Co-Curricular Education

This subcategory seeks to recognize institutions that provide their students with sustainability learning experiences outside the formal curriculum. Engaging in sustainability issues through co-curricular activities allows students to deepen and apply their understandings of sustainability principles. Institution-sponsored co-curricular sustainability offerings, often coordinated by student affairs offices, help integrate sustainability into the campus culture and set a positive tone for the institution.

Student Sustainability Educators Program

Criteria

Institution coordinates an ongoing peer-to-peer sustainability outreach and education program for degree-seeking students. The institution:

- Selects or appoints students to serve as educators and formally designates the students as educators,
- Provides formal training to the educators in how to conduct outreach, and
- Offers faculty or staff and/or financial support to the program.

This credit focuses on programs for degree-seeking students enrolled in a for-credit program. Continuing education and/or non-credit students are excluded from this credit.

Student clubs or groups, which are covered by Co-Curricular Education Tier Two Credit 1, are not eligible for this credit unless the group meets the criteria outlined above.

"---" indicates that no data was submitted for this field

Total number of degree-seeking students enrolled at the institution:

Student Sustainability Outreach Campaign

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution holds at least one sustainability-related outreach campaign directed at students. The campaign yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

To measure if the campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign.

The campaign could take the form of a competition (such as a residence hall conservation competition), or a collective challenge (such as a campus-wide drive to achieve a specific sustainability target).

The campaign may focus on one or more sustainability issues, but educating students is a primary feature of the campaign.

The campaign may reach additional campus members (faculty, staff, visitors, etc.) as long as students are one of the audiences of the campaigns.

The following impacts are not sufficient for this credit:

- Increased awareness
- Additional members of a mailing list or group

"---" indicates that no data was submitted for this field

Does the institution hold a campaign that meets the criteria for this credit?:

No

The name of the campaign(s):

---

A brief description of the campaign(s):

---

A brief description of the measured positive impact(s) of the campaign(s):
The website URL where information about the sustainability outreach campaign(s) is available:
Sustainability in New Student Orientation

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution includes sustainability prominently in its new student orientation activities and programming. Sustainability activities and programming are made available to all new students and are intended to educate about the principles and practices of sustainability.

Because orientation activities vary from one institution to another, prominent inclusion of sustainability may not take the same form on each campus. When reporting for this credit, each institution will determine what prominent inclusion of sustainability means given its particular context.

As this credit is intended to measure sustainability being infused throughout the institution, program or discipline-level orientations are not included in this credit.

"---" indicates that no data was submitted for this field

Does the institution include sustainability prominently in new student orientation?:
No

A brief description of how sustainability is included prominently in new student orientation:
---

The website URL where information about sustainability in new student orientation is available:
---
Sustainability Outreach and Publications

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution produces outreach materials and/or publications that foster sustainability learning and knowledge. The publications and outreach materials may include the following:

- A central sustainability website that consolidates information about the institution’s sustainability efforts
- A sustainability newsletter
- A vehicle to publish and disseminate student research on sustainability
- Building signage that highlights green building features
- Food service area signage and/or brochures that include information about sustainable food systems
- Signage on the grounds about sustainable groundskeeping strategies employed
- A sustainability walking map or tour
- A guide for commuters about how to use alternative methods of transportation
- A guide for green living and incorporating sustainability into the residential experience
- Regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat
- Other

"---" indicates that no data was submitted for this field

Does the institution have a central sustainability website that consolidates information about the institution's sustainability efforts?:

Yes

A brief description of the central sustainability website that consolidates information about the institution's sustainability efforts:

The Sustainability website at WCU serves to inform members of the university and of the surrounding community of the importance of sustainability pertaining to our social lives, economic reality, and natural environment. The website is maintained by university staff and students and provides links to a plethora of information regarding energy, waste, transportation, bio-region, etc.

The website URL for the central sustainability website that consolidates information about the institution's sustainability efforts:

http://www.wcupa.edu/sustainability/sustainability.asp
Does the institution have a sustainability newsletter?:
Yes

A brief description of the sustainability newsletter:
The sustainability E-newsletter was launched in April 2012. The newsletter was assembled by the Department of Communications and sustainability intern Emma Fitzpatrick. The newsletter highlights current events pertaining to sustainability on campus and is distributed to the entire population of students, faculty and staff.

The website URL for the sustainability newsletter:
---

Does the institution have a vehicle to publish and disseminate student research on sustainability?:
Yes

A brief description of the vehicle to publish and disseminate student research on sustainability:
Through the Office of Sponsored Research, students have the ability to present their research on sustainability at the annual Student Research Day held in the Student Union building on campus. Students are recognized for their work and may receive awards.

The website URL for the vehicle to publish and disseminate student research on sustainability:
http://www.wcupa.edu/wcurc/

Does the institution have building signage that highlights green building features?:
No

A brief description of building signage that highlights green building features:
---

The website URL for building signage that highlights green building features:
---

Does the institution have food service area signage and/or brochures that include information about sustainable food systems?:
No

A brief description of food service area signage and/or brochures that include information about sustainable food systems:
The website URL for food service area signage and/or brochures that include information about sustainable food systems:

---

A brief description of signage on the grounds about sustainable grounds-keeping strategies employed:

In the Gordon Natural Area, a wildlife reserve on campus, signage throughout the GNA serves to inform pedestrians of the native plant species, fauna, and projects being carried out in the area.

The website URL for signage on the grounds about sustainable grounds-keeping strategies employed:

Does the institution have a sustainability walking map or tour?:

No

A brief description of the sustainability walking map or tour:

---

The website URL of the sustainability walking map or tour:

---

Does the institution have a guide for commuters about how to use alternative methods of transportation?:

No

A brief description of the guide for commuters about how to use alternative methods of transportation:

---

The website URL for the guide for commuters about how to use alternative methods of transportation:

---

Does the institution have a guide for green living and incorporating sustainability into the residential experience?:

No
A brief description of the guide for green living and incorporating sustainability into the residential experience:

---

The website URL for the guide for green living and incorporating sustainability into the residential experience:

---

Does the institution have regular coverage of sustainability in the main student newspaper (either through a regular column or a reporter assigned to the sustainability beat)?:

No

A brief description of regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat:

---

The website URL for regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat:

---

Does the institution produce another sustainability publication or outreach material not covered above? (1st material):

Student Group

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does the institution have an active student group focused on sustainability?:
Yes

The name and a brief description of each student group:

EARTH - WCU's student environmental organization - has since 1970 worked to develop campus and community awareness of the environment and each person's responsibility to protect it. Initiatives such as the annual Earth Day Festival, collaboration with the Environmental Council, Quad articles, and visits to other student groups are among EARTH's activities.

Recently, EARTH joined community members for a High Street rally against global warming that included handing out environmental literature and energy-efficient light bulbs. The group's current project is a paper-recycling campaign in the residence halls. Andrew Barret is EARTH's president.

List up to 4 notable recent activities or accomplishments of student group(s):

Earth Week Fair; Award of Improvement/Accomplishment from the Sustainability Advisory Council; Fall Campus Sustainability Day Event; Adopt-A-Block.

List other student groups that address sustainability:

---

The sustainability-related book that was chosen, if applicable:
---

The website URL where information about the theme is available:
---
Curriculum

This subcategory seeks to recognize institutions that have formal education programs and courses that address sustainability. One of the primary functions of colleges and universities is to educate students. By training and educating future leaders, scholars, workers, and professionals, higher education institutions are uniquely positioned to prepare students to understand and address sustainability challenges. Institutions that offer courses covering sustainability issues help equip their students to lead society to a sustainable future.

Sustainability Course Identification

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution has developed a definition of sustainability in the curriculum. The definition was developed by a committee comprised of at least three faculty members who teach courses in different departments. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

In order to report on other STARS Curriculum credits, the definition of sustainability in the curriculum should distinguish between courses that focus or concentrate on the concept of sustainability throughout the course and courses that relate to an aspect of sustainability or include sustainability as part of the course.

- **Sustainability-focused courses** concentrate on the concept of sustainability, including its social, economic, and environmental dimensions, or examine an issue or topic using sustainability as a lens.
- **Sustainability-related courses** incorporate sustainability as a distinct course component or module or concentrate on a single sustainability principle or issue.

Part 2

Institution has identified its sustainability-focused and sustainability-related course offerings. A course is either sustainability-focused or sustainability-related; no course should be identified as both sustainability-focused and sustainability-related. Each institution is free to choose a methodology to identify sustainability courses that is most appropriate given its unique circumstances. Asking faculty or departments to self-identify sustainability courses using the definition in Part 1 or looking at the stated learning outcomes and course objectives associated with each course may provide a richer view of sustainability course offerings than simply reviewing course descriptions, but it is not required.

Part 3

Institution makes its sustainability course inventory publicly available online. The identification can be incorporated into the course catalog or posted as a stand-alone document.

Submission Note:

The Sustainability Advisory Council asked faculty to use the above definition to self-identify whether any of their classes are sustainability-focused or sustainability-related. 84 faculty members completed the survey, and the results were used to produce a catalog of sustainability curricula.
Has the institution developed a definition of sustainability in the curriculum?:
Yes

A copy of the institution's definition of sustainability in the curriculum?:

As an institution of higher education, West Chester University's role is to instill the knowledge and values of sustainability within our campus and community.

At West Chester University, we promote the stewardship of an Earth on which life flourishes into a future of increasing prosperity and opportunity, without reducing the capacity of the environment to provide for future generations.

Sustainability requires an understanding of the inter-connected relationship of environmental, societal, and economic issues and resources at both the local and global levels.

West Chester University graduates will be prepared to transform their understanding of those connections into a life-long commitment to environmental sustainability and responsible local and global citizenship.

Sustainability-Focused Course:
Part of the main goals and objectives of the course included any of the following topics:

- The impact of human activities (e.g., energy, agriculture, manufacturing, transportation, development, recreation) on natural systems (e.g., biodiversity loss, air and water pollution, soil erosion, etc.)
- The relationship of population, consumption, culture, social equity, and the environment
- Technical, design, and scientific strategies that foster sustainable development, e.g., promote energy efficiency, conserve natural resources, prevent and control the generation of pollution and waste, remediate environmental problems, and preserve biological diversity
- Social, cultural, legal, and governmental frameworks for guiding environmental management and sustainable development
- The causes, consequences, and severity of climate change
- How to apply principles of sustainable development in the context of professional and personal activities.

Sustainability-Related:
Any of the following topics were addressed in the course, but were not part of the main goals or objectives in the course:

- The impact of human activities (e.g., energy, agriculture, manufacturing, transportation, development, recreation) on natural systems (e.g., biodiversity loss, air and water pollution, soil erosion, etc.)
- The relationship of population, consumption, culture, social equity, and the environment
- Technical, design, and scientific strategies that foster sustainable development, e.g., promote energy efficiency, conserve natural resources, prevent and control the generation of pollution and waste, remediate environmental problems, and preserve biological diversity
- Social, cultural, legal, and governmental frameworks for guiding environmental management and sustainable development
- The causes, consequences, and severity of climate change
- How to apply principles of sustainable development in the context of professional and personal activities

Has the institution identified its sustainability-focused and sustainability-related course offerings?:
Yes
A brief description of the methodology the institution followed to complete the inventory:

The Steering and Planning and Curriculum and Research sub-committees of the Sustainability Advisory Council at West Chester University convened in the fall of 2011 to construct a definition of sustainability at WCU.

Committee Members:
- Paul Morgan, Department of Education, Sustainability Coordinator
- Joan Welch, Department of Geography
- Ashley Duffy, STARS Student Intern
- Allison Turner, Graduate Business Center
- Ashlie Delshad, Department of Political Science
- Carol Smith, Literacy Department
- Walter Cressler, Library Coordinator
- Daria Nikitina, Department of Geology and Astronomy
- Timothy Lutz, Department of Geology and Astronomy
- Kaloni Baylor, Greenhouse Gas Student Intern
- Joy Fritschle, Department of Geography
- Kenneth Witmer, Dean of the College of Education

1. Determined sustainability in the curriculum definition.
2. Faculty/Researcher Survey
   a. Developed survey based on STARS criteria.
   b. Distributed survey to all faculty/researchers/staff on campus via email.
   c. Follow-up reminders from Department Chairs and College Deans.
   d. Monitored survey results.
3. Manually classified responses to survey as either Sustainability Focused or Sustainability Related courses.
4. Cross-referenced courses from survey with courses from the Course Catalog 2011-12.
5. Compiled a final listing of all Sustainability Focused and Sustainability Related Courses.
6. Made course listing publicly available through the WCU Sustainability website.

Does the institution make its sustainability course inventory publicly available online?:
Yes

The website URL where the sustainability course inventory is posted:
http://www.wcupa.edu/sustainability/programs.asp

Professional & Secondary Education

Criteria

Institution’s students graduate from programs that include sustainability as a required learning outcome or include multiple sustainability learning outcomes.

For this credit, learning outcomes at the course level count if the course is required to earn the degree. This credit includes graduate as well as undergraduate programs. For this credit, "programs" include majors, minors, concentrations, certificates, and other academic designations. Programs that include co-curricular aspects may count as long as there is an academic component of the program.

"---" indicates that no data was submitted for this field

---
Undergraduate Program in Sustainability

Responsible Party
Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution offers at least one sustainability-focused undergraduate major, degree program, or equivalent.

The degree program does not have to include sustainability in its name to count for this credit. Environmental Studies programs, for example, count as long as the program covers the social, economic, and environmental dimensions of sustainability. A program that focuses exclusively on environmental or social issues, however, would not be sufficient to earn this credit.

Concentrations within a major (e.g. a concentration on sustainable business within the business major) do not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution offer an undergraduate degree program that meets the criteria for this credit?:

No

The name of the sustainability-focused, undergraduate degree program (1st program):
---

Sustainability Immersive Experience

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution offers at least one immersive, sustainability-focused educational study program. The program(s) may take place off-campus, overseas, or on-campus.

For this credit, the program meets one or both of the following criteria:

• it concentrates on sustainability, including its social, economic, and environmental dimensions or
• it examines an issue or topic using sustainability as a lens.

Immersive programs offered in partnership with outside entities may count for this credit. Programs offered exclusively by outside entities do not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution offer a program that meets the criteria for this credit?:

Yes

A brief description of the sustainability-focused immersive experience(s) offered by the institution:

West Chester University partners with the ACEER Foundation to provide opportunities in the form of fellowships to students working toward a greater understanding of sustainability.

The website URL where information about the immersive experience is available:

Sustainability Literacy Assessment

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution conducts an assessment of the sustainability literacy of its students. The sustainability literacy assessment focuses on knowledge of sustainability topics, not values or beliefs.

Part 2

Institution conducts a follow-up assessment of the same cohort group using the same instrument.

"---" indicates that no data was submitted for this field

Has the institution conducted a sustainability literacy assessment?:
No

Did the assessment include a baseline evaluation of students and then a follow-up evaluation of the same cohort?:
---

---
Incentives for Developing Sustainability Courses

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has an ongoing program or programs that offer incentives for faculty in multiple disciplines or departments to develop new sustainability courses and/or incorporate sustainability into existing courses or departments. The program aims to increase student learning of sustainability.

Incentives may include release time, funding for professional development, and trainings offered by the institution.

Incentives for expanding sustainability offerings in academic, non-credit, and/or continuing education courses count for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a program that meets the criteria outlined above?:
No

A brief description of the program(s):

---

A brief description of the incentives that faculty members who participate in the program(s) receive:

---

The website URL where information about the program is available:

---
Research

This subcategory seeks to recognize institutions that are conducting research related to or focused on sustainability. Conducting research is a major function of many colleges and universities. By researching sustainability issues and refining theories and concepts, higher education institutions can continue to help the world understand sustainability challenges and develop new technologies, strategies, and approaches to address those challenges.

Credit

| Sustainability Research Identification |
| Faculty Engaged in Sustainability Research |
| Departments Engaged in Sustainability Research |
| Sustainability Research Incentives |
| Interdisciplinary Research in Tenure and Promotion |
Criteria

Part 1
Institution has developed a definition of sustainability research. The definition was developed by a committee comprised of at least three faculty members from different departments who conduct research. The committee may include students, staff, and other stakeholders as well. The definition does not have to be formally adopted.

Part 2
Institution has identified its sustainability research activities and initiatives. This research inventory should include all research centers, laboratories, departments, and faculty members whose research focuses on or is related to sustainability.

Part 3
Institution makes its sustainability research inventory publicly available online.

"---" indicates that no data was submitted for this field

Has the institution developed a definition of sustainability research?:
No

A copy of the institution's definition of sustainability research:
---

Has the institution identified its sustainability research activities and initiatives?:
Yes

A brief description of the methodology the institution followed to complete the inventory:
---

Does the institution make its sustainability research inventory publicly available online?:
No

The website URL where the sustainability research inventory is posted (required if claiming Part 3 of the credit):
---
Faculty Engaged in Sustainability Research

Responsible Party
Paul Morgan
Professor
Professional & Secondary Education

Criteria
Institution’s faculty members conduct research on sustainability topics.

Any level of sustainability research by a faculty member is sufficient to be included for this credit. In other words, a faculty member who conducts both sustainability research and other research may be included.

"---" indicates that no data was submitted for this field

The number of faculty members engaged in sustainability research:
17

The total number of faculty members engaged in research:
1,648

Interdisciplinary Research in Tenure and Promotion

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution gives positive recognition to interdisciplinary, transdisciplinary, and multidisciplinary research during faculty promotion and tenure decisions.

"---" indicates that no data was submitted for this field

Does the institution's treatment of interdisciplinary research meet the criteria for this credit?:

No

A brief description or a copy of the institution’s policy regarding interdisciplinary research:

---

The website URL where information about the treatment of interdisciplinary research is available:

---
Operations

Buildings

This subcategory seeks to recognize institutions that are taking steps to improve the sustainability performance of their buildings. Buildings are generally the largest user of energy and the largest source of greenhouse gas emissions on campuses. Buildings also use significant amounts of potable water. Institutions can design, build, and maintain buildings in ways that provide a safe and healthy indoor environment for inhabitants while simultaneously mitigating the building’s impact on the outdoor environment.

Greenhouse Gas Emissions Reduction

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution reduced its net Scope 1 and Scope 2 GHG emissions per weighted campus user compared to a 2005 baseline.

For this credit, off-site, institution-catalyzed carbon offsets (i.e. those popularly known as “local offsets”) count in full. Purchased carbon offsets that have been verified by a third party may count towards a portion of the reduction. Purchased offsets that have not been third-party verified do not count.

To conduct a GHG emissions inventory, campuses may use any methodology and/or calculator that is consistent with the Greenhouse Gas Protocol's Corporate Accounting and Reporting Standards.

The baseline GHG emissions inventory should include the same emissions sources as the performance year emissions inventory.

"---" indicates that no data was submitted for this field

Scope 1 and 2 gross GHG emissions, 2005:

39,152 Metric Tons of CO2 Equivalent

Off-site, institution-catalyzed carbon offsets generated, 2005:

0 Metric Tons of CO2 Equivalent

Third-party verified carbon offsets purchased, 2005:

0 Metric Tons of CO2 Equivalent

On-campus residents, 2005:

3,157

Non-residential/commuter full-time students, faculty, and staff members, 2005:

8,017

Non-residential/commuter part-time students, faculty, and staff members, 2005:

3,202

Scope 1 and 2 gross GHG emissions, performance year:
33,209 Metric Tons of CO2 Equivalent

Off-site, institution-catalyzed offsets generated, performance year:
0 Metric Tons of CO2 Equivalent

Carbon offsets purchased, performance year:
0 Metric Tons of CO2 Equivalent

List the start and end dates of the GHG emissions performance year:
July 1, 2009 - July 1, 2010

On-campus residents, performance year:
4,736

Non-residential/commuter full-time students, faculty, and staff members, performance year:
9,045

Non-residential/commuter part-time students, faculty, and staff members, performance year:
2,967

Time period for weighted campus user (list the consecutive 12 month period that most closely overlaps with GHG performance year):
July 1, 2009 - July 1, 2010
Does the institution have policies and/or programs in place to reduce emissions from air travel?:
No

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

"---” indicates that no data was submitted for this field

Does the institution have a local offsets program through which the institution seeks to offset its greenhouse gas emissions by implementing projects that reduce GHG emissions in the local community?:

No

A brief description of the program:

---

The website URL where information about the program is available:

---
This subcategory seeks to recognize institutions that are supporting a sustainable food system. Modern industrial food production often has deleterious environmental impacts. Pesticides and fertilizers used in agriculture can contaminate ground and surface water, which has potentially dangerous impacts on wildlife and human health. Furthermore, the often long-distance transportation of food to institutions produces greenhouse gas emissions and other pollution. Additionally, farm workers are often paid substandard wages, subjected to harsh working conditions, and exposed to dangerous pesticides. Institutions can use their food purchases to support their local economies; encourage safe, environmentally-friendly farming methods; and help alleviate poverty for farmers.

Please note that while dining services can also play an important role in conserving energy and water, reducing waste, and purchasing environmentally preferable materials other than food, STARS measures these impacts across the institution instead of by department; therefore, the benefits of these actions are captured in the Energy, Water, Waste, and Purchasing subcategories, respectively.

Food and Beverage Purchasing

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

This credit includes food and beverage purchases for on-campus dining services operated by the institution or the institution’s primary on-site contractor. Institution purchases food and beverages that meet at least one of the following criteria:

- Grown and processed within 250 miles of the institution
- Third-party certified (USDA Certified Organic, Marine Stewardship Council Blue Ecolabel, Food Alliance, Fair Trade, Certified Humane Raised and Handled)

Food and beverage purchases that meet multiple criteria listed above should not be double-counted.

This credit includes food and beverage purchases for on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor (e.g. Aramark, Bon Appétit Management Company, Chartwells, Sodexo). On-site franchises, convenience stores, vending machines, or concessions are excluded from this credit unless they are operated by the institution or the institution’s primary on-site contractor.

"---" indicates that no data was submitted for this field

Percentage of food expenditures that meet one or more of the criteria for this credit (0 - 100):

37.80

A brief description of the sustainable food and beverage purchasing program:

Food Purchasing

We understand the power and importance of food in our daily lives, and recognize that food choices have a significant impact on health, culture, environment, and local and global economies. We strive to offer clients and customers fresh whole foods that are raised, grown, harvested, and produced locally and in a sustainable manner whenever possible. And we partner with suppliers to increase the availability of such foods.

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does campus dining operations offer discounts to customers who use reusable mugs instead of disposable cups in to-go food service operations?:

Yes

A brief description of the reusable mug program:

At many locations we offer discounts for those students who remember to bring along their own mug or bag, reducing the amount of disposables produced and wasted.

Amount of the discount offered for using reusable mugs:

---

Description of other reusable food- or beverage-related programs (e.g. incentives for use of reusable bags, dishware, to-go containers):

---

The website URL where information about the reusable mug discount program is available:

Reusable To-Go Containers

Responsibility Party

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does campus dining operations provide reusable containers for to-go food that are returned for cleaning and reuse?:

Yes

A brief description of the reusable to-go container program:

Our To-Go program has been very popular, enabling busy students to take their meals to go, without carrying the guilt of wasteful disposable to-go containers.

The website URL where information about the reusable to-go container program is available:
This subcategory seeks to recognize institutions that are reducing their energy consumption through conservation and efficiency, and switching to cleaner and renewable sources of energy such as solar, wind, geothermal, and low-impact hydropower. For most institutions, energy consumption is the largest source of greenhouse gas emissions, which cause global warming. Global warming is expected to have myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are expected to be particularly pronounced for poor communities and countries. In addition to causing global warming, energy generation from fossil fuels, especially coal, produces air pollutants such as sulfur dioxide, nitrogen oxides, mercury, dioxins, arsenic, cadmium and lead. These pollutants contribute to acid rain as well as health problems such as heart and respiratory diseases and cancer. Coal mining and oil and gas drilling can also damage environmentally and/or culturally significant ecosystems. Nuclear power creates highly toxic and long-lasting radioactive waste. Large-scale hydropower floods habitat and disrupts fish migration.

Implementing conservation measures and switching to renewable sources of energy can help institutions save money and protect them from utility rate volatility. Renewable energy may be generated locally and allow campuses to support local economic development. Furthermore, institutions can help shape markets by creating demand for cleaner, renewable sources of energy.

Building Energy Consumption

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has reduced its total building energy consumption per gross square foot of building space compared to a 2005 baseline.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

1 kWh = 0.003412 MMBtu
1 MWh = 3.412 MMBtu
1 therm = 0.1 MMBtu
1 kBtu = 0.001 MMBtu
1 ton-hour = 0.012 MMBtu
1 MJ = 0.000948 MMBtu

"---" indicates that no data was submitted for this field

Total building energy consumption, 2005:
397,268 MMBtu

Building space, 2005:
2,501,807 Gross Square Feet

Total building energy consumption, performance year:
134,654 MMBtu

Building space, performance year:
3,010,033 Gross Square Feet

List the start and end dates of the energy consumption performance year:
July 2009 - July 2010
Clean and Renewable Energy

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution supports the development and use of clean and renewable energy sources using any one or combination of the following options.

Option 1: Generating electricity from clean and renewable energy sources on campus and retaining or retiring the rights to the environmental attributes of such electricity. (In other words, if the institution has sold Renewable Energy Credits for the clean and renewable energy it generated, it may not claim such energy here). The on-site renewable energy generating devices may be owned and/or maintained by another party as long as the institution has contractual rights to the associated environmental attributes.

Option 2: Using renewable sources for non-electric, on-site energy generation, such as biomass for heating.

Option 3: Catalyzing the development of off-site clean and renewable energy sources (e.g. an off-campus wind farm that was designed and built to supply electricity to the institution) and retaining the environmental attributes of that energy.

Option 4: Purchasing the environmental attributes of electricity in the form of Renewable Energy Certificates (RECs) or other similar renewable energy products that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party, or purchasing renewable electricity through the institution’s electric utility through a certified green power purchasing option.

Option 5: Using cogeneration technologies to generate electricity more efficiently. Note: generating electricity using cogeneration technology and a renewable fuel, such as biomass, is considered Option 1 and should not be counted twice.

Since this credit is intended to recognize institutions that are generating new sources of clean and renewable energy, neither the electric grid mix for the region in which the institution is located nor the grid mix reported by the electric utility that serves the institution count for this credit.

Technologies that reduce the amount of energy used but do not generate renewable energy do not count for this credit. For example, daylighting, passive solar design, and ground-source heat pumps are not counted in this credit. The benefits of such strategies are captured by OP Credit 5: Greenhouse Gas Emissions Reductions and OP Credit 7: Building Energy Consumption.

Transportation fuels, which are covered by OP Credit 14: Campus Fleet, are not included in this credit.

To aggregate energy consumption data from multiple sources, figures should be converted into MMBtu (one million British thermal units – a standard measure of energy) using the following equivalents:

\[
1 \text{ kWh} = 0.003412 \text{ MMBtu} \\
1 \text{ MWh} = 3.412 \text{ MMBtu} \\
1 \text{ therm} = 0.1 \text{ MMBtu}
\]
1 kBtu = 0.001 MMBtu
1 ton-hour = 0.012 MMBtu
1 MJ = 0.000948 MMBTU

"---" indicates that no data was submitted for this field

Option 1: Total clean and renewable electricity generated on site during the performance year and for which the institution retains or has retired the associated environmental attributes:
---

Option 2: Non-electric renewable energy generated:
---

Option 3: Total clean and renewable electricity generated by off-site projects that the institution catalyzed and for which the institution retains or has retired the associated environmental attributes:
---

Option 4: Total RECs and other similar renewable energy products that the institution purchased during the performance year that are Green-e certified or meet the Green-e standard's technical requirements and are third party verified:
---

Option 5: Total electricity generated with cogeneration technology using non-renewable fuel sources:
---

Total energy consumed during the performance year:
---

A brief description of on-site renewable electricity generating devices:
---

A brief description of on-site renewable non-electric energy devices:
---

A brief description of off-site, institution-catalyzed, renewable electricity generating devices:
---
A brief description of RECs or other similar renewable energy products purchased during the previous year, including contract timeframes:

---

A brief description of cogeneration technologies deployed:

---

The website URL where information about the institution's renewable energy sources is available:

---
Does the institution use timers to regulate temperatures based on occupancy hours in at least one building?:
Yes

A brief description of the technology used:
WCU uses a web based digital control HVAC management system. Room climate is determined by room schedules and occupancy. There is a night set-back for all the buildings that are digitally controlled

The percentage of building space (square footage) with timers for temperature control:
---

**Responsible Party**

Paul Morgan  
Professor  
Professional & Secondary Education

"---" indicates that no data was submitted for this field

**Does the institution prioritize the use of native plant species in landscaping?:**  
Yes

**A brief description of the native plant program, policy, or practice:**

There exists an abundance of biodiversity of plant and animal species at WCU, especially in the Gordon Natural Area. Concerned students and staff take great care in preserving these living treasures.

In 2007, 506 species of plants were observed in the Gordon Natural Area. Some tree species you may encounter include tulip poplar, beech, norway maple, flowering dogwood, and red maple. Today, the Gordon mainly consists of beech trees, but tulip poplars are estimated to become the predominant tree species in the coming years. Currently, a tree restoration project is underway called TreeVitalize. The goal of the project is to restore the upper plain of the Gordon, which has been demolished by deer, with native trees. Students and staff maintain the trees by watering them and measuring their growth.

Some native flowers and shrubs include may-apple, spice bush, jewel weed, and virginia creeper. A number of invasives threaten the Gordon such as garlic mustard, oriental bittersweet, mile-a-minute weed, and multiflora rose. In 2007, 162 or 32% of the 506 species of plants were non-native with 7 being state-listed species and 42 considered highly invasive.

Currently, a project supported by DCNR has been underway to study how deer and non-native invasive plants influence native plants. You can observe these fenced in demonstration areas when visiting the Gordon Natural Area.

**The website URL where information about the program, policy, or practice is available:**

Wildlife Habitat

Responsible Party
Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does the institution have programs in place to protect and/or create wildlife habitat on institution-owned land?:
Yes

A brief description of the wildlife habitat program, policy, or practice:

Mission 1) Preservation of a Natural Area. The property is to be maintained in as natural a state as possible, consistent with its function as a natural classroom (see #2 below). This means that all forms of development are prohibited, with the exception of maintaining the single existing paved road and the currently existing limited network of unpaved, undeveloped footpaths. Unacceptable activities include: (1) removal of live or dead plant materials or animals, (2) use of foreign or toxic chemicals such as fertilizers and pesticides, (3) dumping of refuse, (4) creation of any new or enhancement of any existing trails or roads, and (5) addition of any human-made structures or devices. However, it is noted that trail and road maintenance and repairs will be implemented as needed to ensure safe conditions, and that some maintenance along the boundaries may be required to support the use of adjacent areas (such as sports fields, parking areas, etc.).

Mission 2) Natural Classroom for Environmental Studies. The property is to be used for teaching and research in ecology and related environmental studies. However, these scientific and educational activities must not compromise Mission #1. Accordingly, teaching and research activities are to be primarily non-manipulative and should not involve any significant disturbance to the native flora and fauna. However, studies may be undertaken that involve removal of exotic non-native species, to the extent that such studies contribute to better preservation of the natural native plants and animals.

Criteria

Part 1

Institution has an institution-wide stated preference to purchase Electronic Product Environmental Assessment Tool (EPEAT) Silver or higher products. This can take the form of purchasing policies, guidelines, or directives. This credit does not include specialized computers for which no EPEAT certified products are available. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases Electronic Product Environmental Assessment Tool (EPEAT) Silver and/or Gold registered products for standard desktop and notebook/laptop computers and monitors. This credit does not include specialized computers for which no EPEAT certified products are available.

--- indicates that no data was submitted for this field

Does the institution have an institution-wide stated preference to purchase EPEAT Silver or higher computers and monitors?:

No

The website URL where the EPEAT policy, directive, or guidelines are posted:

---

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

---

Does the institution wish to pursue points for Part 2 of this credit (expenditures on EPEAT computers)?:

Yes

Expenditures on EPEAT Gold desktop and laptop computers and monitors:

320,484 US/Canadian $
Expenditures on EPEAT Silver desktop and laptop computers and monitors:

0 US/Canadian $

Total expenditures on desktop and laptop computers and monitors:

320,484 US/Canadian $
Cleaning Products Purchasing

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution has an institution-wide stated preference to purchase Green Seal™ or EcoLogo™ certified cleaning products. The stated preference can take the form of purchasing policies, guidelines, or directives to purchase green cleaning products. Policies and directives adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution’s main cleaning or housekeeping department(s) and/or contractor(s) purchase Green Seal or EcoLogo certified cleaning products. This credit does not include cleaning products for which no Green Seal or EcoLogo certified products are available.

"---" indicates that no data was submitted for this field

Does the institution have an institution-wide stated preference to purchase Green Seal (tm) or EcoLogo (tm) certified cleaning products?:

Yes

The website URL where the green cleaning product purchasing policy, directive, or guidelines are posted:

http://www.wcupa.edu/sustainability/greenreport.asp

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

WCU is using Johnson-Diversey’s GreenSeal certified cleaning products to clean all of our buildings. “Green” cleaning requires the use of only sustainable cleaning products whose ingredients are not derived from non-renewable resources. Sustainable ingredients shall represent a minimum of 80% of the active ingredients (other than water).

Green Cleaning - Custodial Services at West Chester University has for over three years used exclusively GreenSeal recognized products. WCU is now “green” cleaning three high-profile buildings using U. S. Green Building Council and Johnson-Diversey recommendations; School of Music and Performing Arts Center, 25 University Avenue and Sykes Student Union. Custodial staff members in these buildings are specially trained in the use of micro-fiber and air pollutant.
containment equipment with HEPA filters. We are currently implementing a full “Green” program for the Science Center. Once expedited, over 400,000 sq. ft. of space will be cleaned utilizing true “green” practices. All cleaning procedures will be modified with the health and safety of building occupants in mind.

While selecting the right products is of critical importance, it is of equal if not greater importance to make sure cleaning personnel are using the products correctly. Training on appropriate product dilution, use and disposal can have a huge impact on reducing impacts on worker and occupant health, as well as to the environment. Sometimes the greatest effect we can make in terms of reducing impact around our most vulnerable building occupants is not the product, but rather how and when the product is used. Thus, the appropriate training remains ongoing and focuses on creating safer, healthier and more productive environments for our building occupants.

**Does the institution wish to pursue points for Part 2 of this credit (expenditures on cleaning products)?:**

No

**Expenditures on Green Seal and/or EcoLogo certified cleaning products:**

---

**Total expenditures on cleaning products:**

---
Historically Underutilized Businesses

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does the institution seek to support historically underutilized businesses, minority-owned businesses, and women owned-businesses?:

Yes

A brief description of how the institution meets the criteria:

It is the University’s policy to seek and recruit small and disadvantaged businesses, including minority and women owned business enterprises (MBE/WBE), for inclusion on the vendor list. Vendors are identified through minority magazines, trade fairs, and the Commonwealth Office of Minority and Women Business. On a yearly basis, at least one MBE trade show is attended by the Purchasing Director or his/her designee. The names, addresses, phone numbers and product listings, if available, of identified small and disadvantaged businesses are shared with other universities in the Pennsylvania State System of Higher Education as requested. Business Services tracks and reports annually the total dollar amount of contracts and purchase orders awarded to such vendors.

When identified, qualified small and disadvantaged businesses are added to the vendor list for the goods or services they can provide. Business Services will make every reasonable attempt to include one or more of these businesses on every request for quotation or proposal. The University may also reduce the level or change the type of bonding requirements and modify progress payments for small and disadvantaged businesses. However, bid and proposal evaluation procedures do not allow for preference or advantage ratings for any vendors, but provide equality for all vendors.

The website URL where information about the program, policy, or practice is available:

http://www.dgsapp.state.pa.us/cabd/mwbdata.asp
Does the institution give preference to local products and businesses in its purchasing decisions? Local food purchases, which are covered in OP Credit 6: Food Purchasing, are not included in this credit:

Yes

A brief description of the program:

The objectives of the Environmentally Preferred Purchasing Program are:

1. Educate all West Chester University employees on the Environmentally Preferred Purchasing Program, their role in the process, and the opportunities to purchase environmentally preferred goods and services.
2. Increase purchases of environmentally preferred goods and services consistent with the mission of West Chester University while still remaining cost-effective and in compliance with procurement policy.
3. Reduce consumption of energy and natural resources.
4. Increase the use of recycled content products where possible.
5. Create a model program for successfully purchasing environmentally preferable products that encourages other PASSHE universities and the local community to adopt similar goals.
6. Help make the “green choice” the easy choice.

The website URL where information about the program, policy, or practice is available:

http://www.wcupa.edu/_INFORMATION/AFA/FBS/PROC/GRNP/EPPBusPrac.asp
Transportation

This subcategory seeks to recognize institutions that are moving toward sustainable transportation systems. Transportation is a major source of greenhouse gas emissions and other pollutants that contribute to health problems such as heart and respiratory diseases and cancer. Due to disproportionate exposure, these health impacts are frequently more pronounced in low-income communities next to major transportation corridors. In addition, the extraction, production, and global distribution of fuels for transportation can damage environmentally and/or culturally significant ecosystems and may financially benefit hostile and/or oppressive governments.

At the same time, campuses can reap benefits from modeling sustainable transportation systems. Bicycling and walking provide human health benefits and mitigate the need for large areas of paved surface, which can help campuses to better manage storm water. Institutions may realize cost savings and help support local economies by reducing their dependency on petroleum-based fuels for transportation.

Criteria

Institution supports alternative fuel and power technology by including in its motorized vehicle fleet (cars, trucks, tractors, buses) vehicles that are:

1. Gasoline-electric hybrid
2. Diesel-electric hybrid
3. Plug-in hybrid
4. 100 percent electric
5. Fueled with Compressed Natural Gas (CNG)
6. Hydrogen fueled
7. Fueled with B20 or higher biofuel for more than 6 months of the year; and/or
8. Fueled with E85 or higher ethanol for more than 6 months of the year.

For this credit, the institution’s motorized fleet includes all institution-owned and operated vehicles that are used for transporting people and/or goods. Heavy construction equipment (e.g. excavators and pavers) and maintenance equipment (e.g. lawn-mowers and leaf blowers) are not included in this credit.

Waste

This subcategory seeks to recognize institutions that are moving toward zero waste by reducing, reusing, recycling, and composting. These actions mitigate the need to extract virgin materials, such as trees and metals. It generally takes less energy and water to make a product with recycled material than with virgin resources. Reducing waste generation also reduces the flow of waste to incinerators and landfills which produce greenhouse gas emissions, can contaminate air and groundwater supplies, and tend to have disproportionate negative impacts on low-income communities. Waste reduction and diversion also save institutions costly landfill and hauling service fees. In addition, waste reduction campaigns can engage the entire campus community in contributing to a tangible sustainability goal.

Waste Reduction

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has implemented source reduction strategies to reduce total waste generation (garbage, recycling, and compost) per weighted campus user compared to a 2005 baseline.

Total waste generation includes all materials recycled, composted, and disposed of as trash except construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP Credit 19: Construction and Demolition Waste Diversion, OP Credit 20: Electronic Waste Recycling Program, and OP Credit 21: Hazardous Materials Management.

"---" indicates that no data was submitted for this field

Weight of materials recycled, 2005 baseline year :
195 Tons

Weight of materials composted, 2005 baseline year :
0 Tons

Weight of materials disposed as garbage, 2005 baseline year :
---

Weight of materials recycled, performance year :
---

Weight of materials composted, performance year :
0 Tons

Weight of materials disposed as garbage, performance year :
---

List the start and end dates of the waste reduction performance year:
---

On-campus residents, 2005:
Non-residential/commuter full-time students, faculty, and staff members, 2005:

Non-residential/commuter part-time students, faculty, and staff members, 2005:

On-campus residents, performance year:

Non-residential/commuter full-time students, faculty, and staff members, performance year:

Non-residential/commuter part-time students, faculty, and staff members, performance year:

Time period for weighted campus user (list the consecutive 12 month period that most closely overlaps with waste reduction performance year):

Indication of whether institution has a stated commitment to waste-reduction goals, such as zero waste:

A brief description of the plan of action to achieve waste reduction goals:

http://www.wcupa.edu/_INFORMATION/AFA/Facilities/Recycling/recyclereport.asp
Waste Diversion

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution diverts materials from the landfill or incinerator by recycling, composting, reusing, donating, or re-selling.

This credit does not include construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP Credit 19: Construction and Demolition Waste Diversion, OP Credit 20: Electronic Waste Recycling Program, and OP Credit 21: Hazardous Materials Management.

"---" indicates that no data was submitted for this field

Materials recycled, composted, reused, donated, re-sold, or otherwise diverted:
306 Tons

Materials disposed in a solid waste landfill or incinerator:
1,417 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate:

Beginning in January 2011, West Chester University will use the single-stream recycling approach: “All-In-One.” With this method, commingled materials (glass, plastics, aluminum, and food cans) are collected in the same container with mixed paper and cardboard, thus simplifying the process for both the users and the collection team. The “All-In-One” containers will now be located everywhere—in hallways, classrooms, offices, copy rooms, lounge areas, etc. Recycled items are collected throughout the building by the Custodial Services staff and brought to one centrally-located recycling container. From there the recyclables are transported to an off-campus recycling processing plant where the materials are sorted and sold on the various recycling commodity markets.
Construction and Demolition Waste Diversion

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution diverts non-hazardous construction and demolition waste from the landfill and/or incinerator.

Soil and organic debris from excavating or clearing the site do not count for this credit.

"---" indicates that no data was submitted for this field

Amount of construction and demolition materials recycled, donated, or otherwise recovered :
1,623 Tons

Amount of construction and demolition materials landfilled or incinerated :
48 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contribute to the diversion rate for construction and demolition waste:

The E. O. Bull Center project implemented a job-site recycling program with a goal of diverting 75% of the project’s waste from landfills. To date 1,623.00 tons of material or 97.14 of the project’s waste has been diverted from landfills.
Electronic Waste Recycling Program

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution has a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution. Institution takes measures to ensure that the electronic waste is recycled responsibly.

Part 2

Institution has a program in place to recycle, reuse, and/or refurbish electronic waste generated by students. Institution takes measures to ensure that the electronic waste is recycled responsibly.

"---" indicates that no data was submitted for this field

Does the institution have a program in place to recycle, reuse, and/or refurbish all electronic waste generated by the institution and take measures to ensure that the electronic waste is recycled responsibly?:

No

Does the institution have a program in place to recycle, reuse, and/or refurbish electronic waste generated by students and take measures to ensure that the electronic waste is recycled responsibly?:

---

A brief description of steps taken to ensure that e-waste is recycled responsibly, workers’ basic safety is protected, and environmental standards are met:

---

A brief description of the electronic waste recycling program for institution-generated materials:

---

A brief description of the electronic waste recycling program for student-generated materials:

---
The website URL where information about the e-waste recycling program is available: ---
Hazardous Waste Management

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seeks to minimize the presence of these materials on campus.

"---" indicates that no data was submitted for this field

Does the institution have strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seek to minimize the presence of these materials on campus?:

Yes

A brief description of steps taken to reduce hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste:

Guidelines for Reducing Waste

• Establish chemical use parameters before placing an order. This will minimize waste by purchasing chemicals in the container size that permits maximum consumption.
• Purchase chemicals in small quantities. The contents of small containers are most likely to be utilized than lost to contamination or degradation. Also, if disposal is required, volume and expense will be minimized if waste is in small containers.
• Reduce the scale of the experiment if protocol permits. Less chemicals used equates to less waste.
• Whenever possible, substitute less-hazardous chemicals for hazardous chemicals. Examples: Substitute Latex paints for solvent (oil-based) paints, non-mercury thermometers for mercury containing thermometers, etc.,
• Avoid stock piling of common chemicals. Stock piling involves the purchasing or accumulation of chemicals in large quantities for use longer than needed. This practice usually jeopardizes the chemicals’ properties over a period of time.
• When chemicals are received, take all precautions to store them according to manufactures’ recommendations such as by refrigeration or under an inert atmosphere. Following special storage requirements not only creates a safer work environment, it can increase the shelf life of chemicals.
• When chemicals are first received, date and store them in a manner that enables the older chemicals to be used first. This will develop a rotational system so that chemicals will be used before shelf life expires.
• Replace worn labels in a permanent, legible fashion. This will prevent an unknown chemical
from being generated. Unknown chemicals are difficult and expensive to manage as a waste.

- Label all containers and reaction flasks that contain or will contain chemicals. DO NOT use abbreviations, trade names or chemical symbols. Only use the common chemical name or nomenclature to identify each container’s contents. This will prevent an unknown chemical from being generated.
- Replace faulty or damaged caps and lids. This will safeguard against the effect of air and moisture contamination.

A brief description of how the institution safely disposes of hazardous, universal, and non-regulated chemical waste:

**Problem Hazardous Waste**

Gas cylinders, lecture bottles, aerosol cans

Make arrangements when purchasing gas cylinders that the manufacturer or supplier will accept return of cylinders

Shock sensitive materials - peroxidized ethers, dry picric acid

Naturally occurring radioactive materials - uranyl nitrate, thorium nitrate

**Hazardous Waste Labeling Requirements**

Use WCU hazardous waste label - (Contact EHS x3333 or George Zittle x2274 as specified above) you may make your own label as long as it contains all of the same information and wording as the university label

Be sure to clearly mark the accumulation start date for each container, the accumulation start date must be visible for inspection

Hazardous waste generator’s name or responsible person (i.e. faculty, building administrator, shop foreman, employee, etc.), building/room# and phone#

Contents - Please write the full name of the compound(s) and the percentages of each and container size. Please do not use acronyms, chemical formulas or chemical structures.

If known, mark the chemical family code contents fall under on back of hazardous waste label (e.g. Inorganic 1-Metal, Hydrides, Organic 8-Phenols, Cresols)

**Hazardous Waste Container Requirements**

Container must be compatible with waste

Container must be kept closed except when adding or removing waste

Container must be handled and stored in a manner that will prevent rupture or leaks

Container must be inspected weekly for leaks or deterioration

Do not place incompatible materials in the same container or place waste into an unwashed container that contained an incompatible material

**Hazard Class**

A simple method for determining if your waste is hazardous is if it fits into the following hazard classes:

- Flammable
- Oxidizer
- Reactive
- Water reactive
- Shock sensitive
- Light, heat reactive
- Corrosive Acid - mineral
- Corrosive Acid - organic
- Corrosive Base
- Toxic-poison/irritant/carcinogen etc.
Gas cylinders - segregate by hazard class
Segregation by Hazard Class

Use the following resources to determine the hazard class of your waste:

MSDS
Original Container Label
Manufacturers catalog
International Chemical Safety Cards

The website URL where information about hazardous materials management is available:

http://www.wcupa.edu/_facstaff/facdev/sponsoredresearch/wasteDisposal.asp
Does the institution have a surplus department or formal office supplies exchange program that facilitates reuse of materials?:

Yes

A brief description of the program:

As a State institution the University uses property to its best advantage and realizes the maximum value possible for equipment and furniture at the end of their useful life. By following surplus disbursement/disposal procedures we ensure that University property provides value to the full extent of its worth and that its disbursement/disposal will be conducted in an equitable, efficient, and cost-effective manner.

This subcategory seeks to recognize institutions that are conserving water and making efforts to protect water quality. Pumping, delivering, and treating water is a major energy user, so institutions can help reduce energy consumption and the greenhouse gas emissions associated with energy generation by conserving water. Likewise, conservation and effective stormwater management are important in maintaining and protecting finite groundwater supplies. Water conservation and effective stormwater management also reduce the need for effluent discharge into local surface water supplies, which helps improve the health of local water ecosystems.

Stormwater Management

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution has adopted a stormwater management policy, plan, and/or strategies that mitigate the stormwater runoff impacts of new construction, major renovation, and other projects that increase paved surface area on campus or otherwise significantly change the campus grounds.

The policy, plan, and/or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

The policy, plan, and/or strategies cover the entire campus. While the specific strategies or practices adopted may vary depending on project type and location, this credit is reserved for institutions that mitigate stormwater runoff impacts consistently during new construction. Implementing a strategy or strategies for only one new development project is not sufficient for this credit.

Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution has adopted a stormwater management policy, plan, or strategies that mitigate the stormwater runoff impacts of ongoing campus operations.

The policy, plan, or strategies address both the quantity and quality (or contamination level) of stormwater runoff.

Though specific practices adopted may vary across the campus, the policy, plan, and/or strategies cover the entire institution. Implementing strategies for only one building or area of campus is not sufficient for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a policy, plan, and/or strategies to reduce stormwater runoff from new development projects? :
Yes

Does the institution have a policy, plan, and/or strategies to reduce stormwater runoff from ongoing campus operations? :
Yes
A brief description of the institution's stormwater management initiatives:

The WCU campus is entirely within the Chester County Conservation District (CCCD) and is subject to the stormwater regulations of the CCCD. These are stringent, and their application to new construction projects, major renovations, and other projects that significantly change the campus grounds, ensures mitigation of the impacts of stormwater runoff.

At present the University’s projects are permitted as phases under an “umbrella permit” that was established when the EO Bull renovations and Additions project received its permit.

Planning, Administration & Engagement

**Coordination and Planning**

This subcategory seeks to recognize colleges and universities that are institutionalizing sustainability by dedicating resources to sustainability coordination, incorporating sustainability into their primary campus plans, and developing plans to move towards sustainability. Staff and other resources help an institution organize, implement, and publicize sustainability initiatives. These resources provide the infrastructure that fosters sustainability within an institution. Strategic and physical campus plans guide an institution and its physical development. These important documents establish an institution’s priorities and influence budgeting and decision making. Incorporating sustainability into these plans is an important step in making sustainability a campus priority and may help advocates implement sustainable changes. Sustainability plans and climate plans provide a road map for how to achieve sustainability goals.

**Credit**

- Sustainability Coordination
- Strategic Plan
- Physical Campus Plan
- Sustainability Plan
- Climate Action Plan
Sustainability Coordination

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has a sustainability committee, office, and/or coordinator that are tasked by the administration or board of trustees to advise on and implement policies and programs related to sustainability on campus.

The committee, office, and/or coordinator focus on sustainability broadly (i.e. not just one sustainability issue, such as climate change) and cover the entire institution. A committee, office, or coordinator that focuses on just one department or school within the institution does not count for this credit.

"---" indicates that no data was submitted for this field

Does the institution have a sustainability committee?:

Yes

The charter or mission statement of the committee or a brief description of the committee's purview and activities:

West Chester University recognizes that one of the most significant challenges facing humanity is achieving a sustainable society. Accomplishing this depends on our ability to organize human activity so that society, its members and its economies are able to meet their needs and express their greatest potential in the present as well as the future. WCU intends to reduce its ecological impact and to promote research and service that foster regional and global sustainability.

Members of the committee, including affiliations:

Paul Morgan, College of Education, Sustainability Coordinator
Tim Lutz, Department of Geology and Astronomy
Joan Woolfrey, Department of Philosophy
Walt Cressler, Library
Allison Turner, MPA Program
Joan Welch, Department of Geography
Kurt Kolasinski, Department of Chemistry
Daria Nikitina, Department of Geology and Astronomy
Joy Fritschle, Department of Geography
Carol Smith, Department of Literacy
Ashley Duffy, STARS intern
Kaloni Baylor, Greenhouse Gas Intern
Emma Fitzpatrick, Communications Intern
The website URL where information about the sustainability committee is available:

---

Does the institution have a sustainability office?:
Yes

A brief description of the sustainability office:

The Sustainability Office at WCU was established in 2011. It is located in the heart of North Campus. The office provides ample space for the intern staff to work as often as required.

The number of people employed in the sustainability office:
5

The website URL where information about the sustainability office is available:

---

Does the institution have a sustainability coordinator?:
Yes

Sustainability coordinator's name:
Paul Morgan

Sustainability coordinator's position title:
Associate Professor/Sustainability Coordinator

A brief description of the sustainability coordinator’s position:

The WCU sustainability coordinator is currently responsible for overseeing the following: development of the Climate Action Plan; supervising interns; coordinating sustainability communications; facilitating the inclusion of sustainability and climate change into the
curriculum; and reaching out to constituencies on and off campus.

The website URL where information about the sustainability coordinator is available:
Strategic Plan

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution’s current, formally adopted strategic plan or equivalent guiding document includes sustainability at a high level. The plan covers the entire institution.

An amendment to the strategic plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a physical campus plan (which is covered in PAE Credit 3: Physical Campus Plan) nor an independent sustainability plan (which is covered in PAE Credit 5: Sustainability Plan) counts for this credit.

---” indicates that no data was submitted for this field

Year the strategic plan or equivalent was completed or adopted:

2007

Does the institution's strategic plan or equivalent guiding document include the environmental dimensions of sustainability at a high level?:

Yes

A brief description of how the strategic plan or amendment addresses the environmental dimensions of sustainability:

The following is included in the current strategic plan: “Encourage environmental awareness through training, curricula, and co-curricular programming, assess and reduce the ecological impact of the University, and promote research and service that foster regional and global sustainability.”

Does the institution's strategic plan or equivalent guiding document include the social dimensions of sustainability at a high level?:

No

A brief description of how the strategic plan or amendment addresses the social dimensions of sustainability:

A new strategic plan is currently being drafted and will include the social and economic dimensions of sustainability at a high level.
Does the institution's strategic plan or equivalent guiding document include the economic dimensions of sustainability at a high level?:

No

A brief description of how the strategic plan or amendment addresses the economic dimensions of sustainability:

A new strategic plan is currently being drafted and will include the social and economic dimensions of sustainability at a high level.

The website URL where information about the strategic plan is available:

---
Physical Campus Plan

Criteria

Institution’s current plan for its physical campus (commonly referred to as the campus master plan) includes sustainability at a high level.

An amendment to the plan may count for this credit, as long as the institution always presents the amendment with the original plan.

Neither a strategic plan (which is covered in PAE Credit 2: Strategic Plan) nor an independent sustainability plan (which is covered in PAE Credit 4: Sustainability Plan) counts for this credit.

Plans developed at the system level are eligible for this credit. Likewise, multiple plans which together cover the institution’s entire physical campus are eligible for this credit.

"---" indicates that no data was submitted for this field

Does the institution's physical campus plan include sustainability at a high level?:

No

A brief description of how the physical campus plan or amendment includes sustainability:

The University is currently in the process of developing a physical campus plan.

The year the physical campus plan was developed or adopted:

2,012

Diversity and Affordability

This subcategory seeks to recognize institutions that are working to advance diversity and affordability on campus. In order to build a sustainable society, diverse groups will need to be able to come together and work collaboratively to address sustainability challenges. People of color and low-income communities tend to suffer disproportionate exposure to environmental problems. This environmental injustice happens as a result of unequal and segregated communities. To achieve environmental and social justice, society must work to address discrimination and promote equality. The historical legacy and persistence of discrimination based on racial, gender, religious, and other differences makes a proactive approach to promoting a culture of inclusiveness an important component of creating an equitable society. Higher education opens doors to opportunities that can help create a more equitable world, and those doors must be open through affordable programs accessible to all regardless of race, gender, religion, socio-economic status and other differences. In addition, a diverse student body, faculty, and staff provide rich resources for learning and collaboration.

Diversity and Equity Coordination

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has a diversity and equity committee, office, and/or coordinator that are tasked by the administration or board of trustees to advise on and implement policies, programs, and trainings related to diversity and equity on campus.

"---" indicates that no data was submitted for this field

Does the institution have a diversity and equity committee?:
Yes

The charter or mission statement of the committee or a brief description of the committee's purview and activities:

The Campus Climate Intervention Team continues to collect statistics on issues, behaviors or offenses on campus which negatively affect a group on campus. For example, this group collects data on offenses in the dorms (i.e. things written on the doors, things yelled at other students, etc.). These statistics will be available at the end of the academic year and submitted for review in the fall minutes. CCIT also sponsored the Campus Climate survey from last year and is currently reviewing the results along with other organizations on campus.

Members of the committee, including job titles and affiliations:

Executive Committee:
Matt Bricketto (Student Affairs)
Darla Spence Coffey (Academic Affairs)
Richeleen Dashield (Social Equity)

Committee members:
Ruth Almy (Student)
Jared Brown (Greek Life)
Nicole Cattano (Retention and Student Success Committee)
Beth Cooper (American Federation of State, County and Municipal Employees - AFSCME)
Jonathan Curtis (Student, Resident Assistant)

Treiva Dungee (Manager's Association)

Jonathan Friedman (Holocaust and Genocide Studies)

Jackie Hodes (Lesbian, Gay, Bisexual, Transgender, Questioning, Ally Services)

Angela Howard (International Programs)

Skip Hutson (Office of Multicultural Affairs)

Lauri Hyers (Faculty Mentoring)

Cliff Johnston (Association of Pennsylvania State College and University Faculties - APSCUF)

Marion McKinney (Campus Climate Intervention Team; Residence Life)

Kellianne Milliner (Athletic's Office)

Meg Panichelli (Graduate student)

Marty Patwell (Office of Services for Students with Disabilities)

Nancy Rumfield (Women's Consortium)

Swati Salvi (International student)

Adale Sholock (Women's Center)

Keira Smalls (Student, SGA)

Craig Stevens (NCAA Faculty Athletic Representative for WCU)

Cindi Strengari (American Federation of State, County and Municipal Employees - AFSCME)

Tonya Thames-Taylor (Multicultural Faculty Commission)

Phil Tripp (State College and University Professional Association - SCUPA)

Jim Trotman (Frederick Douglass Institute)

Linda Udovich (Human Resources)

Lisa Yannick (Institutional Research)

The website URL where information about the diversity and equity committee is available:
http://www.wcupa.edu/_services/stu.lif/ramseyview/policies/ccit.asp

Does the institution have a diversity and equity office?:
Yes
A brief description of the diversity office:

The Office of Social Equity (OSE) provides leadership, coordination, and information to assist departments and constituencies within West Chester University to achieve its commitments to the principles of equity, diversity, and affirmative action. Through collaborative efforts, the office helps to foster an inclusive and civil community. In furtherance of its mission, the Office of Social Equity monitors a number of policies to promote diversity and inclusion and to eliminate discriminatory behaviors at West Chester University. Several coordinators and committees participate in the administration of the University's social equity program. The following committees are among those that work with the office: the Americans with Disabilities Act (ADA) Committee and the Campus Climate Intervention Team (CCIT). Students serve on all of these committees and are nominated for them through the Student Government Association. Any interested student may contact the Office of Social Equity directly if she/he wishes to become part of these committees.

The number of people employed in the diversity office:

2

The website URL where information about the diversity and equity office is available:

http://www.wcupa.edu/_services/stu.lif/ramseyeview/policies/soc_eq.asp

Does the institution have a diversity and equity coordinator?:

Yes

Diversity coordinator’s name:

Barbara Schneller

Diversity coordinator's position title:

Director of the Office of Social Equity

A brief description of the diversity coordinator's position:

The Office of Social Equity (OSE) provides leadership, coordination and information to assist departments and constituencies within West Chester University to achieve its commitments to the principles of equity, diversity and affirmative action. Through collaborative efforts, the office helps to foster an inclusive and civil community. In furtherance of its mission, the Office of Social Equity monitors a number of policies to promote diversity and inclusion and to eliminate discriminatory behaviors at West Chester University.

Measuring Campus Diversity Culture

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution assesses attitudes about diversity and equity on campus and uses the results to guide policy, programs, and initiatives.

Institution may measure its culture of diversity and equity using one assessment for the entire institution or using separate assessments that taken together cover the entire institution.

Assessments conducted during the previous five years are eligible for this credit.

"---" indicates that no data was submitted for this field

Has the institution assessed attitudes about diversity and equity on campus in a way that meets the criteria for this credit?:

Yes

A brief description of the assessment(s):

In October, the University contracted with Dr. Susan Rankin from Penn State University and Rankin Consulting, Inc., to assist us in conducting a campus climate survey. Dr. Rankin has experience with campus climate surveys in over 90 colleges and universities across the country, including Millersville University within the PA State System of Higher Education.

Since 1987, the University has assessed climate in a number of different ways. For the year of our current self-study for reaccreditation by the Middle States Commission on Higher Education, it was determined that a comprehensive campus climate assessment would assist the self-study and inform a new strategic plan. The survey will be completed by students, faculty, staff, and administration (none of our previous assessment efforts have included the entire campus in this way). Dr. Rankin’s approach is based on the Transformational Tapestry Model of campus climate, which provides a framework to view and assess campus culture and develop integrated interventions for implementation to maximize equity.

Year the assessment was last administered:

2,010

A brief description of how the results of the assessment(s) are used in shaping policy, programs, and initiatives:

It is the intention of the Campus Climate Advisory Committee that the results from this project be used to identify specific strategies for supporting positive initiatives and addressing the challenges facing the WCU campus community. The recommended next steps include the
Campus Climate Advisory Committee and other campus constituent groups using the results of the internal assessment to help to lay the groundwork for future initiatives

The website URL where information about the assessment(s) is available:
http://www.wcupa.edu/sharedvision/climatesurvey/results/documents/WCU_Executive_Summary_Final.pdf
Support Programs for Underrepresented Groups

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has mentoring, counseling, peer support, affinity groups, academic support programs, or other programs in place to support underrepresented groups on campus.

"---" indicates that no data was submitted for this field

Does the institution have mentoring, counseling, peer support, affinity groups, academic support programs, or other programs in place to support underrepresented groups on campus?:

Yes

A brief description of the programs sponsored by the institution to support underrepresented groups within the student body:

Campus Climate Assessment
The mission of the Office of Multicultural Affairs is to maintain a supportive environment that promotes the academic achievement and personal wellbeing of African American, Latino, Asian American, and Native American students at West Chester University. This mission is met through a wide range of services, programs, and activities. Examples include ongoing mentoring, the Kente Commencement Ceremony, leadership development, the Summer Institute for Pennsylvania Board of Governors Scholars, and advocacy.

Campus Climate Intervention Team
LGBTQA Ally Training
Frederick Douglas Society

A brief description of the programs sponsored by the institution to support underrepresented groups within the faculty:

Multicultural Faculty Commission (MFC)
The Multicultural Faculty Commission provides expanded support for a diverse faculty in such areas as scholarship and academic leadership. Among its activities, the commission funds competitive, peer-reviewed grants to assist faculty in their research and scholarship

Campus Climate Assessment
Campus Climate Intervention Team
LGBTQA Ally Training
Frederick Douglas Society

A brief description of the programs sponsored by the institution to support underrepresented groups within the staff:

Recruitment resources, such as the use of diversity recruitment plans and diversity recruitment consultants, will be used to help achieve the full utilization of women and of persons of color. The success of current efforts is reflected in the fact that 37.5 percent of the faculty who were recruited for 2009-10 are persons of color.

Hiring assistance workshops;
Campus Climate Intervention Team
LGBQTA Ally Training

Support Programs for Future Faculty

**Responsible Party**

Paul Morgan  
Professor  
Professional & Secondary Education

**Criteria**

Institution administers and/or participates in a program or programs to help build a diverse faculty throughout higher education.

Such programs could take any of the following forms:

- Teaching fellowships or other programs to support terminal degree students from underrepresented groups in gaining teaching experience. (The terminal degree students may be enrolled at another institution).
- Mentoring, financial, and/or other support programs to prepare and encourage undergraduate or other non-terminal degree students to pursue further education and careers as faculty members.
- Mentoring, financial, and/or other support programs for doctoral and post-doctoral students from underrepresented groups.

"---" indicates that no data was submitted for this field

Does the institution administer and/or participate in programs that meet the criteria for this credit?:

Yes

A brief description of the institution’s programs that help increase the diversity of higher education faculty:

Through the Frederick Douglass Institute, WCU offers the Summer Scholars Program: In keeping with the spirit of Douglass’ life of public service, the Frederick Douglass Teaching Scholars Summer Program is designed to provide graduate students teaching experiences and potential employment opportunities within university settings that are strongly committed to cultural diversity.

The website URL where more information about the program(s) is available:

http://www.wcupa.edu/_academics/fdouglass/summerscholars.asp
Affordability and Access Programs

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has policies and programs in place to make it accessible and affordable to low-income students. Such policies and programs may include, but are not limited to, the following:

- Policies and programs to minimize the cost of attendance for low-income students
- Programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds
- Programs to prepare students from low-income backgrounds for higher education such as the federal TRIO programs
- Scholarships for low-income students
- Programs to guide parents of low-income students through the higher education experience
- Targeted outreach to recruit students from low-income backgrounds
- Other admissions policies or programs
- Other financial aid policies or programs

Institutions are not required to have programs or policies in each of the above areas in order to earn this credit. They may pursue the policies and programs that are appropriate for their context.

"---” indicates that no data was submitted for this field

Does the institution have policies and programs in place to make it accessible and affordable to low-income students?:
Yes

A brief description of the institution’s participation in federal TRIO programs:

Student Support Services (SSS) is a federally funded TRIO program sponsored by the U.S. Department of Education. The SSS program at West Chester University is one of more than 900 Student Support Services programs in the United States and its territories.

The SSS program provides opportunities for academic development, and assist students towards the successful completion of their postsecondary education. The goal of SSS is to increase college retention, and graduation rates of its participants. The West Chester University SSS program serves as a resource and voice for undergraduate first-generation, low-income students and students with disabilities. Within a learning environment which challenges students to grow personally and professionally, we nourish a sense of empowerment and strive to bridge the gap between the dream and the reality of achieving a baccalaureate degree.

A brief description of the institution’s policies and programs to minimize the cost of attendance for low-income students?:

---
SSS has a supplemental grant fund from which to award scholarships for select participants identified as having unmet financial need and having accomplished specific project participation requirements. This Scholarship is awarded on an annual basis.

A brief description of the institution’s programs to equip the institution's faculty and staff to better serve students from low-income backgrounds:

---

A brief description of the institution’s programs to prepare students from low-income backgrounds for higher education:

West Chester University provides a comprehensive Act 101 Program. ADP students who qualify for Act 101 receive additional services such as financial assistance for the summer session, access to specialized cultural activities, additional tutoring, and other services. Students who qualify for Act 101 also have additional responsibilities to help them to succeed academically. Eligibility for Act 101 is determined by income information provided at the time of application for the Academic Development Program.

A brief description of the institution's scholarships for low-income students:

SSS has a supplemental grant fund from which to award scholarships for select participants identified as having unmet financial need and having accomplished specific project participation requirements. This Scholarship is awarded on an annual basis.

A brief description of the institution’s programs to guide parents of low-income students through the higher education experience:

---

Human Resources

This subcategory seeks to recognize institutions that have incorporated sustainability into their human resources programs and policies. This includes recognition for treating and remunerating their workers responsibly and fairly. An institution’s people define its character and capacity to perform; and so, an institution’s achievements can only be as strong as its community. An institution can bolster the strength of its community by making fair and responsible investments in its human capital. Such investments include offering benefits, wages, and other assistance that serve to respectfully and ethically compensate workers. Investment in human resources is integral to the achievement of a healthy and sustainable balance between human capital, natural capital, and financial capital.

In addition, this subcategory recognizes faculty and staff training and development programs in sustainability. Faculty and staff members’ daily decisions impact an institution’s sustainability performance. Equipping faculty and staff with the tools, knowledge, and motivation to adopt behavior changes that promote sustainability is an essential activity of a sustainable campus.

Sustainable Compensation

Responsible Party
Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution evaluates, and updates as appropriate, its wages and benefits policies and its guidelines for contractors operating on campus to ensure that total compensation (wages plus benefits) for all on-campus workers is sufficient to enable these employees to meet their basic needs, as defined by the institution. This evaluation is completed at least once every three years.

Student workers are not covered by this credit.

While wages and total compensation set in the following ways may constitute sustainable compensation, institutions should conduct a basic needs assessment to ensure that the total compensation is adequate before claiming points for this credit:

- Paying prevailing wages for job type or classification
- Paying average or above average wages for the region or city where the institution is located
- Paying minimum wages or a set amount above the minimum wage

Policies and practices adopted by entities of which the institution is part (e.g. state government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

Total number of employees working on campus (including contractors):
---

Number of employees (including contractors) that the institution ensures earn sustainable compensation:
---

The website URL where information about the institution’s compensation policies and practices is available:
---
Employee Satisfaction Evaluation

Responsible Party

Paul Morgan  
Professor  
Professional & Secondary Education

Criteria

Institution conducts a survey or other evaluation that allows for anonymous feedback at least once every five years to measure employee satisfaction. The survey or equivalent may be conducted institution-wide or may be done by individual departments as long as all departments are covered by a survey. The institution has a mechanism in place to address issues raised by the evaluation.

"---" indicates that no data was submitted for this field

Does the institution evaluate employee satisfaction in a way that meets the criteria for this credit?: Yes

A brief description of the institution’s methodology for evaluating employee satisfaction:

WCU has conducted periodic employee satisfaction surveys, including the most recent comprehensive Campus Climate Survey, the results of which are being diligently acted upon.

The year the employee satisfaction evaluation was last administered: 2,010

The website URL where information about the institution’s employee satisfaction evaluation process is available:

http://www.wcupa.edu/sharedvision/climatesurvey/
Staff Professional Development in Sustainability

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution makes available training and/or other professional development opportunities in sustainability to all staff at least once per year.

Separate training opportunities for each department would count for this credit, as long as each staff member has an opportunity to learn about sustainability at least once per year.

It is not necessary that each staff member attend such trainings; the credit is based on making training available to all staff.

This credit applies to staff members only; it does not include faculty members.

The following training opportunities are not sufficient for this credit:

• Specialized training for a small group of staff
• The opportunity to participate in an institutional sustainability committee or group

"---" indicates that no data was submitted for this field

Does the institution make training and professional development opportunities in sustainability available to all staff?:

No

A brief description of the sustainability trainings and professional development opportunities available to staff:

---

The website URL where information about staff training opportunities in sustainability are available:

---
Sustainability in New Employee Orientation

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution covers sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff.

Employees in TIAA-CREF have the option of investing up to 100% in the Social Choice category.

The website URL where information about the program, policy, or practice is available:
http://www.tiaa-cref.org/public/about/how-we-invest/sri/social-screening/index.html
This subcategory seeks to recognize institutions that make investment decisions that promote sustainability. Most institutions invest some of their assets in order to generate income. Together, colleges and universities invest hundreds of billions of dollars. Schools with transparent and democratic investment processes promote accountability and engagement by the campus and community. Furthermore, institutions can support sustainability by investing in companies and funds that, in addition to providing a strong rate of return, are committed to social and environmental responsibility. Investing in these industries also supports the development of sustainable products and services. Finally, campuses can engage with the businesses in which they are invested in order to promote sustainable practices.

Throughout this subcategory, the term “sustainable investment” is inclusive of socially responsible, environmentally responsible, ethical, impact, and mission-related investment.

Committee on Investor Responsibility

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution has a formally established and active CIR or similar body that makes recommendations to the Board of Trustees on socially and environmentally responsible investment opportunities across asset classes, including proxy voting. The body has multi-stakeholder representation, which means its membership includes faculty, staff, and students and may include alumni, trustees, and/or other parties.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

A general committee that oversees the institution's investments does not count for this credit unless social and environmental responsibility is an explicit part of its mission and/or agenda.

This credit applies to institutions with endowments of US $1 million or larger. Institutions with endowments totaling less than US $1 million may choose to omit this credit.

"---" indicates that no data was submitted for this field

Does the institution have a committee on investor responsibility or similar body that meets the criteria for this credit?:
No

The charter or mission statement of the CIR or other body, which reflects social and environmental concerns, or a brief description of how the CIR is tasked to address social and environmental concerns:

---

Members of the CIR, including affiliations:

---

Recent examples (within the past 3 years) of CIR actions:

---

The website URL where information about the committee is available:

---
Shareholder Advocacy

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

There are two possible approaches to earning this credit.

1) Institution filed or co-filed one or more shareholder resolutions that address sustainability or submitted one or more letters about social or environmental responsibility to a company in which it holds investments, during the previous three years.

and/or

2) Institution has conducted a negative screening of its entire investment pool within the last three years. This could take the form of prohibiting investment in an industry (e.g. tobacco or weapons manufacturing) or participating in a divestment effort (e.g. companies operating in South Africa during apartheid). The negative screen includes selling all but $2,000 or less of the affected direct holdings and writing a letter to all fund managers encouraging them to remove affected holdings as well.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the shareholder advocacy activities of those entities.

"---" indicates that no data was submitted for this field

Has the institution filed or co-filed one or more shareholder resolutions that address sustainability during the past three years?:
---

Has the institution submitted one or more letters about social or environmental responsibility to a company in which it holds investments during the previous three years?:
---

Has the institution conducted a negative screening of its entire investment pool within the last three years?:
---

Positive Sustainability Investments

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution invests in any of the following:

- Sustainable industries, such as renewable energy or sustainable forestry
- Businesses selected for exemplary sustainability performances
- Sustainability investment funds, such as a renewable energy investment fund
- Community development financial institutions (CDFI)
- Socially responsible mutual funds with positive screens.

Investment in a socially responsible mutual fund with only negative screens (i.e. one that excludes egregious offenders or certain industries, such as tobacco or weapons manufacturing) does not count for this credit.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

---
Public Engagement

This subcategory seeks to recognize institutions that give back to their communities through community service, engagement, and partnerships. Volunteerism and the sense of compassion that community service helps develop are fundamental to achieving sustainability. From tutoring children to removing invasive species to volunteering at a food bank, students, faculty, and staff can make tangible contributions that address sustainability challenges through community service. Community engagement can help students develop leadership skills while deepening their understandings of practical, real-world problems. Institutions can contribute to their communities by harnessing their financial and academic resources to address community needs. For example, faculty research and courses can focus on how to address community problems. In addition, colleges and universities can offer incentives for their graduates to pursue careers that fill community needs, and schools can use their prominence to advocate for sustainability outside of their institutions.

Criteria

Institution has formal partnership(s) with the local community, including school districts, government agencies, non-profit organizations, or other entities, to work together to advance sustainability within the community.

"---" indicates that no data was submitted for this field

Does the institution participate in community sustainability partnerships that meet the criteria for this credit?:

Yes

A brief description of the institution’s sustainability partnerships with the local community:

In early 2007, West Chester Borough Council approved an advisory committee, Borough Leaders United for Emission Reduction (BLUER), to study greenhouse gas (GHG) emissions in the Borough and to make recommendations to reduce emissions. BLUER reports to Council through the Parks, Recreation, and Environmental Protection (PREP) committee. Five BLUER members were chosen to represent different sectors of the Borough: businesses, residents, county government, and West Chester University.

The Borough is one of nine townships and municipalities in Pennsylvania to commit to membership in ICLEI – Local Governments for Sustainability. West Chester is one of a smaller number who are participating in ICLEI’s Cities for Climate Protection (CCP) Campaign; CCP cities are committed to mitigating climate change by following ICLEI’s Five Milestones. BLUER has adopted a goal of reducing the Borough’s emissions to 10% below 2005 levels by 2015. The University’s GHG inventory was undertaken as a component of the Borough’s inventory.

The website URL where information about sustainability partnerships is available:

---
Inter-Campus Collaboration on Sustainability

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution collaborates with other colleges and universities to support and help build the campus sustainability community.

"---" indicates that no data was submitted for this field

Does the institution collaborate with other colleges and universities to support and help build the campus sustainability community?:

Yes

A brief summary of papers, guides, presentations, and other resources the institution has developed to share their sustainability experience with other institutions:

The sustainability coordinator has made presentations at regional and national events on topics such as infusing sustainability into a strategic plan, and developing a faculty ambassadors program.

The names of local, state, regional, national, and other campus sustainability organizations or consortia in which the institution participates and/or is a member:

We are dues-paying members of the following:
Pennsylvania Environmental Resource Consortium (PERC)
Association for the Advancement of Sustainability in Higher Education (AASHE)

A brief summary of additional ways the institution collaborates with other campuses to advance sustainability:

We have sponsored multi-institutional events on campus (e.g. Peter Bardaglio in February 2012) and participate in regional conferences/meetings (e.g. University of Delaware in Fall 2011)

The website URL where information about cross-campus collaboration is available:

---
Sustainability in Continuing Education

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution offers continuing education courses that are focused on or related to sustainability.

Courses that can be taken for academic credit are not included in this credit. They are covered by the Curriculum subcategory.

Part 2

Institution has a sustainability-related certificate program through its continuing education or extension department.

"---" indicates that no data was submitted for this field

Does the institution offer continuing education courses that are focused on or related to sustainability?:
Yes

Number of sustainability continuing education courses offered :
8

Total number of continuing education courses offered:
300

Does the institution have a sustainability-related certificate program through its continuing education or extension department?:
Yes

A brief description of the certificate program:

Education for sustainability (EFS) is a rapidly emerging field that is guided by a vision of a sustainable society and rooted in a simple truth: we learn what we live. EFS practitioners are trained professionals who understand the challenge of sustainability and who have been prepared to teach others, to catalyze institutional and cultural change, and to model sustainable ways of living.

These innovative programs prepare participants to create real change in their professions, communities, and daily lives. The EFS curriculum develops the necessary knowledge, skills, and perspectives in a way that integrates classroom work with plenty of outdoor, experiential, and project-based learning. The result is a certificate that is meaningful and immediately applicable. The parallel
undergraduate and graduate programs feature combined sections that provide opportunities for mutually beneficial mentor-mentee relationships between working professionals and undergraduates with shared interests. Most students will also complete an EFS Certificate with a cohort – a community of learners who collaborate on various projects and establish lasting professional relationships.

**Year the certificate program was created:**

2,009

**The website URL where information about sustainability in continuing education courses is available:**

Community Service Participation

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution engages its student body in community service, as measured by the percentage of students who participate in community service.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

"---" indicates that no data was submitted for this field

The number of students engaged in community service:

6,000

Total number of students, which may exclude part-time, continuing education and/or non-credit students:

14,492

The website URL where information about the institution’s community service initiatives is available:

http://www.wcupa.edu/_services/stu.slv/default.asp
Community Service Hours

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution engages students in community service, as measured by average hours contributed per full-time student per year.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

"---" indicates that no data was submitted for this field

The number of student community service hours contributed during a one-year period:
282,662

Total number of students, which may exclude part-time, continuing education and/or non-credit students:
14,492

The website URL where information about the institution’s community service initiatives is available:
http://www.wcupa.edu/_services/stu.slv/default.asp
Sustainability Policy Advocacy

Responsibility Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution advocates for federal, state, or local public policies that support campus sustainability or that otherwise advance sustainability.

The policy advocacy must be done by the institution, not by students or a student group.

"---" indicates that no data was submitted for this field

Has the institution advocated for federal, state, and/or local public policies that support campus sustainability or that otherwise advance sustainability?:

No

A brief description of how the institution engages in public policy advocacy for sustainability, including the issues, bills, and ordinances for or against which the institution has advocated:

---

The website URL where information about the institution’s advocacy efforts are available:

---
Trademark Licensing

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Part 1

Institution is a member of the Fair Labor Association or Worker Rights Consortium.

Part 2

Institution has signed on to participate in the Designated Suppliers Program.

"---" indicates that no data was submitted for this field

Is the institution a member of the Worker Rights Consortium?:
No

Is the institution a member of the Fair Labor Association?:
No

Has the institution expressed intention to participate in the Designated Suppliers Program?:
No

The website URL where information about the institution’s participation in the WRC, FLA, and/or DSP is available:
---
Graduation Pledge

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does the institution administer a graduation pledge through which students pledge to consider social and environmental responsibility in future job and other decisions?:

No

A brief description of the graduation pledge program:

---

The website URL where information about the graduation pledge program is available:

---
Community Service on Transcripts

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does the institution include community service achievements on student transcripts?:
No

A brief description of the practice:
---

The website URL where information about the practice is available:
---
Farmers' Market

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

"---" indicates that no data was submitted for this field

Does the institution host a farmers' market for the community?:
No

A brief description of the farmers’ market:
---

The website URL where information about the market is available:
---
Innovation

These credits recognize institutions that are seeking innovative solutions to sustainability challenges and demonstrating sustainability leadership in ways that are not otherwise captured by STARS.

**Innovation 1**

**Criteria**

1) Innovation credits are reserved for new, extraordinary, unique, groundbreaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.

3) The innovative practice, policy, program, or outcome should have occurred within the past three years.

4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.

5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.

6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

7) Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

8) While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit.

9) Outcomes, policies, and practices that are innovative for the institution’s region or school type are eligible for innovation credits.

10) When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

---

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Innovation 2

Criteria

1) Innovation credits are reserved for new, extraordinary, unique, ground breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.

3) The innovative practice, policy, program, or outcome should have occurred within the past three years.

4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.

5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.

6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

7) Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

8) While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit.

9) Outcomes, policies, and practices that are innovative for the institution’s region or school type are eligible for innovation credits.

10) When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Innovation 3

Criteria

1) Innovation credits are reserved for new, extraordinary, unique, groundbreaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2) In general, innovation credits should have roughly similar impacts or be on the same scale as Tier One credits.

3) The innovative practice, policy, program, or outcome should have occurred within the past three years.

4) The innovative practice or program has to be something that the institution has already done; planned activities do not count.

5) An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted.

6) Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

New Student Orientation

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details about how it incorporates sustainability into new student orientation.

"---" indicates that no data was submitted for this field

Does new student orientation include presentations, speakers, or skits that address sustainability and take place in large venues that most or all first-year students attend?:

No

Provide a brief description of the presentations, speakers or skits:

---

Does new student orientation incorporate sustainability information into presentations (e.g., made by Residential Advisors to individual dorm floors)?:

No

Provide a brief description of the presentations:

---

Does new student orientation actively engage students in activities that raise awareness about sustainability, highlight how sustainability plays out on campus, or allows students to take part in a productive green activity?:

No

Provide a brief description of the activities:

---

Does the institution make new student orientation more sustainable via efforts such as a zero-waste meal or carbon offsets?:

No
Provide a brief description of the efforts:

---

Does the institution incorporate sustainability into new student orientation in other ways?:
No

Provide a brief description:

---
Food Education

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides education about eco-positive food and gardening techniques.

"---" indicates that no data was submitted for this field

Are students educated in an academic class about how to make eco-positive food choices?:
---

Provide a brief description:
---

Are students educated in dining facilities about how to make eco-positive food choices?:
---

Provide a brief description:
---

Are students educated during orientation about how to make eco-positive food choices?:
---

Provide a brief description:
---

Are students educated in other venues about how to make eco-positive food choices?:
---

Provide a brief description:
---
Is there a program by which students are encouraged to and/or taught how to grow their own food?:

---

Provide a brief description of the program:

---
Food and Beverage Purchases

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details of its food and beverage purchases.

"---" indicates that no data was submitted for this field

The percentage of food and beverage expenditures that were processed within 100 miles of the institution by a company that is not publicly traded:
---

The percentage of food and beverage expenditures that were grown within 100 miles of the institution:
---

List what tool your institution is using to track this information (e.g. Center for Environmental Farming Systems or CBORD):
---

List items procured for dining services from on-campus organic garden(s):
---

The percentage of total food and beverage expenditures spent by dining services to procure items from on-campus organic garden(s):
---

List all Fair Trade certified items purchased:
---
Confinement-Free Food Purchases

Dishware

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details of the dishware its provides at its dining services locations.

"---" indicates that no data was submitted for this field

Does the institution offer reusable dishware at its dining services locations?:
Yes

Does the institution offer plastic dishware at its dining services locations?:
---

Does the institution offer polystyrene (Styrofoam) dishware at its dining services locations?:
---

Does the institution offer post-consumer recycled content dishware at its dining services locations?:
---

Does the institution offer biodegradable / compostable dishware at its dining services locations?:
---

Does the institution offer other types of dishware at its dining services locations?:
---

Provide a brief description.: Reusable To Go Containers
Energy Initiatives

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details about its energy initiatives.

"---" indicates that no data was submitted for this field

The percentage of total building space square footage that has undergone energy retrofits or renovations within the past three years:
---

The percentage of overall energy consumption reduced as a result of retrofits and renovations completed within the past three years:
---

The percentage of electricity consumption reduced as a result of retrofits and renovations completed within the past three years:
---

The percentage of thermal energy consumption reduced as a result of retrofits and renovations completed within the past three years:
---

The combined gross square footage of all buildings that were constructed or underwent renovations in the past three years that are ENERGY STAR labeled:

Procurement

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details about its procurement efforts.

"---" indicates that no data was submitted for this field

The percentage of institutionally purchased appliances that are ENERGY STAR rated (of eligible appliance categories):
---

Does the institution have a policy to purchase ENERGY STAR appliances whenever possible?:
---

The percentage of expenditures on Forest Stewardship Council (FSC) certified office paper (US/Canadian dollars):
---

Does the institution’s vendor code or policy require vendors to use less packaging?:
---
Bike Sharing

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution reports the number of bicycles available through bike sharing programs.

"---" indicates that no data was submitted for this field

The number of bicycles available through bike sharing programs:
0
Water Initiatives

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details about its water initiatives.

"---" indicates that no data was submitted for this field

Is there a ban or restriction on selling or distributing bottled water on campus?:
No

Provide a brief description of any bottled water ban or restriction:
---

Does the institution meter any of its non-potable water usage?:
No

The percentage of urinals on campus that are waterless:
0
Endowment

Responsible Party

Paul Morgan
Professor
Professional & Secondary Education

Criteria

Institution provides details about its endowment.

"---" indicates that no data was submitted for this field

The institution's total endowment market value as of the close of the most recent fiscal year:
---

Date as of:
---

Does the institution offer donors the option of directing gifts to an investment fund that considers environmental/sustainability factors?:
---

If yes, or if currently under consideration, provide a brief description:
---

Has the institution made investments in on-campus energy and/or water efficiency projects through the endowment (as an endowment investment and not a payout or using operating budget funds):
No

Size of capital commitments made within past 3 years:
---

Provide a brief description:
---

Does institution lack the ability to vote proxies on environmental and social resolutions, as the entire equity holdings of the endowment are invested in mutual funds (e.g. CommonFund, Fidelity, Vanguard)?:
---
Does the institution lack the ability to vote proxies on corporate governance resolutions, as the entire equity holdings of the endowment are invested in mutual funds (e.g. CommonFund, Fidelity, Vanguard)?:

---

Do investment managers handle the details of proxy voting on environmental and social resolutions?:

---

Do investment managers handle the details of proxy voting on corporate governance resolutions?:
