CHAIRMAN'S CORNER: By Bill Sanders

In the last Chairman's Corner of the year, a comment on the progress of the section is in order. Interest in section activities has remained high throughout the year. The SPS is by far the most active section in the Angeles Chapter. Membership continues to grow. And to me the most encouraging sign of progress is that new members continue to feel that they are welcome to participate in activities.

Let me emphasize that welcoming new members and getting them interested in SPS activities is a primary goal of the section. We are furthering Sierra Club aims by doing this.

I repeat that many of us were introduced to the mountains and to our mountaineering friends through the SPS. It is hoped that it can function in this way for many others. To this end, the SPS and its members should always extend a hearty welcome to newcomers.

Finally, I would like to express appreciation on behalf of the section members and myself for the fine job the officers and committeemen have done this year. The assignments these people have completed take a lot more time than is apparent at first look.

The success the section has had is measured in terms of good work these people have done.

A capable leader, Jerry Keating, has been chosen for 1960. Here's looking forward to more progress in the coming year.

---COMING EVENTS---
Dec. 10: Business meeting
Jan. 7: Business meeting

1960 OFFICER ASSIGNMENTS DECIDED; TWO BY-LAW AMENDMENTS APPROVED

The 1960 SPS officers met November 9 and decided which Management Committee post each would occupy. The results were as follows:

Jerry Keating, chairman; Frank Samborn, vice chairman; Bill Sanders, secretary; Mary Ann (soon to be Miller) Bide, treasurer; and George Shirno, alternate officer.

The five received the highest number of votes in November's election. The membership also approved by more than the required two-thirds majority two By-law amendments.

The first amendment scored 72-2. It provides that all By-law amendments shall be submitted to the membership by mail. The two-thirds majority was retained, but it applies only to the returned ballots.

The second change carried 54-21. It provides that SPSers shall subscribe to The Echo to retain active membership and voting rights. Related members living at the same address need only one subscription, according to the change which becomes effective on January 1, 1960.

The Management Committee decided to send this Echo to all SPS members because of the new By-law provision affecting membership status.

Seventy-five activities questionnaires were returned with the ballots. A preliminary check showed an overwhelming majority favored moderate trips, while it was "50-50" on technical and non-technical trips.

The questionnaire was turned over to the Schedule Committee for evaluation, and results will appear in the next issue of The Echo.
ROUTE OF POPULAR WINTER CONDITION DISCUSSED BY CLIMBER WHO TRIED IT

(Edited note: Considerable interest was expressed in articles in the June, 1956, and July-August, 1959, issues of The Echo describing winter ascents of Mt. San Jacinto (10,831) via the Snow Creek Idyllwild traverse. The following description was written by Rich Grazy after he made the climb with Andy Smatko, Bill Sanders and Chuck Miller.)

The most difficult route finding on this climb was locating the road to Snow Creek. Take the Palm Springs cut-off from U.S. 60-70-99. Just beyond the underpass, turn right onto a good road. Soon you angle off on a small dirt road coming diagonally from the left. Turn left again at the first road to the left. When you get to a spot where it looks as if the road goes right, jog down to the left to the road you are looking for.

You will know when you have reached the correct road because it will be a typical, narrow, winding, up and down approach road—but it is oiled.

The route from the end of the road is high to the left of the creek. After about an hour the average hiker should be on a plateau overlooking Snow Creek. Stay on this plateau until you see a cascade or waterfall which looks more and more impassable the closer you get. Head through brush to a side canyon to the left below the waterfall. From the top of this side canyon take a very short drop down into the main canyon. From here the route is straight up the canyon to the summit with about three-fourths of the elevation yet to be gained. The last 3,000 feet of climbing was in steep snow, and a rope should be carried. The first man reached Idyllwild in 13½ hours.
