By Chris Ann Lunghino
Gallatin Coal-Fired Power Plant – The Facts

The Tennessee Valley Authority (TVA) is poised to invest over a billion dollars in the outdated, dirty Gallatin coal plant to keep it running at a time when other major electricity providers are choosing 21st century options that are cheaper, cleaner, and more efficient. Instead of wasting our money on a fossil plant that will continue to pollute our air, water, land, and climate, TVA needs to replace the Gallatin coal plant with energy efficiency and clean energy.

TVA has fought public oversight of its plans for Gallatin. TVA officials initially offered only thirty days for members of the public and ratepayers to comment on their plan. A public outcry from Sierra Club members and other citizens’ organizations across the state resulted in a 14-day extension of the comment period, but TVA continues to refuse to provide the information the public needs to be fully informed, and has announced that it does not see any reason to hold a public hearing to allow concerned residents to speak out.

This is a critical decision that has significant long-term implications: a $1.2 billion investment to keep the Gallatin coal plant running guarantees at least a decade more of burning fossil fuels and a decade more of associated environmental, economic, and health impacts, including climate change.

The wrong course. Addressing climate change is the global mandate for the 21st century.

What We’re Doing About It

The Tennessee Chapter, with the support of Sierra Club Beyond Coal Campaign National staff, has undertaken a major effort to pressure TVA to make the right decision for Gallatin and to operate with transparency. We are currently engaged in the following activities and we need your help:

• **Post-Card campaign** – distributing message post cards asking for clean energy not coal, pre-addressed to TVA board, governor, and Gallatin elected officials.
  E-mail to: chris.lunghino@sierraclub.org to volunteer.

• **Petition signing campaign** – collecting thousands of signatures to pressure TVA board to retire Gallatin. Join the petition campaign team – e-mail chris.lunghino@sierraclub.org.

• **Sign-on letter** – circulating joint letter to universities, environmental advocacy organizations, and other interested organizations asking TVA to invest in energy efficiency.

• **People’s public hearing** – because TVA has refused to help a public hearing, holding a people’s public hearing with expert testimony to help TVA customers understand the issues on Thursday, February 7 at 6:30 pm in Nashville. Venue TBA. Please watch your inbox for details. E-mail to volunteer: chris.lunghino@sierraclub.org.

• **Phone banks** – educating people about the issue and asking people to write to TVA, to spread the word, to volunteer, and to attend our people’s public hearing. Help with canvassing: chris.lunghino@sierraclub.org

• **On-line action alert** – ongoing – asking people to send an e-mail to TVA board telling them to invest in energy efficiency and clean energy instead of coal.

• **Letters from public officials and energy efficiency companies** – reaching out to public officials and energy efficiency companies to motivate them to write letters to the TVA board.

• **Letter to editor campaign** – team making regular submissions to Tennessean, Gallatin papers. Join the team! E-mail me: chris.lunghino@sierraclub.org

How You Can Help

• Contact the TVA Board of Directors and ask them to ensure that TVA doesn’t take more than one billion customer dollars to keep an out-of-date coal plant running. Tell the TVA Board to move forward with clean energy: board@tva.gov

• Volunteer to help our organizer, Chris Ann Lunghino, with any of the “What We’re Doing About” actions listed above: contact her at: chris.lunghino@sierraclub.org, or contact her with any other ideas you have for pressuring TVA

• Spread the word to your neighbors, friends and family

• Attend our people’s public hearing.

Why Help?

• Moving forward with 21st century clean energy solutions is critical for your health, your pocketbook, and your children and grandchildren

• Your involvement will increase Sierra Club membership

• Research shows that volunteering boosts happiness – people who work to further causes they care about get the same happiness boost as earning an additional $100,000 per year (assuming basic needs are met) What We Accomplished In the Early Weeks

As of December 3, the day this article was written, the Sierra Club Gallatin team had taken the following actions:

• Formed a coalition of organizations and individuals to work together

• Posted and publicized an online action alert to pressure TVA to extend the public comment period for their plans

• Hired a full-time organizer

• Developed a slogan and fact sheet

• Posted and publicized an online action alert asking people to write a letter to the editor of their local paper

• Posted and publicized an online action alert to pressure TVA to fully consider energy efficiency and clean energy options instead of coal

• Organized and facilitated 3 phone banks asking people to take action to pressure TVA

• Filed a Freedom of Information Act lawsuit asking TVA to provide the information the public needs to be fully informed

• Launched an online ad campaign on three local newspaper websites calling on TVA to prioritize twenty-first century clean energy solutions

• Issued a press release announcing the Freedom of Information Act lawsuit and the online ad campaign, which resulted in coverage in the Tennessean*

• Together with 4 other organizations, submitted detailed legal comments in response to TVA’s Draft Environmental Assessment on the proposed plans for Gallatin, saying TVA has failed to appropriately consider other options and to disclose information about the proposed upgrades to the public

• Issued a press release announcing the submission of legal comments, highlighting concerns about the projects.

Thanks for making a difference!

ARTICLE SUBMISSION GUIDELINES:

Submission Target Date is January 25 for the March—April issue.

1. E-mail and e-mail attached files are preferred. Send to gvnhorn26@gmail.com either with embedded text messages, or attached files. Attached files are preferred. Word is preferred but Apple users may submit articles in Pages. Photographs should be scanned in a .jpg or a .tif file format then either attached to e-mail or mailed via U.S. Postal Service on a 3 1/2” diskette or CD RM. Please include a stamped, self-addressed envelope if you would like your diskette or photo prints returned.

2. Photographs should be scanned in a .jpg or a .tif file format then either attached to e-mail or mailed via U.S. Postal Service on a 3 1/2” diskette or CD RM. Please include a stamped, self-addressed envelope if you would like your diskette or photo prints returned.

3. Hard-copy handwritten or typewritten articles may be accepted however, pre-approval from the Editor is required. Any materials submitted via USPS mail will not be returned unless a stamped, self-addressed envelope is provided.

4. Concerns or complaints should be addressed to Barbara Kelly, Communications Committee, bk1rivers@comcast.net.

5. Any materials submitted via USPS mail will not be returned unless a stamped, self-addressed envelope is provided. Please notify the Editor when changes are needed.

All meetings and outings notices, articles, and photo-graphs should be in by then. Send material to Gene Van Horn at gvnhorn26@gmail.com
Your Support is Needed to Defend Tennessee’s Environment

By Adelle Wood

Start 2013 right and renew your commitment to the Sierra Club’s Defenders, which supports our important legislative and lobbying program. If you haven’t already become a Defender, now is the perfect time!

Our Sierra lobbyist, Mike Murphy, works diligently for us while encouraging members to be part of the process. As we have become more involved, our legislators have learned that it is we, their constituents, who care about the environment. Beginning this session, the Sierra Club will send alerts targeted to specific districts when an important bill is coming up for a vote.

The Sierra Club has an impressive record. We have worked with legislators and other organizations to move the regulation of mountaintop removal forward; to keep our waters free of pollution; to protect home and landowners from unfair and devaluing policies; to create and protect parks and wilderness areas; to keep Tennessee from becoming a final resting place for nuclear waste; to promote green industries and jobs; and to encourage sound land use strategies.

During this session we anticipate focusing on gas hydrofracking regulations, protection of the Real Estate Transfer Tax, prohibition of mountaintop removal coal mining, defense of incentives for solar energy, and protection of funding for state parks. Our successes have been because of three factors: strong champions in the legislature; our Sierra Club lobbyist who works tirelessly for our goals; and you members who contact your legislators to tell them your views.

How can you help?
● Renew your support for the Defenders or join now!
● Contact your legislators about bills and initiatives that we let you know are important;
● If you are not receiving legislative updates and/or want targeted information about contacts to be made on critical votes, send me your e-mail address on the form below.

You can give a little if you can’t give a lot. You are the lifeblood of this crucial program, and your support makes it possible. Send the form below with a check made out to Sierra Club to Sierra Club Defenders, c/o Adelle Wood, 4641 Villa Green Drive, Nashville, TN 37215.

Donations to this fund are not tax-deductible for federal income tax purposes

Thank you!

Editor’s Notes

Gene Van Horn

We have all seen various groups gradually become non-functional and then disband because the members age and there is no replacement from the next generation. Another problem of some groups is reaching out across cultural chasms. The problems of some groups (e.g., clean air and water) are not the same as the problems of other groups (e.g., food, paying bills).

We have volunteers in the Sierra Club who are trying to bring in young people and also reach across cultures. One of the major efforts in this direction includes the Inner City Outings (ICO). An article was set to go in the last issue of the Tennessee-Sierran along with some great photographs of youngsters enjoying themselves in the outdoors that lost much of its impact because of problems with space relating to the ballots. Two of the photos were not printed and the other photo was not on the same page as the matching article.

The last part of that article is repeated below. Any help (physical or monetary) is appreciated.

Mandatory Red Cross certification for outings leaders. Cost? $70/person biennially.

Mandatory Basic Water Safety certification (in order to conduct water outings): Cost? $40 (note almost all ICO leaders who got certified this year paid this out-of-pocket).

CLOSE YOUR EYES AND ENVISION FUTURE PROPOSED OUTINGS MONTGOMERY BELL OVERNIGHT CAMPING

Estimated cost* for 15 kids/chaperones: $750

MAMMOTH CAVE

( Remember, our closest national park) Estimated cost* for 15 kids/chaperones: $350.

CUMBERLAND CAVERNS

Estimated cost* for 15 kids/chaperones: $530.

*Includes price of admission, meals, transportation expense

Here’s where you can help. YOU can be a part of this and share in the joys this program offers by becoming a certified ICO leader yourself OR you can help us with a financial contribution.

For a tax deductible donation make check payable to Sierra Club Foundation with Inner City Outings on the “For” line.

For donations not requiring tax deductible status, make check payable to Inner City Outings.

If you are interested in ICO certification contact: Joy Mayfield (615-851-1192) or joy.mayfield@comcast.net.

Page 3 - January/February, 2013
**CHEROKEE GROUP (Chattanooga)**

New Year, Covered Dish Get-Together: January 6, 5 P.M. at the home of Bill and Barbara Hurst, off Market Street. No program is held in December - we gather for our annual covered-dish party at Barbara's and Bill's just after the new year begins. Bring a covered dish to share, and a friend or two that you'd like to introduce to environmental concerns. We'll have fun, socialize and talk about our goals for the new year. Call Barbara for directions - 423-886-9503; best to get directions from her, the GPS services are incorrect and will steer you far away from a non-existent road and you'll miss dinner and the fun!

**Strategy Meetings:** Jan, 14 and February 11 (Board Meeting) 2nd Monday, 6 P.M. NEW LOCATION - WE'VE MOVED! Our Strategy Meeting is now held downtown, at Second Presbyterian Church in their excellent meeting room! Suitable seating and a non-descript storefront building with little-to-no signage - it is the last on the left in the first block off Market Street, located at the corner from the church entrance - parking in the church is off Market Street and see exactly what we are planning. If you have any idea for a future program, contact Judith Rutschman at judithrutschman@gmail.com or (901) 767-5916.

**TUESDAY, January 8, 6:30 P.M. Executive Committee Strategy Meeting Contact Sue A Williams for location information.**

The Executive Committee meets on the second Tuesday of every month. This is a business meeting where members are welcome to attend. Come and see exactly what we are planning. If you have an issue which you would like to see discussed, agenda items must be submitted at least 5 days before the meeting to the Executive Committee Chair Sue A Williams at zcnrv@juno.com or 901-274-0524.

**THURSDAY, January 31, 5:30 P.M. Meet & Greet, 6:15 P.M. Program: “Complete Streets” Benjamin L. Hooks Central Library, 3030 Poplar Avenue, Memphis, TN**

Benjamin L. Hooks Central Library (now designed as a library rather than the former library) is the most environmentally friendly library in Tennessee, with 20% of the electrical energy consumed being supplied by their solar panels. As we learn more and begin to figure out what our response will be.

**Note:** Our Program Meetings continue to be held at GreenSpaces, 63 E. Main Street, which is a non-descript storefront building with little-to-no signage - it is the last on the left in the first block off Market Street, located at the corner from the church entrance - parking in the church is off Market Street and see exactly what we are planning. If you have any idea for a future program, contact Judith Rutschman at judithrutschman@gmail.com or (901) 767-5916.

**Thursday, February 7, 5:30 P.M. Monthly First Thursday Gathering Otherslands Coffee Bar, 641 S. Cooper, Memphis, TN**

Sierra Club members, activists, and friends can meet in a casual setting to talk about issues and interests. First Thursday contact: Mark Plummer at mark.chickasaw@gmail.com or 901-679-4622.

**TUESDAY, January 8, 6:30 P.M. Executive Committee Strategy Meeting Contact Sue A Williams for location information.**

The Executive Committee meets on the second Tuesday of every month. This is a business meeting where members are welcome to attend. Come and see exactly what we are planning. If you have an issue which you would like to see discussed, agenda items must be submitted at least 5 days before the meeting to the Executive Committee Chair Sue A Williams at zcnrv@juno.com or 901-274-0524.

**TUESDAY, February 19, 6:30 P.M. Movie and updates, see our website and Facebook page.**

**Sierra Club Chickasaw Group is now on Facebook:**

www.facebook.com/ChickasawGroup/ This is a forum for public discussion, so please feel free to post comments, raise issues, and express environmental concerns. Updates and details about upcoming events are posted here.

**“Nature of Conservation” Sierra Club Chickasaw Group Cable TV Show on WYPL-TV 18 (Comcast/Xfinity) and Online at Vimeo:**

Days and times vary – see http://www.memphislibrary.org/ic/18/schedule/ (or the Comcast/Xfinity on-screen guide) for the latest schedule. Topic changes every month. For more information, or if anyone has an idea for a future program, contact Judy Rutschman at judithrutschman@gmail.com or (901) 767-5916. Previous programs are now available online at: http://vimeo.com/user10896810

**HARVEY BROOME GROUP (Knoxville)**

January 7, 7:00 P.M., Tennessee Valley Unitarian Universalist Church, Knoxville. From Sea to Icey Sea: Biking America’s Last Frontier for Record and 101 More Amazing Things to do on Your Retirement List. Gerry Eddlemon GerFalcon Racing, Knoxville, TN

Gerry Eddlemon, an aquatic ecologist now retired from Oak Ridge National Laboratory, will demonstrate what even a crotchety old guy can do with one of the world’s “greenest” and most efficient means for transportation ever invented — the bicycle:

• Cross America’s last frontier — Alaska — from the Pacific to the Arctic Oceans in record time
• Set or break 76 ultramarathon cycling records
• See how ineffably beautiful this old world is, even now, from the backroads at 12 mph (or 5 to 50 mph if you prefer)
• Make lots of new friends (and a few disgruntled drivers)
• Fight angst and depression — become grease covered,5 to 50 mph if you prefer)
• But wait! There’s more . . .

For more information contact Mac Post mp3116@aol.com

February 12, 2103, 7:00 P.M., Tennessee Valley Unitarian Universalist Church, Knoxville. Footpath My Eye!!! Barbara Allen, Trail Name Mamaw-B (http://www.trailjournals.com/entry.cfm?trailname=13312)

Come and be entertained with comments and photos by the oldest woman to thru hike the Appalachian Trail. Walking the entire AT with 30 lbs. on your back is not a hike but a challenging task, not recreation but an education and a job, but also a most rewarding and enjoyable experience. I would rather die doing something I love than let fear rob me of the experience I seek. For more information contact Mac Post mp3116@aol.com

**MIDDLE TENNESSEE GROUP (Nashville)**

PROGRAM: January 10, 7:00 p.m., at Radford Lake Visitor Center It is not too early to think about putting up nest boxes for songbirds, because many, including our beloved Eastern Bluebirds, will already be on the move by February. Kent Hiday will present a program on “Preparing Your Yard for Spring Nesting” for all local birds but will focus on the Bluebird in particular... (continued on page 5)
Welcome to the Tennessee Chapter’s master list of our local chapters. Members, you are always very welcome at any of these events. Listed by the sponsoring Group, you are welcome to attend as many across the state as you wish! We believe that what you come to love, you will come to stand up to protect.

All participants in Sierra Club outings are required to sign a standard liability waiver. If you would like to read a copy of the waiver before you participate, please refer to: https://www.sierraclub.org/outings/content/forms/Sign_eWaiver.PDF or call 415-977-5630 for a printed version. Transportation to the outing, including carpooling, ride-sharing or anything similar, is entirely a private arrangement among the participants. Participants assume the risks associated with this travel.

CHEROKEE GROUP (Chattanooga)
Emily Marr Davis is our Outings Chair, and point-person for outings information for our Group. Our activities are always open to the public and to members of the Club from across our state! Outings are planned to take in the interests and skill levels of the participants. For more information, contact Emily at 423-413-3038 or emily.marr.davis@gmail.com.

January 12 (Sat) Sandhill Crane/Hiwassee Wildlife Refuge Paddling Trip: Details: Put-In at Bylthe Ferry at 11:00 A.M. (though the group may arrive a little later to meet and caravan as desired.) Must have paddling experience and gear, including boat and appropriate clothing, a set of dry clothes, water, and snacks/lunch. Limited number of spots available, reserve a spot early via e-mail: emily.marr.davis@gmail.com, 423-413-3038 for more information.

February 9 (Sat) Hike and Orienteering Workshop at Cloudland Canyon. Take advantage of the Winter views of the Canyon and hopefully the water will be flowing! Details: Workshop begins at the park at 10 A.M. (the group may arrange a ride/place to meet and caravan as desired.) Must have paddling experience and gear, including boat and appropriate clothing, a set of dry clothes, water, and snacks/lunch. Limited number of spots available, reserve a spot early via e-mail: emily.marr.davis@gmail.com, 423-413-3038 for more information.

February 9 (Sat) (Hike and Orienteering Workshop at Cloudland Canyon. Take advantage of the Winter views of the Canyon and hopefully the water will be flowing! Details: Workshop begins at the park at 10 A.M. (the group may arrange a ride/place to meet and caravan as desired.) Must have paddling experience and gear, including boat and appropriate clothing, a set of dry clothes, water, and snacks/lunch. Limited number of spots available, reserve a spot early via e-mail: emily.marr.davis@gmail.com, 423-413-3038 for more information.

CHICKASAW GROUP (Memphis)
No outings were scheduled for January or February.

HARVEY BROOME GROUP (Knoxville) 12 Jan (Sat), Take-a-Hike, Spruce Flats Falls-Lumber Mountain National Park. This loop hike will start at the Tremont Institute. From the Institute we’ll take the “Falls Trail” to Spruce Flats Falls. This section to the falls (about a mile) is relatively steep with some difficult parts, but well worth the effort. Here there are a series of cascades that drop 100 feet. Spruce Flats Falls is perhaps one of the nicest “unknown” falls in the park. We will then go above the falls and find an unmaintained trail (i.e., old railroad bed), which we will take to Lumber Ridge. Parts of this unmaintained section of the loop are overgrown with rhododendrons, littered with some fallen trees, and will require crossing Spruce Flats a few times. Some remnants of Little River Lumber Company can be seen along this stretch. About half-way through the hike we’ll find the Lumber Ridge Trail and take it back to the Institute. The Lumber Ridge Trail will mostly be downhill with an elevation loss of more than 1000 feet. The driving distance is about 50 miles from Knoxville or about 25 minutes from our meeting location in Maryville. Pre-register with BJ and Bob Perlick: perlick@aol.com; 675-7668.

26-27 Jan (Sat-Sun), Winter Backpack. Grassy Ridge, Cherokee National Forest. This is a short hike trip to a 6,000’’ elevation bald near Roane Mountain. This is a great high-elevation site where we can test our winter backpacking skills. The campsite is a short hike (2.6 miles) to a fantastic view, best when there’s snow. We’ll drive to Carver’s Gap on the AT. Driving time about 3 hours. (If weather conditions make access to Carvers Gap difficult, we’ll wimp out and opt for a lower elevation destination.) Pre-register with Ron Shrieves at 865-922-3518 or mailto: ronaldshrieves@comcast.net (e-mail is preferred).

9 Feb (Sat): Take-a-Hike, Laurel-Snow Natural Area, near Dayton, TN. With the water flowing, Laurel Falls is a sight to behold. We’ll hike up the historic trail that follows Richland Creek through an old mining area before turning to ascend the bluffs to Snakehead Point and Bryan Overlook, where we’ll have great views of the watershed. The lack of leaves on the trees in winter enhances views of the surrounding area, as well as giving great views of the spectacular mountain creek and several waterfalls. Round-trip hike distance is 9 miles, including a side trip to the old Dayton reservoir dam, but it does have a short steep stretch ascending the bluff and one creek crossing. One-way driving distance is 80 miles. Pre-register with Ron Shrieves at 922-675-7668 or ronaldshrieves@comcast.net (e-mail preferred).

23-24 Feb (Sat-Sun), Backpack (Spring brooklet), Little Bottoms Trail to Abrams Mountains National Park. We will start out from the Abrams Creek Ranger Station in Happy Valley. The hike to Little Bottoms is about 3 miles via the Cooper Road Trail (1.3 miles) and the Little Bottoms Trail (1.6 miles). We’ll setup camp then hike to Abrams Falls by continuing on the Little Bottoms Trail to the junction of the Hatcher Mountain Trail. We’ll take Hatcher Mountain a short distance to the junction of Hannah Mountain and Abrams Creek trails. The falls are about 1.7 miles up the Abrams Creek Trail. The backpack is rated moderate. Since this is a late winter hike, appropriate cold weather gear is mandatory. The driving distance is about 25 miles from Maryville. Pre-register with BJ and Bob Perlick: perlick@aol.com; 675-7668.

MIDDLE TENNESSEE GROUP (Nashville)
Middle Tennessee Group Sierra Club members are encouraged to apply: Be an Outings Leader for MTSG. Contact Tom at t.j.progress@comcast.net or (615)853-1192.

Meetings (continued)

Ten Essentials for Hiking

Sierra Club outings offer a variety of wilderness experiences, from backpacking and car camping to climbing and sketching. It is important to realize that while all trips are guided, the leader is in charge. It is each participant’s responsibility to learn to operate in a safe manner. To this end, the following is a list of essential items that should be brought on every outing, according to the particular type of outing. These are:

- Adequate map
- First aid kit
- Compass
- Rain gear
- Food and water

In case of a wilderness emergency: You decide what is the most important thing to bring!

Middle Tennessee Group Sierra Club members are encouraged to apply: be an Outings Leader for MTSG. Contact Tom at t.j.progress@comcast.net or (615)853-1192.

RECYCLING VOLUNTEERS: EVERY SATURDAY - 9:00 - 12:00 - Volunteer at the recycling Site. We are looking for volunteers to man the recycling center from 9 to 12 on Saturdays. This is a major source of income for the club and we need volunteers to spread the workload on. We ask that you commit to keep doing it every month. If you could volunteer just a few times a year that would help — that’s only once every few months! Volunteers just need to be willing to ask people if they need help in unloading their recyclables and tell them “thank you” for recycling. The fun part is that we receive from this effort help the group operations and activities, which includes lobbying efforts.

The bins are in front of the Kroger at 3955 Nolensville Road, Nashville, TN. The Kroger lot is located about a half mile towards town from the Walmart at Harding and Nolensville. It’s a great place to get involved with the Group! Contact Tom at 615-373-9237(h) or 892-0128(c) for more information.

Free and open to the public, and a snack will be served.

Preview of March 14 program: What are genetically modified foods (GMOs and sometimes genetically modified seeds)? What do we need to know about them? Join the Ten Essentials for Hiking Club and we need volunteers to spread the word about this upcoming event. "Unknown" falls in the park. We will then go above the falls and find an unmaintained trail (i.e., old railroad bed), which we will take to Lumber Ridge. Parts of this unmaintained section of the loop are overgrown with rhododendrons, littered with some fallen trees, and will require crossing Spruce Flats a few times. Some remnants of Little River Lumber Company can be seen along this stretch. About half-way through the hike we’ll find the Lumber Ridge Trail and take it back to the Institute. The Lumber Ridge Trail will mostly be downhill with an elevation loss of more than 1000 feet. The driving distance is about 50 miles from Knoxville or about 25 minutes from our meeting location in Maryville. Pre-register with BJ and Bob Perlick: perlick@aol.com; 675-7668.

- 26-7 Jan (Sat-Sun), Winter Backpack.
- 9 Feb (Sat): Take-a-Hike, Laurel-Snow Natural Area, near Dayton, TN.
- 23-24 Feb (Sat-Sun), Backpack (Spring brooklet), Little Bottoms Trail to Abrams Mountains National Park.

FREE and open to the public, and a snack will be served.

10. The tenth essential: You decide what is the most important thing to bring!
Is Memphis Ready for Reform?

One key element of the Sierra Club’s Conservation Policies and Environmental Justice. The EJ policies support “the right to a clean and healthful environment for all people.” They include the following rights: “The Right to Democracy”, “The Right to Participate”, “The Right to Clean Air and Water”, and “The Right to Know”, among others. The case of planning for the Foote Homes and the Vance Avenue neighborhood in Memphis is evolving into a conflict between plans that address current and future community conditions and future development projects.

The resident-generated plan as the overall policy framework guiding the future development of the Vance Avenue neighborhood. The Transformation Plan features the restoration of one of the essential features of the neighborhood’s environment. The plan proposes the “day-lighting” of a channelized urban stream, the Little Bitty Bayou, re-naturalizing and improving the storm water cycle of the area. Complementing this re-naturalization will be a variety of green infrastructure improvements designed to reduce storm water runoff while providing area school children with an enhanced understanding of environmental stewardship. The restored waterway and related improvements, all under the Vance Avenue Transformation Plan, constitute an exciting new greenway connecting the South Memphis, Vance Avenue, and Downtown neighborhoods to the rapidly expanding regional greenways system.

The plan also includes the establishment of a community policing program focused on expanding educational, employment, recreational, and cultural opportunities for local youth, creating an effective crime watch program, and encouraging non-violent forms of conflict resolution. In addition, the plan seeks to re-activate the neighborhood’s once-thriving Vance Avenue retail corridor through the establishment of a producer/consumer owned food cooperative (currently, only 7 of the City’s 77 high poverty Census Tracts are served by a full service super market). Finally, the plan recommends the establishment of a 1.5 mile historic walking trail, called Weaver’s Walk Freedom Trail, that will connect and provide interpretation of 24 historic sites within the neighborhood that played a central role in the City’s Civil Rights history.

On September 13th, one hundred and twenty-five Vance Avenue stakeholders attended a public hearing held in response to feedback on this resident-generated plan. At the end of this highly interactive meeting, residents voted overwhelmingly to take their plan to the City Council for review and adoption. As residents were finalizing their documentation with the Housing Authority quietly presented their own “Heritage Trails Community Development Plan and Tax Incremental Financing Proposal” to the Memphis/Shelby County Redevelopment Agency. This plan which had never been presented to community residents, area business persons, local institutions’ leaders or City Council Members seek to transform the historic Vance Avenue neighborhood into a “destination tourism district” similar to New Orleans’s French Quarter, Kansas City’s 18th and Vine neighborhood, and Harlem’s 125th Street. This “stealth” plan features the demolition of Foote Homes.

The City plans to create a grid-like street system throughout the current public housing campus adding additional impervious surfaces to a flood prone area without addressing the neighborhood’s storm water needs. The City’s economic development proposals focus on providing significant public subsidies to a luxury hotel and condo project which few local residents will enjoy. Neither of these real estate subsidies are conditioned on enforceable local hiring commitments by the City. The costs of the Heritage Trail Plan would be covered, in large part, by the establishment of a new Tax Incremental Financing District, the Vance Avenue neighborhood, and South Main Area. Future property tax increments generated by these areas during the coming thirty years would be used to finance the City’s ambitious redevelopment plan.

On October 16th, with the support of more than two dozen local citizen, labor, religious, and environmental organizations, the Planning and Zoning Committee of the Memphis City Council voted 4 to 0 in favor of a resolution that would establish the resident-generated plan as the overall policy framework guiding the future development of the Vance Avenue neighborhood. After this vote, the Memphis/Shelby County Redevelopment Agency tabled discussion of the City’s plan directing the Memphis Housing Authority to sit down with representatives of the Vance Avenue Collaborative to formulate a compromise that all segments of the community can accept. Mr. Robert Lipscomb, the Executive Director of the Memphis Housing Authority, has indicated his unwillingness to do so at this time.

In mid-September, the Memphis/Shelby County Chapter of the Sierra Club reviewed copies of the Vance Avenue Community Development Plan, and the Heritage Trails Community Development Plan making a strong statement in support of the resident-generated plan. Among the factors influencing the Sierra Club’s endorsement was the residents’ commitment to preserve and improve Foote Homes existing units, which both HUD and the University of Memphis have determined to be in good condition. The residents’ proposals for re-signing of Foote Homes and several thousands of pages of project-related developments. Local stakeholders who had invested significant amounts of time and energy contributing to this highly participatory “bottom-up” planning process responded by asking their University planners to assist them in transforming several thousands of pages of project-generated data into a comprehensive community revitalization plan designed to promote a more vibrant, inclusive, just, and democratic Vance Avenue community.

Local stakeholders and their University planners built upon the many assets of this historical African-American neighborhood, well-documented by past plans, oral histories, focus groups, physical surveys, and resident and leader interviews. Bringing all the information together, they spent the next August and September preparing the “Vance Avenue Community Transformation Plan” – a 129-page comprehensive revitalization strategy. The Plan seeks to establish the Vance Avenue community as the nation’s leading example of what King described as the “Racial Community” – a place where residents and their allies mobilize their community’s many physical, economic, financial, and spiritual assets to help current and future residents overcome the South’s painful legacy of racial inequality to assist individuals and families in reaching their full potential.

Those participating in this resident-led planning and design process formulated thirty-three specific immediate, mid-term, and long-term economic and community development policies and projects. Each project aims at helping the Vance Avenue neighborhood make significant progress towards achieving its highly ambitious goals of becoming a “Beloved Community”. At the heart of this resident-led community renewal process are five “signature” projects to improve neighborhood conditions by attracting significant amounts of new public and private investment. Among these is an innovative approach to upgrading the interior living spaces of the Foote Homes units without the long-term displacement that has characterized the City’s past HOPE VI housing renewal efforts. This objective would be achieved by moving fifty families at a time to nearby units for a period of three to four months, while their individual unit is renovated and restored. This process to rehabilitating these units is strongly supported by two-thirds of the current residents! In addition to the preservation and enhancement of the affordable housing units located at Foote Homes, the Vance Avenue neighborhood planning process is five “signature” projects to improve neighborhood conditions and future development opportunities for the Vance Avenue neighborhood. Several days after the hearing held to elicit local feedback on this resident-generated plan as the overall policy framework guiding the future development of the Vance Avenue neighborhood. The plan seeks to re-activate the neighborhood’s once-thriving Vance Avenue retail corridor through the establishment of a producer/consumer owned food cooperative (currently, only 7 of the City’s 77 high poverty Census Tracts are served by a full service super market). Finally, the plan recommends the establishment of a 1.5 mile historic walking trail, called Weaver’s Walk Freedom Trail, that will connect and provide interpretation of 24 historic sites within the neighborhood that played a central role in the City’s Civil Rights history.

Chickasaw Sierra Club Supports 1-Cent-a-Gallon-Gas-Tax for Improved Public Transit

Memphis, TN  The local Sierra Club Chickasaw Group joined Councilman Edmund Ford Jr. and other organizations to support the 1-Cent-Per-Gallon-Gas-Tax. This would send $3 million to the Memphis Area Transit Authority (MATA) to pay for increased frequency on eight major bus routes around the area and on the downtown trolley, resulting in a 48 percent improvement in total weekly coverage on these routes. The funding will also be used to improve bus shelters and add additional drivers for MATAplus.

William Tudor, President and General Manager of MATA (matatransit.com), said “Many people in Memphis depend on public transportation for their daily activities and increased funding will allow MATA to better serve the needs.

“We’re excited that this broad group of organizations has come together in support of the gas tax referendum.” said Dennis Lynch, the local Sierra Club Transportation Chair. “We think MATA has a good plan for use of the funds, and the benefits to the city should far outweigh the small additional costs of the gas tax.”

Emily Trenholm, Community Development Council/Livable Memphis, said, “The funding that MATA currently receives from fares and the city budget simply isn’t enough to provide the transit system that our community needs and deserves. That’s why we need everyone’s support for a dedicated funding stream for transit.”

“This will be a major win for the people of Memphis,” says Scott Banbury, Conservation Chair for the local Sierra Club group. “More buses mean better service, fewer cars on the road, and more mobility to get to jobs. Of course, nobody wants more taxes, but one cent per gallon means you’d have to drive 100 miles before it would cost you a nickel. If you drive 10,000 miles in a year, it’s only $5.00 for the entire year.”

“We’re excited that MATA will be focusing the funds from the gas tax on significant, needed service improvements,” says Bennett Foster of the Memphis Bus Riders Union. “We’re going to keep working hard to try to get the gas tax referendum passed.”

Organizations joining the Sierra Club in support of the Gas-Tax Referendum, include ADAPT of Tennessee, Latino Memphis, the League of Women Voters, Livable Memphis, the Memphis Bus Rider’s Union (MBRU), the Memphis Center for Independent Living (MCIL), the Mid-South Peace & Justice Center, and the National Federation of the Blind of Tennessee.

Postscript...We did not win, but we put up a good fight! The vote was 38% for the measure. We have created a great informal coalition of groups fighting for local transit, and we will work together again!

Steven Sondheim

An Easy Way to Help Protect Tennessee’s Green Legacy

Please volunteer to call, write, or e-mail our state legislators this spring. How to do this is at the end of this article.

The election is over and the legacy of the 108th General Assembly is yet to be determined. As you know, the new Republican “super majority” can do anything it wishes without worrying about Democratic Party interference. Our job as Sierra Club members is to get all lawmakers to see the energy and environmental world from the Sierra Club’s perspective. Your Legislative Committee is the group that tries organizes this effort. We need your help.

The 2013 State Legislative session begins in January. There will be many untested new faces and some holdovers who do not have a record of being friendly to the environment. We also lost several champions of the environment. For example, missing from the State Senate will be Andy Berke, Mike Faulk, Joe Haynes, Beverly Marrero, Kerry Roberts and Eric Stewart; from the house we will miss Janine Richardson, Mike Kertell, Mike McDonald, Gary Moore, and Janice Sontany. (If they are from your district, please thank them.)

Partly because of their leadership, the Sierra Club has an impressive record of accomplishments in past state legislative sessions. We have worked with these legislators and many other organizations to move the regulation of mountain top removal forward, to keep our streams and rivers free of pollution, to protect home owners and landowners from unfair and devaluing policies, to create and protect parks and wilderness areas, to keep the state from becoming a final resting place for nuclear waste, to promote renewable resources, and to encourage sound land use strategies for communities.

One of the best accomplishments of all the environmental groups has been the continued, mostly successful, fight to keep the “Forever Green Tennessee” fund, a fund designated for the purchase of new land to be owned by the state and preserved for future generations.

Our legislative successes have happened because of four factors: strong leadership in the legislature, a lobbyist who works tirelessly for our goals, collaborative relations with other good organizations and you members who contact your legislators to tell them your views on how they should vote on upcoming bills in the State House and State Senate. Nothing happens without both our lobbyist and your support for our legislative program. Imagine the difference between these two scenarios

1) our lobbyist’s walking into a legislator’s office alone to ask that legislator to vote for a bill to prohibit, say, clearcutting of forests and
2) our lobbyist’s walking into the same office accompanied by several informed Sierra Club members to argue the same proposal and the legislator’s secretary ALSO says he/she has been inundated with calls in support of that bill.

The bottom line is that we need you to volunteer to contact legislators when a bill is coming up for a vote. By one phone call or e mail, you can make a difference. Here is what is involved:

1) You send us your e mail, your address, your phone number and phone and legislative district (check your new voter registration card).
2) We will provide details on the bill, tell you the general background of the bill and general rules about how to address your legislator, how to refer to bills, etc.
3) We will provide details on the bill, tell you the general background of the bill and general rules about how to address your legislator, how to refer to bills, etc.
4) We will provide details on the bill, tell you the general background of the bill and general rules about how to address your legislator, how to refer to bills, etc.
5) We will provide details on the bill, tell you the general background of the bill and general rules about how to address your legislator, how to refer to bills, etc.
6) We will provide details on the bill, tell you the general background of the bill and general rules about how to address your legislator, how to refer to bills, etc.
7) We will provide details on the bill, tell you the general background of the bill and general rules about how to address your legislator, how to refer to bills, etc.

Thank you so much. The future of Tennessee’s environment depends on your helping out.

International Climate Conference

International Climate Conference-COP18 (27/11/12) – Jim Dougerty, Director of Sierra Club, talks about the group’s work in the U.S. defeating coal-fired power stations. He explains that the group has moved from an environmental group aimed at protecting wild spaces to one focused on pollution and now climate change and fossil fuels.

He says the group’s greatest success has been in stopping 147 of the 150 new coal-fired power stations that then President Bush said were needed in 2001.

Dougerty says that the Sierra Club want to see a focus placed on the conservation of energy and energy efficiency and then on renewable energy sources like wind and solar. However, in the real world, fracking has taken over in the U.S., he adds.

He explains how the Sierra Club once saw natural gas as a good stop gap fuel to use in the short term as the U.S. moves from coal to renewables. But with fracking, and the environmental concerns that come along with this, they are now focusing on getting the process of extracting shale gas reformed to limit these impacts.

Smart Choices, Less Traffic

The 50 Best and Worst Transportation Projects In the U.S.

Each year, America invests more than $200 billion in federal, state, and local tax dollars on transportation infrastructure—bridges and highways, aviation and waterways, public transit and sidewalks. But too often transportation projects undermine the higher national goals of reducing oil consumption, increasing safety, improving public health, and saving local, state or federal government—and citizens—money.

Americans are struggling with the health, climate, and economic costs of our oil-centered transportation system. While new standards that double fuel efficiency of new vehicles to 54.5 mpg by 2025 and cut carbon emissions in half are essential to reducing our dependence on oil and its many consequences, our transportation investments should provide an opportunity to further reduce our dependence on oil, reverse climate disruption, and save money. Because transportation infrastructure lasts for decades, the impacts of transportation investments are felt for many years to come, with huge consequences for America’s ability to move beyond oil.

Sierra’s Nuclear Free Campaign Statement
An energy efficient world, powered by clean, renewable technologies, free from dirty, dangerous, costly nuclear power and its legacy of toxic waste. Stop proposed new nuclear plants and license extensions of old plants. Support efficiency, solar, wind, and geothermal power as sustainable sources of electricity. Address the mounting problems of radioactive waste and the effect of the entire nuclear fuel cycle on people and the planet. Stop making radioactive waste. Nuclear energy is risky, dirty, dangerous, slow, and expensive. It is unnecessary too — Renewables and efficiency are faster, cheaper, cleaner, and safer!

Sierra Asks TVA To Shift From Coal & Nuclear to Efficiency & Renewables?

Letter of Sierra’s Beyond Coal Director to New TVA CEO, Bill Johnson

November 15, 2012

On behalf of the Sierra Club’s 1.4 million members and supporters, including thousands in the region served by the Tennessee Valley Authority, welcome to your new role. As the Nation’s largest public power system TVA has a long history serving the needs of the region’s residents. Its unique legal mandate, from the TVA Act of 1933, is to be a national leader in technological innovation, low-cost power, economic development, and environmental stewardship. We request a meeting with you to discuss the interests of the Sierra Club and our members in helping TVA build a clean energy future.

The biggest opportunity facing you is to lead a shift from TVA’s proposed spending on dirty, dangerous, and costly energy options such as coal and nuclear to new investments in affordable and reliable energy efficiency and clean energy. Progress Energy was one of the first companies to decide that pouring more money into aging coal plants was the wrong choice. Over the next few months TVA must decide whether to spend billions to extend the lives of its polluting coal plants like the Gallatin facility near Nashville. We hope you use your experience at Progress Energy to choose energy efficiency and clean energy options that will create more jobs and lower costs for businesses and families, rather than coal.

At Progress Energy you also saw firsthand the mistake of trying to extend dependence on risky nuclear plants. The problems and cost overruns at the Crystal River and proposed Levy nuclear plants in Florida make it clear that continuing to pursue further spending on nuclear plants such as Bellefonte is not the prudent course for TVA. We urge you to immediately review the ongoing cost concerns and safety problems with respect to TVA’s nuclear reactors. TVA’s money would be better spent increasing energy efficiency, wind, and solar power, and building the electric system needed to support them.

As you take the helm of TVA, we look forward to meeting with you to begin our work together on shaping the Valley’s energy future and protecting its air, water, land and all who depend upon them for life.

Sincerely,
Bruce Nilles
