Action Alert:

Please call or email the members of the Senate Energy Committee listed below regarding the bills summarized in this action alert, and ask them to vote with our positions. They need to hear from you before the Senate Energy Committee meets on February 11th at 10:30 a.m.

Due to the nature of committee work, we have multiple bills of concern being heard tomorrow. If there is one bill in particular that interests you, certainly feel free to act on just that one bill. But we have summarized all of the bills and our positions that will be on the Senate Energy Committee agenda tomorrow morning.

SB127: Please vote NO on this bill. We oppose this bill, because we believe Oklahomans should be able to pass rules and regulations that will protect our state, regardless of what federal laws or the EPA say. If Oklahoma faces a unique and terrible environmental issue-- like the 21,000 earthquakes that rocked our state as a result of wastewater injection and fracking operations recently-- the state should be able to pursue any and all laws and regulations needed to keep citizens safe, regardless of what the EPA has to say.

SB448: Please vote NO on this bill. We oppose this bill because we have studied all of the processes mentioned in this bill, and they are all known to be dangerous, toxic, and bad for people and the environment overall. Toxic businesses are not what our state needs to build our economy, especially when we have numerous renewable industries like solar and battery storage just waiting to take off.

SB996: Please vote NO on this bill. We oppose this bill because it places an unfair burden on the wind industry, without making any such effort to place similar burdens and requirements on the oil and gas industry. Oklahoma is covered in thousands of abandoned and dangerous oil and gas installations, and yet the state is not asking that this industry be fined for all of its dangerous, abandoned infrastructure.

SB1021: Please vote NO on this bill as it is written. We oppose this bill because the task force makeup does not include any non-industry scientists or researchers, does not include any citizens, and it does not contain a single representative or organization from the environmental community.

SB1022 Please vote NO on this bill. We oppose this bill because recent lawsuits have proven that the State of Oklahoma has been violating the health, safety and well-being of Oklahomans by abusing the issuance of water permits without outside oversight-- the state lost this lawsuit, and now this bill seeks to make into law a practice that has been ruled by the courts to be wrong. Giving one person the authority to issue water permits sets a terrible precedent and flies in the face of open and public dialogue related to protecting our most precious state asset-- water.
