Number of employees: 1,828

Number of residential students: 3,425
Number of residential employees:
0

Number of in-patient hospital beds:
0
Academics

Curriculum

This subcategory seeks to recognize institutions that have formal education programs and courses that address sustainability. One of the primary functions of colleges and universities is to educate students. By training and educating future leaders, scholars, workers, and professionals, higher education institutions are uniquely positioned to prepare students to understand and address sustainability challenges. Institutions that offer courses covering sustainability issues help equip their students to lead society to a sustainable future.

Academic Courses

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Part 1

Institution offers sustainability courses and/or courses that include sustainability and makes an inventory of those courses publicly available.

Part 2

Institution’s academic departments (or the equivalent) offer sustainability courses and/or courses that include sustainability.

In order to report and earn points for this credit, the institution must conduct a course inventory. The inventory should consist of two parts:

1) An inventory of sustainability courses that includes, at minimum, the title, department (or equivalent), and level of each course (i.e. undergraduate or graduate), as well as a brief description if the sustainability focus of the course is not apparent from its title.

2) An inventory of other courses that include sustainability. The inventory includes, at minimum, the title, department (or the equivalent), and level of each course and a description of how sustainability is integrated into each course.

A course may be a sustainability course or it may include sustainability; no course should be identified as both:

- A sustainability course is a course in which the primary and explicit focus is on sustainability and/or on understanding or solving one or more major sustainability challenge (e.g. the course contributes toward achieving principles outlined in the Earth Charter).

- A course that includes sustainability is primarily focused on a topic other than sustainability, but incorporates a unit or module on sustainability or a sustainability challenge, includes one or more sustainability-focused activities, or integrates sustainability issues throughout the course.

For guidance on conducting a course inventory and distinguishing between sustainability courses and courses that include sustainability, see Standards and Terms and the Credit Example in the STARS Technical Manual. An institution that has developed a more refined approach to course classification may use that approach as long as it is consistent with the definitions and guidance provided.

Each institution is free to choose a methodology to identify sustainability courses that is most appropriate given its unique circumstances. Asking faculty and departments to self-identify sustainability courses and courses that include sustainability using the definitions outlined in Standards and Terms or looking at the stated learning outcomes and course objectives associated with each course may provide a richer view of sustainability course offerings than simply reviewing course descriptions, but it is not required.

This credit does not include continuing education and extension courses, which are covered by EN 11: Continuing Education.
Figures required to calculate the percentage of courses with sustainability content:

<table>
<thead>
<tr>
<th></th>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Does the institution designate sustainability courses in its catalog of course offerings?:

No

Does the institution designate sustainability courses on student transcripts?:

---
Learning Outcomes

Criteria

Institution’s students graduate from degree programs that include sustainability as a learning outcome or include multiple sustainability learning outcomes. Sustainability learning outcomes (or the equivalent) may be specified at:

- Institution level (e.g. covering all students)
- Division level (e.g. covering one or more schools or colleges within the institution)
- Program level
- Course level

This credit includes graduate as well as undergraduate programs. For this credit, “degree programs” include majors, minors, concentrations, certificates, and other academic designations. Extension certificates and other certificates that are not part of academic degree programs do not count for this credit; they are covered in EN 11: Continuing Education. Programs that include co-curricular aspects may count as long as there is an academic component of the program. Learning outcomes at the course level count if the course is required to complete the program.

This credit is inclusive of learning outcomes, institutional learning goals, general education outcomes, and graduate profiles that are consistent with the definition of “sustainability learning outcomes” included in Standards and Terms.

Institutions that do not specify learning outcomes as a matter of policy or standard practice may report graduates from sustainability-focused programs (i.e. majors, minors, concentrations and the equivalent as reported for AC 3: Undergraduate Program and AC 4: Graduate Program) in lieu of the above criteria.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Undergraduate Program

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Institution offers at least one:

• Sustainability-focused program (major, degree program, or equivalent) for undergraduate students

And/or

• Undergraduate-level sustainability-focused minor or concentration (e.g. a concentration on sustainable business within a business major).

Extension certificates and other certificates that are not part of academic degree programs do not count for this credit; they are covered in EN 11: Continuing Education.

"---" indicates that no data was submitted for this field

Does the institution offer at least one sustainability-focused major, degree program, or the equivalent for undergraduate students?:

No

The name of the sustainability-focused, undergraduate degree program (1st program):

---

A brief description of the undergraduate degree program (1st program):

---

The website URL for the undergraduate degree program (1st program):

---

The name of the sustainability-focused, undergraduate degree program (2nd program):

---

---

Does the institution offer one or more sustainability-focused minors, concentrations or certificates for undergraduate students?: Yes

The name of the sustainability-focused undergraduate minor, concentration or certificate (1st program):
Sustainable Development

A brief description of the undergraduate minor, concentration or certificate (1st program):
The minor in SDEV consists of a minimum of at least 15 hours of study that includes a combination of core courses and approved electives. Minors are required to complete a total of 8 core credits (SDEV 010, SDEV 201 and SDEV 202) or (SDEV 010 and SDEV 203). The remaining 7 credits may be selected from the Additional Course Electives.

The website URL for the undergraduate minor, concentration or certificate (1st program):
http://catalog.lehigh.edu/coursesprogramsandcurricula/artsandsciences/sustainabledevelopment/#undergraduatetext

The name of the sustainability-focused undergraduate minor, concentration or certificate (2nd program):

A brief description of the undergraduate minor, concentration or certificate (2nd program):
The website URL for the undergraduate minor, concentration or certificate (2nd program):
---

---

A brief description of the undergraduate minor, concentration or certificate (3rd program):
---

The website URL for the undergraduate minor, concentration or certificate (3rd program):
---

The name, brief description and URL of all other undergraduate-level sustainability-focused minors, concentrations and certificates:
---
Graduate Program

Criteria

Institution offers at least one:

- Sustainability-focused program (major, degree program, or equivalent) for graduate students

And/or

- Graduate-level sustainability-focused minor, concentration or certificate (e.g. a concentration on sustainable business within an MBA program).

Extension certificates and other certificates that are not part of academic degree programs do not count for this credit; they are covered in EN 11: Continuing Education.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Immersive Experience

Criteria

Institution offers at least one immersive, sustainability-focused educational study program. The program is one week or more in length and may take place off-campus, overseas, or on-campus.

For this credit, the program must meet one or both of the following criteria:

- It concentrates on sustainability, including its social, economic, and environmental dimensions

  And/or

- It examines an issue or topic using sustainability as a lens.

For-credit programs, non-credit programs and programs offered in partnership with outside entities may count for this credit. Programs offered exclusively by outside entities do not count for this credit.

See the Credit Example in the STARS Technical Manual for further guidance.

"---“ indicates that no data was submitted for this field

Does the institution offer at least one immersive, sustainability-focused educational study program that meets the criteria for this credit?:

Yes

A brief description of the sustainability-focused immersive program(s) offered by the institution:

The Lehigh in Costa Rica Program has operated study abroad courses for over 17 years. The close association developed between Lehigh’s faculty and a variety of Costa Rican NGOs (non-government organizations) has allowed us to expand our program to include two new initiatives: 1) A 7-week summer internship program, and 2) A summer environmentally-oriented “summer serve” project.

The goal of program is to augment classroom education currently available to students in environmental science or environmental studies with practical on-the-ground experience in sustainable development projects. Students will work on projects related to conservation, particularly in the area of building and/or maintaining biological corridors. The sustainability and integrity of Costa Rica’s environment is crucial to the ecotourism strategy of sustainable development for which Costa Rica is well known. These programs are designed to address the following educational goals:

- Allow students who lack the time or financial resources for a semester-long study abroad program to participate in international learning experiences.
-Create international opportunities specifically tailored to students with an academic background or general interest in the environment and/or international development.

-Demonstrate the inherent interdisciplinary character of “sustainable development” studies by emphasizing the connections among environmental conservation, economic development, and social/economic equity.

-Provide students with an appreciation for the environmental aspects of sustainable development in rural Latin America and expose students to issues related to conservation and preservation of biotic and ecosystem diversity.

-Expose students to Latin American culture and reinforce Lehigh’s connection with various NGOs in Costa Rica.

The website URL where information about the immersive program(s) is available:

http://www.lehigh.edu/~incis/lehighincostarica.html
**Sustainability Literacy Assessment**

**Criteria**

Institution conducts an assessment of the sustainability literacy of its students. The sustainability literacy assessment focuses on knowledge of sustainability topics and may also address values, behaviors and/or beliefs. Assessments that focus exclusively on values, behaviors and/or beliefs are not sufficient to earn points for this credit.

Institution may conduct a follow-up assessment of the same cohort group(s) using the same instrument.

This credit includes graduate as well as undergraduate students.

---

**Submission Note:**

A survey was completed in Spring 2014 so Lehigh can include these results next year.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Incentives for Developing Courses

Criteria

Institution has an ongoing program or programs that offer incentives for faculty in multiple disciplines or departments to develop new sustainability courses and/or incorporate sustainability into existing courses or departments. The program specifically aims to increase student learning of sustainability.

Incentives may include release time, funding for professional development, and trainings offered by the institution.

Incentives for expanding sustainability offerings in academic, non-credit, and/or continuing education courses count for this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Criteria

Institution is utilizing its infrastructure and operations for multidisciplinary student learning, applied research and practical work that advances sustainability on campus in at least one of the following areas:

- Air & Climate
- Buildings
- Dining Services/Food
- Energy
- Grounds
- Purchasing
- Transportation
- Waste
- Water
- Coordination, Planning & Governance
- Diversity & Affordability
- Health, Wellbeing & Work
- Investment
- Public Engagement
- Other

This credit includes substantive work by students and/or faculty (e.g. class projects, thesis projects, term papers, published papers) that involves active and experiential learning and contributes to positive sustainability outcomes on campus (see the Credit Example in the STARS Technical Manual). On-campus internships and non-credit work (e.g. that take place under supervision of sustainability staff or committees) may count as long as the work has a learning component.

This credit does not include immersive education programs, co-curricular activities, or community-based work, which are covered by AC 5: Immersive Experience, credits in the Campus Engagement subcategory, and credits in the Public Engagement subcategory, respectively.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Research

This subcategory seeks to recognize institutions that are conducting research on sustainability topics. Conducting research is a major function of many colleges and universities. By researching sustainability issues and refining theories and concepts, higher education institutions can continue to help the world understand sustainability challenges and develop new technologies, strategies, and approaches to address those challenges.

<table>
<thead>
<tr>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Academic Research</td>
</tr>
<tr>
<td>Support for Research</td>
</tr>
<tr>
<td>Access to Research</td>
</tr>
</tbody>
</table>
**Academic Research**

**Criteria**

*Part 1*

Institution’s faculty and/or staff conduct sustainability research and the institution makes an inventory of its sustainability research publicly available.

*Part 2*

Institution’s academic departments (or the equivalent) include faculty and staff who conduct sustainability research.

Any level of sustainability research is sufficient to be included for this credit. In other words, a researcher who conducts both sustainability research and other research may be included.

In order to report for this credit, the institution should conduct an inventory to identify its sustainability research activities and initiatives.

Each institution is free to choose a methodology to identify sustainability research that is most appropriate given its unique circumstances. For example, an institution may distribute a survey to all faculty members and ask them to self-identify as being engaged in sustainability research or ask the chairperson of each department to identify the sustainability research activities within his or her department. The research inventory should be based on the definition of “sustainability research” outlined in Standards and Terms and include, at minimum, all research centers, laboratories, departments, and faculty members whose research focuses on or is related to sustainability.

---

**Submission Note:**

Institution does not collect this data. However, there are a number of faculty that do conduct sustainability research. This data will be submitted in future reports.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Support for Research

Criteria

Institution encourages and/or supports sustainability research through one or more of the following:

- An ongoing program to encourage students in multiple disciplines or academic programs to conduct research in sustainability. The program provides students with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and mentorships. The program specifically aims to increase student sustainability research.

- An ongoing program to encourage faculty from multiple disciplines or academic programs to conduct research in sustainability topics. The program provides faculty with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and faculty development workshops. The program specifically aims to increase faculty sustainability research.

- Formally adopted policies and procedures that give positive recognition to interdisciplinary, transdisciplinary, and multidisciplinary research during faculty promotion and/or tenure decisions.

- Ongoing library support for sustainability research and learning in the form of research guides, materials selection policies and practices, curriculum development efforts, sustainability literacy promotion, and e-learning objects focused on sustainability.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Access to Research

Criteria

Institution has a formally adopted open access policy that ensures that versions of all future scholarly articles by faculty and staff and all future theses and dissertations are deposited in a designated open access repository.

The open access repository may be managed by the institution or the institution may participate in a consortium with a consortial and/or outsourced open access repository.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Engagement

Campus Engagement

This subcategory seeks to recognize institutions that provide their students with sustainability learning experiences outside the formal curriculum. Engaging in sustainability issues through co-curricular activities allows students to deepen and apply their understandings of sustainability principles. Institution-sponsored co-curricular sustainability offerings, often coordinated by student affairs offices, help integrate sustainability into the campus culture and set a positive tone for the institution.

In addition, this subcategory recognizes institutions that support faculty and staff engagement, training, and development programs in sustainability. Faculty and staff members’ daily decisions impact an institution’s sustainability performance. Equipping faculty and staff with the tools, knowledge, and motivation to adopt behavior changes that promote sustainability is an essential activity of a sustainable campus.

Credit

Student Educators Program
Student Orientation
Student Life
Outreach Materials and Publications
Outreach Campaign
Employee Educators Program
Employee Orientation
Staff Professional Development
Student Educators Program

Responsible Party

Katie Klaniecki
Sustainability Program Coordinator
Office of Sustainability

Criteria

Institution coordinates an ongoing peer-to-peer sustainability outreach and education program for degree-seeking students. The institution:

- Selects or appoints students to serve as educators and formally designates the students as educators (paid and/or volunteer),
- Provides formal training to the educators in how to conduct outreach, and
- Offers faculty or staff and/or other financial support to the program.

This credit focuses on programs for degree-seeking students enrolled in a for-credit program. Continuing education and/or non-credit students are excluded from this credit.

This credit recognizes ongoing student educator programs that engage students on a regular basis. For example, student educators may be responsible for serving (i.e. directly targeting) a particular subset of students, such as those living in residence halls or enrolled in certain academic subdivisions. Thus, a group of students may be served by a program even if not all of these students avail themselves of the outreach and education offerings.

Sustainability outreach campaigns, sustainability events, and student clubs or groups are not eligible for this credit unless the criteria outlined above are met. These programs are covered by EN 5: Outreach Campaign and EN 3: Student Life.

"---" indicates that no data was submitted for this field

Does the institution coordinate one or more ongoing student, peer-to-peer sustainability outreach and education programs that meet the criteria for this credit?:

Yes

Number of degree-seeking students enrolled at the institution:

7,373

Name of the student educators program (1st program):

Eco-Reps

Number of students served (i.e. directly targeted) by the program (1st program):

3,425
A brief description of the program, including examples of peer-to-peer outreach activities (1st program):

The Lehigh Eco-Reps program is a peer-to-peer education program focused on training student leaders to embody and promote sustainable living in residential halls and Greek houses. Eco-Reps foster sustainable behavior among their peers through fun and educational programs such as: energy conservation competition, RecycleMania competition, documentaries, up-cycling crafts, light bulb swaps, and green trivia.

A brief description of how the student educators are selected (1st program):

All Lehigh undergraduate students are welcome to enroll in the 1-credit Sustainability in Action course or attend the 1-hour/week Eco-Reps club. Each student represents their residence hall or Greek house and must commit to a semester of activities. Student coordinators apply for their leadership positions, are interviews and are compensated for their efforts.

A brief description of the formal training that the student educators receive (1st program):

All Eco-Reps receive weekly training in event planning, environmental topics, outreach strategies, and effective communications techniques. There is also an orientation to the program each fall semester. Student coordinators take part in three days of training prior to the start of each academic year. This orientation includes information about Lehigh's sustainability goals, effective leadership strategies, how to organize students, and how to plan effective events.

A brief description of the financial or other support the institution provides to the program (1st program):

The Lehigh Eco-Reps program is funded by Lehigh's Residential Services department. The program is further supported by the Office of Sustainability, Residential Life, and the Environmental Initiative department.

---
Student Orientation

Responsible Party

Allison Ragon
Assistant Dean & Director of First-Year Experience
First-Year Experience

Criteria

Institution includes sustainability prominently in its student orientation activities and programming. Sustainability activities and programming are intended to educate about the principles and practices of sustainability. The topics covered include multiple dimensions of sustainability (i.e. social, environmental and economic).

Because orientation activities vary from one institution to another, prominent inclusion of sustainability may not take the same form on each campus. Prominent inclusion of sustainability may also take different forms for different types of students (e.g. undergraduate students, transfer students, graduate students). When reporting for this credit, each institution will determine what prominent inclusion of sustainability means given its particular context. (See the Credit Example in the STARS Technical Manual.)

As this credit is intended to recognize programming and student learning about sustainability, incorporating sustainability strategies into event planning (e.g. making recycling bins accessible or not serving bottled water) is not, in and of itself, sufficient for this credit. Such strategies may count if they are highlighted and are part of the educational offerings. For example, serving local food would not, in and of itself, be sufficient for this credit; however, serving local food and providing information about sustainable food systems during meals could contribute to earning this credit.

--- indicates that no data was submitted for this field

The percentage of entering students that are provided an opportunity to participate in orientation activities and programming that prominently include sustainability:

10

A brief description of how sustainability is included prominently in new student orientation:

Students have the option of attending a faculty lecture during Orientation that addressed the issue of sustainability in the business field. We also offer a 3-day pre-orientation program focused on sustainability called SustainabLEHIGH.

The website URL where information about sustainability in student orientation is available:

http://studentaffairs.lehigh.edu/content/prelusion
Student Life

Responsibility

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Institution has co-curricular sustainability programs and initiatives. The programs and initiatives fall into one or more of the following categories:

- Active student groups focused on sustainability
- Gardens, farms, community supported agriculture (CSA) or fishery programs, and urban agriculture projects where students are able to gain experience in organic agriculture and sustainable food systems
- Sustainable enterprises that include sustainability as part of their mission statements or stated purposes (e.g. cafés through which students gain sustainable business skills)
- Sustainable investment funds, green revolving funds or sustainable microfinance initiatives through which students can develop socially, environmentally and fiscally responsible investment and financial skills
- Conferences, speaker series, symposia or similar events related to sustainability that have students as the intended audience
- Cultural arts events, installations or performances related to sustainability that have students as the intended audience
- Wilderness or outdoors programs (e.g. that organize hiking, backpacking, kayaking, or other outings for students and follow Leave No Trace principles)
- Sustainability-related themes chosen for themed semesters, years, or first-year experiences (e.g. choosing a sustainability-related book for common reading)
- Programs through which students can learn sustainable life skills (e.g. a series of sustainable living workshops, a model room in a residence hall that is open to students during regular visitation hours and demonstrates sustainable living principles, or sustainability-themed housing where residents and visitors learn about sustainability together)
- Sustainability-focused student employment opportunities offered by the institution
- Graduation pledges through which students pledge to consider social and environmental responsibility in future job and other decisions
- Other co-curricular sustainability programs and initiatives

Multiple programs and initiatives may be reported for each category and each category may include institution-governed and/or student-governed programs.

The name and a brief description of each student group focused on sustainability:

Residential and Greek Eco-Reps: a peer-to-peer education program focused on training student leaders to embody and promote sustainable living in residential halls and other facilities. Green action and Engineers without Borders are also student groups whose interests are sustainability-focused or related. Their descriptions are below:

Green Action: focused on reducing pollution of harmful chemicals, reducing global climate change, and reducing the depletion of vital natural resources, as well as promoting renewable energies, recycling, and discouraging environmentally irresponsible behaviors. Members of Green Action attend national and state-wide conferences to learn more about the environment, lobby US Senators, and protest America's less environmentally friendly activities. Green Action has performed waste audits, promoted plastic bag recycling and reusable take-out containers, among other actions.

Engineers without Borders: Started in 2002, Engineers Without Borders (EWB) is an international non-profit humanitarian organization that works to provide basic needs to communities in need. EWB is a multidisciplinary group of students, from all majors and programs, dedicated to learning about and tackling issues of global poverty, international development, and sustainability. Their mission is to both educate a new generation of students about global inequalities through workshops and presentations and to enable students to use this knowledge to design workable solutions to real life problems. The organization is composed of both university and professional chapters that focus on specific projects addressing issues such as providing clean water, education, sanitation, and renewable energy. EWB focuses on low cost, high impact projects.

To promote sustainability the organization partners with host communities on projects so that the communities can manage the systems autonomously in the future. The project gives students a range of experience from international relations to technical engineering skills. Today there are over 300 chapters and 12,000 members in the United States alone.

The projects EWB takes on are initiated by, and completed with, contributions from the host community working with the EWB project team. The organization has previously designed, funded, and implemented a small-scale water treatment project in Pueblo Nuevo, a village of approximately 1,500 people in northwestern Honduras.

The website URL where information about student groups is available:

https://sustainability.lehigh.edu/ecoreps

A brief description of gardens, farms, community supported agriculture (CSA) or fishery programs, and urban agriculture projects where students are able to gain experience in organic agriculture and sustainable food systems:

Lehigh University has several urban agriculture projects where students are able to gain experience in organic agriculture and/or sustainable food systems. At present the University's South Side Initiative manages several community gardens on the South Side of Bethlehem, PA. One of these gardens (approx. 1 acre) is on the Lehigh University campus, and it provides plots of land in which students can grow organic food. This garden also reserves land for larger student projects, such as composting and 4-square intensive gardening that provides for local food kitchens. (See:

). The other gardens are located on city land and provide a space for students to work with members of the local community to grow fresh, healthy food. Currently the South Side Initiative's Community Gardens and Urban Agriculture Working Group and the CLIP Permaculture Initiative run programming out of these gardens for children from low-income families who rely on the Bethlehem Boys & Boys Club, as well as children from Broughal Middle School, and Big Brother, Big Sister. In these programs, university students grow, harvest, cook, and eat fresh and organically grown produce with program participants. (See:
http://ssi.cas2.lehigh.edu/community-gardens-and-urban-agriculture

and

Lehigh University also offers an Urban Agriculture course during the summer in which a professional organic farmer from the Rodale Institute uses the community garden to teach students about organic growing methods, pest management, weed management, and soil management.

---

A brief description of sustainability-related themes chosen for themed semesters, years, or first-year experiences:

As part of the first-year experience, students have the option of attending a faculty lecture during Orientation that addressed the issue of sustainability in the business field. We also offer a 3-day pre-orientation program focused on sustainability called SustainabLEHIGH.

The website URL where information about the theme is available:
http://sustainability.cc.lehigh.edu/sustainabLEHIGH

A brief description of program(s) through which students can learn sustainable life skills:

The Green House is an environmentally themed community serving as a hub for people who value environmental awareness in their living space. Through several collaboration efforts with other offices on Lehigh’s campus, The Green House hopes to bring a feeling of respect and maintenance for our natural resources.

The community’s primary goals are to learn strategies and technologies that can minimize our impact on the environment and to implement those findings; to sponsor and hold programs based on environmentalism and sustainability; to purchase bicycles for the community in order to encourage less driving.

The website URL where information about the sustainable life skills program(s) is available:
http://www4.lehigh.edu/housing/residencehalls/aztypes/green.aspx

A brief description of sustainability-focused student employment opportunities:

The Office of Sustainability provides student employment opportunities year around. These employment opportunities are in support of achieving Lehigh's Campus Sustainability Plan goals, creating a culture of sustainability and providing students with skills that they can transfer to their professional careers.
The website URL where information about the student employment opportunities is available:

http://sustainability.cc.lehigh.edu/get-involved

A brief description of graduation pledges through which students pledge to consider social and environmental responsibility in future job and other decisions:

Outreach Materials and Publications

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Institution produces outreach materials and/or publications that foster sustainability learning and knowledge. The publications and outreach materials may include the following:

- A central sustainability website that consolidates information about the institution’s sustainability efforts
- A sustainability newsletter
- Social media platforms (e.g. Facebook, Twitter, interactive blogs) that focus specifically on campus sustainability
- A vehicle to publish and disseminate student research on sustainability
- Building signage that highlights green building features
- Food service area signage and/or brochures that include information about sustainable food systems
- Signage on the grounds about sustainable groundskeeping and/or landscaping strategies employed
- A sustainability walking map or tour
- A guide for commuters about how to use alternative methods of transportation
- Navigation and educational tools for bicyclists and pedestrians (e.g. covering routes, inter-modal connections, policies, services, and safety)
- A guide for green living and incorporating sustainability into the residential experience
- Regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat
- Other

A single outreach material or publication that serves multiple purposes may be counted more than once. For example, a sustainability website that includes tools for bicyclists and pedestrians may be counted in both categories.

"---" indicates that no data was submitted for this field

Outreach Campaign

Responsible Party

Katie Klaniecki
Sustainability Program Coordinator
Office of Sustainability

Criteria

Part 1

Institution holds at least one sustainability-related outreach campaign directed at students that yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

Part 2

Institution holds at least one sustainability-related outreach campaign directed at employees that yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution or an employee organization.

The campaign(s) reported for this credit could take the form of a competition (e.g. a residence hall conservation competition), a rating or certification program (e.g. a green labs or green office program), and/or a collective challenge (e.g. a campus-wide drive to achieve a specific sustainability target). A single campus-wide campaign may meet the criteria for both parts of this credit if educating students is a prime feature of the campaign and it is directed at both students and employees.

To measure if a campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign. The following impacts are not sufficient for this credit:

- Increased awareness
- Additional members of a mailing list or group

"---" indicates that no data was submitted for this field

Has the institution held at least one sustainability-related outreach campaign directed at students within the previous three years that has yielded measurable, positive results in advancing sustainability?:
Yes

Has the institution held at least one sustainability-related outreach campaign directed at employees within the previous three years that has yielded measurable, positive results in advancing sustainability?:
Yes

The name of the campaign (1st campaign):
RecycleMania
A brief description of the campaign (1st campaign):

RecycleMania is a friendly competition and benchmarking tool for college and university recycling programs to promote waste reduction activities to their campus communities. Lehigh participated in RecycleMania for the first time in 2013. The competition is promoted through email, newsletters, tabling, events and activities.

A brief description of the measured positive impact(s) of the campaign (1st campaign):

2013 Results:
Per Capita Classic: 60th place, 19.873lbs/person
Gorilla: 120th place, 163,100lbs

The website URL where information about the campaign is available (1st campaign):

https://sustainability.lehigh.edu/recyclemania

The name of the campaign (2nd campaign):

Lights Off, Game On Energy Conservation Competition

A brief description of the campaign (2nd campaign):

An annual Lehigh University v. Lafayette College Energy Conservation Competition. It is held for one month in October and November, with the goal to see which residence hall can conserve the most energy (compared to a 5-year average). The Eco-Reps organize and promote this competition through engaging events and programs, creative marketing, and hall v. hall competitions. Types of events:
- One Hour, No Power event
- Educational tabling
- Greek chapter meetings in the dark
- Light bulb swap
- Prompts
- Posters and fliers

A brief description of the measured positive impact(s) of the campaign (2nd campaign):

During the 2013 competition, there was an 8.94% per capita energy consumption savings in participating Lehigh buildings. This was an increase over the 2012 competition's savings of 6.6%.

The website URL where information about the campaign is available (2nd campaign):

http://sustainability.cc.lehigh.edu/node/90

A brief description of other outreach campaigns, including measured positive impacts:

---
**Employee Educators Program**

**Criteria**

Institution administers or oversees an ongoing faculty/staff peer-to-peer sustainability outreach and education program.

In the program, employee sustainability educators are formally designated and receive formal training or participate in an institution-sponsored orientation. The institution offers financial or other support to the program.

This credit recognizes ongoing programs that engage employees on a regular basis. For example, employee educators may represent or be responsible for engaging workers in certain departments or buildings. Thus, a group of employees may be served (i.e. directly targeted) by a program even if not all of these employees avail themselves of the outreach and education offerings.

Training and/or professional development opportunities in sustainability for staff are excluded from this credit. These activities are covered in *EN 8: Staff Professional Development*.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Employee Orientation

Criteria

Institution covers sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff. The topics covered include multiple dimensions of sustainability (i.e. social, environmental and economic).

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Staff Professional Development

Criteria

Institution makes available training and/or other professional development opportunities in sustainability to all staff at least once per year.

Separate training opportunities for each department would count for this credit, as long as each staff member has an opportunity to learn about sustainability at least once per year. It is not necessary that each staff member attend such trainings; the credit is based on making training available to all staff.

This credit applies to staff members only; it does not include faculty members.

The following training opportunities are not sufficient for this credit:

- Specialized training for a small group of staff
- The opportunity to participate in an institutional sustainability committee or group

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Public Engagement

This subcategory seeks to recognize institutions that help catalyze sustainable communities through public engagement, community partnerships and service. Engagement in community problem-solving is fundamental to sustainability. By engaging with community members and organizations in the governmental, non-profit and for-profit sectors, institutions can help solve sustainability challenges. Community engagement can help students develop leadership skills while deepening their understandings of practical, real-world problems and the process of creating solutions. Institutions can contribute to their communities by harnessing their financial and academic resources to address community needs and by engaging community members in institutional decisions that affect them. In addition, institutions can contribute toward sustainability broadly through inter-campus collaboration, engagement with external networks and organizations, and public policy advocacy.

Community Partnerships

**Responsible Party**

**Dale Kochard**  
Asst Vice President  
Community & Regional Affairs

**Criteria**

Institution has one or more formal partnership(s) with the local community, including school districts, government agencies, non-profit organizations, businesses and/or other entities, to work together to advance sustainability within the community.

Each partnership conforms to one of the following types:

<table>
<thead>
<tr>
<th>Type of Partnership</th>
<th>Indicators</th>
</tr>
</thead>
</table>
| **A. Supportive**   | • *Scope:* Addresses a sustainability topic or a specific aspect of sustainability (e.g. community garden, environmental remediation, community environmental health and education)  
                      • *Duration:* May be time-limited (short-term projects and events), multi-year, or ongoing  
                      • *Commitment:* Institutional involvement may include financial and/or staff support or may be limited to resource sharing and/or endorsement  
                      • *Governance:* Campus and community leaders or representatives are engaged in program/project development |

| **B. Collaborative** | • *Scope:* Addresses one or more sustainability challenge and may simultaneously support social equity and wellbeing, economic prosperity, and ecological health (e.g. a green jobs program in an economically disadvantaged neighborhood)  
                      • *Duration:* May be time-limited, multi-year, or ongoing  
                      • *Commitment:* Institution provides faculty/staff, financial, and/or material support  
                      • *Governance:* Campus and local community members are both engaged in program/project development, from agenda setting and planning to decision-making, implementation and review |
| C.Transformative | - **Scope**: Catalyzes community resiliency and local/regional sustainability by simultaneously supporting social equity and wellbeing, economic prosperity, and ecological health on a community or regional scale (e.g. “transition” projects and partnerships focused on community adaptation to climate change)
- **Duration**: Is multi-year or ongoing and proposes or plans for institutionalized and systemic change
- **Commitment**: Institution provides faculty/staff and financial or material support
- **Governance**: Partnership has adopted a stakeholder engagement framework through which community members, vulnerable populations, faculty, staff, students and other stakeholders are engaged in program/project development, from agenda setting and planning to decision-making, implementation and review |
An institution may have multiple partnerships of each type, however no single partnership may be both supportive and collaborative, collaborative and transformative, or supportive and transformative.

Recognizing the diversity of forms that community partnerships may take, it is not required that a partnership meet all of the criteria listed to be considered supportive or collaborative. A partnership must meet all of the criteria listed to be considered transformative, however. For further guidance in identifying community partnerships that meet the criteria for each type, see the Credit Example in the STARS Technical Manual.

This credit recognizes campus-community partnerships that advance sustainability in an explicit and participatory way. Participatory, community-based research and engaged scholarship around issues of sustainability may be included if it involves formal partnership(s). Although community service activities (e.g. academic service learning, co-curricular service learning and volunteer activities, Work-Study community service and paid community service internships) may involve local partnerships and contribute toward sustainability, they are not included in this credit. Community service is covered by EN 12: Community Service.

Does the institution have at least one formal sustainability partnership with the local community that meets the criteria as “supportive”?

Yes

A brief description of the institution’s supportive sustainability partnership(s) with the local community:

Community garden programs including installation of multiple gardens, engagement of local community in the gardens, education of local youth about organic gardening and Permaculture concepts, and donation of produce to local food banks. Faculty, staff and students are involved with the programs. Campus, civic and community leaders are involved in the program.

Does the institution have at least one formal sustainability partnership with the local community that meets the criteria as “collaborative”?

Yes

A brief description of the institution's collaborative sustainability partnership(s):

Lehigh is partnering with the Bethlehem Area School District in an Elementary and a Middle School as a lead partner in a Community School initiative. Lehigh employs 1-2 individuals at each school to manage after-school enrichment programs in collaboration with the academic programs. Parental programs (ESL, financial basics, computer classes, etc.) are also sponsored. Both schools are located in a low income area where 90% of students are on a free or reduced-cost lunch program. Lehigh students volunteer thousands of hours
annually for such activities as: tutoring, mentoring, homework clubs, enrichment programs, physical activities with the students at these schools. Activities are overseen by our Center for the Development of Urban Educational Leaders in our College of Ed.

**Does the institution have at least one formal sustainability partnership with the local community that meets the criteria as “transformative”?**

No

A brief description of the institution's transformative sustainability partnership(s) with the local community:

---

A brief description of the institution’s sustainability partnerships with distant (i.e. non-local) communities:

---

The website URL where information about sustainability partnerships is available:

---
Inter-Campus Collaboration

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Institution collaborates with other colleges and universities to support and help build the campus sustainability community.

See the Credit Example in the STARS Technical Manual for guidance on identifying appropriate collaborations.

"---" indicates that no data was submitted for this field

Does the institution collaborate with other colleges and universities to support and help build the campus sustainability community?:

Yes

A brief summary of papers, guides, presentations, and other resources the institution has developed to share their sustainability experience with other institutions:

Lehigh Valley Association of Independent Colleges (LVAIC) sustainability conference

The names of local, state/provincial, regional, national, or international campus sustainability organizations or consortia in which the institution participates and/or is a member:

Lehigh Valley Association of Independent Colleges (LVAIC)

A brief summary of additional ways the institution collaborates with other campuses to advance sustainability:

Lehigh is part of the Pennsylvania Environmental Resource Consortium (PERC). Attends regional sustainability conferences (i.e. EcoRep symposium).

The website URL where information about cross-campus collaboration is available:

Continuing Education

Criteria

Part 1

Institution offers continuing education courses that address sustainability.

Courses that address sustainability include continuing education sustainability courses and continuing education courses that include sustainability. Courses that can be taken for academic credit are not included in this credit. They are covered by the Curriculum subcategory.

Part 2

Institution has at least one sustainability-themed certificate program through its continuing education or extension department.

Degree-granting programs (e.g. programs that confer Baccalaureate, Masters, and Associates degrees) and certificates that are part of academic degree programs are not included in this credit. They are covered in the Curriculum subcategory.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Community Service

Criteria

Part 1

Institution engages its student body in community service, as measured by the percentage of students who participate in community service.

Part 2

Institution engages students in community service, as measured by the average hours contributed per full-time student per year.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Community Stakeholder Engagement

Criteria

Institution has adopted a framework for community stakeholder engagement in governance, strategy and operations. The framework includes:

1) Policies and procedures that ensure community stakeholder engagement is applied systematically and regularly across the institution’s activities (e.g. planning and development efforts, capital investment projects, and/or other activities and decisions that affect the broader community)

And

2) Established practices to identify and engage relevant community stakeholders, including any vulnerable or underrepresented groups.

Frameworks adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit does not include the engagement of internal campus stakeholders (e.g. students, faculty and staff); internal stakeholder engagement is covered in PA 3: Governance.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Participation in Public Policy

Criteria

Institution advocates for national, state/provincial, or local public policies that support campus sustainability or that otherwise advance sustainability.

The policy advocacy must be done by the institution, not by students or a student group. This credit acknowledges institutions that advocate for policy changes and legislation to advance sustainability broadly. Advocacy efforts that are made exclusively to advance the institution's interests or projects may not be counted. For example, advocating for government funding for campus sustainability may be counted, whereas lobbying for the institution to receive funds that have already been appropriated may not.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Trademark Licensing

Criteria

Institution is a member of the Fair Labor Association (FLA) and/or the Worker Rights Consortium (WRC).

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Criteria

Institution’s affiliated hospital or health system is a member of the Global Green and Healthy Hospitals Network, the Healthier Hospitals Initiative and/or Practice Greenhealth.

This credit includes hospitals and health systems that are formally affiliated with a higher education institution (sometimes called “university hospitals”). Other types of health care providers (e.g. insurers through which an institution obtains health care for its employees) are not included.

This credit was marked as **Not Applicable** for the following reason:

*The institution does not have an affiliated hospital or health system.*
Operations

Air & Climate

This subcategory seeks to recognize institutions that are measuring and reducing their greenhouse gas and air pollutant emissions. Global climate change is having myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are particularly pronounced for low-income communities and countries. In addition, institutions that inventory and take steps to reduce their air pollutant emissions can positively impact the health of the campus community, as well as the health of their local communities and regions.

Greenhouse Gas Emissions

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Part 1

Institution has conducted a publicly available greenhouse gas (GHG) emissions inventory that includes, at minimum, Scope 1 and Scope 2 GHG emissions and may also include Scope 3 GHG emissions. The inventory may be validated internally by campus personnel who are independent of the GHG accounting and reporting process and/or verified by an independent, external third party.

Part 2

Institution reduced its adjusted net Scope 1 and Scope 2 GHG emissions per weighted campus user compared to a baseline.

Part 3

Institution’s annual adjusted net Scope 1 and Scope 2 GHG emissions are less than the minimum performance threshold of 0.02 metric tons of carbon dioxide equivalent (MtCO2e) per gross square foot (0.002 MtCO2e per gross square metre) of floor area.

Performance for Part 3 of this credit is assessed using EUI-adjusted floor area, a figure that accounts for significant differences in energy use intensity (EUI) between types of building space.

For this credit, the following carbon offsets may be counted:

1. Institution-catalyzed carbon offsets (popularly known as “local offsets”)
2. Carbon sequestration due to land that the institution manages specifically for sequestration (as documented in policies, land management plans or the equivalent)
3. Carbon storage from on-site composting
4. Third-party verified purchased carbon offsets

Purchased Renewable Energy Certificates (RECs) that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party may be counted as zero emissions energy for purposes of Scope 2 GHG accounting.

Purchased carbon offsets and RECs that have not been third-party verified do not count.

Institutions that have sold or transferred emissions reductions, e.g. in the form of verified emissions reductions (VERs), may not count those reductions toward this credit.

"---" indicates that no data was submitted for this field
Does the institution's GHG emissions inventory include all Scope 1 and Scope 2 GHG emissions?:
Yes

Does the institution's GHG emissions inventory include all Scope 3 GHG emissions from any of the following categories?:

Elimination of all fuel oil use for heating, reduction of wattage in lighting, reduction in kwh via VSD on large pumps and fan motors, improved temperature control via upgraded building DDC systems and boiler controls.
Outdoor Air Quality

---

**Responsible Party**

Gary Falasca  
Director  
Facilities Services

---

**Criteria**

**Part 1**

Institution has adopted policies or guidelines to improve outdoor air quality and minimize air pollutant emissions from mobile sources. Policies and/or guidelines may include, but are not limited to, prohibiting vehicle idling, restrictions on the use of powered lawn care equipment, and other strategies for minimizing mobile emissions.

Policies adopted by entities of which the institution is part (e.g. government or university system) may count for Part 1 of this credit as long as the policies apply to and are followed by the institution.

**Part 2**

Institution has completed an inventory of significant air emissions from stationary sources on campus. Significant emissions include nitrogen oxides (NO\textsubscript{x}), sulfur oxides (SO\textsubscript{x}), and other standard categories of air emissions identified in environmental permits held by the institution, international conventions, and/or national laws or regulations.

"---" indicates that no data was submitted for this field

**Does the institution have policies and/or guidelines in place to improve outdoor air quality and minimize air pollutant emissions from mobile sources?:**

No

Buildings

This subcategory seeks to recognize institutions that are taking steps to improve the sustainability performance of their buildings. Buildings are generally the largest user of energy and the largest source of greenhouse gas emissions on campuses. Buildings also use significant amounts of potable water. Institutions can design, build, and maintain buildings in ways that provide a safe and healthy indoor environment for inhabitants while simultaneously mitigating the building’s impact on the outdoor environment.

<table>
<thead>
<tr>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building Operations and Maintenance</td>
</tr>
<tr>
<td>Building Design and Construction</td>
</tr>
<tr>
<td>Indoor Air Quality</td>
</tr>
</tbody>
</table>
**Building Operations and Maintenance**

**Criteria**

Institution owns and operates buildings that are:

1) Certified under a green building rating system for existing buildings, e.g. LEED® for Existing Buildings: Operations & Maintenance (O&M)

And/or

2) Operated and maintained in accordance with formally adopted sustainable operations and maintenance guidelines and policies that cover all of the following:

- Impacts on the surrounding site
- Energy consumption
- Building-level energy metering
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption
- Building-level water metering

Building space that meets multiple criteria listed above should not be double-counted.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Building Design and Construction

Responsible Party

Mary Jo Brown
Facilities Space Data Manager
Campus Planning

Criteria

Institution-owned buildings that were constructed or underwent major renovations in the previous five years are:

1) Certified under a green building rating system for new construction and major renovations (e.g. the LEED® for New Construction and Major Renovations, LEED for Commercial Interiors, LEED for Healthcare, and/or LEED for Core and Shell Green Building Rating Systems)

2) Certified Living under the Living Building Challenge (LBC)

And/or

3) Designed and built in accordance with formally adopted green building guidelines and policies that cover all of the following topics:

- Impacts on the surrounding site
- Energy consumption
- Building-level energy metering
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption
- Building-level water metering

Building space that meets multiple criteria listed above should not be double-counted.

Indoor Air Quality

Criteria

Institution has an indoor air quality (IAQ) management program that includes regular auditing or monitoring, a mechanism for occupants to register complaints, and action plans to implement any corrective measures required in response to audits, monitoring or complaints.

Policies and plans adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Dining Services

This subcategory seeks to recognize institutions that are supporting a sustainable food system. Modern industrial food production often has deleterious environmental and social impacts. Pesticides and fertilizers used in agriculture can contaminate ground and surface water and soil, which can in turn have potentially dangerous impacts on wildlife and human health. The production of animal-derived foods often subjects animals to inhumane treatment and animal products have a higher per-calorie environmental intensity than plant-based foods. Additionally, farm workers are often directly exposed to dangerous pesticides, subjected to harsh working conditions, and paid substandard wages. Furthermore, food is often transported long distance to institutions, producing greenhouse gas emissions and other pollution, as well as undermining the resiliency of local communities.

Institutions can use their purchasing power to require transparency from their distributors and find out where the food comes from, how it was produced, and how far it traveled. Institutions can use their food purchases to support their local economies; encourage safe, environmentally-friendly and humane farming methods; and help eliminate unsafe working conditions and alleviate poverty for farmers. These actions help reduce environmental impacts, preserve regional farmland, improve local food security, and support fair and resilient food systems.

Please note that while dining services can also play an important role in conserving energy and water, reducing waste, and purchasing environmentally preferable materials other than food, STARS measures these impacts across the institution instead of by department; therefore, the benefits of these actions are captured in the Energy, Water, Waste, and Purchasing subcategories, respectively.

<table>

Food and Beverage Purchasing

Criteria

Part 1

Institution’s dining services purchase food and beverages that meet at least one of the following criteria:

- Local and community-based

And/or

- Third party verified to be ecologically sound, fair and/or humane

Food and beverage purchases that meet both criteria listed above (e.g. local community-based products that are Certified Organic) should not be double-counted.

Local community-based products:

- Are sourced from local community-based producers (directly or through distributors)
- Contain raw ingredients (excluding water) that are third party verified and/or locally harvested and produced (e.g. bread made with Organic flour or local honey) and
- Exclude products from Concentrated Animal Feeding Operations (CAFOs), products that have minimal nutritional value (e.g. soda, chewing gum, candies made predominantly from sweeteners), and products from producers that have been convicted of one or more labor law violations within the previous three years

Products that are not local and community-based must be third party verified to count. Recognized third party standards and certifications for food and beverages are outlined in the STARS Technical Manual. Institutions located outside the U.S. and Canada may use additional third party certifications to identify ecologically sound, fair and humane products, provided the certifications are reported in “Notes about this submission”.

Part 1 of this credit includes food and beverage purchases for on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor (e.g. Aramark, Bon Appétit Management Company, Chartwells, Sodexo). On-site franchises, convenience stores, vending services, and concessions are excluded from Part 1.

Part 2

Institution’s on-site franchises, convenience stores, vending services, and/or concessions purchase food and beverages that are third party verified and/or locally sourced (i.e. meet the criteria outlined in Part 1).

Submission Note:
Based on the tools available to us and track our success, we estimate the above are accurate

"---" indicates that no data was submitted for this field

Percentage of dining services food and beverage expenditures that are local and community-based and/or third party verified:
8.90

---
Low Impact Dining

Responsible Party
Bruce Christine
GM
Dining Services

Criteria

Part 1
Conventionally produced animal products comprise less than 30 percent of the institution’s total dining services food purchases.

Conventionally produced animal products include all food products that contain animal derived (i.e. meat, fish, egg, dairy) ingredients that have not been verified to be sustainably produced. Sustainably produced animal products have been either:

- Third party verified to be ecologically sound and/or humane (see OP 6: Food and Beverage Purchasing)
- Or
- Verified by the institution to be both ecologically sound and humane (e.g. “Pasture Raised”, “Grass Fed” or “Humanely Raised”) through a relationship with a local producer

Part 2
Institution:
- Offers diverse, complete-protein vegan options at all meals in at least one dining facility on campus
  - And
- Provides labels and/or signage that distinguishes between vegan, vegetarian (not vegan), and other items

This credit includes on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor. On-site franchises, convenience stores, vending machines, and concessions should be excluded to the extent feasible.

Submission Note:
data based on 2012-2013 academic year
current tools do not identify as detailed as needed for report

"---" indicates that no data was submitted for this field

Percentage of total dining services food purchases comprised of conventionally produced animal products:
25
A brief description of the methodology used to track/inventory expenditures on animal products:

Due to lack of tracking tools, we are estimating an average of weekly purchases. Will work with Sodexo purchasing division for tool tracking.

Does the institution offer diverse, complete-protein vegan dining options at all meals in at least one dining facility on campus?:

No

Does the institution provides labels and/or signage that distinguishes between vegan, vegetarian (not vegan), and other items?:

Yes

Are the vegan options accessible to all members of the campus community?:

Yes

A brief description of the vegan dining program, including availability, sample menus, signage and any promotional activities (e.g. “Meatless Mondays”):

Meatless Monday's at all Student Restaurants
Sodexo Simple Servings Program
Not a complete vegan dining program- above listed are a part of the offerings based on customer request

A brief description of other efforts the institution has made to reduce the impact of its animal-derived food purchases:

Surveys, communication with students between dietitian and management

Annual dining services expenditures on food:

3,113,278 US/Canadian $

Annual dining services expenditures on conventionally produced animal products:

---

Annual dining services expenditures on sustainably produced animal products:

66,736 US/Canadian $
Energy

This subcategory seeks to recognize institutions that are reducing their energy consumption through conservation and efficiency, and switching to cleaner and renewable sources of energy such as solar, wind, geothermal, and low-impact hydropower. For most institutions, energy consumption is the largest source of greenhouse gas emissions, which cause global climate change. Global climate change is having myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, ocean acidification, and spread of diseases. The impacts are particularly pronounced for vulnerable and poor communities and countries. In addition to causing global climate change, energy generation from fossil fuels, especially coal, produces air pollutants such as sulfur dioxide, nitrogen oxides, mercury, dioxins, arsenic, cadmium and lead. These pollutants contribute to acid rain as well as health problems such as heart and respiratory diseases and cancer. Coal mining and oil and gas drilling can also damage environmentally and/or culturally significant ecosystems. Nuclear power creates highly toxic and long-lasting radioactive waste. Large-scale hydropower projects flood habitats and disrupt fish migration and can involve the relocation of entire communities.

Implementing conservation measures and switching to renewable sources of energy can help institutions save money and protect them from utility rate volatility. Renewable energy may be generated locally and allow campuses to support local economic development. Furthermore, institutions can help shape markets by creating demand for cleaner, renewable sources of energy.

<table>

Building Energy Consumption

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Part 1

Institution has reduced its total building energy consumption per gross square foot/metre of floor area compared to a baseline.

Part 2

Institution’s annual building energy consumption is less than the minimum performance threshold of 28 Btu per gross square foot (2.6 Btu per gross square metre) of floor area per degree day.

Performance for Part 2 of this credit is assessed using EUI-adjusted floor area, a figure that accounts for significant differences in energy use intensity (EUI) between types of building space.

The website URL where information about the institution’s energy conservation and efficiency initiatives is available:
---
Clean and Renewable Energy

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Institution supports the development and use of clean and renewable energy sources, using any one or combination of the following options.

Option 1: Generating electricity from clean and renewable energy sources on campus and retaining or retiring the rights to the environmental attributes of such electricity. (In other words, if the institution has sold Renewable Energy Credits for the clean and renewable energy it generated, it may not claim such energy here.) The on-site renewable energy generating devices may be owned and/or maintained by another party as long as the institution has contractual rights to the associated environmental attributes.

Option 2: Using renewable sources for non-electric, on-site energy generation, such as biomass for heating.

Option 3: Catalyzing the development of off-site clean and renewable energy sources (e.g. an off-campus wind farm that was designed and built to supply electricity to the institution) and retaining the environmental attributes of that energy.

Option 4: Purchasing the environmental attributes of electricity in the form of Renewable Energy Certificates (RECs) or other similar renewable energy products that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party, or purchasing renewable electricity through the institution’s electric utility through a certified green power purchasing option.

Since this credit is intended to recognize institutions that are actively supporting the development and use of clean and renewable energy, neither the electric grid mix for the region in which the institution is located nor the grid mix reported by the electric utility that serves the institution count for this credit.

The following renewable systems are eligible for this credit:

- Concentrated solar thermal
- Geothermal systems that generate electricity
- Low-impact hydroelectric power
- Solar photovoltaic
- Wave and tidal power
**Wind**

Biofuels from the following sources are eligible:

- Agricultural crops
- Agricultural waste
- Animal waste
- Landfill gas
- Untreated wood waste
- Other organic waste

Technologies that reduce the amount of energy used but do not generate renewable energy do not count for this credit. For example, daylighting, passive solar design, and ground-source heat pumps are not counted in this credit. The benefits of such strategies, as well as improved efficiencies achieved through using cogeneration technologies, are captured by *OP 1: Greenhouse Gas Emissions* and *OP 8: Building Energy Consumption*.

Transportation fuels, which are covered by *OP 1: Greenhouse Gas Emissions* and *OP 18: Campus Fleet*, are not included in this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Grounds

This subcategory seeks to recognize institutions that plan and maintain their grounds with sustainability in mind. Beautiful and welcoming campus grounds can be planned, planted, and maintained in any region while minimizing the use of toxic chemicals, protecting wildlife habitat, and conserving water and resources.

Credit

- Landscape Management
- Biodiversity
Landscape Management

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Institution’s grounds include areas that are managed at one or more of the following levels:

1) Managed in accordance with an Integrated Pest Management (IPM) Plan

2) Managed in accordance with a sustainable landscape management program

And/or

3) Organic, certified and/or protected

The level at which an area of grounds is managed may be determined as outlined in the table below:

<table>
<thead>
<tr>
<th>Management Level</th>
<th>Standards and/or Certifications Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) IPM Plan</td>
<td>IPM plan calls for:</td>
</tr>
<tr>
<td></td>
<td>• Using least-toxic chemical pesticides,</td>
</tr>
<tr>
<td></td>
<td>• Minimum use of chemicals, and</td>
</tr>
<tr>
<td></td>
<td>• Use of chemicals only in targeted locations and only for targeted species</td>
</tr>
</tbody>
</table>
2) Sustainable Landscape Management Program

The program includes formally adopted guidelines, policies and/or practices that cover all of the following:

- Integrated pest management (see above)
- Plant stewardship - protecting and using existing vegetation (e.g. through the use of a tree care plan), using native and ecologically appropriate plants, and controlling and managing invasive species
- Soil stewardship - organic soils management practices that restore and/or maintain a natural nutrient cycle and limit the use of inorganic fertilizers and chemicals
- Use of environmentally preferable materials - utilizing reused, recycled and local and sustainably produced landscape materials
- Hydrology and water use - restoring and/or maintaining the integrity of the natural hydrology by promoting water infiltration, minimizing or eliminating the use of potable water for irrigation, and protecting/restoring riparian, wetland, and shoreline habitats and lost streams
- Materials management and waste minimization - composting and/or mulching waste from groundskeeping, including grass trimmings
- Snow and ice management (if applicable) - implementing technologies or strategies to reduce the environmental impacts of snow and ice removal

3) Organic, Certified and/or Protected

Protected areas and land that is:

- Maintained in accordance with an organic land care standard or sustainable landscape management program that has eliminated the use of inorganic fertilizers and chemical pesticides, fungicides and herbicides in favor of ecologically preferable materials
- Certified Organic
- Certified under the Forest Stewardship Council (FSC) Forest Management standard
- Certified under the Sustainable Sites Initiative™ (SITES™) and/or
- Managed specifically for carbon sequestration (as documented in policies, land management plans or the equivalent)

Land that meets multiple criteria should not be double-counted. An area of grounds that does not meet the standards specified for a particular management level should be reported at the next appropriate level for which it does meet the standards. For example, a landscape management program that includes an IPM plan and meets some, but not all, of the other standards listed for a sustainable landscape management plan should be reported at level 1 (IPM Plan).

"---" indicates that no data was submitted for this field

A copy of the IPM plan:

---

The IPM plan:

Lehigh requires Brickman Group, our landscape service provider, to maintain Lehigh's grounds in accordance with a Brickman IPM plan. Details can be found on their website.

A brief summary of the institution’s approach to sustainable landscape management:

Lehigh is committed to a campus where the principles of sustainability are clearly evident in the built environment and surrounding landscape and where these principles guide all design, development and maintenance processes in terms of environmental sensitivity and energy efficiency. We utilize smart irrigation systems to reduce water consumption, convert old roads into pedestrian pathways to reduce heat island effect, limit pesticide use on campus and compost yard waste into mulch.

A brief description of how the institution protects and uses existing vegetation, uses native and ecologically appropriate plants, and controls and manages invasive species:
Native and ecologically appropriate plants are used in all the new plantings. Only when necessary, are pesticides used for spot treatments.

**A brief description of the institution’s landscape materials management and waste minimization policies and practices:**

Lehigh has a waste collection site for landscape materials throughout the year. Mulch, which is the finished product, is applied throughout the year.

**A brief description of the institution’s organic soils management practices:**

---

**A brief description of the institution’s use of environmentally preferable materials in landscaping and grounds management:**

Lehigh has eliminated our commercial fertilizers for mulch and instead uses mulch produced from an on-campus mulch pile.

**A brief description of how the institution restores and/or maintains the integrity of the natural hydrology of the campus:**

n/a

**A brief description of how the institution reduces the environmental impacts of snow and ice removal (if applicable):**

---

**A brief description of any certified and/or protected areas:**

---

**Is the institution recognized by the Arbor Day Foundation’s Tree Campus USA program (if applicable)?**

No

**The website URL where information about the institution’s sustainable landscape management programs and practices is available:**

Biodiversity

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

The institution conducts one or both of the following:

- An assessment to identify endangered and vulnerable species (including migratory species) with habitats on institution-owned or -managed land
  
  And/or

- An assessment to identify environmentally sensitive areas on institution-owned or -managed land

The institution has plans or programs in place to protect or positively affect the species, habitats and/or environmentally sensitive areas identified.

Assessments conducted and programs adopted by other entities (e.g. government, university system, NGO) may count for this credit as long as the assessments and programs apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

Does the institution own or manage land that includes or is adjacent to legally protected areas, internationally recognized areas, priority sites for biodiversity, and/or regions of conservation importance?:
No

A brief description of any legally protected areas, internationally recognized areas, priority sites for biodiversity, and/or regions of conservation importance on institution owned or managed land:
---

Has the institution conducted an assessment or assessments to identify endangered and vulnerable species with habitats on institution-owned or -managed land?:
No

Has the institution conducted an assessment or assessments to identify environmentally sensitive areas on institution-owned or -managed land?:
No
The methodology(-ies) used to identify endangered and vulnerable species and/or environmentally sensitive areas and any ongoing assessment and monitoring mechanisms:

Electronics Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase computers and/or other electronic products that are EPEAT registered or meet similar multi-criteria sustainability standards for electronic products. This can take the form of purchasing policies, guidelines, or directives.

Policies and directives adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases EPEAT registered products for desktop and notebook/laptop computers, displays, thin clients, televisions and imaging equipment.

This credit does not include servers, mobile devices such as tablets and smartphones, or specialized equipment for which no EPEAT certified products are available.

Submission Note:

The quoted spend above is specifically for computers commodity code in our reporting tool. It does not represent monitors, televisions or any imaging equipment. Our reporting tool will not allow us to get that granular in line item detail in order to quantify those items specifically.

"---" indicates that no data was submitted for this field

Does the institution have an institution-wide stated preference to purchase computers and/or other electronic products that are EPEAT registered or meet similar multi-criteria sustainability standards for electronic products?:

No

A copy of the electronics purchasing policy, directive, or guidelines:

---

The electronics purchasing policy, directive, or guidelines:

We handle this at the RFP level, requesting EPEAT Silver or better. There is no institution wide policy or guideline.
A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

We manage compliance through review of purchase requests and by making bulk PC purchases as a result of RFP processes.

Does the institution wish to pursue Part 2 of this credit (expenditures on EPEAT registered electronics)?: No

Expenditures on EPEAT registered desktop and laptop computers, displays, thin clients, televisions, and imaging equipment:

<tr>
<td>EPEAT Gold</td>
<td>---</td>
</tr>
</tbody>
</table>

Total expenditures on desktop and laptop computers, displays, thin clients, televisions, and imaging equipment: 224,138 US/Canadian $

The website URL where information about the institution's electronics purchasing policy, directive, or guidelines is available: ---
Cleaning Products Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase cleaning and janitorial products that are Green Seal™ or UL Environment (EcoLogo)™ certified and/or meet similar multi-criteria sustainability standards for cleaning and janitorial products. This can take the form of purchasing policies, guidelines, or directives.

Policies and directives adopted by entities of which the institution is part (e.g. government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution’s main cleaning or housekeeping department(s) and/or contractor(s) purchase Green Seal or UL Environment (EcoLogo) certified cleaning and janitorial products.

Cleaning and janitorial products include, at minimum:

- Cleaning/dgreasing agents
- General-purpose, bathroom, glass, and carpet cleaners
- Biologically-active cleaning products (enzymatic and microbial products)
- Floor-care products, e.g. floor finish and floor finish strippers
- Hand cleaners
- Sanitary paper products, e.g. toilet tissue, facial tissue, paper towels, napkins, and placemats
- Plastic film products (e.g. garbage bags/liners)
- Laundry care products including powder, liquid or pre-measured dosage laundry detergents, stain removers and dryer sheets
- Specialty surface cleaning products and odor removers, including but not limited to: boat cleaning products; deck and outdoor furniture cleaning products; graffiti removers; metal cleaning products; motor vehicle (automotive/tire/wheel) cleaning products; motor vehicle windshield washing fluid; optical lens cleaning products; oven cleaning products; upholstery cleaning products; and other cleaning products sold for specific specialty uses

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Office Paper Purchasing

Responsible Party

Jane Altemose
Sourcing Manager
Purchasing

Criteria

Part 1

Institution has an institution-wide stated preference to purchase office paper that has recycled content, is certified by the Forest Stewardship Council (FSC), and/or is certified to meet similar multi-criteria sustainability standards for paper. This can take the form of purchasing policies, guidelines, or directives.

Policies and directives adopted by entities of which the institution is part (e.g. government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases office paper with post-consumer recycled, agricultural residue, and/or FSC certified content.

"---" indicates that no data was submitted for this field

<td>0 US/Canadian $</td>
</tr>
<tr>
<td>90-100 percent (or FSC Recycled label)</td>
<td>9,809 US/Canadian $</td>
</tr>
</tbody>
</table>

Total expenditures on office paper:
113,379 US/Canadian $

The website URL where information about the paper purchasing policy, directive, or guidelines is available:
http://www.lehigh.edu/~inubs/purchasing/SustainabilityPurchasing.shtml
Inclusive and Local Purchasing

### Responsible Party

Jane Altemose  
Sourcing Manager  
Purchasing

### Criteria

**Part 1**

Institution has an institution-wide stated intent to support disadvantaged businesses, social enterprises, and/or local community-based businesses.

Support could take the form of giving preference during RFP processes, conducting targeted outreach to these businesses about opportunities to work with the institution, and/or other efforts to increase purchases made from such businesses.

**Part 2**

Institution makes purchases from companies that include disadvantaged businesses, social enterprises and/or local community-based businesses.

Purchases that meet multiple criteria listed above should not be double counted. Food and beverage purchases, which are covered by *OP 6: Food and Beverage Purchasing* and *OP 7: Low Impact Dining*, are not included in this credit.

### Submission Note:

We are unable to report a specific percentage of total purchases from disadvantaged businesses, social enterprises and/or local community-based businesses at this time.

"---" indicates that no data was submitted for this field

**Does the institution have an institution-wide stated intent to support disadvantaged businesses, social enterprises, and/or local community-based businesses?:**

Yes

**A copy of the policy, guidelines or directive governing inclusive and local purchasing:**

---

**The policy, guidelines or directive governing inclusive and local purchasing:**

Excerpts from various sources (Lehigh's Strategic Plan, etc.):

Partnering in the renaissance of the local community is one of the 4 tenants of Lehigh's Strategic Plan.
Lehigh manages a Small Business Development Committee (SBDC), focused on small and local, but NOT disadvantaged business opportunities.

Lehigh also works with the Rising Tide Community Loan Fund, loaning money to businesses that cannot obtain commercial loans through the normal course of business (often start-ups and minority owned businesses).

**Does the institution wish to pursue Part 2 of this credit (inclusive and local expenditures)?:**

No

**The percentage of total purchases from disadvantaged businesses, social enterprises and/or local community-based businesses:**

0

**The website URL where information about the institution’s inclusive and local purchasing policies and/or program is available:**

---
Life Cycle Cost Analysis

Criteria

Institution employs Life Cycle Cost Analysis (LCCA) as a matter of policy and practice when evaluating energy- and water-using products and systems. Practices may include structuring RFPs so that vendors compete on the basis of lowest total cost of ownership (TCO) in addition to (or instead of) purchase price.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Guidelines for Business Partners

Responsible Party

Jane Altemose
Sourcing Manager
Purchasing

Criteria

Institution has and acts on policies, guidelines and/or agreements that set expectations about the social and environmental responsibility of its business partners. The policies, guidelines and/or agreements require new and/or existing vendors and contractors and/or franchisees to adhere to:

1) Minimum environmental standards and practices defined by the institution, for example as outlined by the institution’s sustainability policies

And/or

2) Minimum standards and practices governing employee wages, benefits, working conditions and rights that are consistent with fundamental International Labor Organization (ILO) conventions.

All enterprises with employees on-site as part of regular campus operations (e.g. contractors and franchisees) and other standing and/or formal business relationships (e.g. regular vendors and contracted services) are included.

Businesses that produce and/or sell licensed articles bearing the institution’s trademarked logo (“licensees”) are not included. They are covered in EN 15: Trademark Licensing.

The credit acknowledges institutional engagement in selecting its business partners and guiding them toward sustainability. Policies, guidelines or practices of the businesses themselves do not count for this credit in the absence of institutional selection criteria and/or guidance. Requiring compliance with existing legislation does not count on its own, but may be included as part of broader requirements that meet the criteria outlined above.

Policies adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

How many of the institution’s business partners are covered by policies, guidelines and/or agreements that require adherence to minimum environmental standards?:
Some

How many of the institution’s business partners are covered by policies, guidelines and/or agreements that require adherence to minimum standards governing employee wages, benefits, working conditions and rights?:
All

A copy of the policies, guidelines, and/or agreements with the institution's business partners (or a representative sample):

---

The policies, guidelines, and/or agreements with the institution's business partners (or a representative sample):

All of our vendors must sign Lehigh's standard contracts, which specifically address Equal Opportunity Employment and Worker's Compensation Insurance Coverage Requirements. We have no specific policies for vendors regarding environmental standards across the board, but they are specifically addressed on a project by project basis.

A brief description of programs and strategies institution has implemented to ensure that the guidelines are followed, including a brief description of instances when the guidelines have changed purchasing behavior, if applicable:

No specific policies across the board, but recycling requirements are included as part of our RFP’s and resulting contracts, notably in construction projects. We also required EPEAT Silver certification for computers purchased for the public spaces (libraries). Recycling requirements are part of the Sodexo Food Service Management Agreement as well.

The website URL where information about the institution’s guidelines for its business partners is available:

---
Transportation

This subcategory seeks to recognize institutions that are moving toward sustainable transportation systems. Transportation is a major source of greenhouse gas emissions and other pollutants that contribute to health problems such as heart and respiratory diseases and cancer. Due to disproportionate exposure, these health impacts are frequently more pronounced in low-income communities next to major transportation corridors. In addition, the extraction, production, and global distribution of fuels for transportation can damage environmentally and/or culturally significant ecosystems and may financially benefit hostile and/or oppressive governments.

At the same time, campuses can reap benefits from modeling sustainable transportation systems. Bicycling and walking provide human health benefits and mitigate the need for large areas of paved surface, which can help campuses to better manage storm water. Institutions may realize cost savings and help support local economies by reducing their dependency on petroleum-based fuels for transportation.

Campus Fleet

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Institution supports alternative fuel and power technology by including in its motorized vehicle fleet vehicles that are:

A. Gasoline-electric hybrid
B. Diesel-electric hybrid
C. Plug-in hybrid
D. 100 percent electric
E. Fueled with Compressed Natural Gas (CNG)
F. Hydrogen fueled
G. Fueled with B20 or higher biofuel for more than 4 months of the year

And/or

H. Fueled with locally produced, low-level (e.g. B5) biofuel for more than 4 months of the year (e.g. fuel contains cooking oil recovered and recycled on campus or in the local community)

For this credit, the institution’s motorized fleet includes all cars, carts, trucks, tractors, buses and similar vehicles used for transporting people and/or goods, including both leased vehicles and vehicles that are institution-owned and operated. Heavy construction equipment (e.g. excavators and pavers), maintenance equipment (e.g. lawn-mowers and leaf blowers), and demonstration/test vehicles used for educational purposes are not included in this credit.

Vehicles that meet multiple criteria (e.g. hybrid vehicles fueled with biofuel) should not be double-counted.

"---" indicates that no data was submitted for this field

A brief description of the method(s) used to gather data about employee commuting:

A sustainability survey was distributed by the Office of Sustainability in fall 2013 in which faculty and staff were asked to respond to the following question: What is your primary mode of transportation to campus? The answers from which they could choose were the OP-19 answers listed above. This survey was approved by the IRB and can prove statistically valid.

The website URL where information about sustainable transportation for employees is available:

---
Support for Sustainable Transportation

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Part 1

The institution demonstrates its support for active (i.e. non-motorized) transportation on campus in one or more of the following ways:

Option A: Institution:

- Provides secure bicycle storage (not including office space), shower facilities, and lockers for bicycle commuters. The storage, shower facilities and lockers are co-located in at least one building/location that is accessible to all commuters.
- Provides short-term bicycle parking (e.g. racks) within 50 ft (15 m) of all occupied, non-residential buildings and makes long-term bicycle storage available within 330 ft (100 m) of all residence halls (if applicable).
- Has a “complete streets” or bicycle accommodation policy (or adheres to a local community policy) and/or has a continuous network of dedicated bicycle and pedestrian paths and lanes that connects all occupied buildings and at least one inter-modal transportation node (i.e. transit stop or station)

And/or

- Has a bicycle-sharing program or participates in a local bicycle-sharing program

Option B: Institution is certified as a Bicycle Friendly University (at any level) by the League of American Bicyclists (U.S.) or under a similar third party certification for non-motorized transportation.

Part 2

Institution has implemented one or more of the following strategies to encourage more sustainable modes of transportation and reduce the impact of student and employee commuting. The institution:

- Offers free or reduced price transit passes and/or operates a free campus shuttle for commuters. The transit passes may be offered by the institution itself, through the larger university system of which the institution is a part, or through a regional program provided by a government agency.
- Offers a guaranteed return trip (GRT) program to regular users of alternative modes of transportation
- Participates in a car/vanpool or ride sharing program and/or offers reduced parking fees or preferential parking for car/vanpoolers
- Participates in a car sharing program, such as a commercial car-sharing program, one administered by the institution, or one administered by a regional organization
- Has one or more Level 2 or Level 3 electric vehicle recharging stations that are accessible to student and employee commuters
- Offers a telecommuting program for employees, either as a matter of policy or as standard practice
- Offers a condensed work week option for employees, either as a matter of policy or as standard practice
- Has incentives or programs to encourage employees to live close to campus
Does the institution provide secure bicycle storage (not including office space), shower facilities, and lockers for bicycle commuters?:

No

A brief description of the facilities for bicycle commuters:

We provide Bike Racks in several locations on the campus - There is not a designated facility for showers, however, the use of the gym, where locker and shower facilities are available, is an option.

Does the institution provide short-term bicycle parking (e.g. racks) within 50 ft (15 m) of all occupied, non-residential buildings and make long-term bicycle storage available within 330 ft (100 m) of all residence halls (if applicable)?:

Yes

A brief description of the bicycle parking and storage facilities:

We do provide bike racks outside most of our academic and administrative buildings. There is also bike racks installed outside most of our residential housing units.

Does the institution have a “complete streets” or bicycle accommodation policy (or adhere to a local community policy) and/or have a continuous network of dedicated bicycle and pedestrian paths and lanes?:

No

A brief description of the bicycle/pedestrian policy and/or network:

We do not have a "complete streets" or bicycle accommodation policy, however, we work in compunction with the City of Bethlehem with their bicycle regulations. The City of Bethlehem Bicycle regulations 951.06 which outlines that bicycles must be parked in bike racks and not operate on sidewalks in pedestrian malls.

Does the institution have a bicycle-sharing program or participate in a local bicycle-sharing program?:

No

A brief description of the bicycle sharing program:

We are in the process of research and analysis to develop a program.

Is the institution certified as a Bicycle Friendly University by the League of American Bicyclists (U.S.) or under a similar third party certification covering non-motorized transportation?:

--- indicates that no data was submitted for this field
No

A brief description of the certification, including date certified and level:

We are not certified, however, we are in the process of research and analysis to potentially be certified within the next year.

Does the institution offer free or reduced price transit passes and/or operate a free campus shuttle for commuters?:
Yes

A brief description of the mass transit program(s), (s), including availability, participation levels, and specifics about discounts or subsidies offered (including pre-tax options):

Lehigh University operates free on campus bus shuttles to get faculty, staff and students to/from the three campuses: Mountaintop, Saucon Village & Goodman campuses. There is also a late night shuttle intended to transport students to/from on and near by off campus locations.

Does the institution offer a guaranteed return trip (GRT) program to regular users of alternative modes of transportation?:
No

A brief description of the GRT program:

---

Does the institution participate in a car/vanpool or ride sharing program and/or offer reduced parking fees or preferential parking for car/vanpoolers?:
No

A brief description of the carpool/vanpool program:

We are in the process of reviewing an agreement with Zimride.

Does the institution participate in a car sharing program, such as a commercial car-sharing program, one administered by the institution, or one administered by a regional organization?:
Yes

A brief description of the car sharing program:

We currently use the Enterprise Car Share program. It is available to faculty, staff and students for personal use.

Does the institution have one or more Level 2 or Level 3 electric vehicle recharging stations that are accessible to student and employee commuters?:

---
No

A brief description of the electric vehicle recharging stations:

---

Does the institution offer a telecommuting program for employees as a matter of policy or as standard practice?:

No

A brief description of the telecommuting program:

---

Does the institution offer a condensed work week option for employees as a matter of policy or as standard practice?:

No

A brief description of the condensed work week program:

The University has a "Flex Time" scheduling. "A "Flexible Time" schedule means a work schedule which includes designated hours during which an employee may, with the approval of the supervisor and under work unit plans approved by the department head, elect an alternative time of arrival and departure from work. It may also include required days or hours during which an employee subject to the work schedule must be present for work. Working hours must be balanced to meet the operating needs of the department and, if possible, an employee's own personal preferences as to work hours.

The University makes flextime available to employees. Supervisors and department heads are encouraged to approve flextime schedules if effective and efficient operations are ensured. Supervisors and managers do not have to approve any proposed schedule that will interfere with the services offered or the work to be performed within the unit, department, or University"

Does the institution have incentives or programs to encourage employees to live close to campus?:

Yes

A brief description of the incentives or programs to encourage employees to live close to campus:

Lehigh University has the "Home Buying Initiative for South Side Bethlehem". There are 3 loan plans available - a choice between 2 forgivable loan plans for the purchase of a primary residence within the programs' geographic boundaries plus 1 curb appeal" deferred payment loan for exterior home improvements. This program is available to eligible staff members working at least 75% of a full-time schedule.

Does the institution have other incentives or programs to encourage more sustainable modes of transportation and reduce the impact of student and employee commuting?:

No

A brief description of other sustainable transportation initiatives and programs:
The website URL where information about the institution’s sustainable transportation program(s) is available:

http://www.lehigh.edu/parking
Waste

This subcategory seeks to recognize institutions that are moving toward zero waste by reducing, reusing, recycling, and composting. These actions mitigate the need to extract virgin materials, such as trees and metals. It generally takes less energy and water to make a product with recycled material than with virgin resources. Reducing waste generation also reduces the flow of waste to incinerators and landfills which produce greenhouse gas emissions, can contaminate air and groundwater supplies, and tend to have disproportionate negative impacts on low-income communities. Waste reduction and diversion also save institutions costly landfill and hauling service fees. In addition, waste reduction campaigns can engage the entire campus community in contributing to a tangible sustainability goal.

Waste Minimization

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Part 1

Institution has implemented source reduction strategies to reduce the total amount of waste generated (materials diverted + materials disposed) per weighted campus user compared to a baseline.

Part 2

Institution’s total annual waste generation (materials diverted and disposed) is less than the minimum performance threshold of 0.45 tons (0.41 tonnes) per weighted campus user.

This credit includes on-campus dining services operated by the institution or the institution’s primary on-site contractor.

Total waste generation includes all materials that the institution discards, intends to discard or is required to discard (e.g. materials recycled, composted, donated, re-sold and disposed of as trash) except construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP 24: Construction and Demolition Waste Diversion and OP 25: Hazardous Waste Management.

"---" indicates that no data was submitted for this field

</tbody>
</table>

A brief description of when and why the waste generation baseline was adopted:

First year of overall data

A brief description of any (non-food) waste audits employed by the institution:

The Office of Sustainability conducts 4-6 non-food waste audits annually on academic, administrative, residential and greek buildings

A brief description of any institutional procurement policies designed to prevent waste:

Lehigh worked with our office supplies vendors to minimize packaging supplies are delivered in.

A brief description of any surplus department or formal office supplies exchange program that facilitates reuse of materials:
Asa's Attic is Lehigh's Surplus Property Disposal program available to faculty and staff departments

A brief description of the institution's efforts to make materials available online by default rather than printing them:

Library and Technology Services works with Lehigh faculty to educate them about alternatives to requiring printing in their classes.

A brief description of any limits on paper and ink consumption employed by the institution:

Lehigh has instituted a printing quota for students which results in an annual paper savings of a 1 million pages per academic year

A brief description of any programs employed by the institution to reduce residence hall move-in/move-out waste:

Students who will be packing up at the end of the semester are encouraged to donate unwanted clothing, linens, electronics, school supplies, household items, furniture, and unopened food at designated locations within each residence hall or at the sorting facility on campus.

Proceeds from this sale will fund Lehigh's Afterschool Homework Clubs for South Bethlehem children.

In addition to benefiting this worthwhile cause, the sale also helps recycle much-needed items back into the community, at extremely affordable prices.

A brief description of any other (non-food) waste minimization strategies employed by the institution:

---

A brief description of any food waste audits employed by the institution:

Students conduct waste audits in dining and food retail facilities about once a semester to determine food waste for a given meal

A brief description of any programs and/or practices to track and reduce pre-consumer food waste in the form of kitchen food waste, prep waste and spoilage:

All pre-consumer food waste is diverted from the waste stream to a pulper and then buckets which are delivered to a farm where the food waste is composted.

A brief description of programs and/or practices to track and reduce post-consumer food waste:

None at this time
A brief description of the institution's provision of reusable and/or third party certified compostable to-go containers for to-go food and beverage items (in conjunction with a composting program):

Dining Services provides free reusable to-go containers for students. Student are permitted up to 2 containers per academic year for free. If not returned, students are charged a $10 fee per container.

A brief description of the institution's provision of reusable service ware for “dine in” meals and reusable and/or third party certified compostable service ware for to-go meals (in conjunction with a composting program):

---

A brief description of any discounts offered to customers who use reusable containers (e.g. mugs) instead of disposable or compostable containers in to-go food service operations:

---

A brief description of other dining services waste minimization programs and initiatives:

REUSABLE DISHWARE PROGRAM: Students can now reserve Reusable Dishware for an event. The Dishware includes plates, bowls, forks, knives, and spoons. This program is free of charge for the students and contributes to Lehigh Dining goal of being sustainable.

The website URL where information about the institution’s waste minimization initiatives is available:

http://sustainability.lehigh.edu/node/76
Waste Diversion

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Institution diverts materials from the landfill or incinerator by recycling, composting, reusing, donating, or re-selling.

This credit includes on-campus dining services operated by the institution or the institution's primary on-site contractor.

This credit does not include construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP 24: Construction and Demolition Waste Diversion and OP 25: Hazardous Waste Management.

"---" indicates that no data was submitted for this field

Materials diverted from the solid waste landfill or incinerator:
1,138.89 Tons

Materials disposed in a solid waste landfill or incinerator:
1,304.76 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate, including efforts made during the previous three years:

Single stream recycling, improved signage and collection bins, annual move out collection of clothing and furniture for sale to the community with proceeds benefiting local education

A brief description of any food donation programs employed by the institution:

---

A brief description of any pre-consumer food waste composting program employed by the institution:

Kitchen food waste dewatered and sent to local compost facility

A brief description of any post-consumer food waste composting program employed by the institution:

Unmonitored volunteer Greek House post consumer food waste composting
Does the institution include the following materials in its waste diversion efforts?:

<table>
<thead>
<tr>
<th>Material</th>

</tbody>
</table>
Other materials that the institution includes in its waste diversion efforts:

---
Construction and Demolition Waste Diversion

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Institution diverts non-hazardous construction and demolition waste from the landfill and/or incinerator.

Soil and organic debris from excavating or clearing the site do not count for this credit.

"---" indicates that no data was submitted for this field

Construction and demolition materials recycled, donated, or otherwise recovered:
47.40 Tons

Construction and demolition materials landfilled or incinerated:
6 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate for construction and demolition waste:

Concrete brought to recycling plant, scrap metal recycled, LEED silver used for all new construction and renovations
Hazardous Waste Management

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Part 1

Institution has strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seeks to minimize the presence of these materials on campus.

Part 2

Institution has a program in place to recycle, reuse, and/or refurbish electronic waste generated by the institution and/or its students. Institution takes measures to ensure that the electronic waste is recycled responsibly, for example by using a recycler certified under the e-Stewards and/or R2 standards.

"---" indicates that no data was submitted for this field

Does the institution have strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seek to minimize the presence of these materials on campus?:

Yes

A brief description of steps taken to reduce hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste:

The university is working toward identifying improvements to our laboratory chemical waste programs in an effort to increase the amounts of chemicals that are shared between laboratories.

A brief description of how the institution safely disposes of hazardous, universal, and non-regulated chemical waste:

Environmental Health & Safety requires that all hazardous waste is tagged, capped, closed and submitted to EH&S for proper disposal. Departmentally-generated batteries are disposed of through a campus approved vendor. Lamps, ballasts and mercury-containing equipment are also collected and sent to campus-approved licensed disposal contractor.

A brief description of any significant hazardous material release incidents during the previous three years, including volume, impact and response/remediation:

not applicable
A brief description of any inventory system employed by the institution to facilitate the reuse or redistribution of laboratory chemicals:

Chemicals no longer wanted by departments can notify EH&S to help either find a new owner or dispose of the materials properly.

Does the institution have or participate in a program to responsibly recycle, reuse, and/or refurbish all electronic waste generated by the institution?:
Yes

Does the institution have or participate in a program to responsibly recycle, reuse, and/or refurbish electronic waste generated by students?:
Yes

A brief description of the electronic waste recycling program(s):

Student e-waste program to commence in spring 2014. Students, faculty and staff can drop off unwanted electronic items to on campus collection point. Items that are still in usable condition can be selected to be sold at a community sale which raises money for K-12 homework clubs. Items not diverted to sale will be recycled by e-steward vendor.

A brief description of steps taken to ensure that e-waste is recycled responsibly, workers’ basic safety is protected, and environmental standards are met:

University-wide collections held a minimum of twice annually. Hard drives of all collected materials removed and cleaned prior to disposal. Fee attached to purchase of new electronics and held in a central account to cover cost of future disposal. Vendors are required to have either e-stewards and/or R2 certifications.

The website URL where information about the institution’s hazardous and electronic-waste recycling programs is available:

http://sustainability.lehigh.edu/ewaste
Water

This subcategory seeks to recognize institutions that are conserving water, making efforts to protect water quality and treating water as a resource rather than a waste product. Pumping, delivering, and treating water is a major driver of energy consumption, so institutions can help reduce energy use and the greenhouse gas emissions associated with energy generation by conserving water. Likewise, conservation, water recycling and reuse, and effective rainwater management practices are important in maintaining and protecting finite groundwater supplies. Water conservation and effective rainwater and wastewater management also reduce the need for effluent discharge into local surface water supplies, which helps improve the health of local water ecosystems.

Rainwater Management

Criteria

**Part 1**

Institution uses Low Impact Development (LID) practices as a matter of policy or standard practice to reduce rainwater/stormwater runoff volume and improve outgoing water quality for new construction, major renovation, and other projects that increase paved surface area on campus or otherwise significantly change the campus grounds.

The policy, plan, and/or strategies cover the entire campus. While the specific strategies or practices adopted may vary depending on project type and location, this credit is reserved for institutions that mitigate rainwater runoff impacts consistently during new construction. Implementing a strategy or strategies for only one new development project is not sufficient for Part 1 of this credit.

**Part 2**

Institution has adopted a rainwater/stormwater management policy, plan, and/or strategies that mitigate the rainwater runoff impacts of ongoing campus operations and treat rainwater as a resource rather than as a waste product.

The policy, plan, and/or strategies address both the quantity and quality (or contamination level) of rainwater runoff through the use of green infrastructure. Though specific practices adopted may vary across the campus, the policy, plan, and/or strategies cover the entire institution. Implementing strategies for only one building or area of campus is not sufficient for Part 2 of this credit.

Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for both parts of this credit as long as the policies apply to and are followed by the institution.

"---" indicates that no data was submitted for this field

**Does the institution use Low Impact Development (LID) practices as a matter of policy or standard practice to reduce rainwater/stormwater runoff volume and improve outgoing water quality for new construction, major renovation, and other projects?**

Yes

**A brief description of the institution’s Low Impact Development (LID) practices:**

By law, all land development is required to comply with Clean Water Act NPDES permits, which include sediment and erosion control practices and storm water management.
Has the institution adopted a rainwater/stormwater management policy, plan, or strategies that mitigate the rainwater runoff impacts of ongoing campus operations through the use of green infrastructure? : Yes

A brief description of the institution’s rainwater/stormwater management policy, plan, and/or strategies for ongoing campus operations:

Incremental improvements to existing stormwater collection and conveyance systems, increased planting beds and improved turf management including smart irrigation to limit exposed surfaces and prevent erosion.

A brief description of any rainwater harvesting employed by the institution:

None

Rainwater harvested directly and stored/used by the institution, performance year:

---

A brief description of any rainwater filtering systems employed by the institution to treat water prior to release:

None

A brief description of any living or vegetated roofs on campus:

Two small planted roofs on the STEPS building.

A brief description of any porous (i.e. permeable) paving employed by the institution:

None

A brief description of any downspout disconnection employed by the institution:

None

A brief description of any rain gardens on campus:

None

A brief description of any stormwater retention and/or detention ponds employed by the institution:

Large retention structure on Goodman Campus to detain runoff from athletic field venues.
A brief description of any bioswales on campus (vegetated, compost or stone):

None

A brief description of any other rainwater management technologies or strategies employed by the institution:

None

The website URL where information about the institution’s rainwater management initiatives, plan or policy is available:

---
Wastewater Management

Responsible Party

Gary Falasca
Director
Facilities Services

Criteria

Institution’s wastewater is handled naturally on campus or in the local community. Natural wastewater systems include, but are not limited to, constructed treatment wetlands and Living Machines. To count, wastewater must be treated to secondary or tertiary standards prior to release to water bodies.

This credit recognizes natural handling of the water discharged by the institution. On-site recycling/reuse of greywater and/or blackwater is recognized in OP 26: Water Use.

"---" indicates that no data was submitted for this field

Total wastewater discharged:
95,378,200 Gallons

Wastewater naturally handled:
0 Gallons

A brief description of the natural wastewater systems used to handle the institution’s wastewater:

None

The website URL where information about the institution’s wastewater management practices is available:
http://www.lehigh.edu/~infac/facserv.html
## Coordination, Planning & Governance

This subcategory seeks to recognize colleges and universities that are institutionalizing sustainability by dedicating resources to sustainability coordination, developing plans to move toward sustainability, and engaging students, staff and faculty in governance. Staff and other resources help an institution organize, implement, and publicize sustainability initiatives. These resources provide the infrastructure that fosters sustainability within an institution. Sustainability planning affords an institution the opportunity to clarify its vision of a sustainable future, establish priorities and help guide budgeting and decision making. Strategic planning and internal stakeholder engagement in governance are important steps in making sustainability a campus priority and may help advocates implement changes to achieve sustainability goals.

### Credit

<table>

Sustainability Coordination

Responsible Party

Delicia Nahman
Sustainability Officer
Office of Sustainability

Criteria

Institution has at least one sustainability committee, office, and/or officer tasked by the administration or board of trustees to advise on and implement policies and programs related to sustainability on campus. The committee, office, and/or officer focus on sustainability broadly (i.e. not just one sustainability issue, such as climate change) and cover the entire institution.

An institution that has multiple committees, offices and/or staff with responsibility for subsets of the institution (e.g. schools or departments) may earn points for this credit if it has a mechanism for broad sustainability coordination for the entire campus (e.g. a coordinating committee or the equivalent). A committee, office, and/or officer that focuses on just one department or school within the institution does not count for this credit in the absence of institution-wide coordination.

---

"---" indicates that no data was submitted for this field

Does the institution have at least one sustainability committee, office, and/or officer that focuses on sustainability broadly and covers the entire institution?:
Yes

A brief description of the activities and substantive accomplishments of the committee(s), office(s), and/or officer(s) during the previous three years:

Lehigh established an environmental advisory committee in 2008. Since then, a Sustainability Office was started and two full time staff were hired.

Sustainability efforts have occurred on this campus for decades, but have solidified more recently. Initiatives include President Gast's Climate Commitment, the formation of the Environmental Initiative and a presidential advisory group - the Lehigh Environmental Advisory Group (LEAG) -- as well as the university's Strategic Plan, which includes a focus on addressing issues related to energy, environment and infrastructure.

In Spring 2011, a series of workshops were hosted by the university's first Sustainability Coordinator and the Lehigh Environmental Advisory Group (LEAG), which asked participants to envision a sustainable campus, share current practices, define sustainability metrics and create ambitious and measurable goals for the campus. In Spring 2012, Lehigh University adopted its first Campus Sustainability Plan. Below you will find additional achievements over the years:

2013
Participated in RecycleMania competition
Sustainability Program Coordinator hired
2012
1st Campus Sustainability Plan adopted

2011
Alpha Phi composter installed
Campus Master Plan with Sustainable Design standards specifically mentioned
Sustainability Plan workshops throughout the university

2010
Green Fund formed
Sigma Epsilon composter installed
Lehigh Community Garden started
Eco-Rep Program started
Sustainability requirement added to Greek accreditation
Green Purchasing Guidelines created
Sustainability Coordinator hired
LVAIC Director of Sustainability Initiatives hired

2009
Climate Commitment signed
Recycling converted to Single Stream Recycling
Strategic Plan written which acknowledges Community Engagement, Energy, Infrastructure and the Environment as areas of particular interest

2008
LEAG formed

2007
Green House, a sustainability-themed student residential community, started

Does the institution have at least one sustainability committee?:
Yes

The charter or mission statement of the committee(s) or a brief description of each committee's purview and activities:
The Lehigh Environmental Advisory Group (LEAG) was formed in 2008 by President Alice Gast to provide advice to the university leadership on ways to improve sustainability on campus.

Members of each committee, including affiliations and role (e.g. staff, student, or faculty):
Alec Bodzin LEAG Co-Chair, faculty
Michelle Spicer Graduate Representative
David Casagrande Faculty
Suzanne L. Irvine Communications, staff
Teresa Chamberlain, student
Kristen Jellison, faculty
Nicholas DeSalvo, staff with LVAIC
David Joseph, Director of Auxiliary Services, staff
Van Dobson, AVP of Facilities Services and Campus Planning, staff
Stacey Kimmel-Smith, Library and Technology Services, staff
Benjamin Felzer, faculty
Rafi Mills, student
Shokoufeh Elahi, Graduate Assistant
Delicia Nahman, Sustainability Officer, staff
Sally Gilotti Communications
Gregory M. (Greg) Skutches, Director of Writing Across the Curriculum, staff
Carolina Hernandez, Director of Community Service Office, staff
Ryan Umholtz, Athletics, staff
Mark Ironside LEAG Co-Chair, Director of Business Services, staff

The website URL where information about the sustainability committee(s) is available:
http://sustainability.cc.lehigh.edu/environmental-advisory-group

Does the institution have at least one sustainability office that includes more than 1 full-time equivalent (FTE) employee?:
Yes

A brief description of each sustainability office:
Lehigh University is focused on advancing the intellectual footprint of the university while treading lightly environmentally and advocating equitably. With a distinctive position to make significant contributions in social equity environmental stewardship and economic prosperity, Lehigh's Office of Sustainability is committed to integrating sustainability throughout the university.

Full-time equivalent (FTE) of people employed in the sustainability office(s):
2

The website URL where information about the sustainability office(s) is available:
http://sustainability.cc.lehigh.edu/

Does the institution have at least one sustainability officer?:
Yes

Name and title of each sustainability officer:
Delicia Nahman, Sustainability Officer; Katie Klaniecki Sustainability Program Coordinator

A brief description of each sustainability officer position:
Sustainability Officer works with departmental leadership to create visions, programs and policies. Implementation of Sustainability Plan is overseen by Sustainability Officer. Sustainability Program Coordinator manages all Office of Sustainability Programs, including Green Teams, Eco-Reps, Recyclemania, and Greek greening efforts.
The website URL where information about the sustainability officer(s) is available:

http://sustainability.cc.lehigh.edu/meet-the-staff
Criteria

Institution has current and formal plans to advance sustainability. The plan(s) cover one or more of the following areas:

- Curriculum
- Research (or other scholarship appropriate for the institution)
- Campus Engagement
- Public Engagement
- Air & Climate
- Buildings
- Dining Services/Food
- Energy
- Grounds
- Purchasing
- Transportation
- Waste
- Water
- Diversity & Affordability
- Health, Wellbeing & Work
- Investment
- Other

The plan(s) may include measurable objectives with corresponding strategies and timeframes to achieve the objectives.

The criteria may be met by any combination of formally adopted plans, for example:

- Strategic plan or equivalent guiding document
- Campus master plan or physical campus plan
- Sustainability plan
- Climate action plan
- Human resources strategic plan
- Diversity plan

For institutions that are a part of a larger system, plans developed at the system level are eligible for this credit.
Does the institution have current and formal plans to advance sustainability in the following areas? Do the plans include measurable objectives?:

<table>

A brief description of the plan(s) to advance sustainability in Curriculum:

Through the creation of a campus that is a model of sustainability in practice, teaching and research and can serve as living laboratory, Lehigh will enhance awareness and knowledge of sustainable practices, ensure hands on learning is woven into Lehigh's educational experience.

The measurable objectives, strategies and timeframes included in the Curriculum plan(s):

Short Term (1-3 years)
1) Implement all electronic commerce, processes and web based equipment sharing
2) Identify Environmentally Preferable Products (EPP) opportunities including implementing recycled content copy paper standards, making business case for baseline products and services and expanding purchase of organic/local foods
3) Implement Sustainable Purchasing Policy that aims at minimizing or reducing GHG emissions, expand education program

Accountable parties, offices or departments for the Curriculum plan(s):
Office of Sustainability, Environmental Initiative, Lehigh Environmental Advisory Committee Curriculum group

A brief description of the plan(s) to advance sustainability in Research (or other scholarship):

none

The measurable objectives, strategies and timeframes included in the Research plan(s):

none

Accountable parties, offices or departments for the Research plan(s):

none

A brief description of the plan(s) to advance Campus Engagement around sustainability:

---

The measurable objectives, strategies and timeframes included in the Campus Engagement plan:

---
Accountable parties, offices or departments for the Campus Engagement plan(s):

Office of Sustainability, Office of Student Activities, Residential Life

A brief description of the plan(s) to advance Public Engagement around sustainability:

---

The measurable objectives, strategies and timeframes included in the Public Engagement plan(s):

---

Accountable parties, offices or departments for the Public Engagement plan(s):

---

A brief description of the plan(s) to advance sustainability in Air and Climate:

The recognition of the impacts of environmental degradation and climate change on the quality of life for humans call for creative and systemic shifts in the way we think about our demand for, and use of, finite resources. Worldwide demand for energy, a significant contributor to rising greenhouse gas emissions, and the management of its supply, delivery, economies and consumption, is one of the most vexing sets of challenges facing modern society.

Lehigh University understands this grand challenge and is invested in doing its part to reduce our impact. By conducting comprehensive energy audits and creating an Energy Plan, Lehigh will be able to prioritize projects and recommendations for all university buildings that will lead to sustainability in the area of energy and climate, thereby helping to constrain growth in energy use.

The measurable objectives, strategies and timeframes included in the Air and Climate plan(s):
1) Reduce Lehigh’s energy consumption by 3% by 2015
2) Create and expand comprehensive baseline of energy consumption by building
3) Create energy assessment guidelines for new construction and renovations and set timeline for performing audits all existing buildings
4) Create an Energy Plan that addresses campus growth and building needs, energy efficiency retrofits, behavior change opportunities, renewable energy opportunities, and future reduction targets
5) Install occupancy sensors and programmable thermostats/timers for lighting/power/HVAC
6) Reduce energy loss to open fume hood sashes
7) Define a set of temperature control guidelines for new and existing buildings
8) Convert underused public computing sites to wireless lounges
9) Develop a plan to improve energy efficiency within our computing services

Accountable parties, offices or departments for the Air and Climate plan(s):

Facilities Services

A brief description of the plan(s) to advance sustainability in Buildings:

Lehigh can reduce these impacts by retrofitting existing buildings with high efficiency, low waste systems, properly diverting and disposing of construction and demolition waste and ensuring all new buildings are up to standards for LEED certification. Lehigh will facilitate the implementation of sustainable practices and procedures for built structures and natural landscapes that support the education, research, and neighborhood revitalization goals of Lehigh’s sustainability plan.

The measurable objectives, strategies and timeframes included in the Buildings plan(s):

1) Identify and adopt the for new construction and renovation projects and use environmentally friendly materials wherever possible, 1-3 years
2) Identify and implement green practices related to chemical usage and elimination and/or control of invasive plants and select new plantings based on adaptation to the natural environment, 1-3 years
3) Establish a policy that all new construction and renovation projects will be built to USGBC LEED Silver or equivalent standards
4) Develop a set of guiding principles regarding the selection of preferred products and materials for construction and renovation projects
5) Develop a list of preferred products and materials for ongoing building and maintenance

Accountable parties, offices or departments for the Buildings plan(s):

Campus Planning

A brief description of the plan(s) to advance sustainability in Dining Services/Food:
Sustainability should be at the forefront of every food decision - quality of food, impact and knowledge of where and how it is produced, purchased and disposed of. Lehigh University will be a leader in the local food system: partnering, producing and educating the consumer

**The measurable objectives, strategies and timeframes included in the Dining Services/Food plan(s):**

Short-term (1-3 years)
1) Create baseline of current food purchases based on categories such as local, organic, and Fair Trade
2) Set clear and achievable % increase(s) in the aforementioned categories for food and beverage related purchases to be met by years 2015, 2022, 2025
3) Create a Sustainable Food Policy that includes food and beverages targets, waste practices
4) Divert “usable” food from the trash and create a food donation program, where feasible
5) Promote reusable mug and container program and provide continued incentive for its use

Intermediate (4-9 years)
1) Expand healthy and sustainable dining program by educating campus population on food waste, healthy eating options, and current wellness and nutrition program
2) Move toward a sustainable food system on campus by starting to grow select produce for consumption on campus and for distribution in the community
3) Ensure that all pre and post consumer waste in dining halls is composted by 2015 with an expansion to eateries by 2020
4) Increase the total food purchases that meet at least one of the four sustainability criteria (local, humane, eco-sensitive, and fair trade)

**Accountable parties, offices or departments for the Dining Services/Food plan(s):**
Dining Services, Auxiliary Services

**A brief description of the plan(s) to advance sustainability in Energy:**
Lehigh will be a leader in fostering multi-disciplinary and interdepartmental collaboration toward net climate neutrality

**The measurable objectives, strategies and timeframes included in the Energy plan(s):**

1-3 years:
1) Reduce Lehigh’s energy consumption by 3% by 2015
2) Create and expand comprehensive baseline of energy consumption by building
3) Create energy assessment guidelines for new construction and renovations and set timeline for performing audits all existing buildings
4) Create an Energy Plan that addresses campus growth and building needs, energy efficiency retrofits, behavior change opportunities, renewable energy opportunities, and future reduction targets

**Accountable parties, offices or departments for the Energy plan(s):**
Facilities Services

A brief description of the plan(s) to advance sustainability in Grounds:

Lehigh can reduce these impacts by retrofitting existing buildings with high efficiency, low waste systems, properly diverting and disposing of construction and demolition waste and ensuring all new buildings are up to standards for LEED certification. Lehigh will facilitate the implementation of sustainable practices and procedures for built structures and natural landscapes that support the education, research, and neighborhood revitalization goals of Lehigh’s sustainability plan.

The measurable objectives, strategies and timeframes included in the Grounds plan(s):

Identify and implement green practices related to chemical usage and elimination and/or control of invasive plants and select new plantings based on adaptation to the natural environment, 1-3 years

Implement a comprehensive forest management plan, 4-9 years

Accountable parties, offices or departments for the Grounds plan(s):

Facilities Services

A brief description of the plan(s) to advance sustainability in Purchasing:

Leveraging the University’s buying power by partnering with local businesses and local peer institutions, when possible, can impact the strength of the local community. As an institution for higher learning, Lehigh is equipped with the knowledge and expertise to be proactive in our transition toward sustainability and the ability to educate our campus community about the importance and feasibility of these initiatives. By facilitating the acquisition of resources in a manner that supports the education, research, and neighborhood revitalization mission, the university will be able to transition the campus community towards a cradle-to-cradle approach that supports environmentally preferable and socially responsible products.

In contributing to a sustainable future, Lehigh envisions:

- Campus wide engagement toward sustainable practices through policy, analysis, implementation, and action
- Incentives for programs that meet or exceed goals established for environmentally preferable processes and sustainable design
- Shifts toward greater energy-efficiency and conservation, environmentally preferable products and services, and socially responsible business practices
- Standardization of sustainable commodities/services across the University

The measurable objectives, strategies and timeframes included in the Purchasing plan(s):

Short Term (1-3 years)
1) Implement all electronic commerce, processes and web based equipment sharing

2) Identify Environmentally Preferable Products (EPP) opportunities including implementing recycled content copy paper standards, making business case for baseline products and services and expanding purchase of organic/local foods
3) Implement Sustainable Purchasing Policy that aims at minimizing or reducing GHG emissions, expand education program

Accountable parties, offices or departments for the Purchasing plan(s):

Purchasing Department

A brief description of the plan(s) to advance sustainability in Transportation:

Lehigh University can be a leader in the Lehigh Valley by modeling sustainable transportation systems. While the university’s topography is challenging, there are creative solutions that can result in reductions in transportation-related greenhouse gas emissions and costs in the long term. By strengthening the campus shuttle system and creating incentives for alternative modes of transportation use, Lehigh will not only realize cost savings through a decreased need for capital-intensive parking structures but also see health benefits for Lehigh campus and the community.

The measurable objectives, strategies and timeframes included in the Transportation plan(s):

1) Lehigh will begin to phase-in parking adjustments that will reduce the number of vehicle permits issued by 15%, proposing to eliminate cars for sophomores and improve use of a car sharing service
2) Lehigh will optimize the fuel efficiency of our fleet vehicles and bus services by optimizing bus routes, developing a plan for vehicle and bus replacement, and utilizing 20% biodiesel in our buses

Accountable parties, offices or departments for the Transportation plan(s):

Transportation Department

A brief description of the plan(s) to advance sustainability in Waste:

Lehigh will foster a waste-conscious culture through continuous education, student involvement in classroom and real-world experiences, and by raising awareness of resources used. The university will monitor and measure consumption, implement operational improvements, and minimize economic costs to reduce, reuse, and divert waste. By adopting a cradle-to-cradle approach, Lehigh will create the appropriate incentives and disincentives to move the campus toward zero waste. As an institution that continually seeks to improve waste towards zero waste, we need to ask these questions:

- How can we eliminate waste at the input source? How can we make this a higher priority than waste disposal?
- How can we tie disposal costs to the initial purchase cost?
- Where are we using disposable goods and what durable alternatives are there?
- How can we motivate individuals and departments to be more responsible in resource use, and to make choices that reduce waste?

The measurable objectives, strategies and timeframes included in the Waste plan(s):
1) Establish consistent, regular, comparable measures of all kinds of waste on campus and within one to two years of establishing comprehensive measures, set an overarching goal for waste reduction (e.g. 50% reduction over 2011/12 figures)
2) Increase participation in repurposing and recycling through procurement of products that reduces packaging waste and one-time use, new signage, awareness and incentive programs, and through greater participation in current diversion programs such as Move-Out
3) Implement campus-wide e-waste program for all Lehigh community members
4) Expand Lehigh’s composting program to encompass more food/dining areas
5) Find strategies to minimize hazardous waste on campus such as increasing visibility of battery disposal options, strengthening coordination among departments and researchers purchasing the same materials, and exploring chemical substitution strategies and inventory control to reduce hazardous substances in laboratories
6) Explore the use of sustainable construction and renovation practices including local material purchasing and material reuse
7) Ensure that materials from construction and demolition are recycled and/or reused

Accountable parties, offices or departments for the Waste plan(s):

Facilities Services

A brief description of the plan(s) to advance sustainability in Water:

Lehigh will educate members of the campus community as to the sources and fate of our water, both locally and on a global scale, with the goal of promoting sustainable practices. Lehigh University will use water more efficiently as well as increase the quality of water leaving its campus, by researching current areas for improvement, improving infrastructure and fostering positive behavioral change.

The measurable objectives, strategies and timeframes included in the Water plan(s):

1) Reduce water consumption on campus by performing water-use audits based on meter readings
2) Regularly monitor and publish quantity and quality of water in effort to improve access to quality drinking water on campus

Accountable parties, offices or departments for the Water plan(s):

Facilities Services

A brief description of the plan(s) to advance Diversity and Affordability:

---

The measurable objectives, strategies and timeframes included in the Diversity and Affordability plan(s):

Accountable parties, offices or departments for the other plan(s):

---

The institution’s definition of sustainability:

---
Does the institution’s strategic plan or equivalent guiding document include sustainability at a high level?:
Yes

A brief description of how the institution’s strategic plan or equivalent guiding document addresses sustainability:
Lehigh has identified grand challenges in the strategic plan including health, community building and energy and the environment

The website URL where information about the institution’s sustainability planning is available:
http://sustainability.lehigh.edu/
Governance

Criteria

Part 1

Institution’s students participate in governance in one or more of the following ways:

A. All enrolled students, regardless of type or status, have an avenue to participate in one or more governance bodies (through direct participation or the election of representatives)

B. There is at least one student representative on the institution’s governing body. To count, student representatives must be elected by their peers or appointed by a representative student body or organization.

And/or

C. Students have a formal role in decision-making in regard to one or more of the following:
   - Establishing organizational mission, vision, and/or goals
   - Establishing new policies, programs, or initiatives
   - Strategic and long-term planning
   - Existing or prospective physical resources
   - Budgeting, staffing and financial planning
   - Communications processes and transparency practices
   - Prioritization of programs and projects

Part 2

Institution’s staff participate in governance in one or more of the following ways:

A. All staff members, regardless of type or status, have an avenue to participate in one or more governance bodies (through direct participation or the election of representatives)

B. There is at least one non-supervisory staff representative on the institution’s governing body. To count, staff representatives must be elected by their peers or appointed by a representative staff body or organization.

And/or

C. Non-supervisory staff have a formal role in decision-making in regard to one or more of the areas outlined in Part 1.

Part 3

Institution’s faculty participate in governance in one or more of the following ways:

A. All faculty members, regardless of type or status, have an avenue to participate in one or more governance bodies (through direct participation or the election of representatives)

B. There is at least one teaching or research faculty representative on the institution’s governing body. To count, faculty representatives must be elected by their peers or appointed by a representative faculty body or organization.
And/or

C. Faculty have a formal role in decision-making in regard to one or more of the areas outlined in Part 1.

Participatory or shared governance bodies, structures and/or mechanisms may be managed by the institution (e.g. committees, councils, senates), by stakeholder groups (e.g. student, faculty and staff committees/organizations), or jointly (e.g. union/management structures).

Structures or mechanisms adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as they apply and are adhered to by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Diversity & Affordability

This subcategory seeks to recognize institutions that are working to advance diversity and affordability on campus. In order to build a sustainable society, diverse groups will need to be able to come together and work collaboratively to address sustainability challenges. Members of racial and ethnic minority groups and immigrant, indigenous and low-income communities tend to suffer disproportionate exposure to environmental problems. This environmental injustice happens as a result of unequal and segregated or isolated communities. To achieve environmental and social justice, society must work to address discrimination and promote equality. The historical legacy and persistence of discrimination based on racial, gender, religious, and other differences makes a proactive approach to promoting a culture of inclusiveness an important component of creating an equitable society. Higher education opens doors to opportunities that can help create a more equitable world, and those doors must be open through affordable programs accessible to all regardless of race, gender, religion, socio-economic status and other differences. In addition, a diverse student body, faculty, and staff provide rich resources for learning and collaboration.

Diversity and Equity Coordination

Responsible Party

Angela Scott
Director of Academic Diversity and Outreach and Adjunct Professor
Academic Outreach, Provost's Office

---

Criteria

Part 1

Institution has a diversity and equity committee, office and/or officer tasked by the administration or governing body to advise on and implement policies, programs, and trainings related to diversity and equity on campus. The committee, office and/or officer focuses on student and/or employee diversity and equity.

Part 2

Institution makes cultural competence trainings and activities available to all members of one or more of the following groups:

- Students
- Staff
- Faculty
- Administrators

"---" indicates that no data was submitted for this field

Does the institution have a diversity and equity committee, office, and/or officer tasked by the administration or governing body to advise on and implement policies, programs, and trainings related to diversity and equity on campus?:

Yes

Does the committee, office and/or officer focus on one or both of the following?:

<table>
<thead>
<tr>
<th></th>
<th>Yes or No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student diversity and equity</td>
<td>Yes</td>
</tr>
<tr>
<td>Employee diversity and equity</td>
<td>Yes</td>
</tr>
</tbody>
</table>

A brief description of the diversity and equity committee, office and/or officer, including purview and activities:
It is essential that we work collaboratively and collectively on sustainable change. With the support and encouragement of the Board of Trustees, President Alice Gast, and Provost Pat Farrell, we have begun developing an Action Plan for Diversity & Inclusion for our campus community. This effort is being led by the Council for Equity and Community in collaboration with the Vice Provost for Academic Diversity.

In 2005, Lehigh took an important step toward better understanding the climate for individuals and groups on our campus. Identifying and addressing our problems is the first step toward finding solutions for them. The survey provided the opportunity for everyone in the Lehigh community to be heard, and now is the time for each of us to listen, learn and act. The climate survey, which included many thoughtful personal accounts from community members, provides part of our understanding. Together with the hard work of many students, faculty and staff, the survey results provide a framework for sustainable change.

The full-time equivalent of people employed in the diversity and equity office:

6

The website URL where information about the diversity and equity committee, office and/or officer is available:

http://www4.lehigh.edu/diversity/default.aspx

Does the institution make cultural competence trainings and activities available to all members of the following groups?:

<table>
<thead>
<tr>
<th></th>
<th>Yes or No</th>

</tbody>
</table>

A brief description of the cultural competence trainings and activities:

The Senior Officers at the university and all members of the Council for the Equitable Community have experienced a two-day training. There are plans for trainings for faculty, staff and students. The Unconscious Bias Workshop for all faculty search committees will be ongoing.

The website URL where information about the cultural competence trainings is available:

---
Assessing Diversity and Equity

Criteria

Institution assesses diversity and equity on campus and uses the results to guide policy, programs, and initiatives. The assessment(s) address one or more of the following areas:

1. **Campus climate**, e.g. through a survey or series of surveys to gather information about the attitudes, perceptions and experiences of campus stakeholders and underrepresented groups

2. **Student diversity and educational equity**, e.g. through analysis of institutional data on diversity and equity by program and level, comparisons between graduation and retention rates for diverse groups, and comparisons of student diversity to the diversity of the communities being served by the institution

3. **Employee diversity and employment equity**, e.g. through analysis of institutional data on diversity and equity by job level and classification, and comparisons between broad workforce diversity, faculty diversity, management diversity and the diversity of the communities being served by the institution

4. **Governance and public engagement**, e.g. by assessing access to and participation in governance on the part of underrepresented groups and women, the centrality of diversity and equity in planning and mission statements, and diversity and equity in public engagement efforts

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Support for Underrepresented Groups

Responsible Party

Dale Kochard
Asst Vice President
Community & Regional Affairs

Criteria

Part 1

Institution has mentoring, counseling, peer support, academic support, or other programs in place to support underrepresented groups on campus.

This credit excludes programs to help build a diverse faculty throughout higher education, which are covered in PA 7: Support for Future Faculty Diversity.

Part 2

Institution has a discrimination response policy, program and/or team (or the equivalent) to respond to and support those who have experienced or witnessed a bias incident, act of discrimination or hate crime.

"---" indicates that no data was submitted for this field

Does the institution have mentoring, counseling, peer support, academic support, or other programs to support underrepresented groups on campus?:

Yes

A brief description of the programs sponsored by the institution to support underrepresented groups:

The Office of Multicultural Affairs (OMA) serves as an integral resource, advocate, and vehicle of support for the Lehigh community on issues of multiculturalism and diversity. The OMA promotes a community aware of and sensitive to the multifaceted needs of Lehigh students. Identifying itself as an agent of transformation, the OMA challenges individuals to personally and communally grow, exploring multiculturalism and determining their unique role in achieving social justice. (http://studentaffairs.lehigh.edu/oma)

The Office of First-Year Experience (OFYE) provides students with resources and support during their first year at the University and plans orientation and events throughout the academic year to support first-year students’ living and learning experiences. The OFYE’s first-year programming, known as “evoLUtion,” promotes and introduces first-year students to issues of diversity, inclusion, and community. (}
Recognizing gender is a key element of identity, the Women’s Center creates gender equity within the Lehigh community. While the Women’s Center’s focus is traditionally on gender and gender violence issues, the office incorporate issues of diversity and inclusion into its programming. (http://studentaffairs.lehigh.edu/women)

The Graduate Life Office exists to enhance the academic, personal, and professional development of Lehigh graduate students through providing a range of programs, activities, events, and workshops related to diversity, inclusion and community. (http://gradlife.web.lehigh.edu/)

Lehigh Encourages Academic Partnerships for Success (LEAPS) Program: The LEAPS Program is a college access and retention program for students who have graduated from either the Milton Hershey School or the Reading Public Schools. Monthly workshops enable the students to build a sense of community while learning about the various on-campus and off-campus resources and services. Peer mentoring, interaction with key faculty and staff, and fields trips are additional significant elements of the LEAPS Program. Currently, there are more than sixty (60) LEAPS students at Lehigh University.

The Faculty and Staff of Color Network (FSCN) offers support and resources to welcome and foster a greater sense of community with faculty and staff of color on Lehigh’s campus. Goals and purpose of the group includes: building a supportive network of faculty and staff; providing professional development; hosting social events that increase networking and retention; and strengthening bridges to other institutions in the Lehigh Valley.

Lehigh University is one of seven 2010 recipients of an NSF ADVANCE Institutional Transformation Grant. Lehigh’s proposal “Building Community Beyond Academic Departments” focuses on harnessing the strengths of interdisciplinarity to enhance recruitment, retention, and the advancement of women faculty in Science, Technology, Engineering and Mathematics (STEM) fields at Lehigh. At Lehigh University, STEM includes the NSF funded disciplines of Biological Sciences, Chemistry, Earth and Environmental Sciences, Mathematics, Physics, Psychology, Sociology/Anthropology, Economics, and the disciplines within the College of Engineering. Lehigh ADVANCE will evaluate Lehigh's climate and policies, conduct social science research, and make recommendations for best practices to transform the University over the next five years.

The overarching goals of the grant are to:
- transform Lehigh through improved recruitment, retention, career satisfaction and leadership development of early- to mid-career women faculty in STEM.
- contribute to the national dialogue and social science scholarship by examining if interdisciplinary organization can create a critical mass and more equitable work environment for women STEM faculty if facilitated by vigorous search strategies, proactive evaluation policies, and mentoring and networking programs geared to interdisciplinary research and teaching.

LGBTQIA Programs and Outreach seeks to improve the Lehigh University climate by inspiring a vision of diversity that is aware of, engaged in, and appreciative of issues related to sexual orientation and gender identity/expression. We promote academic and personal growth and development of LGBTQIA students and promote access and full involvement in all aspects of campus life.
The creation of the Council for Equity and Community (CEC) was the initiative by President Gast to give increased attention and focus to issues related to diversity, equity, and inclusion at Lehigh and the means to address them in a systematic and coordinated manner. The 2008 inception of the CEC was a tangible and broad-based initiative that has been critical in shaping the dialog on diversity, equity, and inclusion at Lehigh. As CEC enters its sixth year, the university stands willing to strengthen the role and mission of CEC as well as make further advances in creating a more diverse and inclusive community.

Three key developments demonstrate Lehigh University’s commitment to the diversity effort and provide the beginnings of the infrastructure to promote and support diversity and inclusion on our campus: (1) the appointment of the new Vice Provost for Academic Diversity (VPAD), (2) the restructuring of the CEC, and (3) the Board of Trustee Subcommittee on Diversity and Inclusion charge to develop a diversity and inclusion action plan.

In our university community, the undercurrent for any work revolving around diversity and inclusion has been that no one office or individual is solely responsible for this work. Rather, as students, staff and faculty, we are all active participants in this endeavor and thus contribute to and benefit from this community of respect. CEC plays an important coordinating role to make this a reality.

Lehigh University welcomes students with disabilities and is committed to providing the same opportunities to all Lehigh students. Policies and procedures have been developed to provide students with as much independence as possible and to promote self-advocacy. At Disability Support Services, we work closely with students who self-identify in order to ensure equal access to University programs activities and services.

The website URL where more information about the support programs for underrepresented groups is available:
http://www4.lehigh.edu/diversity/default.aspx

Does the institution have a discrimination response policy and/or team (or the equivalent) to respond to and support those who have experienced or witnessed a bias incident, act of discrimination or hate crime?:
Yes

A brief description of the institution’s discrimination response policy, program and/or team:

At Lehigh, we take the health, safety and well-being of our students, faculty and staff very seriously. It is for these reasons the Bias Response Protocol (BRP) has been established for the university. The BRP document describes the role and purpose of the Bias Response Team (BRT), definitions of incidents addressed by the BRT, how to report a bias incident, and support services for Lehigh community members.

As part of the BRP, the University makes available an online incident reporting form. The purpose of the form is to notify the University that a bias incident has occurred. Community members that submit a report may identify themselves or they may report incidents anonymously. The information collected on the form helps the University respond to bias incidents impacting members of the University Community and to track the frequency and nature of such incidents.

Ombuds Office
Lehigh's Ombuds Office serves as a neutral, independent and informal conflict resolution resource and can help resolve problems or complaints within the University. The Ombuds Office is not an official intake point for complaint processes of the University and does not engage in fact-finding or make determinations about right and wrong. The Ombudspersons do not have administrative authority to impose disciplinary, remedial, or any other actions, on University faculty, staff, students or departments, nor to make specific changes within the institution.
Ethics Hotline
This secure and confidential hotline (610-758-2500) is available to all members of the Lehigh community (faculty, staff or students) to anonymously and confidentially report any concerns they have regarding the financial and operational aspects of the University. This would include financial or ethical concerns, fraud, conflicts of interest, and noncompliance with governmental or University requirements. All concerns are investigated. Information provided is kept confidential unless there are serious circumstances such as fraud or there are legal requirements that do not permit a guarantee of confidentiality.

Harassment
A member of the Lehigh University community or guest who believes that he or she has been subject to harassment, or any member of the University community who has knowledge of harassment incidents, is encouraged to confer promptly with one of the following key contact people for formal complaints or any member of the informal network:

Key Contact People for Formal Complaints, Informal Resolution of Complaints, or General Information

If you’re a student, please contact:

Sharon Basso, Dean of Students Office (sbr2@lehigh.edu) or 610 758-4156)
Rita Jones, Women’s Center (rmj207@lehigh.edu or 610 758-6484); or
Chris Mulvihill, Dean of Students Office (cjm9@lehigh.edu or 610 758-6598)

If you’re a staff or faculty member, please contact:

Lee Kern, Harassment Policy Officer (lek6@lehigh.edu or 610 758-3267)
Linda Parks, Human Resources (linda.parks@lehigh.edu or 610 758-5195)
Vincent Munley, Deputy Provost for Faculty Affairs (vgm0@lehigh.edu or 610 758-5923)
Judith Zavaltydriga, Human Resources (STARS Reporting Tool | AASHE)
The website URL where more information about the institution’s discrimination response policy, program and/or team is available:
---

Does the institution offer housing options to accommodate the special needs of transgender and transitioning students?:
---

Does the institution produce a publicly accessible inventory of gender neutral bathrooms on campus?:
---
Support for Future Faculty Diversity

Responsible Party

Angela Scott
Director of Academic Diversity and Outreach and Adjunct Professor
Academic Outreach, Provost's Office

Criteria

Institution administers and/or participates in a program or programs to help build a diverse faculty throughout higher education.

Such programs could take any of the following forms:

- Teaching fellowships or other programs to support terminal degree students from underrepresented groups in gaining teaching experience. (The terminal degree students may be enrolled at another institution.)
- Mentoring, financial, and/or other support programs to prepare and encourage undergraduate or other non-terminal degree students from underrepresented groups to pursue further education and careers as faculty members.
- Mentoring, financial, and/or other support programs for doctoral and post-doctoral students from underrepresented groups.

"---" indicates that no data was submitted for this field

Does the institution administer and/or participate in a program or programs to help build a diverse faculty that meet the criteria for this credit?:

No

A brief description of the institution’s programs that help increase the diversity of higher education faculty:

The university has been aggressive in diversifying faculty overall in several ways. At this time, there are no special separate initiatives for minority or diverse faculty at Lehigh University. As well, there are no separate teaching fellowships or programs for minority students.

The website URL where more information about the faculty diversity program(s) is available:

---
Affordability and Access

Criteria

Part 1

Institution has policies and programs in place to make it accessible and affordable to low-income students and/or to support non-traditional students. Such policies and programs may include, but are not limited to, the following:

- Policies and programs to minimize the cost of attendance for low-income students
- Programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds
- Programs to prepare students from low-income backgrounds for higher education (e.g. U.S. federal TRIO programs)
- Scholarships provided specifically for low-income students
- Programs to guide parents of low-income students through the higher education experience
- Targeted outreach to recruit students from low-income backgrounds
- Scholarships provided specifically for part-time students
- An on-site child care facility, a partnership with a local facility, and/or subsidies or financial support to help meet the child care needs of students

Part 2

Institution is accessible and affordable to low-income students as demonstrated by one or more of the following indicators:

A. The percentage of entering students that are low-income
B. The graduation/success rate for low-income students
C. The percentage of student financial need met, on average
D. The percentage of students graduating with no interest-bearing student loan debt

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Health, Wellbeing & Work

This subcategory seeks to recognize institutions that have incorporated sustainability into their human resources programs and policies. An institution’s people define its character and capacity to perform; and so, an institution’s achievements can only be as strong as its community. An institution can bolster the strength of its community by making fair and responsible investments in its human capital. Such investments include offering benefits, wages, and other assistance that serve to respectfully and ethically compensate workers and acting to protect and positively affect the health, safety and wellbeing of the campus community. Investment in human resources is integral to the achievement of a healthy and sustainable balance between human capital, natural capital, and financial capital.

</tr>
</tbody>
</table>
Employee Compensation

Criteria

Part 1

Institution’s employees and/or the employees of its on-site contractors are covered by sustainable compensation standards, guidelines, or policies and/or collective bargaining agreements.

A sustainable compensation (or “living wage”) standard, guideline or policy is one that addresses wages and benefits in terms of the ability of employees to meet basic needs. For example, a sustainable compensation policy may index hourly wages to a poverty guideline or to local cost-of-living indicators. A labor market survey, salary survey or similar assessment may be used in conjunction with a basic needs/cost-of-living approach, but is not sufficient on its own to count as a sustainable compensation policy.

Part 2

Institution’s employees and/or the employees of its on-site contractors receive sustainable compensation.

To earn points for Part 2 of this credit, an institution must assess employee compensation against one or more of the following:

1. A sustainable compensation standard developed or adopted by a committee with multi-stakeholder representation (i.e. its membership includes faculty, staff, and students and may include Human Resources administrators or other parties). The standard need not be formally adopted by the institution.
2. A sustainable compensation standard that is in use in the institution’s locality. The standard may be formal (e.g. a “living wage” ordinance covering public employees) or informal (e.g. a standard adopted by a local, regional or national campaign).
3. An appropriate poverty guideline, threshold or low-income cut-off for a family of four.

For institutions that elect to assess compensation against a poverty guideline, threshold or low-income cut-off, sustainable compensation is defined as wages equivalent to 120 percent of the poverty guideline for a family of four. An institution may offset up to 20 percent of the wage criteria with employer-paid benefits that address basic needs (e.g. healthcare and retirement contributions).

Both parts of this credit are based on the total number of employees working on campus as part of regular and ongoing campus operations, which includes:

- Staff and faculty, i.e. all regular full-time, regular part-time and temporary (or non-regular) employees, including adjunct faculty and graduate student employees (e.g. teaching and research assistants). Institutions may choose to include or omit undergraduate student workers.
- Employees of contractors that work on-site as part of regular and ongoing campus operations. Such contractors may include, but are not limited to, providers of dining/catering, cleaning/janitorial, maintenance, groundskeeping, transportation, and retail services.

Construction and demolition crews and other temporary contracted employees may be excluded.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Assessing Employee Satisfaction

Criteria

Institution conducts a survey or other evaluation that allows for anonymous feedback to measure employee satisfaction and engagement. The survey or equivalent may be conducted institution-wide or may be done by individual departments or divisions. The evaluation addresses (but is not limited to) the following areas:

- Job satisfaction
- Learning and advancement opportunities
- Work culture and work/life balance

The institution has a mechanism in place to address issues raised by the evaluation.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Wellness Program

Criteria

Institution has a wellness and/or employee assistance program that makes available counseling, referral, and wellbeing services to all members of any of the following groups:

- Students
- Staff
- Faculty

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Workplace Health and Safety

Criteria

Part 1

Institution has reduced its total number of reportable workplace injuries and occupational disease cases per full-time equivalent (FTE) employee compared to a baseline.

Part 2

Institution has fewer than 5 reportable workplace injuries and occupational disease cases annually per 100 full-time equivalent (FTE) employees.

This credit includes employees of contractors working on-site for whom the institution is liable for workplace safety, for example workers for whom the institution is mandated to report injuries and disease cases by a health and safety authority such as the U.S. Occupational Health and Safety Administration (OSHA) or the Canadian Center for Occupational Health and Safety (CCOHS). Injuries and disease cases include OSHA/CCOHS-reportable fatal and non-fatal injuries (or the equivalent) arising out of or in the course of work and cases of diseases arising from a work-related injury or the work situation or activity (e.g. exposure to harmful chemicals, stress, ergonomic issues). See Sampling and Data Standards, below, for further guidance on reporting injuries and disease cases.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
This subcategory seeks to recognize institutions that make investment decisions that promote sustainability. Most institutions invest some of their assets in order to generate income. Together, colleges and universities invest hundreds of billions of dollars. Schools with transparent and democratic investment processes promote accountability and engagement by the campus and community. Furthermore, institutions can support sustainability by investing in companies and funds that, in addition to providing a strong rate of return, are committed to social and environmental responsibility. Investing in these industries also supports the development of sustainable products and services. Finally, campuses can engage with the businesses in which they are invested in order to promote sustainable practices.

Throughout this subcategory, the term “sustainable investment” is inclusive of socially responsible, environmentally responsible, ethical, impact, and mission-related investment.

<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Committee on Investor Responsibility</td>
</tr>
<tr>
<td>Sustainable Investment</td>
</tr>
<tr>
<td>Investment Disclosure</td>
</tr>
</tbody>
</table>
Committee on Investor Responsibility

Criteria

Institution has a formally established and active committee on investor responsibility (CIR) or similar body that makes recommendations to fund decision-makers on socially and environmentally responsible investment opportunities across asset classes, including proxy voting. The body has multi-stakeholder representation, which means its membership includes faculty, staff, and students and may include alumni, trustees, and/or other parties.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

A general committee that oversees the institution’s investments does not count for this credit unless social and environmental responsibility is an explicit part of its mission and/or agenda.

This credit applies to institutions with endowments of US $1 million or larger. Institutions with endowments totaling less than US $1 million may choose to omit this credit.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Sustainable Investment

Criteria

There are two possible approaches to this credit; institutions may pursue one or both. Institutions for which investments are handled by the university system, a separate foundation of the institution and/or a management company contracted by the institution should report on the combined activities of those entities.

Option 1: Positive Sustainability Investment

Institution invests in one or more of the following:

- **Sustainable industries** (e.g. renewable energy or sustainable forestry). This may include any investment directly in an entire industry sector as well as holdings of companies whose entire business is sustainable (e.g. a manufacturer of wind turbines).

- **Businesses selected for exemplary sustainability performance** (e.g. using criteria specified in a sustainable investment policy). This includes investments made, at least in part, because of a company’s social or environmental performance. Existing stock in a company that happens to have socially or environmentally responsible practices should not be included unless the investment decision was based, at least in part, on the company’s sustainability performance.

- **Sustainability investment funds** (e.g. a renewable energy or impact investment fund). This may include any fund with a mission of investing in a sustainable sector or industry (or multiple sectors), as well as any fund that is focused on purchasing bonds with sustainable goals.

- **Community development financial institutions** (CDFI) or the equivalent (including funds that invest primarily in CDFIs or the equivalent).

- **Socially responsible mutual funds with positive screens** (or the equivalent). Investment in a socially responsible fund with only negative screens (i.e. one that excludes egregious offenders or certain industries, such as tobacco or weapons manufacturing) does not count for Option 1.

- **Green revolving loan funds** that are funded from the endowment

Option 2: Investor Engagement

Institution has policies and/or practices that meet one or more of the following criteria:

- Has a publicly available sustainable investment policy (e.g. to consider the social and/or environmental impacts of investment decisions in addition to financial considerations)

- Uses its sustainable investment policy to select and guide investment managers

- Has engaged in proxy voting to promote sustainability, either by its CIR or other committee or through the use of guidelines, during the previous three years

- Has filed or co-filed one or more shareholder resolutions that address sustainability or submitted one or more letters about social or environmental responsibility to a company in which it holds investments, during the previous three years

- Has a publicly available investment policy with negative screens, for example to prohibit investment in an industry (e.g. tobacco or weapons manufacturing) or participate in a divestment effort (e.g. targeting fossil fuel production or human rights violations)

- Engages in policy advocacy by participating in investor networks (e.g. Principles for Responsible Investment, Investor Network on Climate Risk, Interfaith Center on Corporate Responsibility) and/or engages in inter-organizational collaborations to share best practices

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Investment Disclosure

Criteria

Institution makes a snapshot of its investment holdings available to the public, including the amount invested in each fund and/or company and proxy voting records. The snapshot of holdings is updated at least once per year.

Institutions for which investments are handled by the university system, a separate foundation of the institution and/or a management company contracted by the institution should report on the combined activities of those entities.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Innovation

These credits recognize institutions that are seeking innovative solutions to sustainability challenges and demonstrating sustainability leadership in ways that are not otherwise captured by STARS.

Innovation 1

Criteria

1. Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.
2. In general, innovation credits should have roughly similar impacts or be on the same scale as other STARS credits.
3. Outcomes, policies, and practices that are innovative for the institution’s region or institution type are eligible for innovation credits.
4. The innovative practice, policy, program, or outcome must have occurred within the three years prior to the anticipated date of submission.
5. The innovative practice or program has to be something that the institution has already done; planned activities do not count.
6. The innovative practice or program should originate from an area within the defined institutional boundary.
7. An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted. An institution that has made significant advancements to a project or program that was previously submitted as an innovation may resubmit based on those advancements if the project or program is still considered innovative.
8. Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.
9. Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.
10. While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit. When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

To help ensure that the policy, practice, program, or outcome that the institution is claiming for an innovation credit is truly innovative, institutions must submit a letter of affirmation from an individual with relevant expertise in the associated content area. The letter should affirm how the innovation meets the criteria outlined above.

For example, if an institution claims an innovation credit for water use reduction, the institution might solicit a letter from a hydrologist or a water expert from another campus or organization to verify that the strategy is innovative. An innovation may be affirmed internally by campus personnel who are independent of the policy, practice, program, or outcome. Please note that it is not required that the individual be employed in the higher education sector to submit a letter of verification.

The letter should be specific to a single innovation credit. If an institution is claiming three innovation credits, it would solicit and submit three separate letters, with each letter speaking to the specific innovation credit it addresses.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Innovation 2

Criteria

1. Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2. In general, innovation credits should have roughly similar impacts or be on the same scale as other STARS credits.

3. Outcomes, policies, and practices that are innovative for the institution’s region or institution type are eligible for innovation credits.

4. The innovative practice, policy, program, or outcome must have occurred within the three years prior to the anticipated date of submission.

5. The innovative practice or program has to be something that the institution has already done; planned activities do not count.

6. The innovative practice or program should originate from an area within the defined institutional boundary.

7. An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted. An institution that has made significant advancements to a project or program that was previously submitted as an innovation may resubmit based on those advancements if the project or program is still considered innovative.

8. Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

9. Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

10. While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit. When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

To help ensure that the policy, practice, program, or outcome that the institution is claiming for an innovation credit is truly innovative, institutions must submit a letter of affirmation from an individual with relevant expertise in the associated content area. The letter should affirm how the innovation meets the criteria outlined above.

For example, if an institution claims an innovation credit for water use reduction, the institution might solicit a letter from a hydrologist or a water expert from another campus or organization to verify that the strategy is innovative. An innovation may be affirmed internally by campus personnel who are independent of the policy, practice, program, or outcome. Please note that it is not required that the individual be employed in the higher education sector to submit a letter of verification.

The letter should be specific to a single innovation credit. If an institution is claiming three innovation credits, it would solicit and submit three separate letters, with each letter speaking to the specific innovation credit it addresses.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Innovation 3

Criteria

1. Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2. In general, innovation credits should have roughly similar impacts or be on the same scale as other STARS credits.

3. Outcomes, policies, and practices that are innovative for the institution’s region or institution type are eligible for innovation credits.

4. The innovative practice, policy, program, or outcome must have occurred within the three years prior to the anticipated date of submission.

5. The innovative practice or program has to be something that the institution has already done; planned activities do not count.

6. The innovative practice or program should originate from an area within the defined institutional boundary.

7. An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted. An institution that has made significant advancements to a project or program that was previously submitted as an innovation may resubmit based on those advancements if the project or program is still considered innovative.

8. Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

9. Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

10. While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit. When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

To help ensure that the policy, practice, program, or outcome that the institution is claiming for an innovation credit is truly innovative, institutions must submit a letter of affirmation from an individual with relevant expertise in the associated content area. The letter should affirm how the innovation meets the criteria outlined above.

For example, if an institution claims an innovation credit for water use reduction, the institution might solicit a letter from a hydrologist or a water expert from another campus or organization to verify that the strategy is innovative. An innovation may be affirmed internally by campus personnel who are independent of the policy, practice, program, or outcome. Please note that it is not required that the individual be employed in the higher education sector to submit a letter of verification.

The letter should be specific to a single innovation credit. If an institution is claiming three innovation credits, it would solicit and submit three separate letters, with each letter speaking to the specific innovation credit it addresses.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Innovation 4

Criteria

1. Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.
2. In general, innovation credits should have roughly similar impacts or be on the same scale as other STARS credits.
3. Outcomes, policies, and practices that are innovative for the institution’s region or institution type are eligible for innovation credits.
4. The innovative practice, policy, program, or outcome must have occurred within the three years prior to the anticipated date of submission.
5. The innovative practice or program has to be something that the institution has already done; planned activities do not count.
6. The innovative practice or program should originate from an area within the defined institutional boundary.
7. An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted. An institution that has made significant advancements to a project or program that was previously submitted as an innovation may resubmit based on those advancements if the project or program is still considered innovative.
8. Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.
9. Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.
10. While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit. When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

To help ensure that the policy, practice, program, or outcome that the institution is claiming for an innovation credit is truly innovative, institutions must submit a letter of affirmation from an individual with relevant expertise in the associated content area. The letter should affirm how the innovation meets the criteria outlined above.

For example, if an institution claims an innovation credit for water use reduction, the institution might solicit a letter from a hydrologist or a water expert from another campus or organization to verify that the strategy is innovative. An innovation may be affirmed internally by campus personnel who are independent of the policy, practice, program, or outcome. Please note that it is not required that the individual be employed in the higher education sector to submit a letter of verification.

The letter should be specific to a single innovation credit. If an institution is claiming three innovation credits, it would solicit and submit three separate letters, with each letter speaking to the specific innovation credit it addresses.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
