

# HER HEALTH IS UP IN THE AIR

7 in 10 Black Americans live in areas with unsafe air, and Black children are 3 times more likely to be admitted to the hospital for asthma than other children. **It's time for a change.**

The Obama Administration must act now to finalize the strongest possible protections to curb dangerous smog pollution that threatens our kids' health.

Speak up for cleaner air now by visiting [sc.org/smog](http://sc.org/smog).
