your own for ONE afternoon. Enter data, stuff envelopes, put up a candidate’s yard sign. If you can’t spare your time, write a check to a Sierra Club endorsed candidate.

If everyone does just ONE thing, we will be successful. The days of thinking “I’ll let someone else do it” are over. It all starts when you contact the campaign office, letting them know you’re a Sierra Club member and want to help. It may turn out to be the most rewarding thing you have ever done.

VOTE SMART!

Go to Project Vote Smart at www.votesmart.org and use the website’s 9 digit zip code search function to find your state and congressional district numbers and the candidates running for office in your districts.

Contact your County Clerk’s office for complete information about your ballot.

VISIT SIERRA CLUB’S POLITICAL PAGE

Learn more about the Sierra Club’s endorsement process and endorsed candidates by clicking the Michigan Politics link on our home page.
As our next Governor, Virg Bernero will bring a powerful commitment to protect Michigan’s air, water and natural places to our state’s highest office.

As Lansing’s mayor, Bernero has become a national leader on energy issues, having worked to reduce the City’s energy use while increasing the use of renewable energy. Virg has helped make Lansing more pedestrian and bike friendly, and has been forceful and effective at improving the city’s water quality while reducing pollution in the Grand River.

Virg will stand strong to protect our Great Lakes from water diversions, offshore or slant drilling, and invasive species like the Asian Carp. He understands Michigan is uniquely blessed with natural resources and beauty, and that we have a responsibility to care for and preserve our environment for future generations.

Sierra Club supports Virg Bernero for Governor due to his proven leadership in environmental protection.

David Leyton has a strong record of standing up for the environment. As a township official he discovered that land donated for recreational use had been used as a toxic dump. Leyton fought to force the polluter to clean up the land before one single child stepped on the site.

Leyton will take that same passion to defend and protect our environment statewide. He knows that the Attorney General can play a critical role in protecting the environment. Leyton also understands that the Attorney General should be an advocate for regular citizens, not powerful corporate interests.

David Leyton will ensure that corporate polluters don’t compromise our land, air and water resources. His efforts to sustain, encourage and enforce conservation efforts in Michigan will be a hallmark of Leyton’s legacy as Attorney General.

Sierra Club supports David Leyton as Michigan’s next Attorney General.
Find Your Endorsed Candidates

The next few pages list endorsed candidates by general geographic area. Please be aware, however, that many House and Senate districts do not fit neatly into any specific geographically-defined area. To find your House and Senate district numbers and the candidates running for office, go to www.votesmart.org. Project Vote Smart’s 9-digit zip code search function will help you find a list of your current elected officials and the candidates running for office in your districts.

J ust three years ago Michigan was looking at more proposed new or expanded coal plants than any other state. Today, after a smart, aggressive campaign by Sierra Club and our partners in Clean Energy Now and leadership from Governor Granholm and her staff, all eight proposed new or expanded coal plants in Michigan have been denied, cancelled or put on hold.

In the last six months alone four coal plant proposals saw the brakes put on. Michigan Department of Natural Resources and Environment (DNRE) denied the air permit for the Wolverine Power Supply Cooperative proposed Rogers City plant in May, citing the lack of need and available alternatives. A week later, Consumers Energy announced it was indefinitely shelving their Karn-Weadock plant expansion near Essexville. In July the Lansing Board of Water and Light announced they would drop their proposed coal plant and go with combined cycle natural gas, a more flexible option that pairs well with renewable energy generation. And in August, the DNRE found that the Holland Board of Public Works failed to demonstrate a need or the lack of alternatives to their proposed coal plant expansion and their air permit was denied.

There is still more to do to assure that Michigan is moving away from coal and toward clean energy sources that produce jobs and energy right here in the Great Lakes State. But all of you who helped stop the Michigan Coal Rush should celebrate, and then prepare to sustain our momentum to move Michigan toward clean energy and beyond coal.

VICTORY! Michigan Coal Rush Brought to a Halt

Kicking Coal Ash in Chicago
by Tiffany Hartung and Michelle Martinez,
Clean Energy Organizers

Coal ash is the poorly regulated toxic by-product of burning coal that poses documented health risks to people living near disposal sites. Prompted by a disastrous spill in Tennessee two years ago, the US Environmental Protection Agency (EPA) is considering new rules that could provide strong federal standards for coal ash, over the vehement objections of the coal industry.

In mid-September sixty-five Michiganders got on buses to attend an EPA hearing in Chicago and urge stronger coal ash regulations. Michigan is home to at least eighteen coal ash sites that raise concerns in communities statewide. Attendees from Detroit to Holland told EPA it is time to protect communities from toxic coal ash pollution. Their voices joined with 400 other Midwesterners, including many that have been harmed by lax ash disposal.

Terry Miller of the Lone Tree Council in Bay City provided testimony about Consumers Energy’s Karn Weadock coal ash sites which leak contaminants into Saginaw Bay. Miller’s words were read at the hearing, describing the unsuccessful efforts to get state action to clean up this site, and telling EPA “We urge you to issue a strong rule. We need help in Michigan, help only the resources of the federal government can provide.”

You can find out more about coal ash at www.sierraclub.org/coalash, including how to submit your own comments to the EPA.

JENNIFER GRANHOLM’S CLEAN ENERGY LEGACY
by Anne Woiwode

When she packs up her desk in early January, ending eight years in one of the most challenging jobs in the country, Governor Granholm can take credit for the most dramatic shift in state energy policy in the nation. The Governor and her advisors have been aggressive advocates for expanding Michigan’s clean energy industries, one of the few bright spots in Michigan’s economy. And, through the Governor’s bold action, she has prevented the construction or expansion of numerous unneeded coal fired power plants.

In the face of a pro-coal legislature and laws written by the utility industry to foster coal plant expansion, Governor Granholm’s accomplishments are particularly impressive. However, the two coal plants whose air permits were denied are appealing those decisions. Consumers Energy, who received a permit but later decided to put their plant on hold, has declined to cancel their Karn Weadock plant expansion outright. Finally, while the state’s aging fleet of existing coal plants need to be replaced with cleaner sources of power, many utilities are working to extend the operating life of polluting plants instead of investing in more renewable energy.

When the new governor and legislature take office in January, major pieces of unfinished energy policy work will remain. Despite Granholm’s efforts, Michigan’s energy efficiency and renewable energy standards are the weakest in the Great Lakes region, leaving the state less competitive than its neighbors. While both candidates for governor are campaigning on a platform of clean energy, public demand for Michigan’s elected officials to speed up the transition to clean energy will be critical. You can help by telling candidates and newly elected officials to prioritize clean energy in 2011. Help the Sierra Club build upon Governor Granholm’s legacy to create a new energy future for Michigan!
Kalamazoo River Oil Spill Disaster: Our Oil Addiction Hits Close to Home
by Rita Chapman

On July 25th a 30-inch pipeline owned and operated by Enbridge Energy Partners burst and spewed as much as 1,000,000 gallons of crude oil into Talmadge Creek, a Kalamazoo River tributary near Marshall. Damage to Talmadge Creek, the Kalamazoo River, local residents and wildlife came quickly as oil spread for miles downstream, contaminating the water, floodplains, islands and backyards. Stench from the oil sickened people near the river, requiring evacuation of homes. Concerns about drinking water contamination led to warnings about drinking well water, while fishing and recreational use of the rivers came to a screeching halt. Although the official “emergency response” phase of the clean up was declared “complete” on September 27th, impacts of the oil spill are expected to linger for a long time.

After the spill, Michigan residents learned that our state is crisscrossed by pipelines, including some under the Great Lakes and many in need of repair or replacement. Enbridge recently applied for permits to add supports under a pipeline in the Straits of Mackinac that was constructed in 1953. The Sierra Club and other environmental groups asked regulators to require Enbridge to shut down and empty that pipeline before they begin work.

During past pipeline inspections hundreds of dents and pipeline defects were found on the same pipeline that ruptured. Most have not been repaired despite federal requirements to repair or replace problem sections within months. Instead, at a Sept. 16 Congressional investigation hearing, Enbridge asked for 2 ½ years to repair a defect in a pipeline under the St. Clair River.

Sierra Club is tackling America’s addiction to oil in many ways, including calling for better protection of public health and the environment, improving our transportation options, and fighting tar sands development in Alberta, Canada.

Warning sign on Kalamazoo River following the Enbridge Energy oil spill.

WATER COMMITTEE UP & RUNNING
by Rita Chapman

Many of our members in Michigan are familiar with the Chapter’s Conservation Committee. These dedicated volunteer activists meet on the phone every month to discuss and take action on a whole slew of different environmental issues.

Over the summer, the Chapter began recruiting members to focus exclusively on the issues that concern our greatest asset—our fresh water. Water is important to us here in Michigan, and we want to keep it fishable, swimmable, and drinkable.

YOU CAN HELP!
• Start by sharing your water-related interests at our online survey at www.tiny.cc/MichiganWaterSurvey.
• You can see more about what we’ll be working on at www.connect.sierraclub.org/Team/Michigan_Water_Committee.
• To learn more about this effort, please contact amanda.hightree@sierraclub.org or rita.chapman@sierraclub.org, or call 517-484-2372.

We hope to hear from you!
Cleaning Up CAFOs
by Lynn Henning

In July 2001, what was to become the largest, most polluting animal factory in Michigan was cited for its first environmental violation. Nine years later with hundreds of additional environmental violations, hundreds of thousands of dollars in fines and penalties owed to the state, and more than half a million in unpaid local taxes, an Ingham County judge has ruled in favor of the State of Michigan in its lawsuit against the Vreba Hoff Dairy concentrated animal feeding operation (CAFO).

The work of the Michigan Chapter CAFO Water sentinel Lynn Henning has been a bright light in bringing tools to bear on this dirty industry, but progress has been slow and vested industrial agribusiness interests have fought aggressively against every step. During the Granholm Administration, Sierra Club, our partners at Environmentally Concerned Citizens of South Central Michigan (ECCSCM) and Lighthawk’s volunteer pilots helped bring a dramatic change to Michigan’s approach to CAFO pollution. Former DEQ Director Steve Chester was particularly instrumental in raising the profile of this environmental threat by identifying it as one of the most serious inadequately addressed issues in Michigan. Efforts are continuing to bring long overdue resources to address air pollution and public health threats from CAFO wastes.

Despite exceptional efforts, extensive documentation and compelling scientific information, however, CAFO air pollution is unregulated, adequate funding for DNRE has been blocked by Legislators, and public health agencies continue to be limited in their ability to respond. Recent comments by gubernatorial candidate Rick Snyder show an astonishing lack of awareness of the problems from this industry as well.

Going forward, Lynn Henning’s designation as the 2010 Goldman Environmental Prize winner for North America offers hope as international attention is brought to her work to clean up CAFOs. Also, the US Environmental Protection Agency has made it clear that they intend to act to protect public health and the environment from CAFO pollution. To find out more about the Michigan Chapter’s work and Lynn Henning go to the Michigan Chapter website.

ASIAN CARP: GODZILLA OF THE LAKES?
by Melissa Damaschke

“Monster fish devastating local rivers and lakes.”

That is a headline that none of us in the Great Lakes region wants to see, but it is what may be in store if Asian carp establish breeding populations in the Great Lakes ecosystem. A live Asian carp was found in June just 6 miles from Lake Michigan in the Chicago Ship and Sanitary Canal, beyond the electronic barriers that were intended to be the last line of defense. These massive invaders put the entire Great Lakes ecosystem, its $7 billion recreational, commercial and tribal fishing industry, and our way of life at risk.

YOU CAN HELP
Urge President Obama to speed up the process of protecting the Great Lakes. Visit www.sierraclub.org/greatlakes to send your comments to the White House. You can also join Sierra Club’s Asian carp Action Team! Sign up on our website by clicking on the “Volunteer” tab and putting Asian carp Action Team in the comment box, or email us at sierraclub-greatlakes@gmail.com.

YOUR ACTION IS CRITICAL TO PROTECT THE GREAT LAKES FROM THIS THREAT
Asian carp have devastated the Mississippi River ecosystem, harming people, local economies, property, and native fish and wildlife. We cannot afford to let history repeat itself in our vast, yet very vulnerable Great Lakes.

MORE INFORMATION
Keep up to date on issues facing the Great Lakes at www.sierraclubgreatlakes.blogspot.com.
Got Questions? Contact Melissa Damaschke, Great Lakes Program Organizer in Detroit at melissa.damaschke@sierraclub.org.
Michigan’s Visionary Forest Challenge

by Marvin Roberson, Forest Ecologist

The state of Michigan is poised to take a globally unprecedented step towards ecological protection. The Department of Natural Resources and Environment (DNRE) is finalizing decisions to designate a network of “Biological Stewardship Areas” (BSAs) across the state. These BSAs represent a classification and designation of each and every forested community type across all landscapes in our state.

The designation process started with the division of the state into “Ecological Subsections” according to landform, glacial geology, climate, soils, potential vegetation, etc. (see accompanying map of the Lower Peninsula, below). The DNRE then looked at the entire list of 76 “Natural Communities” as determined by the Michigan Natural Features Inventory (MNFI), a non-profit group associated with the MSU Cooperative Extension Service. Here is where the state got visionary: after looking at the state’s natural ecological subdivisions, they cross-referenced this with the natural communities list, and determined which communities do, did, and could exist in which subsections. The agency then decided to designate BSAs for each community in each subsection in which it occurred.

For each region of the state (northern and southern Lower Peninsula, east and west upper peninsula), the state convened a “Core Design Team” (CDT) comprised of stakeholders and DNRE staff, including environmental, hunting, timber industry, tribal, and other experts. The CDT members used their field knowledge to build a consensus on where the best areas were to represent Michigan’s natural communities in each region.

The Northern Lower Peninsula CDT was the first to finish, and DNRE will finalize the designations this winter. The Northern Lower Peninsula CDT members looked at all possible areas over 15 full day meetings before coming to agreement, and have made excellent recommendations. One senior DNRE official remarked that this was “the most important thing the DNRE has done since the creation of the Forestry Commission in 1913”.

Despite the scientifically based, consensus recommendation of the CDT, there has been resistance both within and outside the DNRE. It is very likely that the final set of BSAs proposed by DNRE staff will be significantly reduced from the agreed upon CDT recommendations.

You can help make sure that the BSA network includes the complete network recommended by the Northern Lower Peninsula CDT! There will be public comment opportunities this fall, and your input will show support for Michigan completing this visionary effort. We also invite you to join the Southern Lower Peninsula BSA process that is under way now.

Contact Amanda Hightree, amanda.hightree@sierraclub.org, to find out more, or check the Chapter website for updates.
Emerging Issues
by Anne Woiwode

The Michigan Chapter adopts priorities that guide our environmental advocacy, but emerging issues occasionally demand attention and action. Here are two such issues.

HYDRO-FRACTURING FOR NATURAL GAS
Natural gas burns cleaner than coal, producing fewer conventional air pollutants, generates no toxic ash, and releases about half the greenhouse gases of coal per unit of energy produced, while allowing for flexibility to pair with renewable energy sources like wind. As a result, natural gas has become an attractive alternative to coal in the transition from fossil fuels to clean energy. But as easily accessed natural gas reserves have disappeared, concerns about dirty ways of getting natural gas are raising many concerns. Proposed hydro-fracturing (fracking) of shales found deep underground in Michigan are raising red flags. Companies seeking natural gas leases in shale formations in northern and south central parts of the Lower Peninsula are bidding at higher rates than ever before for these leases, and a rush appears to be on to develop these resources.

Sierra Club and our colleagues in conservation and environmental organizations are calling for Michigan to adopt comprehensive regulations to deal with real threats to water quality, water supply, and the impact on forests and wildlands from the infrastructure to develop these supplies. The Michigan Chapter has long monitored oil and gas development, including working with the Anglers of the Au Sable to protect the Mason Tract along the Au Sable River proposed from drilling next door. Sierra Club is working around the country as well to assure that the move to clean energy doesn’t mean destroying water quality, harming our communities and polluting our state.

NUCLEAR WASTE SHIPMENTS ON THE GREAT LAKES
Sierra Club has long asked a critical question of those who promote nuclear power as a supposedly clean source of energy: what do we do with the waste? Now there is a dramatic example of why knowing the answer that question first is critical. The proposed decommissioning of nuclear power plants on Ontario’s Bruce Peninsula calls for putting the highly radioactive wastes on ships that would travel through Lakes Huron, Erie and Ontario on their way down the St. Lawrence Seaway to the Atlantic Ocean. Sierra Club Canada and Sierra Club Michigan Chapter are working in parallel on either side of the international border to call for comprehensive environmental review of this plan, including full assessment of the risk it poses to millions of people who use and depend on the Great Lakes.

The Michigan Chapter joined with several organizations concerned with the environment and nuclear power in asking that the US Department of Transportation require a complete environmental impact statement with full public disclosure and input regarding this proposed shipment on the Great Lakes. Hearings held in Canada in September brought out extensive concerns about this plan as well, and demands for the Canadian government to provide an appropriate forum to hear from the public and conduct of proper assessment of this plan. Stay tuned to find out more about this emerging issue on the Michigan Chapter website.
Jean Gramlich

Our planet and state face major challenges, and the Chapter must be in the forefront to educate others to value the environment and to protect the earth from those who would exploit and pollute with no thought for the health of our communities or the legacy we leave for future generations. We must strengthen our citizen activism on conservation and in the political arena where many important issues are decided.

Raising money to support our work is essential. I have served on the SEMG and Chapter ExComs for several years, the last 4 years as Chapter Chair. I also sit on the Legislative and Strategic Planning Committees. Locally I work as a master gardener, conservation steward and land conservationist.

Robert Simpson

I am cautiously optimistic that even though it seems at times we are spinning our wheels, we are winning small victories. A coal plant doesn’t get approved, a CAFO is denied a license, a mining company is forced to start over. All we can do is keep working at it and hope for public opinion to catch up with the realities of our long suffering environment and support our work.

In that effort, I am working with my local cable provider to get environmental films onto public access television, and I will continue to support other initiatives statewide.

Lorne Beatty

As a Sierra Club member for over 25 years, I have served as Crossroads Group Fundraising, Media, Membership and Outings Chairs, as well as Group Rep, Treasurer and Vice Chair. I have been an At-Large member of the Michigan Chapter ExCom for the past four years. I have served on the Chapter Development Committee and have been the Chapter Outings Chair for the past two years. I enjoy fishing, canoeing, camping, boating, scuba diving and skiing. I am proud to help the Chapter protect Michigan’s waterways, air and water quality and wilderness. I will continue to assist with building alliances with Michigan sportsmen’s groups such as the Anglers of the Au Sable, of which I am also a member. To accomplish this and more, I am asking for your vote to continue as an at-large member of the Michigan Chapter ExCom.

Leigh Fifelski

Hardworking, dedicated, experienced, energetic, current executive committee member, social media using, worked for the Sierra Club, coal-fighting, water loving, urban environmentalist seeks re-election to Sierra Club’s Executive Committee. Will work hard to stop coal plants, increase renewable energy, elect progressive environmental candidates, ensure communities are protected from Big Corporations that pollute and increase Sierra Club’s under 40 active membership. If this is the change you seek, vote for me!
Judy Hainaut

Judith Hainaut has lived in Pontiac for ten years and is a Senior Designer at General Motors Powertrain. Her special interest is urban agriculture using environmentally sound methods. She is also involved in promoting local food production and marketing. Another environmental issue she has been involved with is the promotion of planting native plants in order to protect our native plant and animal relationships. She loves reading, knitting and camping.

Ed McArdle

As a Sierra Club member since 1981, I have seen the club grow along with the environmental movement. I have served in many volunteer positions on both the group and state chapter levels, including Group, Political, and Conservation Chairs. Currently, I am serving as Group and Chapter Conservation Chair and am a member of the Legislative and Political Committees. I have been involved in issues such as air pollution, incinerators, recycling, coal and nuclear, and have seen successes like closing all Michigan medical waste incinerators and saving Humbug Marsh. I have wonderful experiences working with the many volunteers and staff who help me grow along with the Club. I hope to propose ideas and programs that inspire and empower a younger and more diverse cadre of volunteers and members.

Cynthia A. Husarchik

Sierra Club provides me with the platform to engage in my passion—environmental activism. My commitment to protecting our natural resources inspired me to run for Chapter ExCom. I enjoy hiking and participating in Huron Valley Group conservation committee and Southeast Michigan Group in-district meetings. I’ve attended Environmental Leadership Training seminars and participated in Lobby Day and Hands Across the Sand events. As a trial attorney, I advocate for environmentally friendly and protective legislation and work with pro-environment political leaders to ensure the sustainability of our ecosystem. I am involved with grass roots programs that sponsor clean energy, urban organic farming, and recycling. With your your vote, I will help Michigan become a progressive legislative leader for energy efficiency, environmental protection and sustainable, healthful food production.
Think Globally, and Get Active with Your Local Sierra Club Group!

Sierra Club is the largest grassroots environmental organization in the country, and the Michigan Chapter’s ten regional Groups or committees are a vital link for getting active with Sierra Club! Groups host outings, political and conservation activities, and informational programs. Sierra Club members and supporters are invited to attend outings and meetings—everyone is welcome! The Michigan Chapter website has a comprehensive calendar with current and upcoming outings, programs and events listed for each Group (go to michigan.sierraclub.org/calendar). Below is a list Michigan’s Sierra Club Regional Groups, the counties they cover, and where their meetings usually take place. Group Chairs, their contact information and links for Group websites are also listed below, or go to michigan.sierraclub.org/groups.

Central Michigan Group / CMG
Ingham, Hillsdale, Jackson, Eaton, Ionia, Clinton and Shiawassee Counties / Meets in Lansing area

ONLINE: cmgsierraclub.yolasite.com
CMG CHAIR: Leigh Fifelski, 248-321-4579 or lfifelski@gmail.com

Central Upper Peninsula Group / CUPG
Alger, Delta, Menominee, Marquette, Dickinson, Baraga, Iron, Keweenaw, Iron, Gogebic and Ontonagon Counties / meets in Marquette

GROUP CHAIR: John Rebers, 906-228-3617 or jrebers@gmail.com

Crossroads Group / CG
Livingston County and western Oakland County / meets in Brighton

ONLINE: sites.google.com/site/crossroads.sierraclub
CG CHAIR: Rick Pearsall, 810-227-6298 or rick.pearsall@michigan.sierraclub.org

Huron Valley Group / HVG
Washtenaw, Lenawee and Monroe Counties / meets in Ann Arbor

ONLINE: michigan.sierraclub.org/huron
HVG CHAIR: Doug Cowherd: 734-662-5205 or dcow2@yahoo.com

Nepessing Group / NG
Genesee, Lapeer and northwestern Oakland County / meets in Flint

ONLINE: michigan.sierraclub.org/ng
NG CHAIR: Dennis Crispell, 989-624-5038 or dmcrispell@yahoo.com

Southwest Michigan Group / SWMG
Berrien, Cass, St. Joseph, Calhoun, Kalamazoo, Van Buren, Allegan and Barry Counties / meets in Kalamazoo

SWMG CONTACT: Brad Parsons, 269-492-4437 or bradparsons4@gmail.com

Michigan Chapter members attend a workshop at the 2010 Annual Retreat.

Note: If you live in an area that does not have a local group and you’re interested in starting one, please contact Chapter Coordinator Amanda Hightree at Amanda.hightree@sierraclub.org or 517-484-2372.
Group and Chapter Award
Winners for 2010 Announced
by Anne Woiwode

Following Sierra Club tradition, Group and Chapter members are asked each year to submit names of Sierra Club leaders for recognition of their outstanding work within the Sierra Club. The Chapter Executive Committee reviews and selects award winners at the Chapter and Group level among those nominated. During the Michigan Chapter’s Annual Retreat, Chapter and Group award winners are announced by the Awards Committee Chair, along with our awards recognizing other individuals and organizations for their efforts to promote protection of Michigan’s environment (see page 23).

Please join us in thanking these award winning Sierra Club Michigan Chapter and Group leaders for their exceptional dedication and efforts.

CHAPTER CHAIR AWARD AND CYBERPUNK AWARD

The Chapter Chair Award honors a Michigan Chapter leader for exceptional work in support of Sierra Club’s work in Michigan. The CyberPunk Award recognizes outstanding efforts by a volunteer activist to raise awareness by the use of electronic media.

Ed Steinman is active in the Huron Valley Group and serves as their representative to the Chapter Executive Committee. Michigan Chapter Chair Jean Gramlich selected Ed for the Chair’s award to recognize his exceptional efforts in many areas, from upgrading the Chapter website to documenting pollution from CAFOs. Ed was also the clear choice for the Chapter Cyberpunk Award because of his support for our electronic outreach.

MARLENE FLUHARTY AWARD

Recognizing leadership at two levels of the Sierra Club.

Shirley Kallio of the West Michigan Group was acknowledged for her tireless efforts with the West Michigan Group and with Chapter and Group level Legislative and Political work.

SYLVANIA AWARD

Recognizing a volunteer who is new on the scene but as already demonstrated great enthusiasm, hard work and dedication.

Lauri Tata was the clear choice for this award, as she brings her energy and excitement to both the Nepessing Group and the Chapter Political Committee as a new Sierra Club leader.

VINCE SMITH AWARD

For outstanding contributions to Outings in Michigan.

Denny Burr was recognized for 20 years of leadership in outings with the Huron Valley Group and the West Michigan Group.

SERVICE AWARDS

Nepessing Group

The Executive Committee is the backbone of the Nepessing Group. Its spinal cord is the list server Nepessinghiker@aol.com. Since advent of the Wednesday Hikes in 2006, Don James has maintained and sent out all notices of group activities.

Mitch Mitchell is chair of the SEMG political committee and also serves on the Chapter political committee, which reviews over 100 candidates for possible endorsement. Mitch devotes enormous amounts of time and effort to working with candidates and Sierra Club election volunteers.

West Michigan Group

For more a year and a half, Jill Henke has immersed herself in getting Holland Beyond Coal, hosting house parties and film screenings, staffing booths and attending countless meetings. Jill has also written formal comments, testified and presented statements to state and local entities regarding Michigan’s coal issues.

Chapter

Aaron Nelson volunteers with the Chapter putting together several volunteer tracking databases and creating outreach materials. Her big effort now is a database showing water monitoring projects throughout the state, where they are located, what they are, who is doing the monitoring, and giving contact information. The information will provide map overlays to help connect the dots on water pollution.
Everyone is welcome to participate in Sierra Club Outings!

The Michigan Chapter and Group volunteers lead outings year round. Current outings are updated continually on the Michigan Chapter calendar at www.michigan.sierraclub.org/calendar. Every outing, whether it is a stroll in the park or a weeklong backpacking adventure on Isle Royale, starts at the trailhead, and some include fees to cover expenses. All participants in Sierra Club outings are required to sign a standard liability waiver, which is linked to our website, or call the Sierra Club Outings department at 415-977-5528 to have a print version sent to you.

Below we introduce you to a small cross section of outings led by Group and Chapter leaders, and as well as other Sierra Club activities in Michigan! Details and contact information for signing up for upcoming outings and events are available at www.michigan.sierraclub.org/calendar/index.html. Get out and enjoy the places we all work so hard to protect!

Outdoor Adventures

Oct 23 NG Dauner-Martin Nature Sanctuary Hike. In the mood for a different kind of outdoor adventure? Then join the Nepessing Group for a hike after dark for a full-moon hike! Bring a flashlight and join us at the Michigan Nature Association’s Dauner Martin sanctuary in Genesee County. Join other adventurers on this easy approximately four mile hike. A one dollar outings fee helps cover costs. Find all the details on the web, or call Terry at 810-732-9902.

Oct 24 CMG Picnic & Ledge Walk. Fitzgerald Park in Grand Ledge is home to The Ledges—300-million-year-old, 60-foot, majestic sandstone sedimentary rock outcroppings lining the shores of Grand River. The Central Michigan Group invites you to bring a picnic lunch and hike along this amazing geological feature into Grand Ledge. Eaton County Parks charges a $2 admission fee for entry. Details on the CMG website, or contact Jerry at 517-351-7796.

Oct 24 SEMG Kensington Metro Park Hike. Southeastern Michigan has a remarkable resource in the Metro Parks that provide a green ring around Detroit and suburban communities. Join the Southeast Michigan Group for a fall hike full of color as the thick forests at Kensington Metro Park are changing their looks. We’ll enjoy a moderate, 4-mile hike on the nature trails, including the boardwalk around Wildwing Lake over leaf-covered trails. Keep an eye open for the resident deer, waterfowl and osprey. Trip goes rain or shine. Dress in layers. Park entrance fee. Find out more on the website. Your Outings leader is Tom Griebe, 248-349-8782.

Nov 21 CG Annual Migratory Ducks Outing at Kensington Metro Park. The Crossroads Group invites you to witness one of nature’s amazing shows, the migration of ducks, geese and other wildfowl heading south for the winter. Meet at the Kensington Nature Center parking lot for a short hike to observe the migratory waterfowl on Kent Lake. Bring binoculars, bird books, etc. Members and nonmembers, birders and non-birders are welcome to attend. Check out information on the Crossroads Group website or contact Outing Leader Dan Minock at 248-685-2411 or dan.minock@michigan.sierraclub.org for more details.

Indoor Adventures

Nov 9 & December 14 at 7:30 pm Huron Valley Group’s Sierra Club Book Club. Book: Merchants of Doubt: How a Handful of Scientists Obscured the Truth on Issues from Tobacco Smoke to Global Warming, by Naomi Oreskes and Erik M. Conway. Ann Arbor, check the webpage or contact Nancy Shiffler (734) 971-1157 for details.

Nov 12 & Dec 10 Second Friday Artwalk: Buckham Gallery. Meet other Sierra Club members at Buckham Gallery to enjoy a fun night enjoying art and the company of others. The non-profit art space is located 134 1/2 W Second Street in Flint and Mike Haley, your guide, can tell you more at 810-686-6354 or thaley@gfn.org.
YOU CAN BECOME A LEADER: HELP OTHERS ENJOY MICHIGAN’S GREAT PLACES!

FIRST AID TRAINING FOR OUTINGS LEADERS

If you love the outdoors and want to lead Outings to your favorite places, this one day session will train you in Basic First Aid certification and Outdoor Leadership Training 101, required for all outings leaders by the National Sierra Club. Outdoor Leadership Training 201 and CPR are required for those who lead outings that are more than an hour’s hike away from the car.

The training session, taught by Cheryl McConnell, will be held Saturday, November 20 at 11am at the Ralph A. MacMullen Center on Higgins Lake in Roscommon. Lunch is included. Deadline for registration: October 20. Cost: $35 each.

INNER CITY OUTINGS: EAST AND WEST

Inner City Outings (ICO) is a Sierra Club community outreach program providing opportunities to explore, enjoy and protect the natural world for those who would not otherwise have them. ICO volunteers work with agencies such as community centers, churches and neighborhood youth groups. ICO plans outings and provides equipment and enthusiastic trained leaders who share their love of the natural world.

- Washtenaw County ICO holds monthly business meetings November 15 and December 20, 7PM in Ann Arbor at the REI Community Use Room, 970 West Eisenhower Parkway.
- West Michigan ICO leader Craig Ressler invites you to find out more about the Grand Rapids program. Contact Craig at craig.ressler@michigan.sierraclub.org.

Sierra Club Water Sentinels co-sponsored the Grand River Expedition, a 12 day paddle down Michigan’s longest river. Here paddlers have a stop over in Old Town Lansing.
Supporting Your Chapter

Another Way for YOU to Be a Part of Protecting Michigan’s Environment

ASK YOUR EMPLOYER TO JOIN EARTHSHERE SO YOU CAN GIVE AT THE OFFICE!

Earth Share of Michigan is part of a nationwide network of America’s leading non-profit environmental and conservation organizations, working to promote environmental education and charitable giving through workplace giving campaigns. EarthShare is an opportunity, a system, and an answer for environmentally conscious employees and workplaces to support dozens of environmental groups at once through a charitable giving drive.

EarthShare’s goal is to continue expanding opportunities for working people to have an easy and effective way to help the environment, and in doing so, help ensure the preservation of our natural heritage. The Michigan Chapter’s work is supported through tax-deductible gifts through EarthShare of Michigan to The Sierra Club Foundation.

To create a new giving program at your workplace, please contact Jan O’Connell at 616-956-6646 or jan.oconnell@sierraclub.org. To learn more about EarthShare and to see a full listing of all the MI participating organizations, visit www.earthsharemichigan.org. In the meantime, ask if your workplace giving options allow you to designate a write in option. If so, write in “EarthShare of Michigan” in the space provided on your pledge card, along with the address: P.O. Box 363, 6380 Drumheller Road, Bath, MI 48808-0363.

Thank you for being a Sierra Club member! Your annual membership dues help support Sierra Club’s work at the national, state and local level, providing almost 1/5th of the Michigan Chapter budget. Additional contributions from supporters like you are at the heart of supporting our work on energy, water, wildlands and citizen engagement.

The past year has been a whirlwind with exciting successes! The Michigan Coal Rush is at a complete stop because of our work, but we must continue to push clean energy for our state’s future. Our public wild lands are better protected today than ever because of our Forest Biodiversity Program, but we will long be fighting threats to our forests like biofuels. Our decade long fight against pollution from CAFOs is making progress and drawing national attention through recognition of Lynn Henning’s work, but every day efforts to reverse our progress are underway. The Michigan Chapter’s citizen engagement efforts are recognized as among the most effective in the state, turning out citizen lobbyists and support for environmental candidates, and organizing those voices takes resources and staff time.

Your support for the work of the Michigan Chapter through automatic monthly gifts is an easy way to ensure that these programs are sustained, even in challenging economic times. And your gift can add up fast. For the cost of a fancy coffee each month, you can cover our CAFO Water Monitoring for a day. For the price of five gallons of gas a month, you’ll cover the fees for two online Michigan Chapter Updates. Or how about paying for our expert Forest Ecologist’s time and travel over a few days on the road to protect some of Michigan’s most sensitive waters and wildlands—that’s the cost of taking a family of four to an Imax show once a month (without the popcorn!).

Please consider making a sustaining monthly, quarterly or one-time gift to the Sierra Club Michigan Chapter today. You can go online to www.tiny.cc/MISierraClubSupport right now to sign up, or contact Jan O’Connell for more details!
Michigan Legacy Council
OUR MEMBERS’ BOLD ACTIONS SUPPORT THE PROTECTION AND RESTORATION OF OUR GREAT LAKES STATE

The Sierra Club Michigan Chapter created the Michigan Legacy Council to honor individuals and families making crucial, major gifts to support our environmental work.

Through the Michigan Legacy Council, you can directly support the Michigan Chapter’s effective citizen-based advocacy & lobbying programs as well as make tax deductible gifts to support qualifying educational and policy programs that protect and restore the environment.

Michigan Legacy Council members receive special acknowledgement based on giving level starting at $500 per year. Turn to the back page of this issue to see a listing of current members of our Michigan Legacy Council.

For more information or to join, please return the donation form below, or contact Sierra Club Michigan Chapter’s Development Director Jan O’Connell at 616-956-6646 or jan.oconnell@sierraclub.org.

Enclosed is my/our gift of:  _____ $250  _____ $100  _____ $50  $_____ Other

Give online at http://tiny.cc/supportsCmC!

Your donation helps provide the flexible funding Sierra Club needs to successfully advocate for Michigan’s Great Lakes, wild heritage, and clean energy future.

Your contribution to Sierra Club is not tax-deductible; it supports our effective, citizen-based advocacy and lobbying efforts. If you prefer to make a tax-deductible gift to support our work, call Development Director Jan O’Connell at 616-956-6646 to learn how.

Please send your gift to Sierra Club Michigan Chapter, 109 E. Grand River Avenue, Lansing, MI 48906

Instead of a check, please charge my credit card (VISA or MC) $_________.

Card #: __________________________ Exp. Date: ________

IS THE SIERRA CLUB IN YOUR WILL?

If you have placed the Michigan Sierra Club in your will or would like information on how to do that, please let us know.

Sierra Club’s Gift Planning Program can ensure your intent is spelled out correctly and completely, including leaving a legacy to protect Michigan’s environment. Your interest in learning more about our Gift Planning Program is very welcome, for the long-term ability of the Sierra Club to defend our natural environment depends on the financial reinforcement provided by bequests, charitable gift annuities and other life-income gifts.

Future generations will thank you for your thoughtfulness!
Michigan Chapter Recognizes Environmental Leadership

Each year, the Michigan Chapter acknowledges the exceptional efforts of individuals and organizations who advanced the protection of Michigan’s environment. The 2010 Sierra Club Michigan Chapter Award Winners are extraordinary leaders making a positive impact in our state.

**JANE ELDER ENVIRONMENTALIST OF THE YEAR AWARD**
Presented in recognition of exceptional leadership in environmental protection in Michigan. This is the highest award presented by the Michigan Chapter.

Within days of becoming DEQ Director in 2003, Steve Chester told his staff that he expected them to do their jobs. This simple concept was a radical departure from the DEQ under the prior administration. For seven years as the Director of the DEQ, Steve Chester worked to put the state’s environmental agency back on track in the face of diminishing funding and a hostile legislature. Steve is particularly recognized for his commitment to addressing some of the most important but difficult environmental issues in our state: pollution from CAFOs, global warming and making environmental justice a reality for Michigan citizens.

**WHITE PINE AWARD**
Given to a non-member, organization or group that has shown extraordinary dedication to protection of the environment.

Under the direction of Sam Flanery, the Building Sciences Academy has quickly become a strong and vocal proponent of clean energy policies, particularly the expansion of energy efficiency in Michigan. Sam has done extraordinary work organizing the graduates, clients and businesses connected to the Academy in advocating for stronger energy efficiency standards at the state capitol in collaboration with Sierra Club.

**BURTON V. BARNES AWARD**
Established in 2004 to recognize academic excellence.

Dr. Henry Pollack has been a major force in documenting the impact of climate change. As a member of the Interdisciplinary Panel of Climate Change (IPCC), Dr. Pollack and his colleagues shared the 2007 Nobel Peace Prize with Al Gore. Dr. Pollack’s recent book, “A World Without Ice” crystallizes the unthinkable impact on the world caused by global warming. An emeritus professor of geophysics at the University of Michigan, Dr. Pollack has spent many years studying the Antarctic and has conducted research on all seven continents.

**JOURNALISM AWARDS**
Recognizing those who have done an exceptional job of bringing critical environmental issues to the public’s attention.

**ONLINE JOURNALISM**
Eartha Meltzer, along with her colleagues at the Michigan Messenger, have taken on some of the most difficult environmental stories in Michigan. Eartha is particularly recognized for her reporting on coal plant fights and the continuing fight to clean up dioxin contamination along the Tittabawassee River.

**PRINT JOURNALISM**
As the former environment beat reporter at the Bay City Times, Jeff Kart tackled a wide range of issues with a particular focus on Great Lakes and energy. Jeff’s reporting on the proposed Consumers Energy coal plant expansion near Bay City was comprehensive and compelling. Michigan is fortunate that Jeff is continuing to report on environmental issues online at TreeHugger, Planet Green and other outlets.

---

**MICHIGAN CHAPTER RETREAT 2010 REPORT**
by Amanda Hightree, Chapter Coordinator

Late August weather in Michigan can be pretty unpredictable, but who could have asked for a better weather weekend than the one we had for the 21st Sierra Club Michigan Chapter Annual Retreat!

Thanks to all of you that came out to help us learn and celebrate our wonderful environment. We had another great retreat filled with smiles, laughs and good times—from our group photo to our youngest Sierra Club Tiara winner yet, and of course our eternally-entertaining live auction.

Special thanks to all of our workshop presenters who truly make the retreat fun as well as extremely informative. And a warm thank you to Camp Miniwanca, which has really become the symbol of our retreat.

If you’d like to help with planning the 2011 Retreat, please contact Amanda Hightree at Amanda.hightree@sierraclub.org or 517-484-2372.
