San Luis Obispo will be the site of “Smart Energy Solutions: We Have A Choice,” a regional community summit that will take over the SLO Vets Hall on October 10 from 7 a.m. to 6 p.m. for a day of panels, booths and presentations covering the range of possibilities for the central coast’s transition to a clean energy economy.

The summit will be the outcome of six months of planning by interest groups and constituents who traditionally travel separate paths and often clash over economic and environmental issues.

When you find PG&E, the Sierra Club, the San Luis Obispo Chamber of Commerce, ECOSLO and the Home builders Association all working on the same project with the same goals, that’s a sign that there’s been a shift in the wind, said Sierra Club Santa Lucia Chapter Chair Karen Merrin. “We all know the stakes and the potential benefits in getting to alternative, clean power as fast as possible, and the price we’ll all pay if we don’t get there fast enough.”

SLO Green Build, Coast National Bank, the County Air Pollution Control District, Carrizo Resource Plan Resumes, Cienaga Energy Systems, County Supervisor Jim Patterson, and the Cal Poly School of Architecture are also on the summit steering committee, which has put together panels on transportation, home building and remodeling, greening your business, alternative fuel vehicles, land use planning, and alternative energy options for individuals and communities.

“We can see a future of hotel maids, gardeners, and janitors who can’t afford to live here, according to the projections of John Dunn, CEO of the Economic Vitality Corporation. Unless we acquire a new high-paying economic sector, we’re going to be seeing even less affordable housing, with the increasing commute distances, traffic jams, bad air and deteriorating quality of life that go along with it.

All the wind, wave and solar power we could ever need are right outside our doors. One of the best engineering schools in the country is in the county seat. Between them, the US Mayors Climate Protection Agreement — now signed by the mayors of San Luis Obispo, Morro Bay and Atascadero — and the Air Pollution Control District’s action plan to cut greenhouse gas emissions lay the foundation for the green building and green power policies that can build that new economy here.

Last April, the city of San Luis Obispo adopted a new Energy Element that included the provision for the City to “examine the potential to create a city-owned energy utility,” and, at the urging of the Sierra Club, resolved to “seek the support of the County Air Pollution Control District in calculating emission inventories and the development of balanced strategies for addressing climate protection through development of model ordinances and guidelines” — the first step toward effective programs to curb climate change emissions.

The argument is over on global continued on page 4

Carrizo Resource Plan Resumes

A year ago last May, Carrizo Plain National Monument Manager Marlene Braun took her own life, ending a bitter struggle with her manager at the Bakersfield office of the U.S. Bureau of Land Management over the Resource Management Plan for the Monument. Braun was determined that Carrizo be managed for the primary benefit of the native species and habitat of this last preserve of California’s historic San Joaquin grasslands. Her superiors, determined to keep great
Santa Lucia Chapter General Meeting

The Lessons of Madagascar

Off the southeast coast of Africa, the island of Madagascar once was paradise. It is now coming to stand as a metaphor for the question our time: What happens when a steadily increasing population increasingly consumes finite resources at a rate beyond the ability of natural systems to replenish themselves?

Cal and Letty French went to Madagascar this year for a first-hand look at the potential fate of the Earth in microcosm. They share their slide-illustrated report with us tonight.

- What “Free Trade” Means to you
- Susan Knight in person

Sipakapa is Not for Sale
SLO City Library
Oss & Palm Streets
6 p.m., Monday, Sept. 18

Sipakapa is Not for Sale (Sipakapa is not for Sale) is the story of one community fighting these global rules. After the film, Susan Knight, National Representative for the Sierra Club’s Responsible Trade Program, based in Washington, DC, will lead an interactive (and fun!) overview of international trade and how it impacts all of us, as well as how we are building power and international allies to create long-term change in international trade policy.

Sipakapa, No Se Vende
Sipakapa, Not for Sale

In 1994, the North America Free Trade Agreement (NAFTA) was ratified by Congress. Nine years later, on July 21st, 2003, a gold mining company called Glamis Gold submitted a $50 million claim against the United States over a California environmental law that requires land remediation of all future open pits mines in the state.

In 2005, Glamis received $45 million — one of the largest loans to a private company in the history of the World Bank — to dig a mine in Sipakapa, Guatemala. Like the residents of California, the Mayans of Sipakapa, Guatemala have fought against this company to save their natural resources and transform the way the United States conducts business, internationally and domestically.

Join us as for a first-hand look at the potential fate of the Earth in microcosm. They share their slide-illustrated report with us tonight.

Greatest threat to environment & democracy coming from same source

By Andrew Christie
Responsible Trade Committee

For many years, environmentalists have noticed that even when we win, we seem to lose. Whether fighting for cleaner air or in defense of forests or against bad development projects, what we win is somewhat less dirty air, a few groves surrounded by miles of stumps, or a development that consumes irreplaceable open space or ag land, but not as much as it might have. If graphed on a chart over the last thirty years or so, environmental victories would depict an unmistakably downward slide with the only consolation being the likelihood that if we did not engage in such battles, the slope would be much steeper.

There’s a reason.

As the Church was to the Middle Ages, and European monarchies were to the colonial era, the corpora-
tion is to us. Ultimate power — over our political system and the fate of Third World economies; over what we see, hear, eat, drink, breathe, and, ultimately, the way we live our lives — is concentrated within corporate boardrooms. Of the world’s 100 largest economies, 48 are countries. 52 are global corporations.

The Sierra Club is moving to take on the stacked deck of corporate rule. Over the weekend of August 11, just outside the small Sonoma County town of Occidental, the Club’s Opposing Corporate Power Task Force and Corporate Accountability Committee convened a meeting of Club leaders from across the country. We came from around the state, the midwest, the south and the east coast, in a group that included advocates from our Environmental Justice campaign and Responsible Trade Committee, a member of the Sierra Club’s board of directors and a former Club president.

Over the three days of “Community Day” one...

The overwhelming weight of American law has supported property over democracy, corporations over family enterprise, and big business over local control.

— George Draffan, Public Information Network

The California Coastal Commission’s 22nd Annual Coastal Cleanup Day will take place on Saturday, September 16 from 9 a.m. to 12 p.m. around 700 locations across the state. Volunteers will clean trash and debris from 1,000 miles of the California coast as well as another 1,000 miles along the inland shorelines of bays, creeks, rivers, and lakes throughout California.

In SLO County, The Environmental Center of San Luis Obispo County (ECOSLO) is coordinating Coastal Cleanup Day for the second year after receiving the project from State Parks. Patrick Kirby, logistics coordinator, has contacted Beach Captains for 26 Clean-up sites that will stretch from the Piedras Blancas Lighthouse in San Simeon down to the Flaco Lake near Guadalupe.

In addition to ECOSLO’s promotions, these Beach Captains recruit hundreds of volunteers who come out to do their part in cleaning up our coast. In 2005’s Cleanup brought out 1,100 volunteers who picked up 3,566 pounds of trash and 890 pounds of recyclables.

ECOSLO’s mission is to support and create resilient, healthy natural systems and life styles in SLO County. We do this through education, advocacy, and community building,” said Shiba Musiensi, Oversight Director. “Coastal Cleanup Day is a direct implementation of our mission to urge the community to make a connection between our natural habitat’s health and our own. Participants learn through the hands-on process of collecting debris that coastal pollution is pervasive and is a problem that needs to be addressed through prevention and action.”

A variety of trash and recyclable items are collected each year, with plastics and cigarette butts continually at the top of the list. Smoking bans are having an impact on a growing number of beaches up and down the California coast. As a result of cigarette collections and subsequent analysis by the County’s Tobacco Control Program at last year’s Coastal Clean-up Day, the Program and a determined coalition of Morro Bay youth volunteers were successful in convincing the City Council to proclaim Morro Bay beaches Smoke-Free, the first city in the county to do so.

The 2006 Cleanup will look to build on the success of last year’s event, when an estimated 52,000 volunteers turned out to remove just under 1 million pounds of debris from California’s shorelines – the largest single event in terms of volunteers and tonnage of debris in the Cleanup’s history. The results reveal the impact that year-round outreach efforts and new regulations have had.

Most of the rise in the amount of trash we picked up resulted from growth of the event into new areas, especially inland areas that are typically undererved when it comes to volunteer cleanups,” said Eben Schwartz, Director of California Coastal Cleanup Day. “When you recognize that all those inland waterways will eventually drain to the ocean, you realize that all that extra trash picked up on Coastal Cleanup Day from inland shorelines contributes to keeping our coasts and ocean debris-free.”

ECOSLO invites everyone to help build upon last year’s outstanding participation and accomplishments. Volunteers are encouraged to contact Patrick Kirby at (805) 544-1777 with any questions, or go to www.ecosla.org to see a list of all Beach Site meeting places, interesting articles, and details on the Clean-up Celebration at Pismo Pier from 12:30 p.m. to 4 p.m. for more information.

To order, call 805-543-7651

9/16: Coastal Cleanup at 26 County Sites

Yeast, Santa Lucia Chapter member, you can run for Executive Committee and have a say in decision-making in the Sierra Club. The ExCom is an administrative body; we need people who can take minutes, organize committees, invite participation, provide publicity, and organize members. (You don’t have to do it all; one or two of those is great.) Conserva-
tionists are welcome, but the Chapter also needs volunteers who like to handle the needs common to all or-
ganizations. If you have some time and would like to help this great organization, please volunteer to serve on ExCom.

Each winning candidate will be elected to a three-year term. The Executive Committee meets once monthly at a time and place mutually agreed upon.

Members of the Nomination Committee are Letty French, chair lpfrench@sbcglobal.net, 805-239-7338; Val Endres, VPENDRES@cs.com 805-544-1180; and Leslie Krumk ikrumk2@charter.com 805-473-7725. You may nominate yourself or sug-
gest anyone else to any member of the committee. And if you get the call, please say, “yes.”

Alternatively, members may run by petition, signed by 25 members in good standing of the Chapter. The deadline for submission of petitions at the chapter office and close of nominations is 4 p.m. on Friday, Sep-
tember 22.
"Antibiotic-free foods are not necessarily safer for people, study says" by John Schmeltzer, Chicago Tribune, in The Tribune, June 25, 2006

A single robin does not make a spring, but a single study can be useful to an environmental lobby trying to bring to studies on the health impacts of smoking, and Exxon-funded studies tried to bring to the global-warming "debate" by manufacturing doubt about the phenomenon, its causes and effects.

Panel III. Land Use Planning as a tool to reduce energy consumption: Where smart growth has prevented sprawl and commuter rail systems have been effective.

Panel IV. Making your business better: Real-world examples of designing new and retrofitting existing commercial buildings to improve energy efficiency.

Panel V. Changing transportation patterns: Where and how practical public transit systems, alternative transportation, carpooling, and commuter rail systems have been effective.

Panel VI. “Community Choice” – community and regional energy production: How communities can become regional green energy producers and users.

Panel VII. Building community will: How cities and counties like ours achieve the consensus needed to change energy consumption patterns.

Panel VIII. Generating energy in your home or your business for the region: Getting off the grid and putting your own power back into it.

Shut That Door!

Information and registration: www.smartenergysummit.org

Energy Summit continues from page 1 warming: we all know now that a climate protection plan is not optional, or a nice idea. It’s vital, and it’s up to us. And it’s part of how we’re going to get to the new technologies that will get us from where we are now to where we have to be if the central coast is going to remain a place where we want to live and can afford to live; a future that guarantees a healthy environment and economy, rather than an attempt to sacrifice the first for the second, losing both.

SUMMIT SCHEDULE
8 a.m. Registration opens - all day.
9:30-10:30 PANELS
Panel I. Building homes today for tomorrow: Case studies on how to build and remodel homes to use energy smarter

Panel III. Land Use Planning as a tool to reduce energy consumption: Where smart growth has prevented sprawl and commuter rail systems have been effective.

Panel IV. Making your business better: Real-world examples of designing new and retrofitting existing commercial buildings to improve energy efficiency.

12:00-1:30 LUNCH & KEYNOTE SPEAKER: Paul Fenn, author, California Community Choice Act

3:00-4:30 PANELS
Panel V. Changing transportation patterns: Where and how practical public transit systems, alternative transportation, carpooling, and commuter rail systems have been effective.

Panel VI. “Community Choice” – community and regional energy production: How communities can become regional green energy producers and users.

Panel VII. Building community will: How cities and counties like ours achieve the consensus needed to change energy consumption patterns.

Panel VIII. Generating energy in your home or your business for the region: Getting off the grid and putting your own power back into it.

Meetings room to accommodate conferences & retreats of all sizes.

For instant energy-saving action, a full sheet of the cards at right, in red & black, can be downloaded, printed on Avery card stock and handed out to local establishments who insist on air conditioning the great outdoors. Go to: http://santalucia.sierraclub.org

Just outside Yosemite National Park on 50 Acres of beautiful forested hillsides

Private cabins with bath or shared bath, dorms and tent cabins.

Full service Ayurvedic spa with sauna, hot tub, cold plunge, massage, scented soaking room & yoga classes.

Private hot tub, fire pit.

**Stumbling Down the Coast**

*Fish & Game Commission needs to take another shot at Marine Protected Areas*

by Karen Merriam, Chair, Santa Lucia Chapter
Matthew Fleming, Chair, San Luis Bay Chapter, Surfrider
Morgan Ballferry, Executive Director, ECOSLO

On August 15 in Monterey, while his fellow California Fish and Game Commissioners were congratulating themselves for having just created a network of 29 marine protected areas over 200 square miles of central coastal waters (and landing 17a tremendous step forward...), Commissioner Bob Hattoy offered a dissenting view: “We had a chance to be historic tonight,” he said. “We had an opportunity to run a great race, and we barely stumbled across the finish line.”

The Commission was candid as to the reason why it refrained from designating the estuary as the State Marine Conservation Area that was called for in every stakeholder plan: They wanted to make sure the annual sport waterfowl hunt could continue. But an SMCA designation would not, in fact, forbid a hunt. Thus, our extraordinarily diverse estuary wildlife and habitat have been left high and dry by the Fish and Game Commission for no real reason at all.

Above all, the Commission failed to err on the side of protection because they could resist the reserve system in three to five years and make adjustments. But if the Commission erred on the side of too little protection, warned Keeley, the adjustments will have to make five years hence to fix that mistake will be far more drastic than anything that was on the table that day.

The plan must now undergo environmental review. The Commission couldn’t have done worse by the Morro Bay Estuary. It will be up to those of us who cherish this coast to attend the public hearings that will be part of the review process, where we must forcefully make that point and demand the protections that the estuary deserves.

Commissioner Hattoy was pointing out the fine print that the headline didn’t convey. Of the 29 areas and 200 square miles, only 8 percent of those waters will be designated as “no take” marine reserves, the only designation that allows for full ecosystem recovery and replenishment, and largely the point of the exercise. If commercial fishers are complaining that the Commission protected too much, and environmentalists are complaining that the Commission didn’t protect enough, that means the best possible compromise was achieved, right? Wrong.

The Commission’s Blue Ribbon Task Force, after an 18-month stakeholder process guided by a science advisory team, came up with three network plans. One, a compromise of an earlier plan, would have put 13% of the Central Coast’s waters in no-take reserves. Another package scaled that back, calling for 9%. The third, drafted by fishers, was essentially status quo. The Commission staff set about drafting yet another scaled-down version of the “compromise of the compromise” plan, with 8% of coastal waters proposed for full reserves. It was this plan that was set before the Commission for nipping and tucking. The result was a triple compromise – the kind of outcome that’s pretty much guaranteed to be neither “landmark” nor “tremendous.”

Fish and Game backed the Morro Bay Estuary, one of the most biologically significant estuaries in the state, declaring it a Marine Recreation Management Area, a designation that subordinates resource protection to recreation. They did so, despite the pleas of local residents who traveled to the Monterey hearing, and over the strong objection of the Morro Bay National Estuary Program.

In my dream, I was shopping at Lord and Taylor’s but outside Jack Beigle was shaking his tent to wake me up in the dark. It was time for the dawn paddle out of Sapsei Campground on the weekend kayak at Santa Margarita Lake. I knew it was going to be a paddle as good as Christmas could be. I just didn’t know how good. The moon was long gone and four of us pushed off under the morning light. We headed out onto the trees as well. Jack paraphrased a haiku to the effect that we never just watch the scene but are always a part of it. It was the last trip with Jack as leader, and it was a great one. I had always appreciated his knowledge of all things natural, his good natured skills as a leader, his sense of humor, and his way with a canoe. This was a chance to appreciate his artistic side as well and it would stand out among the many trips I have done with Jack as leader. It’s been a joy to paddle with him. Best wishes to Jack and Grace in Pacific Grove – I already put in a pitch for a trip on the Elkhorn Slough as soon as they are settled in.

I watched as Jack passed the torch onto our new leader Joe Dickerson and his wife Ann. Actually, it was more like a bag of tricks he passed on and I have greater appreciation of what goes into the planning of these outings. Thank heavens and the Dickersons that the kayak trips will be continuing!

Also, a special thanks to the Santa Margarita campground hosts, Jan and Mike. Their hospitality was a tad above normal and helped to make this farewell as special as it deserved to be.

Upcoming trips are Saturday, July 8 at 5 p.m. and Saturday August 26 at 10 a.m. In between there will be a paddle to Los Osos for the Mozart Festival at 5 p.m and Saturday August 26 at 10 a.m. In between there will be a paddle to Los Osos for the Mozart Festival _ no date available at the time of this writing. Check out the outing schedule and join us on the water.

traying its promise to its principals and shareholders and its sole purpose: To make money. They must maximize their profits while exploiting workers, nations, and the planet. “This is not a question of left or right,” said Jim Price, staff liaison with the Club’s Southeast Office, “It’s up or down.”

The conference participants agreed that the solution to the problem is to wrest from corporations the rights that were once vested solely in citizens but which corporations have been acquiring for themselves for over a century. That means educating and organizing in our communities and mounting legal challenges to corporate rights.

The American Revolution was a revolt against corporate rule (the thirteen colonies were literally corporations created to carry out the business of the Crown; the Boston Tea Party was specifically a disagreement over “free trade” issues), and the agrarian Populist revolt of the late 19th century was a mass national re-imagining of the political landscape as a democratic system that would serve the needs of common people rather than the robber barons who ruled that era.

“The political and legal culture has been diverting activists from political arenas where people can define issues and make the rules,” write Richard Grossman and Ward Morehouse, co-founders of the Program on Corporations, Law and Democracy (POCLAD). In those arenas, “whether we win or lose, it is clear that the struggle is about who is in charge — corporations or people.”

By the end of the weekend, meeting participants agreed that while the Sierra Club must continue to do the work of traditional activism — challenging corporate destruction through the regulatory process and in the courts to protect the natural world from immediate harms in the short term — we would all take what we’d learned back to our communities and work to help the Corporate Accountability Committee make the abolition of corporate Constitutional rights and the restoration of citizen-based democracy a long-term Sierra Club priority.

Meeting Minutes

Conservation Committee, Aug. 1, 2006

Present: Chair Pam Heatherington, Jack McCurdy, Ino Rinkade, Mandy Davis, Sue Harvey, Staff: Andrew Christie. Guests: Karen Merriam, Pete Evans.

Pete Evans talked about downtown SLO’s “open door” policy. Businesses have their doors open with the air conditioning on full blast to improve business. Small cards could be made available for people to hand to businesses that leave their doors open; incentives to business to participate in better energy policies — offer a logo for participating business or signs that identified the business as energy smart, keeping its door closed for good energy policy

MB Power Plant: EPA is considering a PSD permit; Prevention of Significant Deterioration. The shorter stacks in a new plant will increase ground pollution by 60% but owners can buy credits. The EPA hearing may be in mid October. Pam proposed a mailing on the EPA hearing involving the L.A. Chapter and Great Coastal Places.

The health commission report on the GMO task force will be discussed at Aug 14 HC meeting. BoS will review Ag Commission report on Aug 22.

MLPA: 8/2 Sac, 8/15 Monterey — Mandy is going to the meeting in Sacramento tomorrow. Gordon Hensley is going. Mandy will ask for stricter protections for Central Coast sites. She will talk about the area from Piedras Blancas to the estuary and state that people are not coming to speak because of threats and intimidation in MB. TDC amendments will come to the BoS for approval on August 22. We want TDC amendments with recommendation from the Planning Commission that receiving sites be allowed only within URLs.
Outings and Activities Calendar

All of our hikes and outdoor activities are open to all Club members and the public. If you have any suggestions for hikes or outdoor activities, questions about the Chapter’s outing policies or would like to be an outings leader, call Outings Leader Gary Felsman (473-3694). For information on a specific outing, please contact the outgoing leader. Outings Leaders please get your outings or events in by the 1st for the next month’s outings.

Sept. 3, 0930, Sun., Callender Dunes Hike: Meet at west of Callender Rd. at Hwy 1. We’ll hike into remote dunes to Chumash Midden, see Black Lake, Dogs OK. Call 929-3647 or <bdenneen@kcbx.net> a few days before to confirm and for details.

Sept. 4, 9030, Sun., Point Sal Hike & Cleanup: Meet at end of Brown Road, hike to ridge (2.5 miles 1000 ft elevation), and then decide to go to PS Beach, Paradise Beach or return. Bring water, wear a backpack & a friend. Dogs OK. With road closed—little trash to pick up. Call 929-3647 or <bdenneen@kcbx.net> a few days before to confirm and for details.

Sept. 7, 0930, Sun., Santa Rosa Wilderness Service Trip: Hike in Santa Rosa Wilderness: Tarma-rik is indiscernable and unrelent- ing. We will assist the BLM in eradi- cating this non-native invasive from a part of the Santa Rosa Wilderness Area within the recently created San Jacinto National Monument. Loppers and handaxes are the tools, and a bad attitude toward tamarisk is required. Saturday Sept 7th, Sunday re- served for a recreational hike. Justin Seastrand, Wilderness Coordinator for the BLM, will be our mentor. Contact Leader: Craig Deutsche, (310-477-6670), deutsche@earthlink.net

Sept. 7, 0930, Sun., Tomales Beach - Trash & Cleanup: Meet at west of Callender Rd at Hwy 1 Well we’ll hike into remote dunes to Chumash Midden, see Black Lake, Dogs OK. Call 929-3647 or <bdenneen@kcbx.net> a few days before to confirm and for details.

Sept. 8, 9030, Sat., Tentative hike, The Big Sur Coast. Come take a hike along the Big Sur coast. Destination is unknown at this time. Meet at the Wildlamar Day Use Area, San Simeon State Park, 8:45 a.m. Bring lunch, water, and dress for the weather. Details call Gary at 473-3694.

Sept. 9, 0930, Sun., Bike Tour of Woodlands: Will bi- cycle the Creek, a very unique stretch of creek that is ‘instant city’. Meet at junction of Wil- lose &爱好 Way. The last bike- tour, we went about 1,000 acre “euke forest” — you have to see it to believe it — amazing. Who said wood is limited out there? Call 929-3647 or <bdenneen@kcbx.net> a few days before to confirm and for details.

Sat., Sept. 16th, Coastal Cleanup Day: Lend a hand to remove trash from our local beaches. Contact ECOSSOL for information. 544-1777 www.ecossl.org.

Thurs-Mon, Sept 14-18 - Tomayre Crest: The Tomayre Range is the longest mountain range in Ne- vada running for over 100 miles. The Tomaybes include the large Arc Dome Wilderness, but the range to the north is still undeveloped, although its wilderness qualities are just as fine. We will sample a little of both parts of the range on this three-day backpack. For more information or to sign up contact: 408-947-0588 or johnswf10mac.com. Limited to 12 people. Loma Prieta chapter.

Sat., Sept 21 - Cuyamago Flats Hike: Joshua Tree National Park. Would you like to go for a sce- nic loop hike in a seldom used but very beautiful area of the park? The plan is to mix a section of the Califor- nia Riding and Hiking Trail with some cross-country hiking that will include great overlooks looking down into the low desert and some lovely hi desert scenery. The hike will begin at about 4800 feet, hopefully on a cool clear fall morning. This should be about a five-hour hike and about a seven-mile distance. Twenty quarts of water and a high protein lunch should do you fine and your momma proud. Call Ann and Al Murdy at 760-366-2932 (directly, no messages) or email amurdy@earthlink.net.

Sat., Sat., Sept 24 - 23rd - Tama- rik/Eradication, carpark, and hike in Surprise Canyon: After three pre- vious service trips our outing should deliver the final blow to these inva- sive weeds. With a flowing stream and shade, this canyon in the Panamint Mountains is a pleasant set- ting or our work with Marty Dickens, Wilderness Coordinator at Ridgecrest BLM office. In addition to the area of Surprise Canyon the entire area, campfire conversation will in- clude concerns about past and future use of the area by off-road vehicles. We work two days and the third is re- served for an exploratory hike to one of several possible destinations. Primitive camping, 2WD vehicles OK. Sign-up and information from leader: Craig Deutsche, (310-477-6670), deutsche@earthlink.net

CNRCC Desert Camp

Sat., Sat., Sat., Sept. 29, 10 a.m., Creek Day 2006: Come help the City of SLO: The Land Conservation of San Luis Obispo County continue the tradi- tion of keeping our creeks clean as we prepare for the winter months. Meet at Mission Plaza in San Luis Obispo for more information call 544-9096, or visit the website at http://www.special-places.org/ecm/Home.html

Sat-Sun, Sept. 29-Oct. 1, Cottonwood Campground Tree Planting and Cleanup Work Party: Join us for National Public Lands Day by planting cottonwood and oak seedlings at the BLM campground in McCann Valley. Saturday will be a work day. Sunday we will have the oppor- tunity to hike in the area, possibly Som-brero Peak, or the palm grove in Four Prong Canyon. This is also a criti- cal area of concern because of the potential for a wind farm in the valley. Leader: Larry Klaassen, 619- 582-7477, klaassen_L@iusd.edu, Contact Leader: Craig Deutsche, <bdenneen@kcbx.net> a few days before to confirm and for details.

Sat., Oct. 1, 0930, Sun., Coast Hike: An exploratory hike of about 4 miles near the ocean. Call 929-3647 or <bdenneen@kcbx.net> a few days before to confirm and for details.

Sat-Mon, Oct 14-16 - Service and Celebration on the Carrizo Plain: In 2001, President Bill Clinton created the Carrizo Plain National Monument under the authority of the Antiquities Act of 1906. This area is now part of the National Landscape Conservation System, special land- scapes managed by BLM. This outing, sponsored by the Sierra Club and The Wilderness Society, will celebrate the one-hundredth anniversary of the Act. On Saturday, we will remove and/or alter barbed wire fencing to benefit pronghorn antelope. Sunday’s cel- ebration will be a hike in a rugged and little-known area of the Caliente Mountains WSA. Those who are able will continue fence removal on Mon- day. For information, contact Leader: Craig Deutsche, (310-477-6670), deutsche@earthlink.net.

CNRCC Desert Camp

Sat, Oct 21 - Covington Flats Hike - Joshua Tree National Park. Would you like to go for a sce- nic loop hike in a seldom used but very beautiful area of the park? The plan is to mix a section of the Califor- nia Riding and Hiking Trail with some cross-country hiking that will include great overlooks looking down into the low desert and some lovely hi desert scenery. The hike will begin at about 4800 feet, hopefully on a cool clear fall morning. This should be about a five-hour hike and about a seven-mile distance. Twenty quarts of water and a high protein lunch should do you fine and your momma proud. Call Ann and Al Murdy at 760-366-2932 (directly, no messages) or email amurdy@earthlink.net.

CNRCC/San Gorgonio Chapter

Sat – Sun, Oct 21-22 - Avawatz Mts and Death Valley Tour of the proposed wilderness. This area includes rugged mountains, deep canyons, open valleys, pristine dry lakes and rare desert wildlife. Overnights Sat-Sun the tour will take us to Sheep Springs, through the Bowline Hills, a previously pro- posed wilderness addition, and camping at Owlhead Springs. Sun- day will include a stop at beautiful Saratoga Springs for lunch and then a trip to China Ranch with a hike to Amargosa River waterfalls. The roads are dirt and rough at times, so 4-WD is strongly recommended. The camp- ing is primitive, so bring all food for weekend and lots of water. Camera and binoculars also highly recom- mended. Bryn Jones, of California Wilderness Coalition, will guide the tour with an abundance of informa- tion on the area. To sign up contact: Carol Wiley at earthlinkpales@web To sign up by phone contact Carol Wiley (760) 245-8734 or Estelle Delgado (760) 241-7327, CNRCC Desert Camp

Sat-Sun, Oct 28-29 - Carrizo Antelope Protection Carcamp: With little rainfall and few water sources, the species that live on the Carrizo Plain are both hardy and endangered. Particularly beautiful are the pronghorn antelope, which evolved in these wild, open spaces. They cattle ranching and the legacy of endless fences - which are deadly to the pronghorn. Join us for a weekend removing fencing for their benefit. Work hard on Saturday; take some
time Sunday to enjoy the monument. Camp at Selby campground, bring food, water, heavy leather work- gloves, and camping gear for the weekend. Potluck Sat, night. Alter- nate date for those of you with 12- Resource specialist: Alice Roch. For more information, contact Leaders: Cal and Letty French, 1140 Chim- ney Rock Road, Paso Robles, CA 93445, (805-235-7338). Prefer e-mail ccfrench@cnn.com.

CNRCC/Santa Lucia Chapter

Sat., Oct 28: Tomales Dunes with the Great Coastal Places Campaign: Sierra Club Coastal Director Mark Massara will lead us from the site of the proposed wilderness addition, and show the threatened coastline and show the simple things you can do to make a difference in protecting the coast for future generations. Tomales Dunes has sensitive wetlands, multiple endangered species and a future in doubt. Let us know how much you can do with very little time commitment. For more information email Mark at eemurdy@eee.org or call Catherine Caulfield at (415) 663-9312.

This is a partial listing of Outings offered by our chapter. Please check the web page www.santasalud.csierraclub.org for the most up-to-date listing of activities.
