 Academics

Curriculum

This subcategory seeks to recognize institutions that have formal education programs and courses that address sustainability. One of the primary functions of colleges and universities is to educate students. By training and educating future leaders, scholars, workers, and professionals, higher education institutions are uniquely positioned to prepare students to understand and address sustainability challenges. Institutions that offer courses covering sustainability issues help equip their students to lead society to a sustainable future.

Academic Courses

Criteria

Part 1

Institution offers sustainability courses and/or courses that include sustainability and makes an inventory of those courses publicly available.

Part 2

Institution’s academic departments (or the equivalent) offer sustainability courses and/or courses that include sustainability.

In order to report and earn points for this credit, the institution must conduct a course inventory. The inventory should consist of two parts:

1) An inventory of sustainability courses that includes, at minimum, the title, department (or equivalent), and level of each course (i.e. undergraduate or graduate), as well as a brief description if the sustainability focus of the course is not apparent from its title

2) An inventory of other courses that include sustainability. The inventory includes, at minimum, the title, department (or the equivalent), and level of each course and a description of how sustainability is integrated into each course.

A course may be a sustainability course or it may include sustainability; no course should be identified as both:

- A sustainability course is a course in which the primary and explicit focus is on sustainability and/or on understanding or solving one or more major sustainability challenge (e.g. the course contributes toward achieving principles outlined in the Earth Charter).

- A course that includes sustainability is primarily focused on a topic other than sustainability, but incorporates a unit or module on sustainability or a sustainability challenge, includes one or more sustainability-focused activities, or integrates sustainability issues throughout the course.

For guidance on conducting a course inventory and distinguishing between sustainability courses and courses that include sustainability, see Standards and Terms and the Credit Example in the STARS Technical Manual. An institution that has developed a more refined approach to course classification may use that approach as long as it is consistent with the definitions and guidance provided.

Each institution is free to choose a methodology to identify sustainability courses that is most appropriate given its unique circumstances. Asking faculty and departments to self-identify sustainability courses and courses that include sustainability using the definitions outlined in Standards and Terms or looking at the stated learning outcomes and course objectives associated with each course may provide a richer view of sustainability course offerings than simply reviewing course descriptions, but it is not required.

This credit does not include continuing education and extension courses, which are covered by EN 11: Continuing Education.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Learning Outcomes

Responsible Party

Emile Netzhammer
Provost
Academic Affairs

Criteria

Institution’s students graduate from degree programs that include sustainability as a learning outcome or include multiple sustainability learning outcomes. Sustainability learning outcomes (or the equivalent) may be specified at:

- Institution level (e.g. covering all students)
- Division level (e.g. covering one or more schools or colleges within the institution)
- Program level
- Course level

This credit includes graduate as well as undergraduate programs. For this credit, “degree programs” include majors, minors, concentrations, certificates, and other academic designations. Extension certificates and other certificates that are not part of academic degree programs do not count for this credit; they are covered in EN 11: Continuing Education. Programs that include co-curricular aspects may count as long as there is an academic component of the program. Learning outcomes at the course level count if the course is required to complete the program.

This credit is inclusive of learning outcomes, institutional learning goals, general education outcomes, and graduate profiles that are consistent with the definition of “sustainability learning outcomes” included in Standards and Terms.

Institutions that do not specify learning outcomes as a matter of policy or standard practice may report graduates from sustainability-focused programs (i.e. majors, minors, concentrations and the equivalent as reported for AC 3: Undergraduate Program and AC 4: Graduate Program) in lieu of the above criteria.

"---” indicates that no data was submitted for this field

Number of students who graduated from a program that has adopted at least one sustainability learning outcome:
48

Total number of graduates from degree programs:
1,212

A copy of the list or inventory of degree, diploma or certificate programs that have sustainability learning outcomes:
green courses offered 2010-2012.xlsx

A list of degree, diploma or certificate programs that have sustainability learning outcomes:
Architecture
Environmental Studies
Sustainable Product Design
International Studies (minor)

A list or sample of the sustainability learning outcomes associated with degree, diploma or certificate programs (if not included in an inventory above):

The Sustainable Product Design and Innovation major at Keene State College is a pre-professional four-year program offering a cross-disciplinary curriculum to give the student a solid foundation in the artistic, scientific, and technical aspects of product design and the social and scientific aspects of sustainability concerns.

The website URL where information about the institution’s sustainability learning outcomes is available:

---
Undergraduate Program

Responsible Party

Emile Netzhammer
Provost
Academic Affairs

Criteria

Institution offers at least one:

- Sustainability-focused program (major, degree program, or equivalent) for undergraduate students

And/or

- Undergraduate-level sustainability-focused minor or concentration (e.g. a concentration on sustainable business within a business major).

Extension certificates and other certificates that are not part of academic degree programs do not count for this credit; they are covered in EN 11: Continuing Education.

"---" indicates that no data was submitted for this field

Does the institution offer at least one sustainability-focused major, degree program, or the equivalent for undergraduate students?:

Yes

The name and website URLs of all other graduate-level, sustainability-focused minors, concentrations and certificates:
---
Immersive Experience

Responsible Party

Skye Stephenson
Director, Global Education Office
Global Education Office

Criteria

Institution offers at least one immersive, sustainability-focused educational study program. The program is one week or more in length and may take place off-campus, overseas, or on-campus.

For this credit, the program must meet one or both of the following criteria:

- It concentrates on sustainability, including its social, economic, and environmental dimensions

  And/or

- It examines an issue or topic using sustainability as a lens.

For-credit programs, non-credit programs and programs offered in partnership with outside entities may count for this credit. Programs offered exclusively by outside entities do not count for this credit.

See the Credit Example in the STARS Technical Manual for further guidance.

Does the institution offer at least one immersive, sustainability-focused educational study program that meets the criteria for this credit?:
Yes

A brief description of the sustainability-focused immersive program(s) offered by the institution:

KSC offers a number of study away immersion programs. Below is a link to the Summer 2011 courses, with brief descriptions.

The website URL where information about the immersive program(s) is available:
http://www.keene.edu/niec/forms/summer_program_2011.pdf
Sustainability Literacy Assessment

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution conducts an assessment of the sustainability literacy of its students. The sustainability literacy assessment focuses on knowledge of sustainability topics and may also address values, behaviors and/or beliefs. Assessments that focus exclusively on values, behaviors and/or beliefs are not sufficient to earn points for this credit.

Institution may conduct a follow-up assessment of the same cohort group(s) using the same instrument.

This credit includes graduate as well as undergraduate students.

"---" indicates that no data was submitted for this field

The percentage of students assessed for sustainability literacy (directly or by representative sample) and for whom a follow-up assessment is conducted:

---

The percentage of students assessed for sustainability literacy (directly or by representative sample) without a follow-up assessment:

---

A copy of the questions included in the sustainability literacy assessment(s):

---

The questions included in the sustainability literacy assessment(s):

---

A brief description of how the assessment(s) were developed:

---

A brief description of how the assessment(s) were administered:

---
A brief summary of results from the assessment(s):

---

The website URL where information about the literacy assessment(s) is available:

---
Incentives for Developing Courses

Criteria

Institution has an ongoing program or programs that offer incentives for faculty in multiple disciplines or departments to develop new sustainability courses and/or incorporate sustainability into existing courses or departments. The program specifically aims to increase student learning of sustainability.

Incentives may include release time, funding for professional development, and trainings offered by the institution.

Incentives for expanding sustainability offerings in academic, non-credit, and/or continuing education courses count for this credit.

"---" indicates that no data was submitted for this field

Does the institution have an ongoing incentives program or programs that meet the criteria for this credit?:

No

A brief description of the program(s), including positive outcomes during the previous three years:

---

A brief description of the incentives that faculty members who participate in the program(s) receive:

---

The website URL where information about the incentive program(s) is available:

---
Campus as a Living Laboratory

Criteria

Institution is utilizing its infrastructure and operations for multidisciplinary student learning, applied research and practical work that advances sustainability on campus in at least one of the following areas:

- Air & Climate
- Buildings
- Dining Services/Food
- Energy
- Grounds
- Purchasing
- Transportation
- Waste
- Water
- Coordination, Planning & Governance
- Diversity & Affordability
- Health, Wellbeing & Work
- Investment
- Public Engagement
- Other

This credit includes substantive work by students and/or faculty (e.g. class projects, thesis projects, term papers, published papers) that involves active and experiential learning and contributes to positive sustainability outcomes on campus (see the Credit Example in the STARS Technical Manual). On-campus internships and non-credit work (e.g. that take place under supervision of sustainability staff or committees) may count as long as the work has a learning component.

This credit does not include immersive education programs, co-curricular activities, or community-based work, which are covered by AC 5: Immersive Experience, credits in the Campus Engagement subcategory, and credits in the Public Engagement subcategory, respectively.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Research

This subcategory seeks to recognize institutions that are conducting research on sustainability topics. Conducting research is a major function of many colleges and universities. By researching sustainability issues and refining theories and concepts, higher education institutions can continue to help the world understand sustainability challenges and develop new technologies, strategies, and approaches to address those challenges.

<table>
<thead>
<tr>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Academic Research</td>
</tr>
<tr>
<td>Support for Research</td>
</tr>
<tr>
<td>Access to Research</td>
</tr>
</tbody>
</table>
Academic Research

Criteria

Part 1

Institution’s faculty and/or staff conduct sustainability research and the institution makes an inventory of its sustainability research publicly available.

Part 2

Institution’s academic departments (or the equivalent) include faculty and staff who conduct sustainability research.

Any level of sustainability research is sufficient to be included for this credit. In other words, a researcher who conducts both sustainability research and other research may be included.

In order to report for this credit, the institution should conduct an inventory to identify its sustainability research activities and initiatives.

Each institution is free to choose a methodology to identify sustainability research that is most appropriate given its unique circumstances. For example, an institution may distribute a survey to all faculty members and ask them to self-identify as being engaged in sustainability research or ask the chairperson of each department to identify the sustainability research activities within his or her department. The research inventory should be based on the definition of “sustainability research” outlined in Standards and Terms and include, at minimum, all research centers, laboratories, departments, and faculty members whose research focuses on or is related to sustainability.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Support for Research

Criteria

Institution encourages and/or supports sustainability research through one or more of the following:

• An ongoing program to encourage students in multiple disciplines or academic programs to conduct research in sustainability. The program provides students with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and mentorships. The program specifically aims to increase student sustainability research.

• An ongoing program to encourage faculty from multiple disciplines or academic programs to conduct research in sustainability topics. The program provides faculty with incentives to research sustainability. Such incentives may include, but are not limited to, fellowships, financial support, and faculty development workshops. The program specifically aims to increase faculty sustainability research.

• Formally adopted policies and procedures that give positive recognition to interdisciplinary, transdisciplinary, and multidisciplinary research during faculty promotion and/or tenure decisions.

• Ongoing library support for sustainability research and learning in the form of research guides, materials selection policies and practices, curriculum development efforts, sustainability literacy promotion, and e-learning objects focused on sustainability.

"---" indicates that no data was submitted for this field

Does the institution have a program to encourage student sustainability research that meets the criteria for this credit?:

---

A brief description of the institution’s program(s) to encourage student research in sustainability:

---

The website URL where information about the student research program is available:

---

Does the institution have a program to encourage faculty sustainability research that meets the criteria for this credit?:

No

A brief description of the institution’s program(s) to encourage faculty research in sustainability:

---

The website URL where information about the faculty research program is available:

---

Has the institution formally adopted policies and procedures that give positive recognition to interdisciplinary,
transdisciplinary, and multidisciplinary research during faculty promotion and/or tenure decisions?

A brief description or the text of the institution’s policy regarding interdisciplinary research:

The website URL where information about the treatment of interdisciplinary research is available:

Does the institution provide ongoing library support for sustainability research and learning that meets the criteria for this credit?

A brief description of the institution's library support for sustainability research and learning:

The website URL where information about the institution's library support for sustainability is available:
Criteria

Institution has a formally adopted open access policy that ensures that versions of all future scholarly articles by faculty and staff and all future theses and dissertations are deposited in a designated open access repository.

The open access repository may be managed by the institution or the institution may participate in a consortium with a consortial and/or outsourced open access repository.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
**Engagement**

**Campus Engagement**

This subcategory seeks to recognize institutions that provide their students with sustainability learning experiences outside the formal curriculum. Engaging in sustainability issues through co-curricular activities allows students to deepen and apply their understandings of sustainability principles. Institution-sponsored co-curricular sustainability offerings, often coordinated by student affairs offices, help integrate sustainability into the campus culture and set a positive tone for the institution.

In addition, this subcategory recognizes institutions that support faculty and staff engagement, training, and development programs in sustainability. Faculty and staff members’ daily decisions impact an institution’s sustainability performance. Equipping faculty and staff with the tools, knowledge, and motivation to adopt behavior changes that promote sustainability is an essential activity of a sustainable campus.

### Criteria

Institution coordinates an ongoing peer-to-peer sustainability outreach and education program for degree-seeking students. The institution:

- Selects or appoints students to serve as educators and formally designates the students as educators (paid and/or volunteer),
- Provides formal training to the educators in how to conduct outreach, and
- Offers faculty or staff and/or other financial support to the program.

This credit focuses on programs for degree-seeking students enrolled in a for-credit program. Continuing education and/or non-credit students are excluded from this credit.

This credit recognizes ongoing student educator programs that engage students on a regular basis. For example, student educators may be responsible for serving (i.e. directly targeting) a particular subset of students, such as those living in residence halls or enrolled in certain academic subdivisions. Thus, a group of students may be served by a program even if not all of these students avail themselves of the outreach and education offerings.

Sustainability outreach campaigns, sustainability events, and student clubs or groups are not eligible for this credit unless the criteria outlined above are met. These programs are covered by EN 5: Outreach Campaign and EN 3: Student Life.

---

Does the institution coordinate one or more ongoing student, peer-to-peer sustainability outreach and education programs that meet the criteria for this credit?:

---

**Number of degree-seeking students enrolled at the institution:**

4,923

**Name of the student educators program (1st program):**

KSC Eco-Reps

**Number of students served (i.e. directly targeted) by the program (1st program):**

4,923
A brief description of the program, including examples of peer-to-peer outreach activities (1st program):

This is a curriculum based program, with chapters on water, energy, recycling, society and economy and food. Eco-Reps are responsible for one outreach event per month (in small groups or as individuals), focused on first year halls. They also must find and maintain a bulletin board or other display area each semester. In Fall 2013 students did water tastings (tap vs. britta vs. bottled water), organic and local food tastings, recycled materials craft nights and a first year residence hall energy competition. Where possible, we are collaborating with resident assistants and resident directors.

A brief description of how the student educators are selected (1st program):

Students apply through the student employment system and can be either work study or student hourly.

We try to hire students from each of the first year residence halls and we use a questionnaire, application and interview process. We ask the returning Eco-reps to review the applications and help determine who might be the best candidates for the jobs.

A brief description of the formal training that the student educators receive (1st program):

We use Blackboard - the college's online student portal program - extensively. There is an introduction and chapters on each topic (energy, waste, etc). There are suggested activities, suggested additional readings and program check lists. The curriculum was developed using templates from other Colleges and Universities and is reviewed and updated each year.

We meet twice a month in group meetings. Additionally, students sign up for office hours where they plan events, do publicity and collaborate on projects.

A brief description of the financial or other support the institution provides to the program (1st program):

Program is staffed by the Campus Sustainability Officer with assistance from the Campus Recycling Coordinator. Funding comes from the Physical Plant administrative budget. We have a work room near the Sustainability/Recycling offices (known as ROCKS) for students to use during office hours, that also houses project materials and other accoutrements for the program.

Name of the student educators program (2nd program):

---

Number of students served (i.e. directly targeted) by the program (2nd program):

Total number of hours student educators are engaged in peer-to-peer sustainability outreach and education activities annually:
---

The website URL for the peer-to-peer student outreach and education program(s):
---
Student Orientation

Criteria

Institution includes sustainability prominently in its student orientation activities and programming. Sustainability activities and programming are intended to educate about the principles and practices of sustainability. The topics covered include multiple dimensions of sustainability (i.e. social, environmental and economic).

Because orientation activities vary from one institution to another, prominent inclusion of sustainability may not take the same form on each campus. Prominent inclusion of sustainability may also take different forms for different types of students (e.g. undergraduate students, transfer students, graduate students). When reporting for this credit, each institution will determine what prominent inclusion of sustainability means given its particular context. (See the Credit Example in the STARS Technical Manual.)

As this credit is intended to recognize programming and student learning about sustainability, incorporating sustainability strategies into event planning (e.g. making recycling bins accessible or not serving bottled water) is not, in and of itself, sufficient for this credit. Such strategies may count if they are highlighted and are part of the educational offerings. For example, serving local food would not, in and of itself, be sufficient for this credit; however, serving local food and providing information about sustainable food systems during meals could contribute to earning this credit.

---

The percentage of entering students that are provided an opportunity to participate in orientation activities and programming that prominently include sustainability:

---

A brief description of how sustainability is included prominently in new student orientation:

Workshops are offered as part of the new student orientation, featuring information about the Sustainable activities on campus and in the community. In addition, blue bags for recycling are put in every residence hall room, with printed information about the recycling program and energy efficiency. There is also a new student scavenger hunt. The recycling and sustainability office are part of the scavenger hunt. We do a display, giveaways and a brief introduction to the programs.

---

The website URL where information about sustainability in student orientation is available:

---

"---" indicates that no data was submitted for this field
Student Life

Criteria

Institution has co-curricular sustainability programs and initiatives. The programs and initiatives fall into one or more of the following categories:

- Active student groups focused on sustainability
- Gardens, farms, community supported agriculture (CSA) or fishery programs, and urban agriculture projects where students are able to gain experience in organic agriculture and sustainable food systems
- Sustainable enterprises that include sustainability as part of their mission statements or stated purposes (e.g. cafés through which students gain sustainable business skills)
- Sustainable investment funds, green revolving funds or sustainable microfinance initiatives through which students can develop socially, environmentally and fiscally responsible investment and financial skills
- Conferences, speaker series, symposia or similar events related to sustainability that have students as the intended audience
- Cultural arts events, installations or performances related to sustainability that have students as the intended audience
- Wilderness or outdoors programs (e.g. that organize hiking, backpacking, kayaking, or other outings for students and follow Leave No Trace principles)
- Sustainability-related themes chosen for themed semesters, years, or first-year experiences (e.g. choosing a sustainability-related book for common reading)
- Programs through which students can learn sustainable life skills (e.g. a series of sustainable living workshops, a model room in a residence hall that is open to students during regular visitation hours and demonstrates sustainable living principles, or sustainability-themed housing where residents and visitors learn about sustainability together)
- Sustainability-focused student employment opportunities offered by the institution
- Graduation pledges through which students pledge to consider social and environmental responsibility in future job and other decisions
- Other co-curricular sustainability programs and initiatives

Multiple programs and initiatives may be reported for each category and each category may include institution-governed and/or student-governed programs.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Outreach Materials and Publications

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution produces outreach materials and/or publications that foster sustainability learning and knowledge. The publications and outreach materials may include the following:

- A central sustainability website that consolidates information about the institution’s sustainability efforts
- A sustainability newsletter
- Social media platforms (e.g. Facebook, Twitter, interactive blogs) that focus specifically on campus sustainability
- A vehicle to publish and disseminate student research on sustainability
- Building signage that highlights green building features
- Food service area signage and/or brochures that include information about sustainable food systems
- Signage on the grounds about sustainable groundskeeping and/or landscaping strategies employed
- A sustainability walking map or tour
- A guide for commuters about how to use alternative methods of transportation
- Navigation and educational tools for bicyclists and pedestrians (e.g. covering routes, inter-modal connections, policies, services, and safety)
- A guide for green living and incorporating sustainability into the residential experience
- Regular coverage of sustainability in the main student newspaper, either through a regular column or a reporter assigned to the sustainability beat
- Other

A single outreach material or publication that serves multiple purposes may be counted more than once. For example, a sustainability website that includes tools for bicyclists and pedestrians may be counted in both categories.

Submission Note:

Additional website used to publish some KSC research.

**A brief description of the central sustainability website:**

We have the main website, listed below, which has information about the college's sustainability efforts. The Recycling Program has a separate website, with additional information about those programs.
The website URL for the central sustainability website:
http://www.keene.edu/sustain/

A brief description of the sustainability newsletter:
We have a blog, called the Compost, which features upcoming events, activities of interest and human interest stories.

The website URL for the sustainability newsletter:
http://sites.keene.edu/thecompost/

A brief description of the social media platforms that focus specifically on campus sustainability:
---

The website URL of the primary social media platform that focuses on sustainability:
---

A brief description of the vehicle to publish and disseminate student research on sustainability:
Each year, the campus holds an academic symposium to promote academic research, including research on sustainability related topics. The event, typically held in April, is a weekend long showcase of some of the best research on campus. Last year's Academic Showcase featured sustainability topics such as:
- TRANSMISSION ELECTRON MICROSCOPE ANALYSIS OF PARTICLE SIZE AND FRACTAL DIMENSION FROM BIODIESEL AND DIESEL FUEL COMBUSTION
- THE INFLUENCE OF THE RECESSION OF THE PASTERZE GLACIER ON WATER DISCHARGE USED FOR HYDRO-POWER PRODUCTION
- ADDRESSING FOOD INSECURITY: HELPING YOUNG STUDENTS GROW FOOD HYDROPONICALLY
- TOWING THE LINE OF PRIVILEGE: INCARCERATED WHITE MEN AND THE CARCERAL LOGICS OF RACISM, SEXISM, AND HOMOPHOBIA
- GENDER, RACE, AND AFRICAN AMERICAN WRITING
- VENTURING INTO VEGANISM: AN ETHNOGRAPHIC STUDY OF VEGAN CULTURE

The website URL for the vehicle to publish and disseminate student research on sustainability:
http://www.keene.edu/grants/eg_ugr_at_ksc.cfm

A brief description of building signage that highlights green building features:
Lucid technologies display in lobby of newest LEED (platinum) building.

The website URL for building signage that highlights green building features:
http://www.keene.edu/featured/tds/tds-photos/
A brief description of food service area signage and/or brochures that include information about sustainable food systems:

The dining commons features signage indicating local foods and signage with nutrition information (serving size, fat, sodium and other content information). The food "court" has posters highlighting many of the sustainable practices including compostable disposal-ware, reusable mugs and regional foods.

The website URL for food service area signage and/or brochures that include information about sustainable food systems:

---

A brief description of signage on the grounds about sustainable groundskeeping and/or landscaping strategies:

---

The website URL for signage on the grounds about sustainable groundskeeping and/or landscaping strategies:

---

A brief description of the sustainability walking map or tour:

The Grounds Supervisor and lead gardener conduct tree walks on campus for classes on an off campus, several times a year. Our campus has a unique and interesting tree inventory

The Sustainability Officer leads sustainability tours for Environmental Studies and Integrated Studies classes several times a year. Those tours take students through the buildings and grounds, highlighting our sustainable features and encouraging students to pay attention to their surroundings.

The website URL of the sustainability walking map or tour:

http://www.keene.edu/aboutksc/arboretum.cfm

A brief description of the guide for commuters about how to use alternative methods of transportation:

---

The website URL for the guide for commuters about how to use alternative methods of transportation:

Outreach Campaign

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Part 1

Institution holds at least one sustainability-related outreach campaign directed at students that yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution, a student organization, or students in a course.

Part 2

Institution holds at least one sustainability-related outreach campaign directed at employees that yields measurable, positive results in advancing sustainability. The sustainability-related outreach campaign may be conducted by the institution or an employee organization.

The campaign(s) reported for this credit could take the form of a competition (e.g. a residence hall conservation competition), a rating or certification program (e.g. a green labs or green office program), and/or a collective challenge (e.g. a campus-wide drive to achieve a specific sustainability target). A single campus-wide campaign may meet the criteria for both parts of this credit if educating students is a prime feature of the campaign and it is directed at both students and employees.

To measure if a campaign yields measurable, positive results, institutions should compare pre-campaign performance to performance during or after the campaign. The following impacts are not sufficient for this credit:

- Increased awareness
- Additional members of a mailing list or group

Submission Note:

We have also been creating nutrition and food related videos in conjunction with the Health and Wellness Office and students from the film studies program. Here's a sample.
http://www.youtube.com/watch?v=lYZ_SZa-hDA

"---” indicates that no data was submitted for this field

Has the institution held at least one sustainability-related outreach campaign directed at students within the previous three years that has yielded measurable, positive results in advancing sustainability?:

Yes
Has the institution held at least one sustainability-related outreach campaign directed at employees within the previous three years that has yielded measurable, positive results in advancing sustainability?:

---

The name of the campaign (1st campaign):
The "Carrot" Campaign (reducing food waste)

A brief description of the campaign (1st campaign):
Dining services at KSC are managed by the Sodexo Group. They partnered with the Office of Sustainability Programs (OSP) to look for ways to reduce food waste in the dining commons, starting in the 2010/2011 school year.

Sodexo measured and reduced their food waste behind the serving tables. The ROCKS program did a full analysis of the waste profile in spring 2012 and the Sodexo team used that information to adjust their processes. The OSP collected plate waste in the dining room for three or four consecutive weeks in each semester since. We displayed posters with the wasted food amounts and gave out buttons or stickers for those who had no food waste.

The Eco-Rep plate waste audits in each semester have introduced new students and reminded returning students about reducing plate waste. The large paper mache and wire carrot came down in Spring 2013 for repair and cleaning and is scheduled to return spring 2014.

A brief description of the measured positive impact(s) of the campaign (1st campaign):
The dining commons waste has shown significant reductions with a reduction of 100 tons between the 2010 and the 2013 fiscal year totals. We saw significant food waste reductions from the first week to the third while doing the plate waste audits.

In addition, students were actively telling us, while we were doing the audits, that they felt guilty not finishing their food, some even sitting down and finishing their food when they saw us. We are trying not to encourage overeating as an unintended consequence of this work. Returning students have requested the return of the carrot.

---

A brief description of other outreach campaigns, including measured positive impacts:
---
Employee Educators Program

Criteria

Institution administers or oversees an ongoing faculty/staff peer-to-peer sustainability outreach and education program.

In the program, employee sustainability educators are formally designated and receive formal training or participate in an institution-sponsored orientation. The institution offers financial or other support to the program.

This credit recognizes ongoing programs that engage employees on a regular basis. For example, employee educators may represent or be responsible for engaging workers in certain departments or buildings. Thus, a group of employees may be served (i.e. directly targeted) by a program even if not all of these employees avail themselves of the outreach and education offerings.

Training and/or professional development opportunities in sustainability for staff are excluded from this credit. These activities are covered in EN 8: Staff Professional Development.

---

"---" indicates that no data was submitted for this field

Does the institution administer or oversee an ongoing faculty/staff peer-to-peer sustainability outreach and education program that meets the criteria for this credit?:
---

Total number of employees:

---
Employee Orientation

Responsible Party

Kim Harkness
Director of Human Resources
Human Resources

Criteria

Institution covers sustainability topics in new employee orientation and/or in outreach and guidance materials distributed to new employees, including faculty and staff. The topics covered include multiple dimensions of sustainability (i.e. social, environmental and economic).

"---" indicates that no data was submitted for this field

The percentage of new employees that are offered orientation and/or outreach and guidance materials that cover sustainability topics:

---

A brief description of how sustainability is included in new employee orientation:

All new full-time benefited hires are given a brief overview of Sustainability practices, including a reusable bag and mug. A new program has started with the Sustainability Officer meeting once a month with new hires and presenting a more comprehensive overview of the Sustainability actions and activities on campus.

The website URL where information about sustainability in new employee orientation is available:

---
Staff Professional Development

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution makes available training and/or other professional development opportunities in sustainability to all staff at least once per year.

Separate training opportunities for each department would count for this credit, as long as each staff member has an opportunity to learn about sustainability at least once per year. It is not necessary that each staff member attend such trainings; the credit is based on making training available to all staff.

This credit applies to staff members only; it does not include faculty members.

The following training opportunities are not sufficient for this credit:

- Specialized training for a small group of staff
- The opportunity to participate in an institutional sustainability committee or group

"---" indicates that no data was submitted for this field

Does the institution make available training and/or other professional development opportunities in sustainability to all staff at least once per year?:

Yes

A brief description of the sustainability trainings and professional development opportunities available to staff :

Each year the campus holds two "training" days. One called Founders Day and the other Professional Development Day. All employees are encouraged to participate in these training days. The Campus Sustainability Officer is invited to lead a workshop on a Sustainability topic each year.

The percentage of staff that participated in training and/or other professional development opportunities in sustainability during the previous year:

---

The website URL where information about staff training opportunities in sustainability is available:

---
Public Engagement

This subcategory seeks to recognize institutions that help catalyze sustainable communities through public engagement, community partnerships and service. Engagement in community problem-solving is fundamental to sustainability. By engaging with community members and organizations in the governmental, non-profit and for-profit sectors, institutions can help solve sustainability challenges. Community engagement can help students develop leadership skills while deepening their understandings of practical, real-world problems and the process of creating solutions. Institutions can contribute to their communities by harnessing their financial and academic resources to address community needs and by engaging community members in institutional decisions that affect them. In addition, institutions can contribute toward sustainability broadly through inter-campus collaboration, engagement with external networks and organizations, and public policy advocacy.

<table>
<thead>

</table>
## Community Partnerships

### Responsible Party

**Mary Jensen**  
Campus Sustainability Officer  
Finance and Planning

### Criteria

Institution has one or more formal partnership(s) with the local community, including school districts, government agencies, non-profit organizations, businesses and/or other entities, to work together to advance sustainability within the community.

Each partnership conforms to one of the following types:

<table>
<thead>
<tr>
<th>Type of Partnership</th>
<th>Indicators</th>
</tr>
</thead>
</table>
| A. Supportive | - **Scope**: Addresses a sustainability topic or a specific aspect of sustainability (e.g. community garden, environmental remediation, community environmental health and education)  
- **Duration**: May be time-limited (short-term projects and events), multi-year, or ongoing  
- **Commitment**: Institutional involvement may include financial and/or staff support or may be limited to resource sharing and/or endorsement  
- **Governance**: Campus and community leaders or representatives are engaged in program/project development |
| B. Collaborative | - **Scope**: Addresses one or more sustainability challenge and may simultaneously support social equity and wellbeing, economic prosperity, and ecological health (e.g. a green jobs program in an economically disadvantaged neighborhood)  
- **Duration**: May be time-limited, multi-year, or ongoing  
- **Commitment**: Institution provides faculty/staff, financial, and/or material support  
- **Governance**: Campus and local community members are both engaged in program/project development, from agenda setting and planning to decision-making, implementation and review |
<table>
<thead>
<tr>
<th>C. Transformative</th>
</tr>
</thead>
<tbody>
<tr>
<td>• <strong>Scope:</strong> Catalyzes community resiliency and local/regional sustainability by simultaneously supporting social equity and wellbeing, economic prosperity, and ecological health on a community or regional scale (e.g. “transition” projects and partnerships focused on community adaptation to climate change)</td>
</tr>
<tr>
<td>• <strong>Duration:</strong> Is multi-year or ongoing and proposes or plans for institutionalized and systemic change</td>
</tr>
<tr>
<td>• <strong>Commitment:</strong> Institution provides faculty/staff and financial or material support</td>
</tr>
<tr>
<td>• <strong>Governance:</strong> Partnership has adopted a stakeholder engagement framework through which community members, vulnerable populations, faculty, staff, students and other stakeholders are engaged in program/project development, from agenda setting and planning to decision-making, implementation and review</td>
</tr>
</tbody>
</table>
An institution may have multiple partnerships of each type, however no single partnership may be both supportive and collaborative, collaborative and transformative, or supportive and transformative.

Recognizing the diversity of forms that community partnerships may take, it is not required that a partnership meet all of the criteria listed to be considered supportive or collaborative. A partnership must meet all of the criteria listed to be considered transformative, however. For further guidance in identifying community partnerships that meet the criteria for each type, see the Credit Example in the STARS Technical Manual.

This credit recognizes campus-community partnerships that advance sustainability in an explicit and participatory way. Participatory, community-based research and engaged scholarship around issues of sustainability may be included if it involves formal partnership(s). Although community service activities (e.g. academic service learning, co-curricular service learning and volunteer activities, Work-Study community service and paid community service internships) may involve local partnerships and contribute toward sustainability, they are not included in this credit. Community service is covered by EN 12: Community Service.

--- indicates that no data was submitted for this field

Does the institution have at least one formal sustainability partnership with the local community that meets the criteria as “supportive”?:
Yes

A brief description of the institution’s supportive sustainability partnership(s) with the local community:
We partner with the City of Keene Cities for Climate Protection organization, the Bicycle/Pedestrian Path Advisory Committee, the Transportation Management Authority and the Monadnock Farm and Community Coalition. Varying members of campus are or have been formally appointed to or are actively engaged on these committees and enjoy a strong and positive relationship with our host city.

Does the institution have at least one formal sustainability partnership with the local community that meets the criteria as “collaborative”?:
---

A brief description of the institution's collaborative sustainability partnership(s):
---

Does the institution have at least one formal sustainability partnership with the local community that meets the criteria as “transformative”?:
---
A brief description of the institution's transformative sustainability partnership(s) with the local community:

---

A brief description of the institution’s sustainability partnerships with distant (i.e. non-local) communities:

---

The website URL where information about sustainability partnerships is available:

---
Inter-Campus Collaboration

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution collaborates with other colleges and universities to support and help build the campus sustainability community.

See the Credit Example in the STARS Technical Manual for guidance on identifying appropriate collaborations.

"---" indicates that no data was submitted for this field

Does the institution collaborate with other colleges and universities to support and help build the campus sustainability community?:
Yes

A brief summary of papers, guides, presentations, and other resources the institution has developed to share their sustainability experience with other institutions:

We have given multiple presentations to local groups on our Sustainability initiatives, at AASHE, Smart and Sustainable Campuses, Northeast Campus Sustainability Consortium and COPLAC conferences.

The names of local, state/provincial, regional, national, or international campus sustainability organizations or consortia in which the institution participates and/or is a member:

Keene State College was one of the founding members of the Northeast Campus Sustainability Consortium and remains an active partner. Through work on the City of Keene Cities for Climate Protection we have worked with Clean Air-Cool Planet and with ICLEI - Local Governments for Sustainability and AASHE.

A brief summary of additional ways the institution collaborates with other campuses to advance sustainability:

Our office has been a resource for many newer programs over the years. We have hosted faculty, staff and students from other schools who are interested in learning about our sustainability efforts.

The website URL where information about cross-campus collaboration is available:
---
Continuing Education

---

Responsibility Party

Heather Jasmin  
Program Coordinator  
Continuing Education

Criteria

Part 1

Institution offers continuing education courses that address sustainability.

Courses that address sustainability include continuing education sustainability courses and continuing education courses that include sustainability. Courses that can be taken for academic credit are not included in this credit. They are covered by the Curriculum subcategory.

Part 2

Institution has at least one sustainability-themed certificate program through its continuing education or extension department.

Degree-granting programs (e.g. programs that confer Baccalaureate, Masters, and Associates degrees) and certificates that are part of academic degree programs are not included in this credit. They are covered in the Curriculum subcategory.

---

"---" indicates that no data was submitted for this field

Does the institution offer continuing education courses that address sustainability?:

Yes

Number of continuing education courses offered that address sustainability:

4

Total number of continuing education courses offered:

33

A copy of the list and brief descriptions of the continuing education courses that address sustainability:

---

A list and brief descriptions of the continuing education courses that address sustainability:

---
Does the institution have at least one sustainability-themed certificate program through its continuing education or extension department?:

Yes

A brief description of the certificate program:

Three are available:
Building Science and Renewable Energy
Sustainable Energy and Going Green
Skilled Trades and Industrial

Year the certificate program was created:

2003

The website URL where information about sustainability in continuing education courses is available:

http://www.keene.edu/conted/programs.cfm
Community Service

Responsible Party

Paul Striffolino  
Assistant VP Student Affairs  
Student Affairs

Criteria

Part 1

Institution engages its student body in community service, as measured by the percentage of students who participate in community service.

Part 2

Institution engages students in community service, as measured by the average hours contributed per full-time student per year.

Institutions may exclude non-credit, continuing education, and/or part-time students from this credit.

Submission Note:

These students engaged in 18,000 hours of community service work.

"---" indicates that no data was submitted for this field

Number of students engaged in community service:

740

Total number of students:

5,086

Does the institution wish to pursue Part 2 of this credit (community service hours)?:

---

Total number of student community service hours contributed during a one-year period:

18,000

Does the institution include community service achievements on student transcripts?:

No
A brief description of the practice of including community service on transcripts, if applicable:

We do not include community service achievements on student transcripts.

Does the institution provide incentives for employees to participate in community service (on- or off-campus)?:

---

A brief description of the institution’s employee community service initiatives:

---

The website URL where information about the institution’s community service initiatives is available:

http://sites.keene.edu/kscce/
Community Stakeholder Engagement

Criteria

Institution has adopted a framework for community stakeholder engagement in governance, strategy and operations. The framework includes:

1) Policies and procedures that ensure community stakeholder engagement is applied systematically and regularly across the institution’s activities (e.g. planning and development efforts, capital investment projects, and/or other activities and decisions that affect the broader community)

And

2) Established practices to identify and engage relevant community stakeholders, including any vulnerable or underrepresented groups.

Frameworks adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit does not include the engagement of internal campus stakeholders (e.g. students, faculty and staff); internal stakeholder engagement is covered in PA 3: Governance.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Participation in Public Policy

Responsible Party

Helen Giles-Gee
President
Executive Office

Criteria

Institution advocates for national, state/provincial, or local public policies that support campus sustainability or that otherwise advance sustainability.

The policy advocacy must be done by the institution, not by students or a student group. This credit acknowledges institutions that advocate for policy changes and legislation to advance sustainability broadly. Advocacy efforts that are made exclusively to advance the institution's interests or projects may not be counted. For example, advocating for government funding for campus sustainability may be counted, whereas lobbying for the institution to receive funds that have already been appropriated may not.

"---" indicates that no data was submitted for this field

Does the institution advocate for national, state/provincial, or local public policies that support campus sustainability or that otherwise advance sustainability?:

---

A brief description of how the institution engages in public policy advocacy for sustainability, including the issues, legislation, and ordinances for or against which the institution has advocated:

---

A brief description of other political positions the institution has taken during the previous three years:

---

A brief description of political donations the institution made during the previous three years (if applicable):

---

The website URL where information about the institution’s advocacy efforts is available:

---
Trademark Licensing

Responsible Party

Francis Brush
Director, Mail, Print and Bookstore
Finance and Planning

Criteria

Institution is a member of the Fair Labor Association (FLA) and/or the Worker Rights Consortium (WRC).

"---" indicates that no data was submitted for this field

Is the institution a member of the Worker Rights Consortium?:
No

Is the institution a member of the Fair Labor Association?:
Yes

Has the institution expressed an intention to participate in the WRC’s Designated Suppliers Program?:
No

The website URL where information about the institution’s participation in the WRC, FLA, and/or DSP is available:
---
**Hospital Network**

**Criteria**

Institution’s affiliated hospital or health system is a member of the Global Green and Healthy Hospitals Network, the Healthier Hospitals Initiative and/or Practice Greenhealth.

This credit includes hospitals and health systems that are formally affiliated with a higher education institution (sometimes called “university hospitals”). Other types of health care providers (e.g. insurers through which an institution obtains health care for its employees) are not included.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Operations

Air & Climate

This subcategory seeks to recognize institutions that are measuring and reducing their greenhouse gas and air pollutant emissions. Global climate change is having myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, and spread of diseases. The impacts are particularly pronounced for low-income communities and countries. In addition, institutions that inventory and take steps to reduce their air pollutant emissions can positively impact the health of the campus community, as well as the health of their local communities and regions.

<table>

</tbody>
</table>
Greenhouse Gas Emissions

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Part 1

Institution has conducted a publicly available greenhouse gas (GHG) emissions inventory that includes, at minimum, Scope 1 and Scope 2 GHG emissions and may also include Scope 3 GHG emissions. The inventory may be validated internally by campus personnel who are independent of the GHG accounting and reporting process and/or verified by an independent, external third party.

Part 2

Institution reduced its adjusted net Scope 1 and Scope 2 GHG emissions per weighted campus user compared to a baseline.

Part 3

Institution’s annual adjusted net Scope 1 and Scope 2 GHG emissions are less than the minimum performance threshold of 0.02 metric tons of carbon dioxide equivalent (MtCO2e) per gross square foot (0.002 MtCO2e per gross square metre) of floor area.

Performance for Part 3 of this credit is assessed using EUI-adjusted floor area, a figure that accounts for significant differences in energy use intensity (EUI) between types of building space.

For this credit, the following carbon offsets may be counted:

1. Institution-catalyzed carbon offsets (popularly known as “local offsets”)
2. Carbon sequestration due to land that the institution manages specifically for sequestration (as documented in policies, land management plans or the equivalent)
3. Carbon storage from on-site composting
4. Third-party verified purchased carbon offsets

Purchased Renewable Energy Certificates (RECs) that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party may be counted as zero emissions energy for purposes of Scope 2 GHG accounting.

Purchased carbon offsets and RECs that have not been third-party verified do not count.

Institutions that have sold or transferred emissions reductions, e.g. in the form of verified emissions reductions (VERs), may not count those reductions toward this credit.

"---" indicates that no data was submitted for this field
Does the institution's GHG emissions inventory include all Scope 1 and Scope 2 GHG emissions?:
Yes

Does the institution's GHG emissions inventory include all Scope 3 GHG emissions from any of the following categories?:

<table>
<thead>
<tr>
<th>Category</th>
<th>Yes or No</th>
</tr>
</thead>
<tbody>
<tr>

---
Outdoor Air Quality

Criteria

Part 1

Institution has adopted policies or guidelines to improve outdoor air quality and minimize air pollutant emissions from mobile sources. Policies and/or guidelines may include, but are not limited to, prohibiting vehicle idling, restrictions on the use of powered lawn care equipment, and other strategies for minimizing mobile emissions.

Policies adopted by entities of which the institution is part (e.g. government or university system) may count for Part 1 of this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution has completed an inventory of significant air emissions from stationary sources on campus. Significant emissions include nitrogen oxides (NOx), sulfur oxides (SOx), and other standard categories of air emissions identified in environmental permits held by the institution, international conventions, and/or national laws or regulations.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Buildings

This subcategory seeks to recognize institutions that are taking steps to improve the sustainability performance of their buildings. Buildings are generally the largest user of energy and the largest source of greenhouse gas emissions on campuses. Buildings also use significant amounts of potable water. Institutions can design, build, and maintain buildings in ways that provide a safe and healthy indoor environment for inhabitants while simultaneously mitigating the building’s impact on the outdoor environment.

</tbody>
</table>
Building Operations and Maintenance

Criteria

Institution owns and operates buildings that are:

1) Certified under a green building rating system for existing buildings, e.g. LEED® for Existing Buildings: Operations & Maintenance (O&M)

And/or

2) Operated and maintained in accordance with formally adopted sustainable operations and maintenance guidelines and policies that cover all of the following:

- Impacts on the surrounding site
- Energy consumption
- Building-level energy metering
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption
- Building-level water metering

Building space that meets multiple criteria listed above should not be double-counted.

Building Design and Construction

Responsible Party

Jay Kahn
Vice President Finance and Planning
Finance and Planning

Criteria

Institution-owned buildings that were constructed or underwent major renovations in the previous five years are:

1) Certified under a green building rating system for new construction and major renovations (e.g. the LEED® for New Construction and Major Renovations, LEED for Commercial Interiors, LEED for Healthcare, and/or LEED for Core and Shell Green Building Rating Systems)

2) Certified Living under the Living Building Challenge (LBC)

And/or

3) Designed and built in accordance with formally adopted green building guidelines and policies that cover all of the following topics:

- Impacts on the surrounding site
- Energy consumption
- Building-level energy metering
- Usage of environmentally preferable materials
- Indoor environmental quality
- Water consumption
- Building-level water metering

Building space that meets multiple criteria listed above should not be double-counted.

Indoor Air Quality

Responsible Party

Sylvie Rice
Environmental, Health and Safety Coordinator
Physical Plant

Criteria

Institution has an indoor air quality (IAQ) management program that includes regular auditing or monitoring, a mechanism for occupants to register complaints, and action plans to implement any corrective measures required in response to audits, monitoring or complaints.

Policies and plans adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

Floor area of building space covered by an indoor air quality (IAQ) management program that meets the criteria for this credit:

1,386,057 Square Feet

Gross floor area of building space:

1,386,057 Square Feet

A brief description of the institution’s indoor air quality program(s):

General
Keene State College is committed to maintaining a safe and healthful work environment for its employees, students, and visitors. Good indoor air quality promotes a favorable learning environment for both students and faculty and a productive work environment for employees.

Ideal indoor air quality is a balancing act between trying to contain rising energy costs by designing and installing energy efficient buildings, and providing sufficient ventilation for comfort and a healthy environment. A variety of airborne contaminants such as paints, tobacco smoke, dust, mold and other materials, can negatively impact indoor air quality. It is important that proper maintenance procedures are performed on Heating Ventilation and Air Conditioning equipment.

Keene State College through the Offices of the Physical Plant and Environmental Health and Safety ensure that building HVAC equipment is properly maintained and response is prompt to indoor air quality complaints to ensure there are no negative health effects for building occupants. A properly designed HVAC system controls temperature and humidity to provide thermal comfort, distribute adequate outdoor ventilation air, and removes odors and other contaminants as needed.

http://www.keene.edu/ehs/Indoor%20Air%20Quality.pdf
Dining Services

This subcategory seeks to recognize institutions that are supporting a sustainable food system. Modern industrial food production often has deleterious environmental and social impacts. Pesticides and fertilizers used in agriculture can contaminate ground and surface water and soil, which can in turn have potentially dangerous impacts on wildlife and human health. The production of animal-derived foods often subjects animals to inhumane treatment and animal products have a higher per-calorie environmental intensity than plant-based foods. Additionally, farm workers are often directly exposed to dangerous pesticides, subjected to harsh working conditions, and paid substandard wages. Furthermore, food is often transported long distance to institutions, producing greenhouse gas emissions and other pollution, as well as undermining the resiliency of local communities.

Institutions can use their purchasing power to require transparency from their distributors and find out where the food comes from, how it was produced, and how far it traveled. Institutions can use their food purchases to support their local economies; encourage safe, environmentally-friendly and humane farming methods; and help eliminate unsafe working conditions and alleviate poverty for farmers. These actions help reduce environmental impacts, preserve regional farmland, improve local food security, and support fair and resilient food systems.

Please note that while dining services can also play an important role in conserving energy and water, reducing waste, and purchasing environmentally preferable materials other than food, STARS measures these impacts across the institution instead of by department; therefore, the benefits of these actions are captured in the Energy, Water, Waste, and Purchasing subcategories, respectively.

<tr>
<td>Low Impact Dining</td>
</tr>
</tbody>
</table>
Food and Beverage Purchasing

Responsible Party

Paul Striffolino
Assistant VP Student Affairs
Student Affairs

Criteria

Part 1

Institution’s dining services purchase food and beverages that meet at least one of the following criteria:

- Local and community-based

And/or

- Third party verified to be ecologically sound, fair and/or humane

Food and beverage purchases that meet both criteria listed above (e.g. local community-based products that are Certified Organic) should not be double-counted.

Local community-based products:

- Are sourced from local community-based producers (directly or through distributors)
- Contain raw ingredients (excluding water) that are third party verified and/or locally harvested and produced (e.g. bread made with Organic flour or local honey) and
- Exclude products from Concentrated Animal Feeding Operations (CAFOs), products that have minimal nutritional value (e.g. soda, chewing gum, candies made predominantly from sweeteners), and products from producers that have been convicted of one or more labor law violations within the previous three years

Products that are not local and community-based must be third party verified to count. Recognized third party standards and certifications for food and beverages are outlined in the STARS Technical Manual. Institutions located outside the U.S. and Canada may use additional third party certifications to identify ecologically sound, fair and humane products, provided the certifications are reported in “Notes about this submission”.

Part 1 of this credit includes food and beverage purchases for on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor (e.g. Aramark, Bon Appétit Management Company, Chartwells, Sodexo). On-site franchises, convenience stores, vending services, and concessions are excluded from Part 1.

Part 2

Institution’s on-site franchises, convenience stores, vending services, and/or concessions purchase food and beverages that are third party verified and/or locally sourced (i.e. meet the criteria outlined in Part 1).

"---" indicates that no data was submitted for this field

A brief description of other sustainable restaurant and food service standards that the institution’s dining services operations are certified under:

---

The website URL where information about the institution's sustainable food and beverage purchasing efforts is available:

---
Low Impact Dining

Criteria

Part 1

Conventionally produced animal products comprise less than 30 percent of the institution’s total dining services food purchases.

Conventionally produced animal products include all food products that contain animal derived (i.e. meat, fish, egg, dairy) ingredients that have not been verified to be sustainably produced. Sustainably produced animal products have been either:

- Third party verified to be ecologically sound and/or humane (see OP 6: Food and Beverage Purchasing)

  Or

- Verified by the institution to be both ecologically sound and humane (e.g. “Pasture Raised”, “Grass Fed” or “Humanely Raised”) through a relationship with a local producer

Part 2

Institution:

- Offers diverse, complete-protein vegan options at all meals in at least one dining facility on campus

  And

- Provides labels and/or signage that distinguishes between vegan, vegetarian (not vegan), and other items

This credit includes on-campus dining operations and catering services operated by the institution or the institution’s primary dining services contractor. On-site franchises, convenience stores, vending machines, and concessions should be excluded to the extent feasible.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Energy

This subcategory seeks to recognize institutions that are reducing their energy consumption through conservation and efficiency, and switching to cleaner and renewable sources of energy such as solar, wind, geothermal, and low-impact hydropower. For most institutions, energy consumption is the largest source of greenhouse gas emissions, which cause global climate change. Global climate change is having myriad negative impacts throughout the world, including increased frequency and potency of extreme weather events, sea level rise, species extinction, water shortages, declining agricultural production, ocean acidification, and spread of diseases. The impacts are particularly pronounced for vulnerable and poor communities and countries. In addition to causing global climate change, energy generation from fossil fuels, especially coal, produces air pollutants such as sulfur dioxide, nitrogen oxides, mercury, dioxins, arsenic, cadmium and lead. These pollutants contribute to acid rain as well as health problems such as heart and respiratory diseases and cancer. Coal mining and oil and gas drilling can also damage environmentally and/or culturally significant ecosystems. Nuclear power creates highly toxic and long-lasting radioactive waste. Large-scale hydropower projects flood habitats and disrupt fish migration and can involve the relocation of entire communities.

Implementing conservation measures and switching to renewable sources of energy can help institutions save money and protect them from utility rate volatility. Renewable energy may be generated locally and allow campuses to support local economic development. Furthermore, institutions can help shape markets by creating demand for cleaner, renewable sources of energy.

Building Energy Consumption

Responsible Party
Diana Duffy
Energy Coordinator
Physical Plant

Criteria

Part 1
Institution has reduced its total building energy consumption per gross square foot/metre of floor area compared to a baseline.

Part 2
Institution’s annual building energy consumption is less than the minimum performance threshold of 28 Btu per gross square foot (2.6 Btu per gross square metre) of floor area per degree day.

Performance for Part 2 of this credit is assessed using EUI-adjusted floor area, a figure that accounts for significant differences in energy use intensity (EUI) between types of building space.

**A brief description of when and why the building energy consumption baseline was adopted:**

---

**A brief description of any building temperature standards employed by the institution:**

---
We use our BAS systems to regulate temperatures based on occupancy hours in many of our buildings. In some of our older buildings, we use timers for managing exhaust fans.

**A brief description of any light emitting diode (LED) lighting employed by the institution:**

We are using LED lighting in many buildings, as appropriate. We have installed them in outdoor parking lot lighting, in hallway recessed lighting, in classrooms and in meeting rooms. We are trying a variety of applications to learn more about how and where the products work the best. The Sustainability and Energy coordinators offices are using the latest in LED technology, including full color spectrum and dimmable switching.

**A brief description of any occupancy and/or vacancy sensors employed by the institution:**

Motion sensors are used extensively on campus for internal spaces. Our dining hall uses light sensors. All of our outdoor lights are on light sensors.

**A brief description of any passive solar heating employed by the institution:**

---

**A brief description of any ground-source heat pumps employed by the institution:**

---

**A brief description of any cogeneration technologies employed by the institution:**

---

**A brief description of any building recommissioning or retrofit program employed by the institution:**

---

**A brief description of any energy metering and management systems employed by the institution:**

We do use a centralized energy management system.

**A brief description of the institution's program to replace energy-consuming appliances, equipment and systems with high efficiency alternatives:**

---

**A brief description of any energy-efficient landscape design initiatives employed by the institution:**
A brief description of any vending machine sensors, lightless machines, or LED-lit machines employed by the institution:

Vending miser is the brand name. They have been installed on most older machines on campus for the past 10 years. Newest machines are much more energy efficient than the older machines.

A brief description of other energy conservation and efficiency initiatives employed by the institution:

---

The website URL where information about the institution’s energy conservation and efficiency initiatives is available:

Clean and Renewable Energy

Responsible Party

Diana Duffy
Energy Coordinator
Physical Plant

Criteria

Institution supports the development and use of clean and renewable energy sources, using any one or combination of the following options.

Option 1: Generating electricity from clean and renewable energy sources on campus and retaining or retiring the rights to the environmental attributes of such electricity. (In other words, if the institution has sold Renewable Energy Credits for the clean and renewable energy it generated, it may not claim such energy here.) The on-site renewable energy generating devices may be owned and/or maintained by another party as long as the institution has contractual rights to the associated environmental attributes.

Option 2: Using renewable sources for non-electric, on-site energy generation, such as biomass for heating.

Option 3: Catalyzing the development of off-site clean and renewable energy sources (e.g. an off-campus wind farm that was designed and built to supply electricity to the institution) and retaining the environmental attributes of that energy.

Option 4: Purchasing the environmental attributes of electricity in the form of Renewable Energy Certificates (RECs) or other similar renewable energy products that are either Green-e Energy certified or meet Green-e Energy’s technical requirements and are verified as such by a third party, or purchasing renewable electricity through the institution’s electric utility through a certified green power purchasing option.

Since this credit is intended to recognize institutions that are actively supporting the development and use of clean and renewable energy, neither the electric grid mix for the region in which the institution is located nor the grid mix reported by the electric utility that serves the institution count for this credit.

The following renewable systems are eligible for this credit:

- Concentrated solar thermal
- Geothermal systems that generate electricity
- Low-impact hydroelectric power
- Solar photovoltaic
- Wave and tidal power
• Wind

Biofuels from the following sources are eligible:

• Agricultural crops
• Agricultural waste
• Animal waste
• Landfill gas
• Untreated wood waste
• Other organic waste

Technologies that reduce the amount of energy used but do not generate renewable energy do not count for this credit. For example, daylighting, passive solar design, and ground-source heat pumps are not counted in this credit. The benefits of such strategies, as well as improved efficiencies achieved through using cogeneration technologies, are captured by OP 1: Greenhouse Gas Emissions and OP 8: Building Energy Consumption.

Transportation fuels, which are covered by OP 1: Greenhouse Gas Emissions and OP 18: Campus Fleet, are not included in this credit.

---

Submission Note:

Although we operate a co-gen facility, it was not operating during the performance year.

Bud Winsor
Asst. Dir. Physical Plant - Grounds
Physical Plant

Criteria

Institution’s grounds include areas that are managed at one or more of the following levels:

1) Managed in accordance with an Integrated Pest Management (IPM) Plan

2) Managed in accordance with a sustainable landscape management program

And/or

3) Organic, certified and/or protected

The level at which an area of grounds is managed may be determined as outlined in the table below:

<table>
<thead>
<tr>
<th>Management Level</th>
<th>Standards and/or Certifications Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) IPM Plan</td>
<td>IPM plan calls for:</td>
</tr>
<tr>
<td></td>
<td>• Using least-toxic chemical pesticides,</td>
</tr>
<tr>
<td></td>
<td>• Minimum use of chemicals, and</td>
</tr>
<tr>
<td></td>
<td>• Use of chemicals only in targeted locations and only for targeted species</td>
</tr>
</tbody>
</table>
| 2) Sustainable Landscape Management Program | The program includes formally adopted guidelines, policies and/or practices that cover all of the following:
|  | • Integrated pest management (see above)
|  | • Plant stewardship - protecting and using existing vegetation (e.g. through the use of a tree care plan), using native and ecologically appropriate plants, and controlling and managing invasive species
|  | • Soil stewardship - organic soils management practices that restore and/or maintain a natural nutrient cycle and limit the use of inorganic fertilizers and chemicals
|  | • Use of environmentally preferable materials - utilizing reused, recycled and local and sustainably produced landscape materials
|  | • Hydrology and water use - restoring and/or maintaining the integrity of the natural hydrology by promoting water infiltration, minimizing or eliminating the use of potable water for irrigation, and protecting/restoring riparian, wetland, and shoreline habitats and lost streams
|  | • Materials management and waste minimization - composting and/or mulching waste from groundskeeping, including grass trimmings
|  | • Snow and ice management (if applicable) - implementing technologies or strategies to reduce the environmental impacts of snow and ice removal

| 3) Organic, Certified and/or Protected | Protected areas and land that is:
|  | • Maintained in accordance with an organic land care standard or sustainable landscape management program that has eliminated the use of inorganic fertilizers and chemical pesticides, fungicides and herbicides in favor of ecologically preferable materials
|  | • Certified Organic
|  | • Certified under the Forest Stewardship Council (FSC) Forest Management standard
|  | • Certified under the Sustainable Sites Initiative™ (SITES™) and/or
|  | • Managed specifically for carbon sequestration (as documented in policies, land management plans or the equivalent)

Land that meets multiple criteria should not be double-counted. An area of grounds that does not meet the standards specified for a particular management level should be reported at the next appropriate level for which it does meet the standards. For example, a landscape management program that includes an IPM plan and meets some, but not all, of the other standards listed for a sustainable landscape management plan should be reported at level 1 (IPM Plan).

"---" indicates that no data was submitted for this field

<tr>
<td>Managed organically, third party certified and/or protected</td>
<td>---</td>
</tr>
</tbody>
</table>

A copy of the IPM plan:
---

The IPM plan:
The campus has proactive planning for grounds maintenance. The fundamental concept is that healthy plants are resilient plants. They use 3” mowing heights wherever possible, creating healthier grass. They use compost tea and mulch produced on campus to feed trees and plantings. Local experts are called in (such as the local county extension agent) to help identify issues and determine treatment plans, if necessary. Chemicals are used as a last resort and in strictly limited and controlled circumstances.

A brief summary of the institution’s approach to sustainable landscape management:
---

A brief description of how the institution protects and uses existing vegetation, uses native and ecologically appropriate plants, and controls and manages invasive species:
Whenever possible Grounds uses plants that are indigenous to the region. "The right plant for the right place".
A brief description of the institution’s landscape materials management and waste minimization policies and practices:

In addition to using 3” mowing heights everywhere on campus (except the athletic fields) which produces healthier grass, the mowing machines are all mulching mowers.

Leaf, garden and tree debris is composted and screened on campus and used as soil amendment or mulch on the campus grounds. The compost also contains pre-plate waste from the Zorn Dining Commons. This has helped eliminate the need for purchased mulch.

Mulch is blended with aged wood chips to mimic forest duff, aiding tree health and growth and lessens our reliance on synthetic fertilizers.

A brief description of the institution’s organic soils management practices:

---

A brief description of the institution’s use of environmentally preferable materials in landscaping and grounds management:

---

A brief description of how the institution restores and/or maintains the integrity of the natural hydrology of the campus:

---

A brief description of how the institution reduces the environmental impacts of snow and ice removal (if applicable):

The KSC Grounds department uses a variety of techniques to reduce the environmental impacts of snow and ice. They use a professional weather service to get up to date and local condition information, ground temperature readings to determine the proper "product" to use and thoughtful and careful management of equipment.

Ice Ban is a trademarked product, derived from brewer's wastes. It is significantly less toxic and less corrosive to plantings than salt. Where we do need to use salt, it is pretreated with the Ice Ban, making it much more effective and requiring significantly smaller amounts. The crew has developed techniques for pre-spraying roads and walkways before storms, since the Ice Ban works well as a pre-treatment, preventing the buildup of ice.

We have eliminated the use of sand, which causes its own problems. Where possible, snow brooms are used to help clear snow, lessening damage to edge plantings.

Each person in the Grounds department has assigned areas of responsibility in each season, including snow storm and storm clean up. This makes the vehicle use as efficient as possible, reducing redundancy and fuel use.

A brief description of any certified and/or protected areas:
Is the institution recognized by the Arbor Day Foundation's Tree Campus USA program (if applicable)?
No

The website URL where information about the institution’s sustainable landscape management programs and practices is available:
---
Biodiversity

Criteria

The institution conducts one or both of the following:

- An assessment to identify endangered and vulnerable species (including migratory species) with habitats on institution-owned or -managed land

  And/or

- An assessment to identify environmentally sensitive areas on institution-owned or -managed land

The institution has plans or programs in place to protect or positively affect the species, habitats and/or environmentally sensitive areas identified.

Assessments conducted and programs adopted by other entities (e.g. government, university system, NGO) may count for this credit as long as the assessments and programs apply to and are followed by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Purchasing

This subcategory seeks to recognize institutions that are using their purchasing power to help build a sustainable economy. Collectively, colleges and universities spend many billions of dollars on goods and services annually. Each purchasing decision represents an opportunity for institutions to choose environmentally and socially preferable products and services and support companies with strong commitments to sustainability.

Electronics Purchasing

Responsible Party
Laura Seraichick
CIO
Information Technology

Criteria

Part 1

Institution has an institution-wide stated preference to purchase computers and/or other electronic products that are EPEAT registered or meet similar multi-criteria sustainability standards for electronic products. This can take the form of purchasing policies, guidelines, or directives.

Policies and directives adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution purchases EPEAT registered products for desktop and notebook/laptop computers, displays, thin clients, televisions and imaging equipment.

This credit does not include servers, mobile devices such as tablets and smartphones, or specialized equipment for which no EPEAT certified products are available.

"---" indicates that no data was submitted for this field

Does the institution have an institution-wide stated preference to purchase computers and/or other electronic products that are EPEAT registered or meet similar multi-criteria sustainability standards for electronic products?:
Yes

A copy of the electronics purchasing policy, directive, or guidelines:
---

The electronics purchasing policy, directive, or guidelines:
---

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:
Keene State College has policy around ‘campus standards’ for computer equipment purchase and all of our current standards are EPEAT Gold rated. Furthermore, Purchasing computer equipment at KSC follows a central purchasing model and approval by the Information Technology Group to ensure campus standards are met. We purchase computers from Dell and Apple and all of our campus ‘standard’ computers available for purchase are rated EPEAT Gold. In the last year, we have purchased 100% EPEAT Gold-rated computers.

**Does the institution wish to pursue Part 2 of this credit (expenditures on EPEAT registered electronics)?:**
Yes

**Expenditures on EPEAT registered desktop and laptop computers, displays, thin clients, televisions, and imaging equipment:**

<table>

Cleaning Products Purchasing

Responsible Party

Frank Mazzola
Director of Physical Plant
Physical Plant

Criteria

Part 1

Institution has an institution-wide stated preference to purchase cleaning and janitorial products that are Green Seal™ or UL Environment (EcoLogo)™ certified and/or meet similar multi-criteria sustainability standards for cleaning and janitorial products. This can take the form of purchasing policies, guidelines, or directives.

Policies and directives adopted by entities of which the institution is part (e.g. government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

Part 2

Institution’s main cleaning or housekeeping department(s) and/or contractor(s) purchase Green Seal or UL Environment (EcoLogo) certified cleaning and janitorial products.

Cleaning and janitorial products include, at minimum:

- Cleaning/degreasing agents
- General-purpose, bathroom, glass, and carpet cleaners
- Biologically-active cleaning products (enzymatic and microbial products)
- Floor-care products, e.g. floor finish and floor finish strippers
- Hand cleaners
- Sanitary paper products, e.g. toilet tissue, facial tissue, paper towels, napkins, and placemats
- Plastic film products (e.g. garbage bags/liners)
- Laundry care products including powder, liquid or pre-measured dosage laundry detergents, stain removers and dryer sheets
- Specialty surface cleaning products and odor removers, including but not limited to: boat cleaning products; deck and outdoor furniture cleaning products; graffiti removers; metal cleaning products; motor vehicle (automotive/tire/wheel) cleaning products; motor vehicle windshield washing fluid; optical lens cleaning products; oven cleaning products; upholstery cleaning products; and other cleaning products sold for specific specialty uses

Submission Note:

While we do not have a contractual requirement to use green cleaning products, our cleaning service has listened to our stated preferences and responded by using many Green Seal products. In addition, they have changed some of their practices to reduce the amount of chemicals used and how often (floor stripping and waxing in particular).
Does the institution have an institution-wide stated preference to purchase third party certified cleaning and janitorial products?:

No

A copy of the green cleaning product purchasing policy, directive, or guidelines:

---

The green cleaning product purchasing policy, directive, or guidelines:

---

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

---

Does the institution wish to pursue Part 2 of this credit (expenditures on cleaning and janitorial products)?:

Yes

Expenditures on Green Seal and/or UL Environment (EcoLogo) certified cleaning and janitorial products:

12,000 US/Canadian $

Total expenditures on cleaning and janitorial products:

24,000 US/Canadian $

Has the institution's main cleaning or housekeeping department(s) and/or contractor(s) adopted a certified low-impact, ecological (“green”) cleaning program?:

---

A brief description of the institution’s low-impact, ecological cleaning program:

---

A copy of the sections of the cleaning contract(s) that reference certified green products:

---

Criteria

**Part 1**

Institution has an institution-wide stated preference to purchase office paper that has recycled content, is certified by the Forest Stewardship Council (FSC), and/or is certified to meet similar multi-criteria sustainability standards for paper. This can take the form of purchasing policies, guidelines, or directives.

Policies and directives adopted by entities of which the institution is part (e.g. government or the university system) may count for this credit as long as the policies apply to and are followed by the institution.

**Part 2**

Institution purchases office paper with post-consumer recycled, agricultural residue, and/or FSC certified content.

Submission Note:

This covers our office paper. Colored or specialty paper is not covered in this and there is no centralized tracking for this information. Departments can purchase specialty papers with their purchasing cards.

"---" indicates that no data was submitted for this field

Does the institution have an institution-wide stated preference to purchase office paper that has recycled content and/or is certified to meet multi-criteria sustainability standards for paper?:

Yes

A copy of the paper purchasing policy, directive or guidelines:

---

The paper purchasing policy, directive or guidelines:

---

A brief description of steps the institution has taken to ensure that the purchasing policy, directives, or guidelines are followed:

---
Office and copier paper are generally distributed through our Central Stores department. Since 2002, our Central Stores has purchased 75% - 100% recycled content copier paper through our supplier contract.

Does the institution wish to pursue Part 2 of this credit (expenditures on office paper)?:
Yes

Expenditures on office paper with the following levels of post-consumer recycled, agricultural residue, and/or FSC certified content:

<table>
<thead>
<tr>
<th>Percentage Range</th>
<th>Expenditure Per Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>10-29 percent</td>

http://www.unh.edu/purchasing/bid-results.html
Inclusive and Local Purchasing

Criteria

Part 1

Institution has an institution-wide stated intent to support disadvantaged businesses, social enterprises, and/or local community-based businesses.

Support could take the form of giving preference during RFP processes, conducting targeted outreach to these businesses about opportunities to work with the institution, and/or other efforts to increase purchases made from such businesses.

Part 2

Institution makes purchases from companies that include disadvantaged businesses, social enterprises and/or local community-based businesses.

Purchases that meet multiple criteria listed above should not be double counted. Food and beverage purchases, which are covered by *OP 6: Food and Beverage Purchasing* and *OP 7: Low Impact Dining*, are not included in this credit.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Life Cycle Cost Analysis

Criteria

Institution employs Life Cycle Cost Analysis (LCCA) as a matter of policy and practice when evaluating energy- and water-using products and systems. Practices may include structuring RFPs so that vendors compete on the basis of lowest total cost of ownership (TCO) in addition to (or instead of) purchase price.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Guidelines for Business Partners

Criteria

Institution has and acts on policies, guidelines and/or agreements that set expectations about the social and environmental responsibility of its business partners. The policies, guidelines and/or agreements require new and/or existing vendors and contractors and/or franchisees to adhere to:

1) Minimum environmental standards and practices defined by the institution, for example as outlined by the institution’s sustainability policies

And/or

2) Minimum standards and practices governing employee wages, benefits, working conditions and rights that are consistent with fundamental International Labor Organization (ILO) conventions.

All enterprises with employees on-site as part of regular campus operations (e.g. contractors and franchisees) and other standing and/or formal business relationships (e.g. regular vendors and contracted services) are included.

Businesses that produce and/or sell licensed articles bearing the institution’s trademarked logo (“licensees”) are not included. They are covered in EN 15: Trademark Licensing.

The credit acknowledges institutional engagement in selecting its business partners and guiding them toward sustainability. Policies, guidelines or practices of the businesses themselves do not count for this credit in the absence of institutional selection criteria and/or guidance. Requiring compliance with existing legislation does not count on its own, but may be included as part of broader requirements that meet the criteria outlined above.

Policies adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as the policies apply to and are followed by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Transportation

This subcategory seeks to recognize institutions that are moving toward sustainable transportation systems. Transportation is a major source of greenhouse gas emissions and other pollutants that contribute to health problems such as heart and respiratory diseases and cancer. Due to disproportionate exposure, these health impacts are frequently more pronounced in low-income communities next to major transportation corridors. In addition, the extraction, production, and global distribution of fuels for transportation can damage environmentally and/or culturally significant ecosystems and may financially benefit hostile and/or oppressive governments.

At the same time, campuses can reap benefits from modeling sustainable transportation systems. Bicycling and walking provide human health benefits and mitigate the need for large areas of paved surface, which can help campuses to better manage storm water. Institutions may realize cost savings and help support local economies by reducing their dependency on petroleum-based fuels for transportation.

Campus Fleet

Responsible Party

Bud Winsor
Asst. Dir. Physical Plant - Grounds
Physical Plant

Criteria

Institution supports alternative fuel and power technology by including in its motorized vehicle fleet vehicles that are:

A. Gasoline-electric hybrid
B. Diesel-electric hybrid
C. Plug-in hybrid
D. 100 percent electric
E. Fueled with Compressed Natural Gas (CNG)
F. Hydrogen fueled
G. Fueled with B20 or higher biofuel for more than 4 months of the year

And/or

H. Fueled with locally produced, low-level (e.g. B5) biofuel for more than 4 months of the year (e.g. fuel contains cooking oil recovered and recycled on campus or in the local community)

For this credit, the institution’s motorized fleet includes all cars, carts, trucks, tractors, buses and similar vehicles used for transporting people and/or goods, including both leased vehicles and vehicles that are institution-owned and operated. Heavy construction equipment (e.g. excavators and pavers), maintenance equipment (e.g. lawn-mowers and leaf blowers), and demonstration/test vehicles used for educational purposes are not included in this credit.

Vehicles that meet multiple criteria (e.g. hybrid vehicles fueled with biofuel) should not be double-counted.

Submission Note:

We use bio-diesel in all of our diesel equipment - including mowers, plow equipment, and multi-purpose equipment like bob/tool cat - in addition to our on road diesel vehicles. We have been using bio-diesel since 2002.

"---" indicates that no data was submitted for this field

Student Commute Modal Split

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution's students commute to and from campus using more sustainable commuting options such as walking, bicycling, vanpooling or carpooling, taking public transportation, riding motorcycles or scooters, riding a campus shuttle, or a combination of these options.

Students who live on campus should be included in the calculation based on how they get to and from their classes.

Submission Note:

This information comes from a 2007 survey of student transportation behaviors. The survey had 1160 responses out of 5135 total full and part time head count.

First year students are not allowed to have vehicles on campus. Students were not asked their primary method of transportation if they did not have a vehicle, but how they travel too and from campus. I have extrapolated answers from the questions on the survey.

"---" indicates that no data was submitted for this field

Support for Sustainable Transportation

Criteria

Part 1

The institution demonstrates its support for active (i.e. non-motorized) transportation on campus in one or more of the following ways:

Option A: Institution:

- Provides secure bicycle storage (not including office space), shower facilities, and lockers for bicycle commuters. The storage, shower facilities and lockers are co-located in at least one building/location that is accessible to all commuters.
- Provides short-term bicycle parking (e.g. racks) within 50 ft (15 m) of all occupied, non-residential buildings and makes long-term bicycle storage available within 330 ft (100 m) of all residence halls (if applicable).
- Has a “complete streets” or bicycle accommodation policy (or adheres to a local community policy) and/or has a continuous network of dedicated bicycle and pedestrian paths and lanes that connects all occupied buildings and at least one inter-modal transportation node (i.e. transit stop or station)

And/or

- Has a bicycle-sharing program or participates in a local bicycle-sharing program

Option B: Institution is certified as a Bicycle Friendly University (at any level) by the League of American Bicyclists (U.S.) or under a similar third party certification for non-motorized transportation.

Part 2

Institution has implemented one or more of the following strategies to encourage more sustainable modes of transportation and reduce the impact of student and employee commuting. The institution:

- Offers free or reduced price transit passes and/or operates a free campus shuttle for commuters. The transit passes may be offered by the institution itself, through the larger university system of which the institution is a part, or through a regional program provided by a government agency.
- Offers a guaranteed return trip (GRT) program to regular users of alternative modes of transportation
- Participates in a car/vanpool or ride sharing program and/or offers reduced parking fees or preferential parking for car/vanpoolers
- Participates in a car sharing program, such as a commercial car-sharing program, one administered by the institution, or one administered by a regional organization
- Has one or more Level 2 or Level 3 electric vehicle recharging stations that are accessible to student and employee commuters
- Offers a telecommuting program for employees, either as a matter of policy or as standard practice
- Offers a condensed work week option for employees, either as a matter of policy or as standard practice
- Has incentives or programs to encourage employees to live close to campus
- Other strategies

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Waste

This subcategory seeks to recognize institutions that are moving toward zero waste by reducing, reusing, recycling, and composting. These actions mitigate the need to extract virgin materials, such as trees and metals. It generally takes less energy and water to make a product with recycled material than with virgin resources. Reducing waste generation also reduces the flow of waste to incinerators and landfills which produce greenhouse gas emissions, can contaminate air and groundwater supplies, and tend to have disproportionate negative impacts on low-income communities. Waste reduction and diversion also save institutions costly landfill and hauling service fees. In addition, waste reduction campaigns can engage the entire campus community in contributing to a tangible sustainability goal.

Waste Minimization

Responsible Party

Heather Greenwood
Recycling Coordinator
Physical Plant

Criteria

Part 1
Institution has implemented source reduction strategies to reduce the total amount of waste generated (materials diverted + materials disposed) per weighted campus user compared to a baseline.

Part 2
Institution’s total annual waste generation (materials diverted and disposed) is less than the minimum performance threshold of 0.45 tons (0.41 tonnes) per weighted campus user.

This credit includes on-campus dining services operated by the institution or the institution’s primary on-site contractor.

Total waste generation includes all materials that the institution discards, intends to discard or is required to discard (e.g. materials recycled, composted, donated, re-sold and disposed of as trash) except construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP 24: Construction and Demolition Waste Diversion and OP 25: Hazardous Waste Management.

A brief description of any institutional procurement policies designed to prevent waste:

---

A brief description of any surplus department or formal office supplies exchange program that facilitates reuse of materials:
We have a ReUse Room in one of our academic support buildings. Open whenever the building is open, this room has shelves for office supplies and a front section that sees other household goods. You might find a good book, a lamp or picture frames in addition to the usual file folders, stackable bins, hanging folders, paper supplies and more.

In addition, we have a Surplus Program where furniture and larger goods are available for reuse on campus (1st) or available to the general public for sale, one weekend per month (2nd)

A brief description of the institution's efforts to make materials available online by default rather than printing them:

As many of our print materials as possible are now on line only, including all of the materials listed below.

A brief description of any limits on paper and ink consumption employed by the institution:

Printing is limited in the library, and the large printing lab requires multiple steps to get something printed. Limits have not yet been implemented in other computer labs.

A brief description of any programs employed by the institution to reduce residence hall move-in/move-out waste:

Multiple bins are placed in each residence hall to capture clothing, food, books, small appliances, art supplies and other still good materials. Rugs, refrigerators and other bulkier items are also collected.

The program is publicized through the Eco-reps, through posters and signage and through emails and postings to the student portal used by the campus.

A brief description of any other (non-food) waste minimization strategies employed by the institution:

---

A brief description of any food waste audits employed by the institution:

---

A brief description of any programs and/or practices to track and reduce pre-consumer food waste in the form of kitchen food waste, prep waste and spoilage:

---

A brief description of programs and/or practices to track and reduce post-consumer food waste:

Dining room personnel noticed three years ago that better than 305 of diners didn't use trays. Removing (most) of the trays was the next step and there has been little negative feedback. Trays were not completely eliminated at the request of handicapped and elderly patrons. There is a small number available near the dish room.
A brief description of the institution's provision of reusable and/or third party certified compostable to-go containers for to-go food and beverage items (in conjunction with a composting program):

---

A brief description of the institution's provision of reusable service ware for “dine in” meals and reusable and/or third party certified compostable service ware for to-go meals (in conjunction with a composting program):

---

A brief description of any discounts offered to customers who use reusable containers (e.g. mugs) instead of disposable or compostable containers in to-go food service operations:

Bring your own mug and get a 10% discount.

In addition, Sodexo, our food service provider, is re-energizing the reusable mug program this semester with new mugs, free coffee when you purchase one of their mugs and an improved punch card program.

A brief description of other dining services waste minimization programs and initiatives:

---

The website URL where information about the institution’s waste minimization initiatives is available:

http://www.keene.edu/rocks/facts.cfm
Waste Diversion

Responsible Party

Heather Greenwood
Recycling Coordinator
Physical Plant

Criteria

Institution diverts materials from the landfill or incinerator by recycling, composting, reusing, donating, or re-selling.

This credit includes on-campus dining services operated by the institution or the institution's primary on-site contractor.

This credit does not include construction, demolition, electronic, hazardous, special (e.g. coal ash), universal and non-regulated chemical waste, which are covered in OP 24: Construction and Demolition Waste Diversion and OP 25: Hazardous Waste Management.

Submission Note:

The diversion total reflects only the materials we sent out for reuse through IRN.

In addition to those materials, we have an active surplus sales program, which does not have an accurate method of determining weights diverted, as well as a program of reusing materials back on campus.

"---" indicates that no data was submitted for this field

Materials diverted from the solid waste landfill or incinerator:

22.73 Tons

Materials disposed in a solid waste landfill or incinerator:

703.70 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate, including efforts made during the previous three years:

Furniture from residential life is diverted through the Institutional Recycling Network (IRN), who donates the materials to countries who have experienced natural and financial disasters.

Other unwanted yet still useful items are sold through our surplus program. Those materials are not captured in our figures here, but include office furniture and file cabinets, computer monitors, general furniture and random finds.

A brief description of any food donation programs employed by the institution:
All produce and dairy that remains in the coolers at the end of a semester and have not reached their expiration dates are donated to The Community Kitchen, the local "soup kitchen."

**A brief description of any pre-consumer food waste composting program employed by the institution:**

Pre-consumer food waste is collected daily M-F by the ROCKS recycling program. It is mixed with leaves and other organic material from campus and used as a soil amendment on campus.

**A brief description of any post-consumer food waste composting program employed by the institution:**

---

**Does the institution include the following materials in its waste diversion efforts?:**

<table>
<thead>
<tr>
<th>Material</th>
<th>Yes or No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper, plastics, glass, metals, and other recyclable containers</td>
<td>---</td>

</table>

Other materials that the institution includes in its waste diversion efforts:

---
Construction and Demolition Waste Diversion

Responsible Party

Heather Greenwood
Recycling Coordinator
Physical Plant

Criteria

Institution diverts non-hazardous construction and demolition waste from the landfill and/or incinerator.

Soil and organic debris from excavating or clearing the site do not count for this credit.

"---" indicates that no data was submitted for this field

Construction and demolition materials recycled, donated, or otherwise recovered:
42.35 Tons

Construction and demolition materials landfilled or incinerated:
41.07 Tons

A brief description of programs, policies, infrastructure investments, outreach efforts, and/or other factors that contributed to the diversion rate for construction and demolition waste:

Some of the materials are sold through our surplus program, which does not currently capture weights. Many materials are re-purposed on campus.

Their is a local deconstruction company we have worked with but not in this last "control" year.

Carpeting is aggregated with carpets from other businesses by the company we use, so we don't currently have those weights either.
Criteria

Part 1

Institution has strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seeks to minimize the presence of these materials on campus.

Part 2

Institution has a program in place to recycle, reuse, and/or refurbish electronic waste generated by the institution and/or its students. Institution takes measures to ensure that the electronic waste is recycled responsibly, for example by using a recycler certified under the e-Stewards and/or R2 standards.

---

"---" indicates that no data was submitted for this field

Does the institution have strategies in place to safely dispose of all hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste and seek to minimize the presence of these materials on campus?:

Yes

A brief description of steps taken to reduce hazardous, special (e.g. coal ash), universal, and non-regulated chemical waste:

Combined efforts of the EHS Manager, Recycling Coordinator, Electricians, Science and Fine Arts faculty to identify such wastes, seek out and obtain alternatives and purchase smaller amounts of chemicals over a period of several years. In addition, the vendors were chosen with input from all of the USNH campuses and included a review of their Sustainability related practices.

A brief description of how the institution safely disposes of hazardous, universal, and non-regulated chemical waste:

Used hazardous wastes are stored in an approved building on campus and are collected periodically by Clean Harbors, Inc.

Universal Wastes are stored in a separate approved building on campus and are collected periodically by Viola Environmental Services.

A brief description of any significant hazardous material release incidents during the previous three years, including volume, impact and response/remediation:
A brief description of any inventory system employed by the institution to facilitate the reuse or redistribution of laboratory chemicals:

We have CEMS, a web based Chemical Emergency Management System that we use to manage our chemical inventories and is a source of safety information for KSC.

Does the institution have or participate in a program to responsibly recycle, reuse, and/or refurbish all electronic waste generated by the institution?:

Yes

Does the institution have or participate in a program to responsibly recycle, reuse, and/or refurbish electronic waste generated by students?:

Yes

A brief description of the electronic waste recycling program(s):

The Information Technology Group maintains an e-waste recycling program for all surplus workstations and printers resulting from upgrade cycles.

http://www.keene.edu/it/helpdesk/wkstnupgrades/wrkstnupgrades.cfm

Broken or still usable laptops and hard drive materials are palletized for pick up by LifeSpan Technology Recycling as are broken mice, keyboards and monitors.

Good monitors, keyboards and mice that have been replaced might also get sold through our surplus program.

Some random electronic equipment "appear" in hallways, at recycling stations and in our recycling area. Those materials are brought to the local municipal recycling facilities electronic recycling program.

A brief description of steps taken to ensure that e-waste is recycled responsibly, workers’ basic safety is protected, and environmental standards are met:

KSC contracts with a recycling firm, LifeSpan Technology Recycling, based in Newton, MA, with facilities in multiple locations in the United States. They are R2/RIOS Certified Electronics Recycler and are ISO 14001 - Environmental Management Standard - compliant. All of those certifications include standards for responsible recycling, worker EHS and environmental standards.

We are also working with a local remanufacturer of electronic equipment. We have toured their facility.

We also resell some of our monitors, mice and keyboards through our surplus program.

Our technology detritus (CD's, Videos, floppy discs, microfiche, etc. are recycled through Green Disk. Cell phones are recycled through the police department in a local violence prevention program.
The website URL where information about the institution’s hazardous and electronic-waste recycling programs is available:

http://www.keene.edu/ehs/manual.cfm
Water

This subcategory seeks to recognize institutions that are conserving water, making efforts to protect water quality and treating water as a resource rather than a waste product. Pumping, delivering, and treating water is a major driver of energy consumption, so institutions can help reduce energy use and the greenhouse gas emissions associated with energy generation by conserving water. Likewise, conservation, water recycling and reuse, and effective rainwater management practices are important in maintaining and protecting finite groundwater supplies. Water conservation and effective rainwater and wastewater management also reduce the need for effluent discharge into local surface water supplies, which helps improve the health of local water ecosystems.

Water Use

Responsible Party

Diana Duffy
Energy Coordinator
Physical Plant

Criteria

Part 1
Institution has reduced its potable water use per weighted campus user compared to a baseline.

Part 2
Institution has reduced its potable water use per gross square foot/metre of floor area compared to a baseline.

Part 3
Institution has reduced its total water use (potable + non-potable) per acre/hectare of vegetated grounds compared to a baseline.

"---" indicates that no data was submitted for this field

Level of water risk for the institution’s main campus:
---

Total water use::

**A brief description of when and why the water use baseline was adopted:**

---

**Water recycled/reused on campus, performance year:**

---
Recycled/reused water withdrawn from off-campus sources, performance year:
---

A brief description of any water recovery and reuse systems employed by the institution:

We use water from the (flood controlled) river that runs through campus for watering athletic fields.

A brief description of any water metering and management systems employed by the institution:

While some individual buildings have meters, they are city meters that are read quarterly. We do not currently have any meters that can show trending of water consumption.

A brief description of any building retrofit practices employed by the institution, e.g. to install high efficiency plumbing fixtures and fittings:
---

A brief description of any policies or programs employed by the institution to replace appliances, equipment and systems with water-efficient alternatives:
---

A brief description of any water-efficient landscape design practices employed by the institution (e.g. xeriscaping):

The campus grounds department strives to use plantings that are indigenous to the region and require low maintenance. The campus does not use irrigation except on athletic fields and in times of severe plant stress.

A brief description of any weather-informed irrigation technologies employed by the institution:

The Grounds crew uses a professional weather forecasting tool to inform many aspects of their work, including irrigation schedules.

A brief description of other water conservation and efficiency strategies employed by the institution:
---

The website URL where information about the institution’s water conservation and efficiency initiatives is available:
---
Criteria

Part 1

Institution uses Low Impact Development (LID) practices as a matter of policy or standard practice to reduce rainwater/stormwater runoff volume and improve outgoing water quality for new construction, major renovation, and other projects that increase paved surface area on campus or otherwise significantly change the campus grounds.

The policy, plan, and/or strategies cover the entire campus. While the specific strategies or practices adopted may vary depending on project type and location, this credit is reserved for institutions that mitigate rainwater runoff impacts consistently during new construction. Implementing a strategy or strategies for only one new development project is not sufficient for Part 1 of this credit.

Part 2

Institution has adopted a rainwater/stormwater management policy, plan, and/or strategies that mitigate the rainwater runoff impacts of ongoing campus operations and treat rainwater as a resource rather than as a waste product.

The policy, plan, and/or strategies address both the quantity and quality (or contamination level) of rainwater runoff through the use of green infrastructure. Though specific practices adopted may vary across the campus, the policy, plan, and/or strategies cover the entire institution. Implementing strategies for only one building or area of campus is not sufficient for Part 2 of this credit.

Policies adopted by entities of which the institution is part (e.g. state government or the university system) may count for both parts of this credit as long as the policies apply to and are followed by the institution.

Does the institution use Low Impact Development (LID) practices as a matter of policy or standard practice to reduce rainwater/stormwater runoff volume and improve outgoing water quality for new construction, major renovation, and other projects?:

Yes

A brief description of the institution’s Low Impact Development (LID) practices:

We installed permeable parking lots next to our newest building to manage stormwater runoff. It has been very successful.

Has the institution adopted a rainwater/stormwater management policy, plan, or strategies that mitigate the
Rainwater runoff impacts of ongoing campus operations through the use of green infrastructure? : No

**A brief description of the institution’s rainwater/stormwater management policy, plan, and/or strategies for ongoing campus operations:**

---

**A brief description of any rainwater harvesting employed by the institution:**

---

**Rainwater harvested directly and stored/used by the institution, performance year:**

---

**A brief description of any rainwater filtering systems employed by the institution to treat water prior to release:**

---

**A brief description of any living or vegetated roofs on campus:**

---

**A brief description of any porous (i.e. permeable) paving employed by the institution:**

KSC incorporated porous paving around the new Alumni Center in 2010.

**A brief description of any downspout disconnection employed by the institution:**

---

**A brief description of any rain gardens on campus:**

---

**A brief description of any stormwater retention and/or detention ponds employed by the institution:**

Retention pond is used at the Winchester Parking lot

**A brief description of any bioswales on campus (vegetated, compost or stone):**

at our Owl Stadium athletic fields
A brief description of any other rainwater management technologies or strategies employed by the institution:

---

The website URL where information about the institution’s rainwater management initiatives, plan or policy is available:

http://sites.keene.edu/cn/2010/02/04/successful-engineering/
Wastewater Management

Criteria

Institution’s wastewater is handled naturally on campus or in the local community. Natural wastewater systems include, but are not limited to, constructed treatment wetlands and Living Machines. To count, wastewater must be treated to secondary or tertiary standards prior to release to water bodies.

This credit recognizes natural handling of the water discharged by the institution. On-site recycling/reuse of greywater and/or blackwater is recognized in OP 26: Water Use.

This credit was marked as Not Pursuing so Reporting Fields will not be displayed.
Planning & Administration

Coordination, Planning & Governance

This subcategory seeks to recognize colleges and universities that are institutionalizing sustainability by dedicating resources to sustainability coordination, developing plans to move toward sustainability, and engaging students, staff and faculty in governance. Staff and other resources help an institution organize, implement, and publicize sustainability initiatives. These resources provide the infrastructure that fosters sustainability within an institution. Sustainability planning affords an institution the opportunity to clarify its vision of a sustainable future, establish priorities and help guide budgeting and decision making. Strategic planning and internal stakeholder engagement in governance are important steps in making sustainability a campus priority and may help advocates implement changes to achieve sustainability goals.

Sustainability Coordination

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution has at least one sustainability committee, office, and/or officer tasked by the administration or board of trustees to advise on and implement policies and programs related to sustainability on campus. The committee, office, and/or officer focus on sustainability broadly (i.e. not just one sustainability issue, such as climate change) and cover the entire institution.

An institution that has multiple committees, offices and/or staff with responsibility for subsets of the institution (e.g. schools or departments) may earn points for this credit if it has a mechanism for broad sustainability coordination for the entire campus (e.g. a coordinating committee or the equivalent). A committee, office, and/or officer that focuses on just one department or school within the institution does not count for this credit in the absence of institution-wide coordination.

"---" indicates that no data was submitted for this field

Does the institution have at least one sustainability committee, office, and/or officer that focuses on sustainability broadly and covers the entire institution?:

---

A brief description of the activities and substantive accomplishments of the committee(s), office(s), and/or officer(s) during the previous three years:

---

Does the institution have at least one sustainability committee?:

Yes

The charter or mission statement of the committee(s) or a brief description of each committee's purview and activities:

The mission of The President's Council for a Sustainable Future at Keene State College is to affirm the beliefs that college faculty, staff, administration and students have a responsibility to take a leadership role in conducting activities as responsible stewards of the environment.

Through role-modeling as a college-wide proactive learning community and by serving as an interdisciplinary resource group, the Council will strive to support educational and institutional activities that promote environmental awareness and stewardship though local action and global thinking.
Members of each committee, including affiliations and role (e.g. staff, student, or faculty):

Members

Mary Jensen, Campus Sustainability Officer, Chair
Sharon Fantl, Redfern Arts Center
Ken Goebel, Advancement Office
Brian Green, Sociology Faculty
John Sturtz, Sociology Faculty
Bart Sapeta, Architecture Faculty
Karen Balnis, Dietetic Internship Program Coordinator
Becca Hickam, CELT Coordinator for Experiential Learning
Kathleen Johnson, Management Faculty
Robert Shalit, Chemistry Faculty
Lucy Webb, PAT Staff Rep.
Dee Denehy, Operating Staff Rep.
Dianne Arsenault, Student, Environmental Studies
Chris Riley, Student, Architecture

Ex-officio members:
James B. Draper, III, Purchasing
Tim Allen, Environmental Studies Faculty
Jay Kahn, Vice-President for Finance and Planning
Gordon Leversee, Dean of Sciences and Social Sciences
Frank Mazzola, Physical Plant Director
Joseph Quirinale, Sodexo Dining Services Manager
Allen Morrison, Information Technology

The website URL where information about the sustainability committee(s) is available:
http://www.keene.edu/sustain/

Does the institution have at least one sustainability office that includes more than 1 full-time equivalent (FTE) employee?:
Yes

A brief description of each sustainability office:

The Office of Sustainability Programs is responsible for identifying and championing sustainable efforts on campus, for supporting members of the campus community as they initiate and develop sustainable practices/teaching on campus. The OSP is responsible for publicizing the sustainable efforts on campus and for keeping a focus on sustainable practices. The OSP is also responsible for the Eco-reps peer to peer education program and for supporting and developing student focused education and activities promoting sustainability.

Full-time equivalent (FTE) of people employed in the sustainability office(s):

2
The website URL where information about the sustainability office(s) is available:
http://www.keene.edu/sustain/

Does the institution have at least one sustainability officer?:
Yes

Name and title of each sustainability officer:
Mary Jensen

A brief description of each sustainability officer position:
The CSO is responsible for the development and implementation of sustainability initiatives including the development of a carbon inventory and plan for becoming carbon neutral; the promotion of sustainability across Keene State College; the establishment of relationships with relevant bodies external to the College; and provide high level policy and technical advice to senior management.

The website URL where information about the sustainability officer(s) is available:

Sustainability Planning

Responsible Party

Mary Jensen
Campus Sustainability Officer
Finance and Planning

Criteria

Institution has current and formal plans to advance sustainability. The plan(s) cover one or more of the following areas:

- Curriculum
- Research (or other scholarship appropriate for the institution)
- Campus Engagement
- Public Engagement
- Air & Climate
- Buildings
- Dining Services/Food
- Energy
- Grounds
- Purchasing
- Transportation
- Waste
- Water
- Diversity & Affordability
- Health, Wellbeing & Work
- Investment
- Other

The plan(s) may include measurable objectives with corresponding strategies and timeframes to achieve the objectives.

The criteria may be met by any combination of formally adopted plans, for example:

- Strategic plan or equivalent guiding document
- Campus master plan or physical campus plan
- Sustainability plan
- Climate action plan
- Human resources strategic plan
- Diversity plan

For institutions that are a part of a larger system, plans developed at the system level are eligible for this credit.
Does the institution have current and formal plans to advance sustainability in the following areas? Do the plans include measurable objectives?:

<table>
<thead>

Governance

Criteria

Part 1

Institution’s students participate in governance in one or more of the following ways:

A. All enrolled students, regardless of type or status, have an avenue to participate in one or more governance bodies (through direct participation or the election of representatives)

B. There is at least one student representative on the institution’s governing body. To count, student representatives must be elected by their peers or appointed by a representative student body or organization.

And/or

C. Students have a formal role in decision-making in regard to one or more of the following:

* Establishing organizational mission, vision, and/or goals
* Establishing new policies, programs, or initiatives
* Strategic and long-term planning
* Existing or prospective physical resources
* Budgeting, staffing and financial planning
* Communications processes and transparency practices
* Prioritization of programs and projects

Part 2

Institution’s staff participate in governance in one or more of the following ways:

A. All staff members, regardless of type or status, have an avenue to participate in one or more governance bodies (through direct participation or the election of representatives)

B. There is at least one non-supervisory staff representative on the institution’s governing body. To count, staff representatives must be elected by their peers or appointed by a representative staff body or organization.

And/or

C. Non-supervisory staff have a formal role in decision-making in regard to one or more of the areas outlined in Part 1.

Part 3

Institution’s faculty participate in governance in one or more of the following ways:

A. All faculty members, regardless of type or status, have an avenue to participate in one or more governance bodies (through direct participation or the election of representatives)

B. There is at least one teaching or research faculty representative on the institution’s governing body. To count, faculty representatives must be elected by their peers or appointed by a representative faculty body or organization.
And/or

C. Faculty have a formal role in decision-making in regard to one or more of the areas outlined in Part 1.

Participatory or shared governance bodies, structures and/or mechanisms may be managed by the institution (e.g. committees, councils, senates), by stakeholder groups (e.g. student, faculty and staff committees/organizations), or jointly (e.g. union/management structures).

Structures or mechanisms adopted by entities of which the institution is part (e.g. government or university system) may count for this credit as long as they apply and are adhered to by the institution.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Diversity & Affordability

This subcategory seeks to recognize institutions that are working to advance diversity and affordability on campus. In order to build a sustainable society, diverse groups will need to be able to come together and work collaboratively to address sustainability challenges. Members of racial and ethnic minority groups and immigrant, indigenous and low-income communities tend to suffer disproportionate exposure to environmental problems. This environmental injustice happens as a result of unequal and segregated or isolated communities. To achieve environmental and social justice, society must work to address discrimination and promote equality. The historical legacy and persistence of discrimination based on racial, gender, religious, and other differences makes a proactive approach to promoting a culture of inclusiveness an important component of creating an equitable society. Higher education opens doors to opportunities that can help create a more equitable world, and those doors must be open through affordable programs accessible to all regardless of race, gender, religion, socio-economic status and other differences. In addition, a diverse student body, faculty, and staff provide rich resources for learning and collaboration.

Diversity and Multiculturalism

Criteria

Part 1

Institution has a diversity and equity committee, office and/or officer tasked by the administration or governing body to advise on and implement policies, programs, and trainings related to diversity and equity on campus. The committee, office and/or officer focuses on student and/or employee diversity and equity.

Part 2

Institution makes cultural competence trainings and activities available to all members of one or more of the following groups:

- Students
- Staff
- Faculty
- Administrators

"---" indicates that no data was submitted for this field

Does the institution have a diversity and equity committee, office, and/or officer tasked by the administration or governing body to advise on and implement policies, programs, and trainings related to diversity and equity on campus?:

Yes

Does the committee, office and/or officer focus on one or both of the following?:

### Assessing Diversity and Equity

**Responsible Party**

**Cathryn Turrentine**  
Director of Institutional Research  
Finance and Planning

---

**Criteria**

Institution assesses diversity and equity on campus and uses the results to guide policy, programs, and initiatives. The assessment(s) address one or more of the following areas:

1. **Campus climate**, e.g. through a survey or series of surveys to gather information about the attitudes, perceptions and experiences of campus stakeholders and underrepresented groups

2. **Student diversity and educational equity**, e.g. through analysis of institutional data on diversity and equity by program and level, comparisons between graduation and retention rates for diverse groups, and comparisons of student diversity to the diversity of the communities being served by the institution

3. **Employee diversity and employment equity**, e.g. through analysis of institutional data on diversity and equity by job level and classification, and comparisons between broad workforce diversity, faculty diversity, management diversity and the diversity of the communities being served by the institution

4. **Governance and public engagement**, e.g. by assessing access to and participation in governance on the part of underrepresented groups and women, the centrality of diversity and equity in planning and mission statements, and diversity and equity in public engagement efforts

---

**Submission Note:**

Currently in progress

Support for Underrepresented Groups

Responsible Party

Dottie Moris
Chief Officer for Diversity and Multiculturalism
Diversity and Multiculturalism

Criteria

Part 1

Institution has mentoring, counseling, peer support, academic support, or other programs in place to support underrepresented groups on campus.

This credit excludes programs to help build a diverse faculty throughout higher education, which are covered in PA 7: Support for Future Faculty Diversity.

Part 2

Institution has a discrimination response policy, program and/or team (or the equivalent) to respond to and support those who have experienced or witnessed a bias incident, act of discrimination or hate crime.

Does the institution have mentoring, counseling, peer support, academic support, or other programs to support underrepresented groups on campus?:

Yes

A brief description of the programs sponsored by the institution to support underrepresented groups:

The student managed Common Ground Multicultural club, with an active office, activities and events.

Multi-cultural Student Affairs Office, with a Coordinator of Multi-cultural Student Affairs.

Aspire - one of our two TRIO programs - Eligibility Criteria

If neither of your parents or guardians graduated from a four-year college, you qualify for Aspire services as a first generation student.
If you are getting financial aid, you might meet federal low-income criteria. If you are a low-income student, you will be eligible for Aspire services
If you have a documented learning or physical disability, you are eligible for Aspire services. If you have a documented disability, we can support your learning and college experience.

Support for Future Faculty Diversity

Responsible Party

Kim Harkness
Director of Human Resources
Human Resources

Criteria

Institution administers and/or participates in a program or programs to help build a diverse faculty throughout higher education.

Such programs could take any of the following forms:

- Teaching fellowships or other programs to support terminal degree students from underrepresented groups in gaining teaching experience. (The terminal degree students may be enrolled at another institution.)
- Mentoring, financial, and/or other support programs to prepare and encourage undergraduate or other non-terminal degree students from underrepresented groups to pursue further education and careers as faculty members.
- Mentoring, financial, and/or other support programs for doctoral and post-doctoral students from underrepresented groups.

Submission Note:

There is some mentoring going on to encourage our students to pursue additional higher education, including teaching, but there is nothing formal or organized.

"---" indicates that no data was submitted for this field

Does the institution administer and/or participate in a program or programs to help build a diverse faculty that meet the criteria for this credit?:

No

A brief description of the institution’s programs that help increase the diversity of higher education faculty:

Affordability and Access

Responsible Party

Jay Kahn
Vice President Finance and Planning
Finance and Planning

Criteria

Part 1

Institution has policies and programs in place to make it accessible and affordable to low-income students and/or to support non-traditional students. Such policies and programs may include, but are not limited to, the following:

- Policies and programs to minimize the cost of attendance for low-income students
- Programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds
- Programs to prepare students from low-income backgrounds for higher education (e.g. U.S. federal TRIO programs)
- Scholarships provided specifically for low-income students
- Programs to guide parents of low-income students through the higher education experience
- Targeted outreach to recruit students from low-income backgrounds
- Scholarships provided specifically for part-time students
- An on-site child care facility, a partnership with a local facility, and/or subsidies or financial support to help meet the child care needs of students

Part 2

Institution is accessible and affordable to low-income students as demonstrated by one or more of the following indicators:

A. The percentage of entering students that are low-income
B. The graduation/success rate for low-income students
C. The percentage of student financial need met, on average
D. The percentage of students graduating with no interest-bearing student loan debt

Submission Note:

http://admissions.keene.edu/find-the-right-fit/person-to-person

http://www.keene.edu/sfs/default.cfm
Does the institution have policies and programs in place to make it accessible and affordable to low-income students?:
Yes

A brief description of any policies and programs to minimize the cost of attendance for low-income students:

Part of our mission is:
As a public institution, we provide educational opportunities for all qualified students and continue our heritage of service to New Hampshire and the New England region.

We have an excellent web site with information about the costs of attending KSC, as well as links to loans, grants and other funding streams. Personnel in Student Financial Services and Admissions are excellent resources for all of our students, with up to date information.

Admission fees can be waived for students with financial needs and over 60% of scholarships/grants go to students who have been identified as in financial need.

On average, 70% of the financial aid needs of students who were awarded any need-based aid were met.

A brief description of any programs to equip the institution’s faculty and staff to better serve students from low-income backgrounds:

Aspire works to raise awareness of class issues on campus, especially ones that impact students, and we also work to foster a climate of institutional support for this population.

A brief description of any programs to prepare students from low-income backgrounds for higher education:

The Aspire Program offers:
Aspire encourages students to take full advantage of the services available at Keene State. They also assist students in examining their strengths and limitations in order to create a realistic schedule of classes.

LINK program:

The Link program is a six-week summer program designed for first-time college students. The purpose of Link is to expose students to the academic and social expectations of college in a supportive learning community. The program takes place in classrooms, a residence hall, around campus and in the local Keene community.

Co-curricular and classroom components are integrated in an attempt to make learning relevant and meaningful. Link components are designed to improve and develop skills such as college reading, writing, critical thinking, and communication.

At the close of the six weeks, student are better able to handle the varied demands of college and be active, contributing members of the Keene State College community. Plus, students pursuing high credit majors have already completed two required courses prior to the fall semester!

A brief description of the institution's scholarships for low-income students:

Many of the available endowed scholarships, grants and scholarships, including our Leadership Award Scholarship, have a need based component.

Two thirds of our institutional grants go towards students who've been identified as in need of financial support. That includes endowed scholarships, annual gifts and tuition funded grants awarded by the college, excluding athletic aid and tuition waivers.

In addition we have ready information about Title IV programs.

Information is readily available on the

keene.edu

website.

A brief description of any programs to guide parents of low-income students through the higher education experience:

There are a variety of resources for all parents of students at Keene State College. The voluntary system of accountability is available at

http://www.keene.edu/policy/disclosure.cfm
Orientation information for parents and guardians at

http://www.keene.edu/orientation/parents.cfm

The KSC Street Sense program designed to help students and families understand the finances of a college education, with required participation of all incoming students.
Parents of prospective students FAQ page

http://admissions.keene.edu/parents/questions

A brief description of any targeted outreach to recruit students from low-income backgrounds:

Keene State College admissions is considered need blind - which means that family income is not considered when determining eligibility for admissions. Admissions counselors do familiarize themselves with income levels and college experiences of the areas in which they work.

In regions where the average income level would be considered low and the first generation rate high, Admissions counselors connect with agencies such as the NHHEAF, Upward Bound and Talent Search to develop strategies to work with students through the admissions and financial aid processes.
In addition, we have the Upward Bound and LINK programs

A brief description of other admissions policies or programs to make the institution accessible and affordable to low-income students:

Group tours on the campus, classroom visits, virtual tours, department open houses, admitted student days, detailed web site.
KSC also used the ALEAP (adult learner entrance assistance program) for adults who want to start or complete a degree.

http://admissions.keene.edu/find-the-right-fit/person-to-person

A brief description of other financial aid policies or programs to make the institution accessible and affordable to low-income students:

Keene State has a dedicated and knowledgeable financial aid department and an excellent web site, full of useful information and links. It is an intuitive and helpful website.
A brief description of other policies and programs to make the institution accessible and affordable to low-income students not covered above:

Our Elliot Center groups together helpful student services including:
- Academic and Career Advising
- ASPIRE
- Admissions
- Center for Health and Wellness
- Continuing Education
- Counseling Center
- Dean of Students
- Office of Disability Services
- Global Education Office
- Registrar's Office
- Student Development Office
- Student Financial Services
- Associate Vice President for Student Affairs
- Assistant Vice President for Academic Services

Does the institution have policies and programs in place to support non-traditional students?:

Health, Wellbeing & Work

This subcategory seeks to recognize institutions that have incorporated sustainability into their human resources programs and policies. An institution’s people define its character and capacity to perform; and so, an institution’s achievements can only be as strong as its community. An institution can bolster the strength of its community by making fair and responsible investments in its human capital. Such investments include offering benefits, wages, and other assistance that serve to respectfully and ethically compensate workers and acting to protect and positively affect the health, safety and wellbeing of the campus community. Investment in human resources is integral to the achievement of a healthy and sustainable balance between human capital, natural capital, and financial capital.

Employee Compensation

Responsible Party

Kim Harkness
Director of Human Resources
Human Resources

Criteria

Part 1

Institution’s employees and/or the employees of its on-site contractors are covered by sustainable compensation standards, guidelines, or policies and/or collective bargaining agreements.

A sustainable compensation (or “living wage”) standard, guideline or policy is one that addresses wages and benefits in terms of the ability of employees to meet basic needs. For example, a sustainable compensation policy may index hourly wages to a poverty guideline or to local cost-of-living indicators. A labor market survey, salary survey or similar assessment may be used in conjunction with a basic needs/cost-of-living approach, but is not sufficient on its own to count as a sustainable compensation policy.

Part 2

Institution’s employees and/or the employees of its on-site contractors receive sustainable compensation.

To earn points for Part 2 of this credit, an institution must assess employee compensation against one or more of the following:

1. A sustainable compensation standard developed or adopted by a committee with multi-stakeholder representation (i.e. its membership includes faculty, staff, and students and may include Human Resources administrators or other parties). The standard need not be formally adopted by the institution.

2. A sustainable compensation standard that is in use in the institution’s locality. The standard may be formal (e.g. a “living wage” ordinance covering public employees) or informal (e.g. a standard adopted by a local, regional or national campaign).

3. An appropriate poverty guideline, threshold or low-income cut-off for a family of four.

For institutions that elect to assess compensation against a poverty guideline, threshold or low-income cut-off, sustainable compensation is defined as wages equivalent to 120 percent of the poverty guideline for a family of four. An institution may offset up to 20 percent of the wage criteria with employer-paid benefits that address basic needs (e.g. healthcare and retirement contributions).

Both parts of this credit are based on the total number of employees working on campus as part of regular and ongoing campus operations, which includes:

- Staff and faculty, i.e. all regular full-time, regular part-time and temporary (or non-regular) employees, including adjunct faculty and graduate student employees (e.g. teaching and research assistants). Institutions may choose to include or omit undergraduate student workers.

- Employees of contractors that work on-site as part of regular and ongoing campus operations. Such contractors may include, but are not limited to, providers of dining/catering, cleaning/Janitorial, maintenance, groundskeeping, transportation, and retail services.

Construction and demolition crews and other temporary contracted employees may be excluded.
Submission Note:

2009 for full equity, annually for market equity.

"---" indicates that no data was submitted for this field

## Assessing Employee Satisfaction

### Responsible Party

**Kim Harkness**  
Director of Human Resources  
Human Resources

### Criteria

Institution conducts a survey or other evaluation that allows for anonymous feedback to measure employee satisfaction and engagement. The survey or equivalent may be conducted institution-wide or may be done by individual departments or divisions. The evaluation addresses (but is not limited to) the following areas:

- Job satisfaction
- Learning and advancement opportunities
- Work culture and work/life balance

The institution has a mechanism in place to address issues raised by the evaluation.

### Submission Note:

We are embarking on the Chronicle for Higher Education Best Places to Work survey in 2012.

We have done recent surveys regarding employee benefits, including the System wide Total Rewards survey in 2011 and a Campus Climate Survey done every 5 years.

"---" indicates that no data was submitted for this field

### Has the institution conducted an employee satisfaction and engagement survey or other evaluation that meets the criteria for this credit?:

No

### The percentage of employees (staff and faculty) assessed, directly or by representative sample:

A brief description of the institution’s wellness and/or employee assistance program(s):

Our employee assistance program offers:
Professional Support Services
Child and Adult Care Services
Financial and Legal Services
We also feature:
President's Commission for the Promotion of Wellness

Mission:
The President's Commission for the Promotion of Wellness advocates and promotes wellness on a holistic level. The Commission supports each individual in the KSC community in making healthy choices for mind, body and spirit. The Commission is responsible for providing opportunities and strategies that promote the well-being of faculty, staff and students by coordinating programs and initiatives with the Wellness Program of USNH and by the development, planning, execution and evaluation of local health initiatives.

Goals:
Provide leadership, resources and support to the KSC community regarding individual, family, and worksite health and quality of life.
Provide innovative health promotion programming to faculty, staff, and students of KSC.
Facilitate collaboration between health and wellness offices and programs at KSC, Wellness Promotion, Activity and Commitment (WELLPAC), and the greater Keene community.
Conduct periodic assessments of the health needs and strengths of the KSC community.

The website URL where information about the institution's wellness program(s) is available:
http://www.keene.edu/hr/links.cfm
Workplace Health and Safety

Criteria

Part 1

Institution has reduced its total number of reportable workplace injuries and occupational disease cases per full-time equivalent (FTE) employee compared to a baseline.

Part 2

Institution has fewer than 5 reportable workplace injuries and occupational disease cases annually per 100 full-time equivalent (FTE) employees.

This credit includes employees of contractors working on-site for whom the institution is liable for workplace safety, for example workers for whom the institution is mandated to report injuries and disease cases by a health and safety authority such as the U.S. Occupational Health and Safety Administration (OSHA) or the Canadian Center for Occupational Health and Safety (CCOHS). Injuries and disease cases include OSHA/CCOHS-reportable fatal and non-fatal injuries (or the equivalent) arising out of or in the course of work and cases of diseases arising from a work-related injury or the work situation or activity (e.g. exposure to harmful chemicals, stress, ergonomic issues). See Sampling and Data Standards, below, for further guidance on reporting injuries and disease cases.

This credit was marked as **Not Pursuing** so Reporting Fields will not be displayed.
Investment

This subcategory seeks to recognize institutions that make investment decisions that promote sustainability. Most institutions invest some of their assets in order to generate income. Together, colleges and universities invest hundreds of billions of dollars. Schools with transparent and democratic investment processes promote accountability and engagement by the campus and community. Furthermore, institutions can support sustainability by investing in companies and funds that, in addition to providing a strong rate of return, are committed to social and environmental responsibility. Investing in these industries also supports the development of sustainable products and services. Finally, campuses can engage with the businesses in which they are invested in order to promote sustainable practices.

Throughout this subcategory, the term “sustainable investment” is inclusive of socially responsible, environmentally responsible, ethical, impact, and mission-related investment.

Credit

| Committee on Investor Responsibility |
| Sustainable Investment |
| Investment Disclosure |
Committee on Investor Responsibility

Criteria

Institution has a formally established and active committee on investor responsibility (CIR) or similar body that makes recommendations to fund decision-makers on socially and environmentally responsible investment opportunities across asset classes, including proxy voting. The body has multi-stakeholder representation, which means its membership includes faculty, staff, and students and may include alumni, trustees, and/or other parties.

Institutions for which investments are handled by the university system and/or a separate foundation of the institution should report on the investment policies and activities of those entities.

A general committee that oversees the institution’s investments does not count for this credit unless social and environmental responsibility is an explicit part of its mission and/or agenda.

This credit applies to institutions with endowments of US $1 million or larger. Institutions with endowments totaling less than US $1 million may choose to omit this credit.

"---" indicates that no data was submitted for this field

Does the institution have a formally established and active committee on investor responsibility (CIR) or similar body that has multi-stakeholder representation and otherwise meets the criteria for this credit?:

---

The charter or mission statement of the CIR or other body which reflects social and environmental concerns or a brief description of how the CIR is tasked to address social and environmental concerns:

---

Members of the CIR, including affiliations and role (e.g. student, faculty, alumni):

---

Examples of CIR actions during the previous three years:

---

The website URL where information about the CIR is available:

---
Sustainable Investment

Criteria

There are two possible approaches to this credit; institutions may pursue one or both. Institutions for which investments are handled by the university system, a separate foundation of the institution and/or a management company contracted by the institution should report on the combined activities of those entities.

Option 1: Positive Sustainability Investment

Institution invests in one or more of the following:

- **Sustainable industries** (e.g. renewable energy or sustainable forestry). This may include any investment directly in an entire industry sector as well as holdings of companies whose entire business is sustainable (e.g. a manufacturer of wind turbines).
- **Businesses selected for exemplary sustainability performance** (e.g. using criteria specified in a sustainable investment policy). This includes investments made, at least in part, because of a company's social or environmental performance. Existing stock in a company that happens to have socially or environmentally responsible practices should not be included unless the investment decision was based, at least in part, on the company's sustainability performance.
- **Sustainability investment funds** (e.g. a renewable energy or impact investment fund). This may include any fund with a mission of investing in a sustainable sector or industry (or multiple sectors), as well as any fund that is focused on purchasing bonds with sustainable goals.
- **Community development financial institutions** (CDFI) or the equivalent (including funds that invest primarily in CDFIs or the equivalent).
- **Socially responsible mutual funds with positive screens** (or the equivalent). Investment in a socially responsible fund with only negative screens (i.e. one that excludes egregious offenders or certain industries, such as tobacco or weapons manufacturing) does not count for Option 1.
- **Green revolving loan funds** that are funded from the endowment

Option 2: Investor Engagement

Institution has policies and/or practices that meet one or more of the following criteria:

- Has a publicly available sustainable investment policy (e.g. to consider the social and/or environmental impacts of investment decisions in addition to financial considerations)
- Uses its sustainable investment policy to select and guide investment managers
- Has engaged in proxy voting to promote sustainability, either by its CIR or other committee or through the use of guidelines, during the previous three years
- Has filed or co-filed one or more shareholder resolutions that address sustainability or submitted one or more letters about social or environmental responsibility to a company in which it holds investments, during the previous three years
- Has a publicly available investment policy with negative screens, for example to prohibit investment in an industry (e.g. tobacco or weapons manufacturing) or participate in a divestment effort (e.g. targeting fossil fuel production or human rights violations)
- Engages in policy advocacy by participating in investor networks (e.g. Principles for Responsible Investment, Investor Network on Climate Risk, Interfaith Center on Corporate Responsibility) and/or engages in inter-organizational collaborations to share best practices

Criteria

Institution makes a snapshot of its investment holdings available to the public, including the amount invested in each fund and/or company and proxy voting records. The snapshot of holdings is updated at least once per year.

Institutions for which investments are handled by the university system, a separate foundation of the institution and/or a management company contracted by the institution should report on the combined activities of those entities.

"---" indicates that no data was submitted for this field

Does the institution make a snapshot of its investment holdings available to the public?:
Yes

The percentage of the total investment pool included in the snapshot of investment holdings:
---

A copy of the investment holdings snapshot:

Innovation 1

Criteria

1. Innovation credits are reserved for new, extraordinary, unique, ground-breaking, or uncommon outcomes, policies, and practices that greatly exceed the highest criterion of an existing STARS credit or are not covered by an existing STARS credit.

2. In general, innovation credits should have roughly similar impacts or be on the same scale as other STARS credits.

3. Outcomes, policies, and practices that are innovative for the institution’s region or institution type are eligible for innovation credits.

4. The innovative practice, policy, program, or outcome must have occurred within the three years prior to the anticipated date of submission.

5. The innovative practice or program has to be something that the institution has already done; planned activities do not count.

6. The innovative practice or program should originate from an area within the defined institutional boundary.

7. An institution can only claim a particular activity as an innovation credit once. When re-submitting for a STARS rating, an innovation credit that the institution submitted previously cannot be re-submitted. An institution that has made significant advancements to a project or program that was previously submitted as an innovation may resubmit based on those advancements if the project or program is still considered innovative.

8. Practices, policies, and programs that were once considered innovative but are now widely adopted (e.g. being the first institution to enact a policy 20 years ago that is now common) may not be claimed as innovation credits.

9. Multiple activities or practices whose sum is innovative can be considered for an innovation credit as long as those activities or practices are related. For example, three innovative waste reduction programs in research laboratories could be listed together under a single innovation credit for Greening Laboratories. Listing a series of unrelated accomplishments or events under a single innovation credit is not accepted.

10. While the practices that led to receiving an award may be appropriate for an innovation credit, winning awards and/or high sustainability rankings in other assessments is not, in and of itself, grounds for an innovation credit. When the innovation is part of a partnership, the summary provided must clearly describe the institution’s role in the innovation.

To help ensure that the policy, practice, program, or outcome that the institution is claiming for an innovation credit is truly innovative, institutions must submit a letter of affirmation from an individual with relevant expertise in the associated content area. The letter should affirm how the innovation meets the criteria outlined above.

For example, if an institution claims an innovation credit for water use reduction, the institution might solicit a letter from a hydrologist or a water expert from another campus or organization to verify that the strategy is innovative. An innovation may be affirmed internally by campus personnel who are independent of the policy, practice, program, or outcome. Please note that it is not required that the individual be employed in the higher education sector to submit a letter of verification.

The letter should be specific to a single innovation credit. If an institution is claiming three innovation credits, it would solicit and submit three separate letters, with each letter speaking to the specific innovation credit it addresses.
